The regular monthly meeting of this society was held in Glencove, Nov. 12th. The treasurer, E. J. Brown, read a very satisfactory report in connection with the exhibition held Oct. 28 and 29. Vice-President J. Elmslie presented President Everett, with two silver cups won at the fall show. One, presented by Mrs. Smithers, has to be won three times. The other, presented by Mrs. H. L. Pratt, was won outright. President Everett, before resuming the chair, showed his appreciation in a neat little speech. Recording secretary Gant was presented with the Troy cup. This cup has to be won three times before competition for it closes.

As usual there was a miniature show at this meeting. In the points com-

AMERICAN ROSE SOCIETY.

At a meeting of the Executive Committee held in New York city in the American Museum of Natural History, the preparations for the next spring's exhibition was the topic for consideration and the date according to the book calls for the fourth Wednesday in Lent, which comes this year so early that various parties who were interested in exhibiting raised the question, "Why do you have it so early, we cannot be sure of a crop," so upon deliberation the date was fixed for the Wednesday, 16, Thursday, 17, and Friday, 18, of March, 1910.

This exhibition is to be held under the auspices of the New York Horticultural Society. This Society is one of the best supported in the East, and we look forward to having many of the large private estates take an interest in the show. The place of exhibition being a public hall of the very highest class, the admission is free and a large attendance is properly expected of all classes of city people.

The matter of securing a list of handsome prizes is being looked after and the society asks the support of every one interested, not only in roses, but floriculture in general. The second edition of the schedule is issued and has been mailed to the members of the society and others as far as it

was practicable to do. The Bulletin for 1909 will be mailed during Christmas week.

CHAS. W. JOHNSON, Secretary.

The following officers were elected at the fortieth annual meeting of the Southwestern Iowa Horticultural Society: President, S. W. Snyder, Centertown; vice-president, C. E. Deuel, Washington; secretary, Wesley Green, Davenport; treasurer, F. O. Harrington, Williamsburg.

TO UNITE THE RETAIL FLORIST TRADE.

A paper read at a special meeting held in Chicago, Nov. 8, by J. A. Valentine, President S. A. F.

We are here in response to a call issued by me as president of the S. A. F. to see whether some plan can be devised whereby that society can render such definite and valuable service to the retailer as will make its membership necessary and attractive to him.

Prior to the last annual convention of the society, I was impressed with the fact that while there were nearly 1,000 florists enrolled, this number included very few retailers who were not also owners of greenhouses. The men who were exclusively retailers had not, as a class, found membership in our society attractive to them. I therefore recommended to the society, that, instead of carrying on its work as heretofore, in one large assembly room, the work should be divided into sections which should hold their sessions in different rooms and that a section should be organized and devoted to the interests of the retailer. This recommendation met with the unanimous approval of the convention, and it was ordered that a plan should be prepared and submitted to the directors of the society at their next meeting. That meeting will be held in Rochester, N. Y., in mid-Lent which will bring it early in March.

In order that the suggestion submitted might be complete and satisfactory to the retailers, it seemed wise to have them get together, so that their needs could be formulated and it would be certain in advance that the plans adopted would meet with the approval of the people it was desired to interest. To determine whether I was right in thinking that the retailers would be glad to join a movement of this sort, I wrote nearly 100 letters to such store men as I knew or had previously had dealings with. I made no attempt to make the list complete or exclusive. It was simply to see what response would come from a fairly representative list. The letter sent out stated the action taken at the summer convention of the S. A. F. with regard to the proposed retailers section. It asked for endorsement and the privilege of quoting the recipient as favoring it in a general way. The letter further asked for suggestions. The response was so prompt and so general as to leave no doubt that the movement would have cordial support. I have had but one unfavorable reply.

Probably there is not a retailer present today who has not, at some time, been worried as to how he could properly effect a delivery at some distant point. Most of us have had some unpleasant experience resulting from selecting a name haphazard from the Florists' Directory. Such a man may have gone out of business. He may have a place largely devoted to vegetables and treat the flower business as an insignificant side issue, or he may be one of those cautious people afraid to hand out the flowers unless he can take in the coin at the same time.

Then there comes the matter of discounts. Some say 15 per cent. should be allowed—others say 20 per

RAMBLER ROSE LADY DUNCAN.

The accompanying picture is reproduced from a painting of this beautiful rose which is now being offered for the first time by the Eastern Nurseries. As a garden ornament or an

Easter forcing plant, it will take rank with any and all of its predecessors. The flowers are very large and beautifully colored. The foliage is rich and heavy, denoting the influence of the rugosa blood.

cent. and I find that still others say 25 per cent. Some florists will remit as soon as they get a bill; the majority take 30 days and some settle when they have no other pressing need of the money. The detailed directions for delivery often make it necessary to send long and expensive telegrams. The florist in a small town may gladly fill an order for a dollar's worth of carnations and think himself properly paid at 50 cents per dozen while the man on Fifth avenue will feel that the expense of a long delivery would make an order for \$1 a nuisance, and that high rents compelled him to charge three times as much per dozen as the village florist.

We will have accomplished a great deal if we can form an organization that shall include one or more representatives in every city of the country who can be depended on to properly fill orders from any other member at a rate of discount fixed in advance. We must devise some plan where the prompt payment for such orders is made certain. We must have a telegraph code that is practical, concise and comprehensive. The members should be kept as fully posted as practicable concerning the prices prevailing in different localities. I think we will find no serious difficulty except in the two points which may be said to involve the character of the members, viz.: Will the recipients of an order fill it properly and will the sender pay for the goods?

Of these two questions, the former is the more difficult of solution, but I believe it will be solved. Any member should see that his self-interest demands the proper filling of orders intrusted to him by another florist. We must not allow the adoption of any rule that would compel members to send their orders to any given florist. This would be fatal. Each member must feel that the securing of orders is assisted by membership in the organization, but that the retention of patronage depends upon the

quality of the service rendered. An offender may not attend the annual conventions, but he may be sure others will do so, and that they will exchange notes and get a line on how orders are being filled by different people. If service were bad enough, it might well be the occasion for expulsion, but it would not need to be very bad before the majority of members would know about it. We should encourage our customers to make inquiries from their friends and to report on all deliveries, but, in considering such reports, we should bear in mind the disposition of some people to complain in season and out of season.

The matter of credits is difficult at first sight; but seems certain of solution. In the first place, make membership cost enough so that it will be too valuable to lose for a trifling bill. In the next place, make the annual dues enough so that the organization can afford to exercise close supervision in the matter of accounts. I have given considerable thought to this particular feature and am inclined to think that the following plan is practical and equitable. In addition to a fixed membership fee, let the member or members from each city pay into the treasury a sum based on the population of their city. If there is only one member from the city, he should pay it all; if a second member comes in from that city he should pay one-half of the population fee which should then be refunded to the first member—and so on—no matter how many come in from that one city. The total population fee in the treasury from that city should remain constant, and each member from that city should have paid an equal amount.

Let the money so paid be invested and the interest from such investment be combined with the membership fees to form a guarantee fund. Should any member fail or refuse to pay a bill due to any other member for a specified time, say 60 days, let this bill be

ALL ORDERS FILLED PROMPTLY, PROPERLY AND TO YOUR SATISFACTION.

presented to the proper committee and, if it is found correct, paid from the guarantee fund, thus consuming the membership fee of the delinquent member and severing his connection with the association.

In case the account is a disputed one it should be provided that the debtor may pay to the arbitration committee the amount claimed and await its decision as to what amount is justly due; in such a case his membership would not be affected. It should be provided that the guarantee of the association would not hold good except when the non-payment of accounts was promptly reported. Otherwise a florist might be badly delinquent in a number of places at the same time and the association know nothing about it until some creditor became alarmed and then the bills would pour in from all directions.

The secretary of the retail section should be the secretary of the S. A. F. and the membership fee and dues of the section should include the fees and dues of the parent society, so that members would only have to make payments to one person and confusion would thus be avoided. The membership fee of the section should also include the price of the telegraph code book of the association. By buying in quantity, the cost of the code book could be very materially reduced. While the matter of deliveries seems the most vital single question to be taken up there are countless questions which could be handled at the annual conventions and which would make the sessions interesting and profitable. Everyone of us should be interested in the best ways of at-

tending to the details of the business.

What method do you use in keeping track of credits and guarding against dead beats?

At times of rush how do you handle your orders and how do you prevent confusion in handling cards to go with orders?

What do you pay your clerks? What methods have you found effective to awaken their interest and insure their loyalty? Do you know where I can find a good man for my store? Do you believe it pays a retail florist to advertise and what methods are the most effective?

I will venture to say that there are few of you who have not had these questions asked of you. Get together every summer, gentlemen, and discuss them. They will not be settled. Such questions are always alive and unanswered, but it will be a dull man who will not derive some benefit from talking such things over with other men in his line of work. If tailors and milliners can meet and co-operate in turning the attention of the public toward certain materials and certain styles, why may not the florist make his influence felt in support of his ideas of the beautiful and the artistic?

ELBERON HORTICULTURAL SOCIETY.

This society held a meeting on Nov. 15th. The new officers took their places for the coming year: Peter Murray, president; Wm. Seymour, vice-president, Reginald Corey, secretary; Peter Ewen, treasurer; Alex. Fleming, recording secretary. Anthony Bauer made a report on the chrysanthemum

show held in Long Branch. He said it had been a great success from every standpoint, especially from a financial point. The competition for points for the year ended at the last meeting, Peter Ewen, first, gets the Rickards Bros' cup; Wm. Seymour the Society cup; Frank Logan, the Seawarty cup and James Kennedy the Ewen medal. For summer exhibits for members having no greenhouses, A. Grieb got the first prize.

ALEX. FLEMING, Rec. Sec.

The recent show in Lenox, Mass., is reported to have been very successful financially.

FRENCH BULB PROSPECTS.

Japan writes that large sizes will be very scarce next year and that the prices have already advanced considerably.

We learn that the south of France was visited by a very severe wind and hail storm, which ruined many hyacinths and will cause considerable loss to many growers. The loss to horticultural farmers is estimated at about two million francs. The storm came just after the growers had planted their hyacinths. There is every prospect that French bulbs will be higher next year.

Ghent writes that azalea prices will advance slightly and that the supply of certain varieties extensively used here will be limited.

NEWS NOTES.

Grand Rapids, Mich.—The Grand Rapids Vegetable Growers' Association, the new organization representing firms including the Grand Rapids Greenhouse Co. and others, has taken possession of its central depot in the Crittenden building on S. Market Street.

W. A. Keeling of the Roebeling conservatories at Trenton, N. J., writes us that the varietal name of that pure white Dendrobium Phalaenopsis with the "unpronounceable and unspellable terminal" as referred to by our Philadelphia correspondent last week, is "Hololeucium." While on the subject we might go further and correct the typographical error as to Mr. Keeling's native place, which should read Bradford, York, (Eng.) and not Bradford "Forks."

Seed Trade

"Future" Peas and Beans.

Reference was made in last week's issue to probable advance in peas and beans of the 1910 crop, or, as we might say with our canner friends, "future" peas and beans, and, while the heaviest advance will be on these lines, many others will be in the ascending scale. It is but repeating a well-known fact to say we have not had an average yield of peas or beans since 1905 or 1906. In fact the average for the last four years has been below 50 per cent., or to place it in the vernacular of the trade, or at least growers, it has been under three-fold. The question of yield or "fold" has heretofore been discussed in HORTICULTURE. Five-fold on peas has been the standard for a quarter of a century or more, and while this may have represented average yields when established by general consent of the growers, it has not been a fair estimate for at least ten years. One of the largest producers of this line of goods last year struck an average of the yields for the past ten years, and found it below four-fold, and thereupon changed their standard to four-fold. The wisdom of this move has been amply vindicated the present season, and has enabled this concern to make more liberal deliveries on their contracts than most of their competitors, with one or two possible exceptions. It looks as if all of the growers will have to recognize the four-fold standard as the proper one, and far more just to their customers as well as themselves ultimately.

Effect of the Decreased Averages.

As prices have been based on a five fold yield, this decrease of 20 per cent. will have to be taken note of, with a consequent new basis of prices. To advance prices without changing the standard of yield would be an injustice to their customers, a policy which would reflect scant credit on the growers' sense of fairness, hence there must be a very complete readjustment as to peas. With reference to beans, the issue is not so clear, but it would certainly seem as if a readjustment were necessary to meet the new conditions, as returns from plantings in recent years indicate plainly that a permanent decrease in yield must be reckoned with, and of course this leads at last to an inevitable advance in prices of both peas and beans.

In Justice to the Growers.

These repeated short crops have been most discouraging to the farmers and therefore they have demanded more for their share in producing these crops. In the end this advance must be paid by the seedsman and canners, and it is only just that it should be, as the growers certainly cannot bear it, and remain in business. Few, probably none, have grown wealthy in this business, and most of them have acquired little more than a modest competency. There have been years when they not only made no money, but suffered actual loss. Of course there is another side to the story, and the writer holds no brief from the growers, but has heard their

Michell's Seasonable Seeds

VERBENA SEED

Michell's Mammoth Fancy Strain. This is without doubt the finest strain ever offered to the trade, combining large size, purity of color and free flowering qualities.

Henry F. Michell Co. 1018 Market Street **Phila.**

side of the case from several of their class, and has deemed it only fair to state such facts as have come to his notice. Harmony and good will are the great desideratum between the growers and their clients, and this can best be brought about by a frank and full understanding of the conditions between them.

The Bean Situation.

The situation affecting beans clears up very slowly, but it becomes more evident as it develops, that the warnings given in HORTICULTURE on several occasions were not scareheads, but founded on a pretty intimate knowledge of conditions. The estimates of contract deliveries sent out by growers in September and at a later date were regarded by a few well informed persons as entirely too optimistic and the latest information fully confirms their views. Early estimates placed Black Valentines at 50 to 70 per cent., but it is known now that these figures are far too high. This is but an illustration of how misleading were these early reports. We have information of a sale of 100 bushels of these beans at \$5.00 per bushel, and the buyer made a good purchase, as it is believed that in 60 days they will bring \$6.00. It looks now as if Stringless Greenpods will be very short, and in fact most of the greenpod varieties will prove to be much scarcer than expected some weeks ago. Wax varieties promise better results, but definite information or even a close estimate is impossible at this time.

About Limas.

It was confidently believed that Lima beans were nearly a full crop, but the most recent information clips off a goodly percentage from the early estimates on the bush sorts, and particularly of Burpee's Bush. Instead of delivering 100 per cent. with a comfortable surplus, it is not improbable that a cut of 10 to 20 per cent. may have to be made, and the same may be said of the Dreer's, and Henderson's Bush. Burpee's two new introductions are procurable at what may be considered reasonable prices—\$7.50 for the Fordhook, and \$8.00 for the Burpee's Improved. Pole Limas are believed to be in sufficient supply to meet the requirements of the trade. We hope to have further crop news for next week's issue.

The seed business formerly conducted by H. D. Garwood, of Rocky Ford, Col., has been absorbed by the Elbert Seed Co.

CATALOGUES RECEIVED.

John Lewis Childs, Floral Park, N. Y.—Trade Price List of Gladioli.

California Rose Co., Pomona, Cal.—A prettily illustrated catalogue as usual, with a very taking cover illustration.

W. Atlee Burpee, Philadelphia, Pa.—Advance Wholesale Prices for the Trade Only, Seeds for 1910. Vegetables and sweet peas. A very comprehensive list of the latter.

Dervaes Freres, Wetteren, Belgium.—General Catalogue of Trees, Hardy Herbaceous and Tender Plants. The list of roses is extensive as is also that of Nymphæas and other aquatic plants, which are a specialty.

Sluis & Groot, Enkhuizen, Holland.—Advance Price List of Vegetable, Flower and Agricultural Seeds, Fall 1909. Printed in English. Contract offers for delivery in Fall 1910 and 1911 will be sent out in December.

F. C. Heinemann, Erfurt, Germany.—Special Illustrated Trade Offer of Novelties 1910 and Others of Recent Introduction. Printed in the English language. A colored plate of new things in carnations, antirrhinums, delphiniums, cinerarias and beans is enclosed.

V. Lemoine et Fils, Nancy, France.—Catalogue and Price List of Hardy and Tender Plants, 1909-1910. The novelty list is, as usual, full and interesting. Full page halftones of Begonia Patrie, Heliopsis scabra fl. pl., Deutzia crenata magnifica, Deutzia discolor elegantissima, D. discolor densiflora and Philadelphus Lemoinei Virginal, are presented.

M. Rice & Co., Philadelphia, Pa.—Catalogue of Florists' Supplies, Ribbon Specialties, etc. This beautiful album 11 x 14 inches, in covers of moss green with watered silk effect and embellished with halftone illustrations on heavy coated paper, is a credit to Messrs. Rice & Co., and the industry which they so worthily represent. "Don't turn your back on a good thing" is the motto on the introductory page. We should say that the florist who has not this useful book on his desk is certainly turning his back on a good thing. The illustrations are beautiful reproductions of beautiful handiwork, many of them new and representing every item of value to the up-to-date florist, from a complete wedding outfit of gates, kneeling stool, bell and vases, down to a toothpick. The issuing of such an elaborate work is an evidence of notable enterprise. The typographical make-up and finish are also of a high order.

FORCING GLADIOLUS

Many florists plant these in boxes, or among their carnations, in the winter. They are excellent for decorative purposes and realize good prices, either wholesale or retail. Gladiolus are a good catch crop and take up but little room. The following are the best for this purpose.

Gladiolus Gandavensis Hybrids

America. The flowers, which are of immense size, are of the most beautiful flesh-pink color. \$3.25 per 100; \$30.00 per 1000.

Augusta. The florists' best white Gladiolus. First size bulbs, 1 3/4 inches and up. \$2.00 per 100; \$18.00 per 1000.

Bulbs, 1 1/2 to 1 3/4 in., \$1.75 per 100; \$16.00 per 1000.

Shakespeare. White and rose. \$4.75 per 100; \$45.00 per 1000.

May. Pure white, flaked rosey crimson; the best forcer. Selected bulbs, \$1.75 per 100; \$15.00 per 1000.

Branchleyensis (true.) Fiery scarlet. Selected bulbs, \$1.50 per 100; \$13.00 per 1000. First size bulbs, \$1.25 per 100; \$10.00 per 1000.

Boddington's White and Light. Extra selected bulbs, 1 1/4 in. and up. \$1.50 per 100; \$13.00 per 1000.

Bulbs, 1 1/2 to 1 3/4 in., \$1.25 per 100; \$10.00 per 1000.

American Hybrids. A mixture of the choicest varieties of Gladiolus in cultivation. \$1.00 per 100; \$9.00 per 1000.

Gladiolus, Colvillei and Nanus (type)

Plant some of these among your carnations; they will come in handy at any time.

Peach Blossom. The most beautiful of all the Colvillei type of Gladiolus; the color is a lovely soft pink, on the order of the Killarney rose. \$0.90 per 100; \$8.75 per 1000.

Blushing Bride. Flowers are large, pure white, with delicate pink spot. Useful for early forcing. \$0.75 per 100; \$6.00 per 1000.

The Bride (Colvillei alba). This lovely white miniature Gladiolus makes a useful cut flower for early Spring use; will stand forcing. \$0.65 per 100; \$5.00 per 1000.

Ackermanii. Salmon-orange, with white blotches, edged scarlet; very pretty. \$0.75 per 100; \$6.50 per 1000.

Remember you may deduct 5 per cent if cash accompanies order.

Flower Market Reports:

BOSTON The market situation here has not changed much from last week as reported, either in volume or quality of receipts or strength of the demand. Business has been really dull since the beginning of the present week and there are heavy accumulations of carnations and chrysanthemums especially. Roses are shortening up a little, the planning for holiday crops six weeks hence making short production now, but there are enough for all requirements. Crimson carnations and red chrysanthemums are being care-

fully hoarded for the Harvard demand at Saturday's football affair, but the violet lags although, no doubt, the call for this flower at New Haven will be up to the record. Gardenias are making a fine run this fall.

A good supply of every-
BUFFALO thing has been had for two weeks past, but trade not as good as a few weeks ago. Indian summer weather prevailing brought on the chrysanthemums a little faster than desired, and while there always are plenty of roses and other material during the chrysanthemum season it can be said that the carnation and Beauty and other roses have

NEW CROP GALAX

(BRONZE)

THEY usually color up and are in fine condition to market the latter part of November. Our supply this season will be much above the average as to quality. We are offering same at \$6.50 per case, every leaf guaranteed; delivery in about two weeks. Orders will be filled in rotation, so would appreciate your early response. Immediate delivery on Bronze and Green \$7.50 case.

S. S. PENNOCK-MEEHAN CO.
1608-20 LUDLOW ST. PHILADELPHIA

not suffered as in other years, although ordinary roses are very plentiful. Select Killarney, White Killarney and My Maryland have had a good demand, and while prices have not been fancy they always find a way out. Kaiserin and Carnot are still with us and some good blooms are had. Violets, lily of the valley, daisies, mignonette, etc., have sold readily. Short stemmed carnations remain with the wholesaler, but the fancy ones bring the price. Prices have been good, although the retailers have had practically their own way for the past week or so.

A spell of warm weather which would be ideal in mid-summer has hastened the chrysanthemum crop along so that Thanksgiving will practically see the end of the season. Beauties are decidedly in short supply and on Monday buyers were running from place to place to get these roses for their customers. This is also said to be caused by the warm wave which lasted for days and reached 73 degrees. Carnations are in good supply and the prices will not be excessive for Thanksgiving. Lilies are more abundant. Roses other than Beauties are plentiful and good.

The cut flower market in some what of an indifferent condition due, no doubt, to the warm weather of the last ten days. Good, snappy cold weather would have a tendency to brighten up prospects and shorten the supply, which at present writing is far in excess of demand. Beauties are plentiful, quality good, fair demand and no advance in prices. Teas are very plentiful in all grades. Chrysanthemums are at their best just now. Carnations are showing decided improvement, length of stem increasing which adds considerably to selling qualities. Easter lilies are quite plentiful, no particular demand apparent. High grade lily of the valley is in fair demand and good supply. Quite a quantity of orchids are arriving, although no special demand is noticed. Indoor sweet peas are gradually increasing, both in quantity and demand.

Weather conditions favored an overproduction and price demoralization all along the line for the past ten days. The chrysanthemum has been coming in in approved western style—carload lots. Already it begins to show the wear and tear, and although there are

quantities of late blooms yet lacking maturity, it is true nevertheless that the chrysanthemum's reign is approaching its close. All indications point to more strenuous times in the wholesale districts. Already a whiff of frigid air is felt and with it comes the inspiration to the cunning operator to hoard his product in anticipation of a rise for Thanksgiving week. There may be a rise but not on hoarded stock. It is a vain hope. The big Harvard-Yale football game at Boston on Saturday of this week is too far removed to make much impression on this market except possibly on violets, but even on these old conditions no longer exist and many of the Hudson River boxes reach Boston and New Haven direct without touching New York at all. Orchids are scarcer and gardenias are maintaining a record pace. Carnations are excellent, but while the chrysanthemum avalanche is on they have but little show. Their turn comes next. The rose market has been very sluggish, the receipts being enormous, with Killarneys and Maryland having a little the best of it so far. Lilies too abundant. Paper White narcissi popping up on all sides.

Market for the PHILADELPHIA last week has been rather slug-

gish—too much stuff, and very low prices. Early in the season chrysanthemums found a ready market at good figures, but for the past two weeks things have been entirely different. In fact, there has been such a deluge from little growers and private places to the retail stores, that the regular wholesale centers could get better prices from the fakirs than from the retailers. That tells the whole story of the demoralization better than a page of explanation. The weather has been very warm, too, and that has had its effect. American Beauty roses are much more plentiful, and he is a smart salesman who, with even the finest long-stem stock gets top figures. Killarneys are better and in large supply. Bridesmaid poor and not much in evidence. Brides are rather better but still below standard. White Killarneys are very good from local points, but the choicest are still coming from outside. Cattleyas and cypripediums are still scarce and in good demand. Carnations much improved as to quality and in good supply. Gardenias continue top-notch favorites, splendid flowers coming in and satisfactory returns. Greens are moving a little better. Galax and box for futures are having a brisk call.

PHILADELPHIA NOTES.

Ben Harry, a promising young attorney, son of W. S. Harry, florist, Conshohocken, was accidentally killed at the Chelton Ave. crossing of the Reading R. R. on Sunday last.

The 16th inst. was nomination night at the P. H. S. All the old officers are on the list for another year without opposition. Dreer, Michell and Waterer premiums for 1910 were announced.

Edwin Lonsdale, Mrs. Lonsdale and their nephew, Mr. Smith, leave for the Pacific coast on the 4.30 p. m. train Saturday, the 20th, from Broad St. station. The delay in installment of the successor at Girard College has prevented an earlier departure.

The latest addition to the Pennock-Meehan outfit is a 40 h. p. auto-delivery wagon that can cover the ground

" " & Spreu. (100 bchs).....	12.00	to 20.00	12.00	to 20.00

in double quick time at the minimum of expense. The outside body is of the swellest, so far as artists' skill can go.

The final awards of last week's show included a certificate of merit to Julius Roehrs Co. for "Fred Sander" croton, and Brasso-cattleya Digbyana labiata. The latter is a magnificent pink flower, of fine form and very distinct. It shows the Digbyana character very strongly and also in its width of petals and fine coloring the influence of the other parent, C. labiata.

Heck Bros., Wyomissing, Berks Co., Pa., exhibited their new chrysanthemum "Pink Seedling" at last week's chrysanthemum show. This was awarded a silver cup last year, and the committee declared that this year it was better than ever. Our up-state friends seem to have a good thing in this—which is worth planning a campaign with, for their own benefit and the good of the trade at large. There is

both money and glory to be gained from such a novelty.

Visitors: Alex. Montgomery and Wm. Nicholson, Boston; Paul and Henry Dailledouze, Brooklyn, N. Y.; Mrs. S. E. Scherrer, Bethlehem, Pa.; O. J. Sawyer, Allentown; Chas. Johnson, Nazareth; Mrs. Chas. Vorkeller, Bethlehem; Jno. Stanley and Jno. Rogers, Whitford; Wallace R. Pierson, Cromwell, Conn.; George A. Cooke, Washington, D. C.; Ernest Ashley, Allentown; George W. Carr, Kingston; S. G. Marvin and Mrs. Marvin, Wilkes-barre.

Galax and Leucothoe

Quality, Packing and Price All Right
Wholesale Only.

BASKET PLANTS.

As subjects for planting in hanging baskets in conservatories, windows, and verandas, during the warmer months, I would call attention to some species of suitable plants which are in vogue in France and Germany. Among lobelias of the *L. erinus* section are *L. e. Hamburgia*, *L. littoralis* (true) and Kathleen Mallard. *L. littoralis* has small, white flowers succeeded by pretty fruits that are the chief ornaments of the plant. *Hamburgia* has flowers of a dark blue color. *Lobelia Richardsonii* is a variety which grows more freely than *Hamburgia*, and the growths are longer. It is necessary before planting *Hamburgia* and Kathleen Mallard in baskets, in order to encourage the plants to grow vigorously, to place them for a considerable period of time in an intermediate temperature. The plants having made long growths should be afforded cool treatment, and spare feeding. *Glechoma hederacea variegata* is a much admired plant for small baskets. *Muehlenbeckia complexa*, several campanulas, viz., *C. isophylla*, *C. fragilis*, a useful plant, with root-leaves on long stalks, a profuse bloomer; *Othonna crassifolia*, a native of Barbary, and a plant of distinct character, the shoots and leaves smooth and glaucous and the habit spreading, blooms freely in the late spring months if planted in light rich soils. The flowers are yellow.

FREDERICK MOORE.

ORCHIDS AT ROYAL HORTICULTURAL SOCIETY.

At the exhibition on October 26, Edward V. Low arranged a group consisting largely of *Cattleya labiata* varieties which he has been collecting in South America. The major proportion were white-flowered, excepting the lip, which is more or less colored purple. Those having the largest amount of this color were *Cooksoniae*, Mrs. R. Ashworth, *Gilmouriae*, and G. G. Whitelegge. Those with the least purple were *Reedleyensis*, and *Amesiana*.

Sander & Sons, St. Albans, had an exhibit rich in cattleyas. Very fine were *C. Lord Rothschild* var. *delicata*—its chief feature being the stain of deep orange in the throat; *C. Clarkiae* = *C. bicolor* × *C. labiata*; a variety of *C. Hardyana* having a beautiful lip of a purple tint; *C. Empress Frederick* var. *Sanderae*, a flower having white petals and sepals, and lip white at the margin; throat orange on the inside, lined with purple. Several cypripediums were deserving of notice, viz.: *Minos*, *San Actaeus*, *insigne Lindeni*, and *J. Wilson Potter*.

Charlesworth & Co. showed *Cattleya Empress Frederick gigantea*, a flower measuring 6 inches across; the sepals and petals of an uniform light purple tint, the lip lobed and fringed bright purple in front, throat orange lined with purple; *Odontioda Bradshawiae* and *Cypripedium Madame Alfred Bleu*.

Messrs. J. Veitch & Sons showed *Cypripedium Elatior Rex* (Award of Merit); *Cattleya porphyroblebia* = *C. intermedia* × *C. superba*; *Brassocattleya Digbyana gigas*.

In Cypher & Son's collection we noted: *Cattleya Mantinii nobilior*, *Cypripedium Milo Westonbirt* var. *Euryades*, *Leeanum magnificum*, *nitens magnificum*, some forms of *C. insignis*, as *Commander-in-Chief* and *Laura Kimball*, and the singular looking *Phaio* - *Cymbidium Chardwarensis*, whose sepals and petals are orange and lip brownish purple, the flower almost circular.

Lieut.-Col. Holford received the Society's gold medal for a group of orchids of the finest quality. An award of merit fell to him for *Cypripedium Beacon* = *C. Lowianum* × *nitens Leeanum*. Mr. Bath of Wisbech received an award of merit for the American carnation named *May Day*. Shrubby veronicas as standards 3 feet in height and small bushes were shown in bloom by Mr. H. B. May, Upper Edmonton. The standards were formed in three years from the time of grafting and were distinctly ornamental.

FREDERICK MOORE.

Little Ads Bring Big Returns

Little ads in our Classified Columns bring big returns to both advertiser and purchaser.

Anything that can be sold to florists, gardeners, park and cemetery superintendents, etc., can be sold through this medium in this department, and at very small cost.

Don't fail to read them each issue, for you will find one or more that will prove profitable to you.

They Cost Only One Cent a Word Undisplayed

AN INTERESTING NURSERY.

On Thursday, November 11th, a few friends paid a visit to Messrs. Farquhar's nursery at Roslindale, Mass. Assembling at Horticultural Hall, Boston, they were met by Messrs. Farquhar and conveyed in automobiles. The route embraced a goodly portion of the park system. Late as the season was, many trees and shrubs were still in good foliage and fruit; particularly fine were large bushes of the beautiful *Cornus florida*. In Franklin Park the contrast between the red-brown of the oaks and the dark green of the conifers was very striking.

Messrs. Farquhar's new nursery consists of a long, narrow valley flanked by low hills. On one of these latter the greenhouse and other buildings are situated. One house, filled with *Begonia Gloire de Lorraine*, some 300 ft. long and every plant one mass of flowers, created general admiration. Other houses were filled with cyclamens, primulas, Boston ferns, araucarias and miscellaneous decorative plants.

In one of the greenhouses and in many pits we noted thousands of seedlings of the new Chinese plants introduced by the Arnold Arboretum. All of these were too small to form any accurate idea of their merits, but the variety is unquestionably great and many look decidedly interesting. We noted nice young plants of *Clematis rubens* with its very distinct dark foliage often marbled with white; also *Clematis Armandi*, an evergreen in some respects resembling *Clematis indivisa*. We also noted many species of *Vitis*, and two—*V. Henryana* with crimson foliage striped white and *V. Thomsoni* with dark scarlet leaves—were very attractive. The seedling *Rhododendrons* from China, of which Messrs. Farquhar have thousands, are full of interest and even in their present young state exhibit much variety. These Chinese introductions promise great things, and if only a very moderate percentage prove adaptable to the climate of this vicinity they must have a great effect in the adornment of our gardens and parks of the future.

The soil in the valley of this new nursery is pure peat of great depth, and peat-loving plants generally thrive in it amazingly. We noted several fine plots of dwarf *rhododendrons*, well-budded and equally fine beds of kindred plants. Men were busy lifting the bulbs of *Lilium auratum*, *L. speciosum* and its varieties, *L. tigrinum* and others, and the bulbs generally were an exceptionally fine sample. Dahlias and other tender tuberous plants were already lifted and stood in well managed sheds.

The whole of the stock at this Roslindale Nursery is in splendid condition, and reflects the greatest credit on the proprietors and their competent staff. It is evident that a perfect understanding exists between employer and employes, for without the hearty co-operation of all concerned such results could not be obtained.

Light refreshments were served to the visitors at the Nursery and a dinner followed afterwards at the Parker House. Messrs. Farquhar have the happy knack of doing all things well and one and all of the guests were indebted to them for a most interesting and thoroughly enjoyable afternoon.

W. H. E.

E.; \$10,000, one-half cash. Mr. Hodge, 8 Grand View Ave., Somerville, Mass.

TO LET

TO LET—Part of large store with large basement. Situated in the center of the wholesale florists' trade. Good opportunity for florists' supplies, green goods, Ferns, etc., or any business connected with the florist trade. Address Manhattan Flower Market, Wholesale Florists, 46 West 28th St., New York City.

Obituary.

Samuel J. Thompson.

Samuel J. Thompson, florist, died on November 8 in his apartments over his store at 532 S. Fourth avenue, Louisville, Ky.

Thos. McKenna Ulam.

Thos. McKenna Ulam, formerly of Elliott & Ulam, and later in the florist business for himself at Pittsburgh, died at his home, 507 Edgewood ave., Pittsburgh, Pa., Nov. 3, aged 47 years. He leaves one brother and two sisters and is also survived by his mother, Mrs. Harriet Ulam.

August W. Steineke.

August W. Steineke, Woodmere, Mich., who for many years conducted a florist's business under the firm name of A. W. Steineke & Son, died November 5, aged 65 years. He was born in Kronigsberge, Germany, and came to this country 36 years ago. He leaves a widow and his mother, who is over 90 years of age.

Ernest H. Schmiedel.

Ernest Heinrich Schmiedel was born July 5, 1846, in Doebelin, Saxony, Germany, and has been located in America about 25 years. He has been employed by the city of Harrisburg, Pa., for a number of years as a florist. He died, Sunday, Oct. 31, of cancer of the stomach. He leaves a wife, one daughter and three sons, all of Harrisburg.

CHICAGO NOTES. City Improvements.

An ordinance, which if passed, will put every flower stand off every street in Chicago, was presented by Alderman Cermac, Nov. 8th, and was referred to the judiciary committee. The proposed ordinance provides that no obstructions be permitted on sidewalks and those now issued shall be revoked. War on sub-sidewalk space also is promised to come later.

By order of the council, Chicago will reclaim about 2,000 acres of submerged land lying in the Hyde Lake district, between 117th and 113th streets. In few places is there more than 18 in. of water. It now belongs to the state and an ice company is endeavoring to obtain possession of it. "When properly filled it will make a fine park and this valuable land should not be allowed to slip into the hands of private interests," says Alderman Jones who succeeded in getting the ordinance passed.

A petition for widening Michigan avenue and the boulevarding of the east forty feet between Jackson boulevard and Randolph has been presented to the council.

The annual meeting of the Outdoor Improvement Association will be held at Champaign, Ill., Nov. 18th and 19th. Pres. James of the University of Illinois is much interested in this work and sent a special request to Mayor Busse to be present or to send a representation.

Florists whose greenhouses are in close proximity to the railroads as well as all florists who desire to see Chicago more beautiful are just now greatly interested in the war against smoke. Smoke Inspector Paul P. Bird at a meeting last week was warmly congratulated on his success. Among other things Mr. Bird says, "It is wonderful how the public has awakened. Two years ago it was luke warm, now it is red hot." Mr. Bird said it would be well to have a school for men who do furnace firing in Chicago, as they do in England.

Chicago City Gardens Association will put 400 families in the way of raising their own vegetables on vacant lands next summer. Classes in gardening will be held this winter. The returns on the Harvester tract for the past season averaged \$25 for each plot and expenses averaged \$6. 95 per cent. of those taking plots carried the work through.

The Outdoor Art League of Chicago, placed 5,000 window boxes the past year and compelled a number of owners of smoking chimneys to repair their furnaces.

Milwaukee Show.

A number of the leading growers of Chicago exhibited at Milwaukee last week and some of them brought back various prizes.

Bassett & Washburn took first on Rhea Reid rose, 1st on seedling carnation No. 36, and 1st on O. P. Bassett carnation in two classes, the best 100 red, and the best variety disseminated in 1909, any color.

About thirty Chicago florists attended the banquet at Milwaukee giv-

en by the Milwaukee Florists' Club and had a royal good time, returning home Sunday evening after witnessing the close of the first big show held in Milwaukee. It was pronounced by all to have been a great success as an exhibit and when the financial returns are in no doubt the balance will be on the right side.

A. C. Brown of Springfield, Ill., originator and introducer of carnation Sangamo, is a Chicago visitor on his way home from the Milwaukee show, where he exhibited his prize winning carnation Sangamo. At the Chicago and the St. Louis shows this flower took first prizes. It is a beautiful light pink.

Notes.

The late chrysanthemums are just coming in, Timothy Eaton and Golden Dome being the first arrivals.

A. E. Hunt of Park Ridge is showing a fine vase of the Mary Tolman carnation at the Flower Growers' Market. Mr. Hunt is the originator of this carnation and is pleased with its success at the Milwaukee show last week, where it received 1st prize in the class in which it was entered. It is a beautiful light pink with deeply fringed petals.

Chicago papers of last week announce the bankruptcy of the Emma Eaton Flower Shop with liabilities of \$25,620.00 and assets \$315.00.

Harry Rowe, speaking for the retail business says he thinks we are slowly getting over the effects of the financial depression and believes that the business of the retail florist should be judged by the sale of flowers outside of the funeral trade. He is right.

The Bohanan Floral Co. had their large window adorned entirely in yellow and brown this week and the effect was very pleasing and seasonable.

"The Flower Growers' Market will have \$30,000 spent on its improvement in the spring," says the new manager John Sinner. The present narrow stairs will be replaced by two modern stairways and a better elevator will be installed.

Harry Clifton, of 373 N. 48th avenue, will soon have the new front to his retail store completed, making a great improvement.

Another meeting of the retailers was held at the Flower Growers' Market, Nov. 11, to discuss the question of their exclusive right to the retail trade. A committee was appointed to draft a set of resolutions and report at the next meeting.

DURING RECESS.

The Chicago Bowling Club had a spirited contest last Friday evening. The score was as follows:

Carnations	768	708	715
vs.			
Roses	758	611	686
vs.			
Orchids	673	661	680
vs.			
Violets	692	768	721

Chairman F. R. Pierson of the S. A. F. Flower Show Committee has appointed E. A. Stroud of Overbrook to succeed Edwin Lonsdale, whose removal to California has made a vacancy on the committee.

A SUGGESTION FOR FALL PLANTING.

I have often wondered why it is that florists serving suburban customers—those that have more or less garden space about their homes—do not make a greater effort to develop a demand for hardy material. They work hard to push the sale of bedding plants at a time of the year when all are more than busy, occupying greenhouse room and expensive help, with cost of pots, etc., added and at prices that scarcely more than cover the expense of raising the stuff, yet they pay no attention to the opportunity for a good profit calling for no expense in time or labor which lies in selling lily of the valley roots in fall and other things which are easily cared for in the garden, such as the irises, and yield a profusion of beautiful fragrant flowers. Everybody likes these things, and the only reason why they are not planted everywhere is that the florist does not bring them forward properly. Brother florist, try it. Set forth to your customers the cheapness of these roots, the ease with which they can be grown on any kind of soil in shade or sunshine, one planting sufficing for several years, increasing fast, giving a profusion of fine flowers and not requiring the care and expense of keeping bedding plants attractive. I have noticed in HORTICULTURE'S advertisements how cheaply the above mentioned and similar stock can be bought in quantity, leaving a good profit on retail sales, and I know from my own experience how little effort it takes to talk the people into buying and giving orders for planting. There is still time to do considerable this fall. MCA.

PERSONAL.

Arthur Bodwell has taken a position with J. H. Troy, New York. He was formerly gardener on the estate of the late William Barr, Llewellyn Park, N. J.

Sam Lundy, formerly with the Hoekel Floral Co., is now representing W. A. Manda of South Orange, N. J., on the Pacific coast.

Walter R. Manson of Akron and Cleveland, Ohio, is now in the employ of John Walker of Youngstown, Ohio, as manager of his greenhouses.

E. Philpott is visiting Duluth and Minneapolis where he will spend a few days before returning to his home in Winnepeg.

James F. M. Farquhar, of Boston, sailed on Nov. 17 from New York on the Lusitania for a brief European business trip.

Visitors in New York: H. E. Fiske, Boston, Mass.; Philip Freud, of H. F. Michell, Phila.; Harry Holmes, of the Holmes' Seed Store, Harrisburg, Pa.; James Comont, of Merrs. Carter, Dunnett & Beale, London, Eng.

Visitors in Boston—H. S. De Forest, of Pierson U-Bar Co., New York; E. J. Fancourt of Pennock-Meehan Co., Phila.; Paul Berkowitz of H. Bayersdorfer & Co., Phila.; A. C. Zvolanek, Round Brook, N. J.; F. R. Pierson, Tarrytown, N. Y.

BUSINESS CHANGES.

McCook, Neb.—March & Johnson have acquired the houses recently owned by McCook Greenhouses. They include about 6,000 feet of glass.

Detroit, Mich.—The business of A. W. Steineke, formerly conducted under the firm name of Steineke & Sons, will hereafter be carried on by John Warneke under his own name.

NEWS NOTES.

Pasadena, Cal.—The Park Nursery Co. will remove from their old location at 190 W. Colorado St. to Rose Ave. and Pasqual St. Jesse R. Vore and A. S. Hollingsworth have purchased the interest of their partner, T. E. Gould.

The manufacturers of Aphine are arranging for an exhibition and test of the merits of their insecticide to be given in New York city the early part of December. All interested in horticulture will be welcome on the occasion, the date of which will be advertised in due time. Any growers having plants infested with disease or insects on which they would care to have test made as to the effectiveness of Aphine will be accommodated if they will forward their specimens to the place of exhibition.

New Chicago Sprayer

This sprayer is made of aluminum with two brass plates, one fine, one coarse. These are easily removed and quickly cleaned. Spraying face 4½ inches wide, nozzle 6½ inches long; ¾ inch pipe connections. These sprayers will never wear out and are said by users to be the finest on the market.

Send to us for testimonials from growers using them.

FROM THE INSIDE—OUT

You know there is not a house built today, no matter what the construction, that has the extreme lightness, beauty and practicalness of our U-Bar Curved Eave.

Just look at this side view! You never saw anything like it in any other house! It is the patented U-Bar Construction that makes such an interior possible. At no points are there heavier roof supporting members than you see right in this interior, and all these are galvanized steel, aluminum finished.

If you want a house that you can show to your friends with the satisfaction of knowing it is the lightest and most attractive, "the best there is," then the U-Bar is the house for you.

It might be well to drop us a line at once.

PHOENIX and KENTIAS

Two Splendid ROSE NOVELTIES

Raised by JACKSON DAWSON
NOW OFFERED FOR SALE FOR THE FIRST TIME

LADY DUNCAN

Rosa Wichuraiana fertilized with Rosa rugosa. Absolutely hardy.

WINNER

of the Silver Medal of the Massachusetts Horticultural Society 1900. One of the finest hardy ramblers ever raised.

Has the prostrate long rampant growth of the mother, while the Rugosa blood shows in the foliage, spines and flowers, the petals being a warm, lively pink and making a delightful contrast to the yellow stamens.

DAYBREAK

Wichuraiana type, formerly known as seedling No. 7 (Wichuraiana X The Dawson). A vigorous grower, profuse bloomer and easy forcer. Foliage light yellowish green. Hardy as far north as Canada.

Flowers single, in loosely pyramidal clusters. Color deep yellowish pink, a shade darker than Lady Duncan, slightly lighter tint towards centre. Stamens very bright orange. Flowers full, round cupped. See illustration of plant in issue of November 6.

EVERY NURSEYMAN AND EASTER PLANT FORCER WILL WANT THESE TWO NEW ROSES.

Stock limited, order now for prompt delivery.

PRICES—Strong three-year-old plants, \$1.00 each; \$10.00 per dozen.
Two-year-old plants, \$1.00 each; \$ 0.00 per dozen.

We carry a very large stock of fine Conifers, Deciduous Trees and Shrubs and Hardy Herbaceous Perennials.

EASTERN NURSERIES

Henry S. Dawson, Mgr.

JAMAICA PLAIN, MASS.

Notes From the Arnold Arboretum

Next to *Vitis* and its allies the most important genus of vines is *Clematis* of which already several new species have been mentioned in previous issues. The most beautiful of all the new forms of this genus is undoubtedly *Clematis montana* var. *rubens* differing from the type of the species which has been in cultivation since a long time in its larger and rosy red flowers produced in great profusion during the summer; also the leaves and the stem are tinged more or less purplish; the leaves are trifoliate with ovate, long-pointed leaflets furnished with a few large teeth. Another new variety is *C. montana* var. *Wilsoni*, distributed first by Veitch as *C. repens*, but the true *C. repens* is quite different and not in cultivation. The var. *Wilsoni* has pure white flowers, like the type, but they are much larger, measuring two to three inches in diameter, and it flowers in August instead of in spring, which much enhances its value, as not many shrubs are in bloom at that time. Another new variety is *C. montana* var. *sericea* with pubescent leaves and large white flowers. A very striking and distinct new species is the evergreen *Clematis Armandi* with long-stalked dark green trifoliate leaves and white flowers, rosy pink on the back and nearly two inches in diameter, borne in large axillary panicles; the leaflets are ovate-lanceolate, from four or five inches in length and quite entire. *Clematis Gouriana* has pinnate leaves with five ovate leaflets from two to three inches long, entire or with a few teeth and green on both sides; the petioles and the young stems are purple; the white flowers are small, but appear in great profusion in large panicles. In regard to *Clematis eriopoda* mentioned in the issue of July 3 I may add here that its correct name is *C. tangutica* and *C. eriopoda* only a synonym of it.

A very handsome and ornamental vine is *Polygonum multiflorum* figured in the issue of October 23; it is very similar to the better known *P. baldschuanicum*. Another closely related species is *Polygonum Auberti* from Tibet with smaller leaves and slenderer panicles of white flowers.

An interesting new climber is *Schizandra Henryi* closely related to *S. chinensis* which, though in cultivation since some time, is still little known; it is particularly handsome in autumn with its drooping elongated clusters of bright scarlet fruits. *Schizandra Henryi* differs in its larger leaves, from three to five inches long and of thickish texture, and in the longer fruiting racemes.

With the large white bracts surrounding the flowering corymbs *Schizophragma integrifolia* presents a striking picture when in bloom; it is chiefly distinguished by its entire leaves from the Japanese *S. hydrangeoides* which is still rare in gardens, the plants found under this name in cultivation being usually *Hydrangea petiolaris*. The large bract-like sepals of the sterile flowers which surround the broad corymbs of *S. integrifolia* are from two to three inches long and the ovate leaves measure from four to seven inches in length.

Of more botanical than horticultural interest seems the new *Aristolochia heterophylla* with rather small flowers similar to those of our native *A. macrophylla* (*A. Siphon*) and with variable, partly three-lobed, partly entire and ovate leaves from three to six inches in length.

A number of other new Chinese vines have already been mentioned in previous issues as: *Actinidia*, *Clematoclethra*, *Periploca*, *Paederia*, *Celastrus*, *Lonicera* and *Rubus*.

Alfred Rehder.

The East and the West

As HORTICULTURE is becoming a national paper and will soon have a wide circulation in the west as well as in the east, it is well to note the conditions of the two sections and the class of stock adapted to different locations. The climate of the Atlantic states is entirely different from that of the great middle west, and many things which can be successfully grown in Massachusetts are utterly worthless in Nebraska. I think at times, after repeated failures, that there is a sort of aristocracy in some plants. They had rather die than live in "the wild and woolly west." At any rate, many of them do die. I have spent thousands of dollars in finding out what I could not do, and the record of my failures ought to be a valuable asset to the public.

Now let us examine into the causes. The air of Massachusetts is much more humid than that of the Middle West. Added to this, in the summer we will have the mercury up to 100 and over and the south wind blowing like a blast of a furnace. I have had beautiful white pines scorched to death by these American siroccos, and at times you could smell the prairie grass as it was cooked and dried by the fierce heat. We do not have these hot winds every year. But they are sure to come—perhaps once in five or ten years they are sure to wipe out the "tenderfoots." We have not only the summer drouth but that of the winter also. While your atmosphere registers 90 degrees of moisture, ours on beautiful clear days will go but 55 or 60. Now when trees and plants are frozen and the dry air is pumping away at the tops it is hard on tender things. I have watched a fine strong Concord grape vine in beautiful February weather kill down an inch a day, and the condition which gives strength and joy to the people is death to many plants. So it is that millions of dollars in the West have been wasted by following instructions taken from Eastern publications. The most beautiful catalogues, garden manuals and nursery books are published in the East. They are all right for the Atlantic States, but their directions are of little use west of the Missouri river.

Most of those beautiful publications are so winning and fascinating that they are taken in as the true and only gospel of beauty. Every spring orders for impossible things pour into our western nurseries and the proprietors are snubbed because they are so behind the times and don't keep up with the procession. Alas, they have been there before and have found to their cost what cannot be done. Nevertheless people are bound to have these things, and send for them to celebrate their funeral within a year. For instance the broad-leaved evergreen azaleas, rhododendrons, kalmias and hollies must have a moist climate. Planted out on our prairies the tops are sucked dry and they are killed to the ground. In sheer desperation, not to be whipped, I bought one thousand of these beautiful shrubs and built a good screen over them to save them from the drying sun and hot winds and then I irrigated them when needed, and everyone under the best of care was dead in a year. Nevertheless the pictures in eastern catalogues are as alluring as ever and people will send on just the same.

C. S. Hammon

York, Neb.

British Horticulture

A SWEET PEA LIST

A very useful list has been published by the National Sweet Pea Society, giving the leading varieties in commerce, and their distinctive tints. This authoritative selection should be exceedingly helpful to those cultivators who are perplexed at the multiplicity of sorts which crowd the pages of the trade catalogues. The list is as follows: White, Etta Dyke, Nora Unwin, and Dorothy Eckford; crimson and scarlet, The King, King Edward, and Queen Alexandra; rose and carmine, John Ingman, Marjorie Willis, and Prince of Wales; yellow and buff, Clara Curtis and James Grieve; blue, A. J. Cook and Lord Nelson; blush, Mrs. Hardcastle Sykes; cerise, Chrissie Unwin and Coccinea; pink, Countess Spencer and Prima Donna; cream pink, Constance Oliver, Mrs. H. Bell, and Queen of Spain; orange shades, Helen Lewis, St. George, and Miss Willmott; lavender, Frank Dolby, Mrs. C. Foster, and Lady Grizel Hamilton; violet and purple, Rosie Adams and Duke of Westminster; magenta, Menie Christie; mauve, the Marquis and Mrs. Walter Wright; maroon and bronze, Black Knight and Hannah Dale; picotee edged, Elsie Herbert and Mrs. C. W. Breadmore; striped and flaked (red and rose), Aurora Spencer, Yankee, and Jessie Cuthbertson; striped and flaked (purple and blue), Prince Olaf; fancy, Sybil Eckford; bicolor, Mrs. Andrew Ireland and Jeanie Gordon; marbled, Helen Pierce. The floral committee of the society have also issued a list of "too-much-alike" varieties.

CHRYSANTHEMUM NOVELTIES

Although the trade growers were strongly represented, there was a falling off of both as regards the quality and the quantity of the competitive section at the November show of the National Chrysanthemum Society at the Crystal Palace, Sydenham. The numerous visitors, however, found much that was new and interesting amongst the various stands, indicating the continuous activity of the British and continental hybridists to add to their meritorious lists of triumphs. A complete list would occupy too much space. I must content myself with a selection of the leading novelties. Shanklin Sunshine is a new comer from the fertile Isle of Wight. It is a bold exhibition bloom of a very rich golden-yellow. Amongst the whites, White Queen, from the same raiser, attracted considerable attention. The spotless, snowy blooms are borne on stiff stems, and the plant is evidently a vigorous grower. A first-class certificate from the National Chrysanthemum Society, and an award of merit from the Royal Horticultural Society has been received. There is no dearth of good yellows. One of the newest is Yellow Mrs. Charles Beckett. This is a clear primrose sport, with somewhat broader florets than its white parent, and will evidently prove very useful for the show benches. Empress is an imposing canary yellow incurved Japanese bloom, with broad, loosely formed florets. David Ingamells, named after a well known Covent Garden florist, is a mid-season market variety of a nice rich yellow, with excellent points as a commercial variety.

SOME ATTRACTIVE TINTS

Leviathan, aptly named, is a big Japanese bloom, of a creamy-white tint, striped with pink, the florets being long and straight pointed. The delicate shading of silvery-rose in the drooping florets of Miss Lilian Hall attracted many admirers. Another pleasing combination was seen in Beecham Keeling—amber, shaded

with cinnamon red. George J. Buzzard has a taking shade of wine red, with broad, straight florets. Of a similar color is Keith Luxford. On more than one stand was to be seen Lady Letchworth, a shapely, incurved Japanese variety, the broad florets being of a bright golden hue, with a canary yellow reverse. Amongst the new sports Mrs. W. Iggulden is likely to find considerable favor. This is a sport from Madame G. Rivol, the reflexed florets having a rich yellow tint. Dreadnought resembles Reginald Vallis; the long florets are of a pleasing shade of ruby-rose. Captivation partakes somewhat after Bessie Godfrey, the full flowers being of a soft yellow shade. Single chrysanthemums are now enjoying increased popularity. This is largely due to the many new developments made amongst this section. The later additions include Bessie Payne, a graceful flower of a bright pink hue; Sylvia Slade, a rosy garnet, with a white ring around the disc; White Pagram, an interesting sport from the rose-pink Edith Pagram; Miss Mary Pope, a decided acquisition amongst the pinks; and Cissie Jervis, which is of a canary-yellow tint, shaded towards the edges with apricot bronze.

ITEMS OF INTEREST

"The British Fern Gazette" is the latest addition to horticultural journalism on this side. It is edited by Mr. C. T. Drury, F. L. S., a well known expert.—The carnations raised by the late Mr. Martin Smith, for many years president of the National Carnation Society, are being distributed by Mr. C. Blick, of Hayes, Kent.—Mr. Seaton, after a three years' course of instruction at the Royal Horticultural Society's gardens, has been appointed by the British Columbian Government to superintend one of its parks.—The partnership which has existed between Messrs. W. Bull and Edward Bull, nurserymen, Chelsea, has been dissolved owing to the ill-health of the first-named. The business will be continued by Mr. E. Bull.—A lady florist has been appointed to superintend the table decorations of the new Lord Mayor at the Mansion House in London.

London.

W. H. Adsett.

Adiantums in the South

This class of ferns is very much in demand both in cut fronds and in pots and pans from small fernery sizes up to large specimens, and at times the supply runs far short of the demand. For cut purposes *A. hybridum* and *A. Croweanum* are chiefly grown. These varieties also make fine pot plants. *A. magnificum* is the leader for ferneries and table decorations. It is hard to overpraise this variety. As a house plant it always gives satisfaction to the purchaser. Its chief business seems to be to keep on growing no matter how it is maltreated. It is also about the only variety outside of *A. Farleyense* that will keep in any kind of shape during the hot summer months. *A. capillus-veneris* is losing favor. The fronds of this variety are so short and dense that it requires careful watering to prevent the foliage from damping off. *A. cuneatum*, relegated to the background on the introduction of *A. hybridum* and *A. Croweanum*, is once more coming into its own and for design work is far ahead of either. *A. Farleyense* holds first place as a fancy, and grows readily when given proper care. Dur-

ing summer this variety should stand on the bare boards or on inverted pots. Indeed all adiantums are better in summer on the bare wood than on ashes. *A. giganteum* is a variety that ought to be in more common use. So far as the writer knows, it is found only in one of the Bahama Islands and in Hernando County, Florida. In the latter place it grows on the sides of a deep pit or cave which always has lots of water at the bottom. The fronds grow to an immense size and the stems measure from $2\frac{1}{2}$ to 3 ft. It grows very easily, stands quite a lot of sun and with liberal treatment makes a very fine specimen.

A good potting material is made by adding about one-third of leaf mould to the soil and also a small percentage of sand or charcoal screenings. Where leaf mould can not be obtained add enough sand and charcoal to make the mixture light. Provide plenty of drainage and pot firmly taking care not to bury the crowns. When planted out for cutting a good friable loam with the addition of a little old manure will answer very well.

Adiantums, with the exception probably of *A. Farleyense* and *A. magnificum*, require a long rest in summer and it is useless to try to make them grow then. The old fronds should be cut off, the pots placed close together on the bare boards and just enough water given to keep the crowns alive. In September they can be repotted or shook out and put back in the old pots. Water sparingly until they are well started. When well established a watering with liquid manure once a week will be beneficial. A night temperature of 55 degrees is sufficient except for *A. Farleyense* which should be a few degrees warmer.

Snails, shot bugs or wood lice, mealy bugs and the larvae of a night-prowling moth or butterfly are the chief insect pests and all have to be guarded against. A little air-slacked lime scattered on the benches between the pots will generally be sufficient to banish the snails, and bran mixed with enough paris green to change the color and spread on the benches will soon finish the shot bugs. Mealy bug generally attacks only the large specimens. Turn the plants on their side and syringe with a fine spray but good pressure and do it early in the day. The larvae of the moth are the hardest problem and the amount of damage they do in the south is incalculable. The plants, too, should be dusted regularly with pyrethrum powder or slug shot at least once a week, but the slug shot must be used sparingly or it will burn the tender foliage. Keep this up until cold weather sets in.

Robert Lockerbie

New Orleans, La.

Water Scenery In the Garden

The treatment of the banks of sheets of water in a garden is of so varied a character that a brief description of the subject is beyond the scope of a gardening journal, and I propose only to take the one to be commonly met with in gardens on level land, and to leave rock work, formed of Alpine gardening and subtropical gardening to some future time.

The water scenery is, or should be, something apart from the rest of the garden, and for that reason it ought to be differentiated in its nature. Few owners of gardens desire to have the ornate work of the flower gardener to extend over the whole of the so-called "pleasure ground," but they do enjoy the repose afforded by the fresh green of smooth turf, relieved here and there, perhaps, by small groups of not too obtrusive flowering

plants and shrubs, and of the more ornamental trees of moderate growth. A considerable amount of restraint is therefore a necessity on the part of the planter, and the natural, rather than the artificial, should be the predominating character.

Assuming that the area of water is of small extent, low growing plants should be those chiefly employed more especially on the south, southwest and southeast sides, otherwise the surface of the water would be deprived of its main feature—its brightness, under the sun's rays. There are numerous plants, perennial for the most part, which might be selected for enlivening the immediate surroundings, if a plain sward be not preferred. I may mention a few of these, viz., *Aster amellus* in variety, and especially Perry's Favorite, of a pleasing red tint, the only one yet raised; *A. Fremonti*, excellent for early flowering; hardy, very floriferous, and not particular as to the nature of the soil, providing it is not too moist. The plant forms caespitose tufts of dark green leaves, from which stems arise about 10 inches high, surmounted with blossoms 3 inches in diameter, violet with a yellow disc; *Astilbe Davidii*, a plant having erect stems 3-4 feet in height bearing panicles of purplish red flowers. It does well in partial shade and a moist soil. The *Aubrietias* are capital plants of pleasing tints for forming masses; and *A. tauricola alba* is a compact growing variety with white flowers. The *campanulas* offer many beautiful plants for planting in masses, and *C. glomerata acaulis* is one of the best. *C. hybrida Fergusoni* is an excellent variety, said to be a cross with *C. pyramidalis*. It possesses tall slender stems that are furnished with closely set flowers of a light blue tint. The varieties of *C. persicifolia* with blue or white flowers, are very desirable. The newer *delphiniums* make grand masses of color. *Dielytra spectabilis* and its variety *alba*. *Gaillardias*, invaluable plants for grouping, having large flowers, brilliant in coloring, of which the variety *Beauty* is one of the best; but there are many others worth planting; as are also the *Incarvilleas*, *Delavayi*, *compacta* and *grandiflora*—all quite hardy in temperate climates, and bearing handsome flowers. The *N. American Lithospermums Tweedii*, *L. canescens* and *L. Gastoni*; the second having clusters of tubular flowers of a deep orange tint, are very decorative. *Pentstemons* in variety, especially *P. heterophyllus*—a very floriferous plant, with blue flowers. *Phlox Laphami*, a superior variety of *P. canadensis*, much finer than the type, and having flowers of the color of *Plumbago capensis*. The *tritomas* are capital waterside plants, handsome in flower and leaf.

The above list offers a number of uncommon species and varieties of an ornamental character, which are adapted for planting in irregular masses—small or large, according to space and taste; and coming into bloom at different seasons. They differ in various points from the ordinary class of bedding plants, and for that reason they are desirable for this special garden feature—the decoration of the banks of lakes and streams. The list of such hardy perennials is very extensive, but some of those named are among the most recent introductions to gardens on this side of the Atlantic, and are being eagerly sought for.

Deciduous and evergreen species of trees and shrubs of suitable dimensions are to be found in any good nursery list, and no useful purpose would be served in giving names here.

National Flower Show preparations

Ground having now been broken on the preliminary work for the National Flower Show to be held at Boston in 1911, rapid progress on the project may be looked for. March, 1911, seems a long time ahead but it is none too long in which to properly prepare for a show such as the country has reason to expect, considering the location selected and its great horticultural resources. We understand it to be the plan of the committee on schedule to proceed immediately with the prize list for plants and such other material as may call for a long time in which to prepare. This plant schedule and the completion of the guarantee fund are the first essentials.

"By grafting a twig from a chestnut A Touchdown tree on an apple bough it is claimed that an apple was obtained inside of which there were three well-grown and well-flavored chestnuts."

Now what do you think of that? We clip it from the Nov. 17 issue of the *Seattle Daily Times* in an article by F. J. Haskin on the "Red Apple King of Fruits." Mr. Haskin naively remarks that this "must await the approving seal of some body of scientists" before being accepted as really truly true. He further mentions one famous horticulturist who has "so combined twigs from sweet and sour apple trees that he has produced a tree bearing apples sweet on one side and sour on the other!" In the face of all this stupendous advance on the part of the "famous horticulturists" of the limitless West the New England and New York apple growers might as well turn over their antiquated Baldwins and Greenings to the brown-tail moth. These wizards have us beaten to a frazzle.

The best blessing

Another Thanksgiving Day is here with its gladness and bounty. Whatever may have befallen us of disappointment or adversity in the course of the year just passed, there are very few of us who cannot look back and find in our experiences since last Thanksgiving Day very much to feel grateful for, very much that we shall love to cherish in memory, very much to encourage and inspire us to face the unforeseen troubles and joys that await us in the months to come. HORTICULTURE, looking backward over the busy twelve months, and weighing the bitter against the sweet, finds the latter far outbalancing the former. Old friends have never wavered, new ones continue to multiply, and "the smoke goes up the chimney just the same." Our appreciation and gratitude go out in full measure to all who have favored us with their kindly good-will.

"It is a good thing to be rich and a good thing to be strong, but it is a better thing to be beloved by many friends."—*Enripides*.

Climatic observations

Our good friend and observant lover of nature, C. S. Harrison, has given us in this issue a very clear idea of the climatic differences existing between the Atlantic coast and localities in a corresponding latitude

in the Middle West and the horticultural disadvantages which the people of the latter have to contend with. He might go farther and find a still greater variation on the Pacific Coast. It is probably a wise and beneficent provision of Nature which gives us these dissimilar conditions in rain fall, temperature and other factors which so largely control vegetation but we cannot resist the conviction that the acts of man, wise or unwise, have much to do with some of these phenomena. Certain parts of Florida, once regarded as immune against injurious frosts, are no longer immune since her vast forest protection has been destroyed. On the other hand is it not likely that the gigantic irrigation operations which are turning the western deserts into a verdant and fruitful empire may, in conjunction with the new balance of verdure and forest growth, so modify in due time the severities of the weather of the prairie countries that things now impossible may yet become practicable? Man cannot change the order of the seasons, nor latitude, nor gulf stream, but he can preserve and extend forest growth and, outside of fixed physical conditions, there is no one factor which has so much to do primarily in modifying climatic extremes and conserving the comfort and well-being of humanity as the forests have. Mr. Harrison's articles will be continued in later issues.

Codiaeum

These well known hothouse evergreen shrubs are popularly known as Crotons. Botanists, however, tell us that they are quite distinct from that genus, belonging to a different section of Euphorbiaceæ. About three or four species are known to exist, notable among which is *C. pictum*, from which many of the garden forms have originated. Codiaëums, as decorative plants, have few equals. Mixed with a few graceful palms, and ferns, a very imposing group can be made and a well grown specimen also looks well alone. As table plants they are among the best we have, especially the narrow leafed varieties, if grown about a foot high, in a five or six-inch pot.

Codiaëums are of easy culture and, after being established in pots from the cutting bed, there is no need of the humid high temperature they are so often subjected to. These, along with many other tropical plants, have been made unpopular by the sweatbox mode of cultivation. I have heard an employer more than once say, "Oh, yes, they are beautiful, but they are grown in too uncomfortable an atmosphere to be enjoyed."

Cuttings can be rooted, in three to four weeks, in a case, with a top and bottom temperature of seventy. Let them get dry at the roots before transferring to pots. This treatment firms up the young roots, making them less liable to damp off when put in soil, which, for a first potting, should be about equal parts of loam, leafmold, and sand with some charcoal added to keep it sweet. If a large specimen is desired quickly take an old plant, with a top that has a good few breaks on it and girdle the stem close to the lower breaks, and put a three-and-a-half-inch paper pot on it, covering the girdled part about an inch in a mixture of loam, sand and sphagnum moss. It will be well rooted in about a month and, before removing from the old plants, it is better to have it well established in a five-inch pot, using

plenty of loam in the mixture for this shift. When well rooted in this pot, dry off the old plant quite severely, allowing all the moisture for the top to be derived from the pot around the girdle. By this mode of treatment no leaves need be lost when it is severed from the old plant. If this method of propagation is used it is astonishing how large a specimen can be had in a very small pot.

Each year, as the plant increases in size, it is better to prune the shoots back an inch or two, care being taken, however, to keep the plant evenly balanced. We find the end of January a good time to do this. After they break well repotting is in order, and we use a good fibery loam, to which has been added about a fifth part of manure, and to every shovelful of loam a handful of bonemeal. It is a good plan to sterilize the soil as this kills all the eggs of scale and mealy bug—two pests that are very fond of Codiaëums. Red spider, another pest, that comes in mostly through the ventilators from outdoor trees, can be kept down by frequent use of the "Stott nozzle" on the end of the hose on bright mornings. I don't believe in having the foliage wet over night, as one is apt to loose a good many leaves by doing so. We find that sixty to sixty-five is a good winter night temperature, putting on air in the morning as soon as the glass reaches seventy. We give no fire heat from June until about the middle of September and on bright days have the ventilators full open and during that period do not close them tight at night. By this treatment one gets a nice firm short-jointed growth, and when used for decorative work they stand it a great deal better. When in vigorous growth Codiaëums enjoy frequent waterings with liquid manure; some varieties will stand more than others and one has to be careful with the one he is acquainted with.

Shading, enough to break the direct rays of the sun, is necessary from March until the end of September. It is a good plan also, to stop giving stimulants at this time of the year, giving plenty of air, and allowing the plants to get a little drier at the roots before watering. This treatment helps to finish up the season's growth, and has a tendency to bring out the brilliant red colorings on these varieties that are popular with the florists around Christmas.

Good large-leaved varieties to grow are Andreanum, Baron Rothschild, Challenger, Czar Alexander III, Dayspring, Edwin Lonsdale, Evansianum, Earl Derby, Heroicus, Queen Victoria, Reidii, Stewartii, Thomsonii, Undulatum, Veitchii. Narrow leaved varieties: Angustifolium, Chelsonii, Dodgsonæ, Golden Ring, Interruptum, Johannis, Lancifolium, Majesticum, Mrs. Dorman, Prince of Wales, Warrenii, Weismanii.

CLIANTHUS DAMPIERI AND C. PUNICEUS.

As most gardeners know, these species of the Glory Pea natives of Australia—are very showy inhabitants of the cool greenhouse. They are of moderately easy culture when planted in a mixture of two-thirds turfy loam and one-third hard peat, with a small quantity of sand to afford porosity. When grown to a sufficiently large size, no more shifts should be afforded into larger pots; but every second year the plants should be removed from the pots in which they have been growing and the balls reduced by about one inch all round, and the roots at the bottom disentangled with care, and the strongest cut back moderately. This operation is best performed in early spring, or at the time when growth is about completed, but when there is enough solar warmth to promote root growth. The work of repotting should be carried out with a moderate amount of firmness and with a potting stick or rammer. The plants thus treated are the better for being housed forthwith, and supplied moderately with moisture at the root and afforded an overhead sprinkling in the afternoon if the weather has been sunny.

C. Dampieri has a prostrate habit of growth, and shows to the best advantage when grafted on C. puniceus, a hard-wooded, erect-growing species, or on Colutea arborescens, an allied Papilionaceous species, having a similar habit. On the last named stock the grafted plants make fine ornaments in a few months, of two feet or more in diameter and come into bloom a week or two sooner than those grafted on C. puniceus. They flower very abundantly on Colutea, but in regard to the size of the flowers these do not equal those on C. puniceus. Cultivators who may wish to have flowering plants in the summer till winter arrives, should graft C. Dampieri on both stocks. Seeds of the stocks, and of the named species should be sown simultaneously in pans—those of the stocks at a good distance apart. As soon as the characteristic leaves appear grafting may be commenced, and the best method is by cleft grafting, the stocks being cut in wedge form, and the scions split upwards so as to fit them saddlewise. The knife must be thin and very sharp. It is scarcely possible to place a ligature around the point of union, nor is it required. When the union is completed the plants should be placed in pots of two inches in diameter, using coarse leaf mould and sand, and be further repotted in five or six-inch pots when established. Good drainage with crocks is essential at all stages, as is likewise much moisture in the air. It is well to sink the pots during the summer in a bed of fine gravel, coarse sand, or finely sieved coal ashes. A white flowered form of C. puniceus is in commerce

FREDERICK MOORE.

AGAVE NEGLECTA IN FLOWER.

The accompanying picture shows one of three Agaves neglecta (century plants) in flower by the side of the villa of Mr. E. Rollins Morse at Newport, R. I. These three are in a batch of eight plants which have been on this place the past eight years, and all are probably about fifteen years old. They began to show their flower stems early in June and had not opened all their flowers October 18, when this picture was taken. The stem of the plant shown in the picture

is twenty-two inches in circumference near the base and its height is thirty-two feet six inches. D. J. Coughlin, the gardener in charge here, informs us that no special treatment has been given those plants with a view to induce them to flower, except that they have never been watered other than by the rains that fell on them. And the vigorous and healthy condition of all this batch proves that this is all the moisture they require. Mr. Coughlin is in the picture standing up on the tub.

J. R.

Reports on nursery trade from Indianapolis are to the effect that a very large amount of fall planting is being done this year, of shrubbery and hardy ornamental material generally.

JACK ROSE DAHLIA.

So much has been said pro and con about this dahlia that I feel in duty bound, to at least, try to clear the atmosphere.

In the first place, instances have been brought to my notice where a distinctly different variety was sold for Jack Rose; also the old question of properly growing and handling the blooms has a great deal to do with Jack Rose dahlias as with any other flower. Last fall Jack Rose was condemned by a great many who had seen flowers from certain sources, and on seeing blooms grown by us could hardly conceive them to be the same variety.

Jack Rose was certified by the Pennsylvania Horticultural Society after having been critically examined and passed upon by expert committees at both the September and October meetings. It was then pronounced the finest crimson dahlia on the market. Several of the leading catalogue firms who are most exclusive and always insist on trying varieties out on their own grounds, waived this "try-out" after seeing the cut blooms in the open market and the dahlia growing on our place, and listed Jack Rose as the finest crimson florist dahlia in existence.

Now, after another year's growing, during which we had several acres, we can only add to the praise extended by us last year. It was the healthiest plant we had on the place, the first to get into bloom, and every flower was perfect the entire season; which, in our location, was a most trying one, owing to the extended droughts throughout the season. True the stems were not so long as they should have been, but were as long as Sylvia, recognized by all as a first-class flower with good stems, and later in the season Jack Rose stems averaged longer than many of the recognized standard varieties.

Almost every special order for cut flowers included Jack Rose. In justice to the many florists and seedsmen who have stocked up on Jack Rose, it is only fair to say that no attention should be paid to detrimental remarks made by inexperienced growers, or even experienced growers, who only know the variety after one year's experience under adverse conditions, in the face of the perfect flowers produced by competent growers under the conditions—probably the worst season we have experienced in the last 25 years, with the exception, perhaps, of 1895.

Another thing not to be forgotten is the forcing quality of Jack Rose, which is even today placed on the market and sold at prices far above chrysanthemums, as it has that brilliantly rich crimson that appeals to all, and cannot be found in the chrysanthemum; a decidedly richer shade than found even in the "Jaquemiot" rose. Perhaps one of its best qualities is largely responsible for the criticism of the color, and I wish to say most emphatically that it does not bleach one-fourth as badly as Lyndhurst, and yet Lyndhurst is the standard vermilion scarlet. Lyndhurst is inclined to show the open center if allowed to get old enough to fade, and the Jack Rose continues to un-

TWO GOOD DAHLIAS.

DAHLIA GEISHA

The varieties of Peony-flowered dahlias shown herewith are among the most satisfactory of the last sea-

DAHLIA BERTHA VON SUTTON

son's introductions. Bertha von Sutton is a fine tint of pink; Geisha is bright red and yellow. Both are

vigorous, profuse blooming, large flowered varieties, representing the best type of the peony-flowered section.

fold for days until finally there is nothing left at the center, this being absolutely full, and even then the petals which have become somewhat bleached can be removed and it is still a perfect flower. If Jack Rose blooms were cut in the same condition and with the same regularity as Lyndhurst, there would be no complaint that the color was not everything that could be desired. The only criticism made on Jack Rose has been length of stem and color, and, as I am only answering the criticism, I am not extolling the other merits of the flower.

Last spring W. C. Ward, Quincy, Mass., wrote me after Memorial Day, that Jack Rose was not only the best, but the only perfect cut-flower dahlia; that if it had a single fault he did not know it, adding—"we are getting \$1.50 per dozen for the blooms and cannot supply the demand." In conclusion I would simply quote a news item from Boston, Mass., under date of November 13th: "C. W. Ward of Quincy, is still sending to market some excellent Jack Rose dahlia blooms, which Thos. Pegler says are sellers."

L. K. PEACOCK,

Berlin, N. J.

SOME NEW SHOW CHRYSANTHEMUMS.

During the present season, which has not been so favorable to the chrysanthemum as some, we have had several opportunities of seeing some of the best of the most recent English productions in new chrysanthemums. They are as a rule presented in rather better form than the new French varieties. These latter when first shown

by the raisers on the Continent are lacking in the quality we know as "finish" and are often coarse and wanting in depth.

At Messrs. W. Wells' nursery many of the novelties are Australian seedlings sent over to England for trial. If they do well they are named and distributed and among some of the best at the time of our visit late in October, we noted Mrs. R. Luxford, a Jap. of medium size suitable for market purposes. It has long drooping florets, forming a globular flower, and slightly twisted at the tips; the color is golden chestnut with reverse of old gold. Alice Lemon is a grand Show flower of the typical Japanese build, large and spreading with an immense length of floret. The florets are drooping and of medium width. The color is rosy blush. H. W. Thorpe is a noble Incurved—a perfect flower of its class; petals regular, of good substance and finely imbricated. Color pure white. Bessie G. Payne is one of the heavily built types of Japanese with broad, grooved florets of considerable width. The flowers are deep and globular and very solid. Color inside of florets golden chestnut, reverse deep gold.

At Messrs. Cannell's many of the novelties are of French origin, principally Calvats. We noted here some fine additions to the show type, of which Hon. Mrs. Lopes is a grand example. An immense spreading Japanese with petals of great length, and curly at the tips; color, canary yellow. Mrs. F. W. Duck—A Japanese, very close and compact in build, florets of medium width; color amber, shaded pale purple, center golden. Hamilton

—An Incurved of colonial origin. A large flower with medium florets; pale lilac mauve, reverse silvery pink.

In W. J. Godfrey's stand at the N. C. S. show, we specially admired the following: Acquisition—Jap. with very long drooping florets. Blooms solid and deep in build with medium sized florets; color amber yellow. Laura Hill—A massive Jap.; color orange terra cotta. Mrs. Arthur Arnold—Jap.; rather broad florets slightly incurving; pale golden yellow. Mrs. W. Iggulden—A sport from Mme. G. Rivol. Florets rather stiff and intermingling; golden yellow.

Mr. Norman Davis showed grand flowers, probably the best in the show. They were Yellow Mrs. Chas. Beckett—A huge Japanese with broad florets; color clear primrose. Mary Poulton—A most attractive Jap. of the show type; color shell pink. Miss Lilian Hall—Broad incurving floret, forming a Japanese show bloom of the largest dimensions; color silvery rose. Henry Poulton—Jap., a deeply built bloom; color crimson. Mrs. Robt. Brown—A fine show Jap. with broad florets; deep yellow suffused with chestnut red.

At the meeting of the N. C. S. Floral Committee on the 3rd of November, there were several good show flowers staged. The under-mentioned were particularly fine: G. Hemming—Jap. of large size, long drooping florets; a closely built flower; color amaranth, reverse silvery. Francis Joliffe—An immense Jap.; florets very long and rather broad; centre golden yellow, passing to straw yellow towards the tips, shaded rose.

C. HARMAN PAYNE.

NEWS OF THE CLUBS AND SOCIETIES

THE NATIONAL CHRYSANTHEMUM SOCIETY, LONDON.

The great annual show of the National Chrysanthemum Society, took place on November 3-5, at the Crystal Palace. As is usual on the occasion of a large show of any kind, the area in front of the great organ—which forms a part of the central transept, was utilized, and the general effect was charming, and satisfactory likewise to the visitors, for the ease with which the flowers and plants could be inspected at close quarters.

There is always a desire to inspect the latest good thing in novelties and there was a considerable number of these. Then the miscellaneous groups of plants standing about in prominent spots on the floor and in which chrysanthemums of all kinds find a conspicuous place, were very good. One pleasing feature was introduced on this occasion worth mentioning, namely, prizes for chrysanthemum plants growing in 5-inch pots and therefore suitable as decorative objects in the dwelling and for market purposes.

In the open class for cut blooms of incurved chrysanthemums, the first prize for 36, fell to W. Higgs, Jr., of Fetcham Park. His best white was H. W. Thorp, the best yellow Mrs. B. Hankey; May Phillips was the finest yellowish-rose; W. J. Higgs the largest reddish bloom; Lady Isabel, pale blush; Clara Wells, yellowish pink.

In the class for 48 Japanese varieties T. Waller, gardener to H. C. Hammersley was the winner of the first prize. As winner of this prize, the exhibitor took also the Holmes' Memorial challenge cup, and the Dean Memorial gold medal. The finer varieties were Leigh Park Wonder, red; Mrs. A. T. Miller, white; R. Vallis, Mrs. Chalk, Mrs. R. H. Pearson, H. Perkins, Mildred Ware, President Viger, Geo. Mileham of 1908, Mrs. A. H. Lee, etc.

The president of the society offered a silver cup for the best 24, distinct, Japanese blooms, a prize taken by T. J. Brown, gardener at Gay's House, Holyport; his best varieties being Charles Tutt, Dr. Sharp, King of Crimson, Miss F. Lunn, Chevalier Damage, Golden Elise, etc.

In chrysanthemum blooms shown in vases the competition was not so good or so keen as usual.

Messrs. W. Wells & Co.'s prize for 6 blooms of Japanese varieties, distributed by this firm in 1908 and 1909, was awarded to Mr. Mease, gardener to A. Tate, Esq., Downside, Leatherhead. He had fine blooms of Rose Pockett, Pockett's Supreme, C. H. Totty, Mrs. L. Thorn, Merstham Blush and Leslie Morrison.

First class certificates were granted to Messrs. Wells & Co., for Mrs. L. Loxford, a Japanese variety of a chestnut-brown color; for Francis Jolliffe, straw yellow tinted with rose pink, and for Phosphorescens, bronzy-terra cotta. For Mr. J. H. Greswell Williams, a bright yellow, single flowered variety, shown by Mr. H. Tribe, and for George Hemming, a claret-colored Japanese, having a rosy tinge, the reverse of florets silvery sheen,

shown by Mr. G. Mileham, and for Mrs. Colles (single) of a crushed strawberry color, shown by A. W. Bird.

My readers will understand from the foregoing remark, that these apply solely to a very few of the most important features of this exhibition of the N. C. S.

FREDERICK MOORE.

NEW ORLEANS HORTICULTURAL SOCIETY.

The members of the New Orleans Horticultural Society were out in good force at the regular meeting on the 18th inst., this also being "chrysanthemum night." The committee appointed at last meeting to investigate and report on the new club house, reported progress and expected to have the deal closed by next month. To avoid any legal difficulties in this connection, it was agreed to have the society incorporated at once. One honorary member was elected and the members present agreed to try and bring more enthusiastic amateurs into the society as honorary members. The exhibition of chrysanthemums and roses while not very extensive was very choice.

M. Alost, the president, had American Beauty and Pink Cochet roses grown under glass. The stems, foliage and flowers were very fine and as this was Mr. Alost's first attempt at indoor culture he was warmly congratulated. John St. Mard had four varieties of chrysanthemums grown outdoors, very nice flowers, but a little lacking in finish. The Metairie Ridge Nursery Co. had about twenty varieties on exhibition, Mrs. Jerome Jones, Col. Appleton, T. Eaton, Nagoya, Golden Wedding and Buff Globe being up to the highest exhibition standard. Large vases of Bride, Bridesmaid and W. R. Smith roses were shown in fine form, the color of the Bridesmaids being superb. They also had a vase of fine American Beauties, the equal of anything coming to this market. Mr. Papworth gave a short interesting talk on the cultural methods adopted at his place. A large collection of blooms from outside were shown and the merits and demerits of each variety were freely discussed by the members present. A novelty here, the Dwarf Pearl tuberose, was also on the table from the same firm. These were grown in pots in the greenhouse and the flowers opened up nicely. R. Eichling had some fine long-stemmed Paper White narcissi, the first of the season. Mr. Eichling is very methodical in his work and he stated that these were in flower ten days earlier than last year. For the next monthly meeting it was agreed to have an exhibition of flowering and fancy-foliaged Christmas plants.

A committee was appointed to draw up a resolution of sympathy on the death of J. H. Menard, one of the charter members of the society, the same to be printed and a copy sent to the family of the deceased and also to each member of the society.

CHRYSANTHEMUM SOCIETY OF AMERICA.

The official list of awards at the joint exhibition of the American Institute of the City of New York and the Chrysanthemum Society of America, Nov. 10-12, has been received.

Special Prizes.

Chrysanthemum Society of America Prize—10 blooms, one variety. William Turner, gardener to M. C. D. Borden, Oceanic, N. J., silver cup.

H. W. Buckbee Prize—12 blooms, 12 varieties American seedlings, Elmer D. Smith & Co., Adrian, Mich., silver cup.

J. C. Vaughan Prize—Specimen bush plant, W. H. Waite, supt. to Samuel Untermyer, Yonkers, N. Y., silver cup.

Stumpp & Walter Prize—10 blooms of Miriam Hankey, Wm. Duckham, gardener to Mrs. D. Willis James, Madison, N. J., silver cup.

W. Wells & Co. Prize—6 blooms Pockett's Crimson, Thomas W. Head, supt. to Morton F. Plant, Groton, Conn., gold medal. Harry Turner, gardener to Howard Gould, Port Washington, N. Y., silver medal. Francis Milne, gardener to E. H. Weatherbee, Mamaroneck, N. Y., bronze medal.

W. Wells & Co. Prize—Vase of 12 sprays, single varieties, Geo. H. Hale, supt. to E. D. Adams, Seabright, N. J., silver medal. Elmer D. Smith & Co., bronze medal.

F. R. Pierson Company Prize—12 blooms in 4 varieties, 24-inch stems, William Turner, gardener to M. C. D. Borden, Oceanic, N. J., \$10.00.

Charles H. Totty Prizes—6 blooms, one variety, introduction 1909, Thomas W. Head, 1st, \$15.00. William Turner, 2d, \$10.00.

Skidelsky & Irwin Co. Prize—12 sprays Pompon varieties, 12 varieties. Francis Milne, gardener to E. H. Weatherbee, Mamaroneck, N. Y., \$2.00.

Foley Manufacturing Co. Prize—Best undisseeded seedling, 6 blooms, William Duckham, \$10.00.

Traendly & Schenck Prize—Best vase 12 blooms, Col. D. Appleton, Charles H. Totty, Madison, N. J., \$6.00.

William Duckham Prizes—12 blooms 12 varieties, William Turner, 1st, \$10.00. N. Butterbach, gardener to C. N. Bliss Estate, Oceanic, N. J., 2d, \$5.00.

New York Florists' Club Prize—6 blooms seedling or variety never before exhibited in this country. Geo. H. Hale, silver medal. Thomas W. Head, bronze medal.

R. Vincent, Jr., & Sons Co., of White Marsh, Md., were given a diploma for collection of pompon chrysanthemums.

Thomas Proctor of Lenox, Mass., N. Butterbach, William Turner and John F. Johnston were the winners of the big prizes for twenty-five blooms one variety, thirty varieties one bloom each, twenty varieties do., and ten varieties do., respectively. On the balance of the regular schedule prize list the following names appear as winners of first premiums: William Turner, seven firsts; Harry Turner, five; Scott Bros., one; N. Butterbach, two;

Geo. H. Hale, six; Thos. W. Head, five; Francis Milne, five; Jas. Bell, two; A. Bauer, one; Wm. Duckham, one; C. H. Totty, one; W. Dowlin, one; W. H. Waite, three; Jos. Kennedy, one; Max Schneider, one. The judges were Eugene Dailledouze, A. B. Cartledge, Peter Duff, Wm. Nicholson, W. Wells and Alex. Mackenzie.

DETROIT FLORIST CLUB.

The annual fall display of the local florist club brought out a large exhibit, very good in quality and quantity which was well staged at the commodious quarters of the Michigan Cut Flower Exchange. On such occasions the club distributes certificates and the judges J. F. Sullivan, Herman Knope and Frank Danzer made the following awards:

To J. Breitmeyer's Sons first for collection of plants, specimen Boston fern, specimen Schoelzeli do., general display of carnations, bronze chrysanthemums, collection fifty blooms of chrysanthemums and double violets. M. Bloy first for cyclamens, primroses, Lorraine and Taft begonias, Whitmanii ferns, roses Rhea Reid, La Detroit and general collection and pink chrysanthemums. Chas. Distelrath first for chrysanthemum plants. Robert Klagge first for lily of the valley and single violets, Gus. Taepke first for white chrysanthemums, J. F. Sullivan first for yellow and Fred Pautke first for Bonnaillon. Honorable mention was given to Fred Pautke for collection of Pompons, seedling white Pompons and vase of lupins; to Robert Klagge for cosmos, Van Boeslager for wallflower, R. H. Ellis for O. P. Bassett carnation, F. Damerow for White Enchantress, Chas. Distelrath for assorted carnations, Van Boeslager for seedling "Clara" and "Marshall."

On roses, Mr. Klagge far outclassed every thing about the same as Breitmeyers outclassed in carnations. Another very good showing was made by J. F. Sullivan with yellow Chadwick. General interest was aroused through Van Boeslager's colored seedling carnations. The appearance of the former gave strong evidence of vigor and abundance.

FRANK DANZER.

CONNECTICUT HORTICULTURAL SOCIETY.

The November meeting of this society was held on the 19th inst., at the County Building, Hartford. Six persons were admitted to membership. Votes of thanks were extended to Arthur T. Boddington and the Stumpp & Walter Company, of New York, for their contributions to the success of the two autumn exhibitions of the society, by their offerings of special prizes. A short but very enthusiastic discussion ensued on the value and need of the parcels post. President Huss deplored the lack of this great public benefit, and spoke of the immense advance some of the nations of Europe have made over the United States in this respect. The secretary was appointed a committee of one to draft a set of resolutions, and bring them forward at a future meeting, expressive of the sentiments of the Connecticut Horticultural Society on this subject.

Alexander Cumming, Jr., our former

popular secretary, who was assistant to Peter Zuger in the horticultural department of Elizabeth Park, Hartford, and who has lately been employed on the Exposition grounds at Seattle, Wash., is to return to Hartford, having been appointed head gardener of the park mentioned, to succeed Mr. Zuger, who lately resigned and has become a professional florist and landscape gardener at South Manchester.

Our next meeting, set for December 17th, will be the annual meeting for the election of officers for the next year. The society is about to close one of the most successful years in its history.

GEORGE W. SMITH, Secretary.
Melrose, Conn., Nov. 23, 1909.

SOCIETY AMERICAN FLORISTS AND ORNAMENTAL HORTICULTURISTS.

Retail Florists' Delivery Association.

Pursuant to action of preliminary meeting of retail florists held at Chicago, the following have been appointed a committee on organization of a Retail Florists' Delivery Association: J. A. Valentine, Denver, Colo. (chairman); Wm. F. Gude, Washington, D. C.; Philip Breitmeyer, Detroit, Mich.; W. J. Palmer, Buffalo, N. Y.; E. Wienhoeber, Chicago, Ill.; John Bertermann, Indianapolis, Ind.; W. L. Rock, Kansas City, Mo.

Registration of Cannas.

Public notice is hereby given that the Conard & Jones Company of West Grove, Pa., offer for registration the plants described below. Any person objecting to the registration or to the use of the proposed names is requested to communicate with the undersigned at once. Failing to receive objection to the registration the same will be made three weeks from this date.

Description—Green foliage, strong grower, moderate height, huge heads of fiery scarlet with yellow throat and narrow rim of yellow around the petals. Name—Halley's Comet.

Description—Green foliage, vigorous grower, 4 to 5 feet, flowers extra large, petals broad, color La France pink. Name—Mrs. Alfred F. Conard.

Description—Green foliage, 6 to 7 feet high. Enormous flowers, beautifully wavy petals, orange scarlet, wondrously flaked with gold. An improvement over Mrs. Kate Gray. Name—Mrs. Carl Kelsey.

W. N. RUDD, Sec.

Date—November 20, 1909.

NORTH SHORE HORTICULTURAL SOCIETY.

The North Shore Horticultural Society took final action at its meeting at Manchester, Mass., Nov. 19, looking to its incorporation, and elected the following officers: James Salter, president; Dr. W. H. Tyler, vice-president; James Macgregor, treasurer; James Scott, librarian; John D. Morrison, clerk; William Till, Joseph Clark, William Swan, Eric H. Wetterlow and George Gordon, executive committee. The speaker of the evening was John W. Duncan of Boston, president of the American Association of Park Superintendents.

CLUB AND SOCIETY NOTES.

The sixth annual meeting of the American Breeders' Association will be held at Omaha, Neb., on December 8, 9 and 10, 1909; headquarters at Hotel Rome. Friday, Dec. 10th, will be devoted mainly to plant breeding.

The preliminary prize schedule of the American Rose Society for its coming exhibition at the American Museum of Natural History, New York city, has been distributed. The exhibition will be held March 16, 17 and 18, 1910. The list of valuable special prizes now numbers eight and more are coming.

The annual dinner of the Gardeners and Florists of Andover, Mass., was held Friday evening, Nov. 12, at Phillips' Inn. The tables presented a beautiful appearance. After the dinner, which was well served and amply enjoyed by all, several speeches were made by Messrs. Lynch, Johnson, Millet, Playdon and Brown. A motion was adopted authorizing the florists to consult with the Andover Village Improvement Society and the Andover Guild in regard to possibilities of holding an amateur flower show in August, 1910. This is a movement which will without doubt create a great deal of interest in the town.

Obituary.

H. F. A. Lange.

As we go to press the news comes to us of the death on Tuesday night, November 23, of H. F. A. Lange at his home in Worcester, Mass. Much that we should desire to say regarding Mr. Lange must be deferred until our next issue, but we must here express on behalf of the Boston fraternity a sense of great loss, for Mr. Lange was, in the days of his full vigor and health, an integral part of the line of public-spirited, broad-minded floriculturists to whom Boston and eastern New England were indebted for much of the prestige that gave this section a prominent position in American horticulture. He was a self-made man and the leading figure for a generation in the florist trade of Worcester. He has been in failing health for some time. The management of the business has during his illness devolved upon his two sons, who have carried it on with commendable ability.

J. H. Menard.

The members of the New Orleans Horticultural Society and a large circle of friends were startled at the news of the death of J. H. Menard, which occurred on the evening of Saturday, the 13th inst., after an illness of only a few hours' duration, as the result of a paralytic stroke. He had been in business in New Orleans for over 30 years and was universally liked. Bright and cheerful by nature, his presence radiated sunshine in every assembly and the society was often indebted to him for his truly wise council. He was 63 years of age and is survived by a widow and several children, who will carry on the business. A large delegation of the society members were present at the funeral to show both their respect for the deceased and their sympathy for his family.

Samuel J. Thompson.

Samuel J. Thompson, a retail florist of Louisville, Ky., died Nov. 8. He was born in Roanoke, Va. and was the son of the late George Thompson, who for many years conducted a florist business under the name of Geo. Thompson, Sr. & Sons. He leaves a wife, one son, two brothers and a sister all well known to the trade.

Landscape Gardening

PROF. CRAIG

A course for Home-makers and Gardeners taught by Prof. Craig and Prof. Batchelor, of Cornell University.

Gardeners who understand up-to-date methods and practice are in demand for the best positions.

A knowledge of Landscape Gardening is indispensable to those who would have the pleasantest homes.

Important Announcement To Carnation Growers

At the earnest solicitation of a large number of commercial and private growers, the Cottage Gardens Company has decided to disseminate this year the two famous carnations

MRS. C. W. WARD and ALMA WARD

Two varieties which are well known to all the leading growers of the country. Four years test in the New York market has demonstrated their popularity and good staying qualities. For the past three years we have been growing from fifteen to twenty-five thousand of each, during which time they have always **COMMANDED THE HIGHEST MARKET PRICES**, and at no time has the supply been equal to the demand.

On the exhibition table they have taken the **HIGHEST HONORS**, and we believe it is safe to say these two carnations **STAND WITHOUT AN EQUAL**.

INVITATION

We extend a cordial invitation to all those interested to visit our establishment, where they will have an opportunity to see them growing and compare their good points with other standard varieties grown under the same conditions.

MRS. C. W. WARD

MRS. C. W. WARD is a perfectly formed flower with full centre; color deep pink several shades lighter than Lawson, deeper than Winsor; having strong, erect stems 24 to 36 inches in length. A vigorous, healthy grower and has never shown disease of any kind.

A very early and free bloomer, producing fine flowers as early as September 1st, which bring from twenty-five to fifty per cent more than any other variety on the market.

The keeping qualities of this variety are remarkable. Several shipments of blooms sent to Europe reached their destinations in perfect condition, and wherever exhibited it has always been the last to show signs of wilting.

AWARDS

Society of American Florists, Silver Medal, Boston, 1906; The Craig Cup for Best Seedling, Philadelphia, 1906; The Lawson Bronze Medal, Washington, 1908; The Horticultural Society of N. Y. Silver Medal, Sweepstake prize for best 100 blooms, New York, 1909; The Horticultural Society of N. Y. Diploma, for best new variety, New York, 1909.

Rooted Cuttings Ready December 15th

\$2.00 per 12, \$12.00 per 100, \$100.00 per 1000, \$95.00 per 1000 in lots of 2500. 25 at the 100 rate, 250 at the 1000 rate.

ALMA WARD

This beautiful Carnation is pure white except during dark weather when it shows delicate splashes of pink similar to the Cattleya Orchid, increasing its popularity.

ALMA WARD is the largest and most fragrant Carnation ever grown, producing perfect flowers $3\frac{1}{2}$ to $4\frac{1}{2}$ inches in diameter on strong, erect stems 36 to 42 inches in length.

This most remarkable variety takes the same place among carnations as the American Beauty Rose among roses, and has, during the past four years, been awarded numerous prizes including the following:

The Lawson Silver Medal, Toronto, 1907, (No Gold Medal having been awarded); The Lawson Gold Medal, Washington, 1908; The Society of American Florists Silver Medal, Washington, 1908.

Rooted Cuttings Ready January 1st

\$3.00 per 12, \$5.00 per 25, \$9.00 per 50, \$15.00 per 100, \$35.00 per 250, \$85.00 per 500, \$120.00 per 1000.

Seed Trade

THE AMERICAN SEED TRADE ASSOCIATION.

Some remarks by W. Atlee Burpee at the Lonsdale banquet in Philadelphia.

In the few minutes I shall talk to you tonight, I can give but a brief outline of the history of the American Seed Trade Association and what it has accomplished. The first meeting was held in New York city at the Gilsey House, June 12th to the 14th, 1882. R. A. Robbins of Wethersfield, Connecticut, familiarly known to the trade in the later years of his life as "Deacon Robbins," was elected chairman, and thus became the first president of the association.

Of the 33 members who attended the first convention 19 are dead, while of the remaining 14 but 7 are now in active business affiliated with the seed trade. A few among the leading seedsmen of the day held aloof, evidently believing they were sufficient unto themselves, but the association went on its way, growing in membership and proving its usefulness, until now it has 168 active members, while not more than two or three representative houses are outside of its fold, and to these the glad hand of fellowship is ever extended, with the invitation, "Knock and it shall be opened unto you."

The advantages of organization and concentration of energies are too well appreciated to require argument. We have seen what aggregations of capital have accomplished, and the tremendous power they wield. We have seen what organization has done for the working men of the country. According to statistics furnished by the Manufacturers' Association, less than 10 per cent. of the wage earners of the country are organized, yet this 10 per cent practically dominates the labor market, and in many instances dominates completely important industries. The founders of the American Seed Trade Association appreciated the power of organization in securing desired and beneficial results, and in preventing undesirable and harmful measures, detrimental to their legitimate interests.

A few disgruntled members of the trade groping for an excuse for not joining the association have asked, "What has it done, what good is it?" If the annual convention of the association had done nothing more than to make the members acquainted with one another it would have a valid excuse for its existence.

The moral force and effect of the Association of a body of men, whose aim is to elevate and improve their business, even if they accomplish nothing but to meet and discuss matters of mutual interest and exchange ideas, would be quite sufficient to justify such an organization, but the American Seed Trade Association has done more than this. It has accomplished practical results, has secured the enactment of much needed and useful legislation and accomplished the defeat of more or less vicious and unnecessary measures. It would be pleasing to give the full record of the

Michell's Seasonable Seeds

VERBENA SEED

Michell's Mammoth Fancy Strain. This is without doubt the finest strain ever offered to the trade, combining large size, purity of color and free flowering qualities.

Also all other varieties as listed in our Wholesale Catalogue a copy of which is yours for the asking.

MOSS, Green Lump. In Bags Containing About **75c per Bag**
One Barrel

WATSONIA ARDERNEI

Florists, it will pay you to grow some of these bulbs. The flower is pure white, produced on stems about five feet in length. For cut flowers, they have proved especially valuable, lasting several days in a cut state, and are very decorative. The bloom and habit is similar to that of the Gladiolus, coming into full bloom about Easter, when its pure white blooms are of great value.

Immediate ordering advisable at the special low price of \$6.00 per 100.

Henry F. Michell Co. 1018 Market Street **Phila.**

NOTES.

San Francisco, Cal.—A. Nauvramont, formerly with the May Seed Co. has started in business for himself under the firm name of the California Seed Co.

Pasadena, Cal.—The Ross Seed Co., 148 W. Colorado street, has recently been purchased by Wm. Neil Campbell, Mr. Campbell who has been connected with the concern securing control by purchasing the interest of his partner J. W. Ross.

CATALOGUES RECEIVED.

St. Przepelski, Plock, Polonia, Russia.—Price list of Tree and Shrub Seeds.

Ernst Benary, Erfurt, Germany.—List of seed novelties for 1910, including asters, verbenas, lobelias, gerberas, etc. Also Begonia gracilis Prima Donna.

NEWS NOTES.

York, Neb.—Joseph Hackethal has purchased a portion of the Harrison nursery property.

Port Arthur, Tex.—C. H. Crawford of Minnesota is looking over the ground, with a view to establishing a large nursery here.

paper last fall and winter and a number of parties
responded and were well pleased with the results.
This year I have similar roots for sale. Let me
hear from you. Also **RHUBARB** roots for
forcing.
Warren Shinn, Nurseryman, Woodstown, N. J.

FORCING GLADIOLUS

Many florists plant these in boxes, or among their carnations, in the winter. They are excellent for decorative purposes and realize good prices, either whole-sale or retail. Gladiolus are a good catch crop and take up but little room. The following are the best for this purpose.

Gladiolus Gandavensis Hybrids

America. The flowers, which are of immense size, are of the most beautiful flesh-pink color. \$3.25 per 100; \$30.00 per 1000.

Augusta. The florists' best white Gladiolus. First size bulbs, 1 1/4 inches and up. \$2.00 per 100; \$18.00 per 1000.

Bulbs, 1 1/2 to 1 3/4 in., \$1.75 per 100; \$16.00 per 1000.

Shakespeare. White and rose. \$4.75 per 100; \$45.00 per 1000.

May. Pure white, flaked rosey crimson; the best forcer. Selected bulbs, \$1.75 per 100; \$15.00 per 1000.

Brenchleyensis (true.) Fiery scarlet. Selected bulbs, \$1.50 per 100; \$13.00 per 1000. First size bulbs, \$1.25 per 100; \$10.00 per 1000.

Boddington's White and Light. Extra selected bulbs, 1 1/4 in. and up. \$1.50 per 100; \$14.00 per 1000.

Bulbs, 1 1/2 to 1 3/4 in., \$1.25 per 100; \$10.00 per 1000.

American Hybrids. A mixture of the choicest varieties of Gladiolus in cultivation. \$1.00 per 100; \$9.00 per 1000.

Gladiolus, Colvillei and Nanus (type)

Plant some of these among your carnations; they will come in handy at any time.

Peach Blossom. The most beautiful of all the Colvillei type of Gladiolus; the color is a lovely soft pink, on the order of the Killarney rose. \$0.90 per 100; \$8.75 per 1000.

Blushing Bride. Flowers are large, pure white, with delicate pink spot. Useful for early forcing. \$0.75 per 100; \$6.00 per 1000.

The Bride (Colvillei alba). This lovely white miniature Gladiolus makes a useful cut flower for early Spring use; will stand forcing. \$0.65 per 100; \$5.00 per 1000.

Ackermanii. Salmon-orange, with white blotches, edged scarlet; very pretty. \$0.75 per 100; \$6.50 per 1000.

Remember you may deduct 5 per cent if cash accompanies order.

Of Interest to Retail Florists

Robert MacMillan & Co. of Greenwich, Conn., have won their suit against James Everard the millionaire brewer for the price of floral decorations provided for the birthday party of Everard's daughter. The sum of \$1,115 is awarded. The bill was disputed on the ground that it was exorbitant. We congratulate Mr. MacMillan and the florist trade on his vindication.

It will be very welcome news to the flower growing fraternity, and to the retail trade remote from New York city as well, to learn that the Cottage Gardens Company have decided to remove the restrictions from those two superb carnations, Alma Ward and Mrs. C. W. Ward, and offer rooted cuttings to the trade. The dissemination of these carnations, which have continuously brought the highest price in the New York market, brings a great acquisition within the reach of the carnation growers and, no doubt, the response will be a lively one.

NEW ORLEANS FLOWER MARKET.

A few cool nights have had a wonderfully bracing effect on all greenhouse stock. Roses particularly have felt the benefit and are beginning to show their class. The cut of outdoor roses has been considerably shortened and the indoor stock will now have its innings. Trade in the stores continues brisk and many important orders are on the books for delivery in a short time. Weddings and social functions are keeping everyone busy and the season bids fair to be a good one. Chrysanthemums sell well at good prices. My Maryland rose has made a hit and the best buyers ask for it in preference to any other pink. T. Eaton chrysanthemums from the Metairie Ridge Nursery Co. are wonderful and readily retail at \$10-per dozen. The J. Steekler Seed Co. report a lively demand for plants in their catalogue trade.

LONG DISTANCE PHONES, 2617-2618 MAIN.

Flower Market Reports.

BOSTON A very welcome spurt of trade is on as the week gets under way. Thanksgiving Day is undoubtedly responsible directly and indirectly for most of it. The business appears to be in general good shape, all lines of material and all classes of trade seeming to feel the impulse. The uplift seems to have struck the high class material most effectually, gardenias, cattleyas, American Beauty and special grades of Killarney roses making the greatest advance in value. Violets, as usual at Thanksgiving are also in for a little prosperity. There are some fine Eatons and other large-flowered late chrysanthemums in market which move at good figures.

There was very little **BUFFALO** life in the market the past week, but no more was expected than other years the week preceding the first holiday. Chrysanthemums were the main factor. They came in in heavy supply and there was very little outlet until the end of the week, when Friday and Saturday helped to clean up the week's surplus. Too much of a mixture of snow and other things which and better demand for everything still, was no doubt the cause. Roses and carnations dropped off in supply and better demand for everything was had on Saturday. Violets, lily of the valley, peas, narcissi and other material were had in fair supply. With a clean market to begin with on Monday a good week's trade is looked

The outlook for Thanksgiving from the florists' standpoint is considered quite satisfactory at this writing. The quantity of flowers is supposed to be sufficient to meet all demands and the prices are not expected to reach any very unusual height. Beauties continue the scarcest and all grades seem to be equally in demand. This may be partly accounted for by the fact that some of the large growers are disbudding so as to throw the crop into the holidays. Chrysanthemums are at their height in the late varieties and everyone seems fairly well satisfied with results. The weather will be a great factor with the trade of the next ten days. A cold wave is just arriving at this writing, for summer weather has given way to a cold sleet and every indication that the cold spell so long looked for by the florist will be here before this is in print.

Demand is excellent and **DETROIT** stock is none too plentiful—just that supreme condition of happiness when supply and demand meet on an equal basis. One or two growers of large chrysanthemums did not devote themselves to that feature this year and although real large blooms are not in great demand as a rule the absence of their product is much noticed. So far we have had satisfactory price conditions locally and it is to be hoped that we may be able to maintain this equilibrium all the season through.

Luxury and Exclusiveness in FLORISTS' RIBBONS

Are demonstrated in our new color combinations for Violets, Orchids and Roses. Some of the loveliest and most changeable shades ever created.

In effective originality these ribbons have no equal for corsage work. One of these most popular patterns is "Supreme" a taffeta in two widths No. 7's—65c and No. 9's—85c.

Pattern Killarney has been and is still one of our best sellers, almost every florist in the United States and Canada having bought from us, ordering again and again.

Pattern My Maryland (same quality as Killarney) another new shade this season is proving equally attractive. Quality and finish the best our manufacturer can produce.

PRICES: No. 7, 65c; No. 40, \$1.65; No. 60, \$2.35; No. 100, \$2.65

INDIANAPOLIS

Trade is still on the increase here with plenty of stock coming in. The weather has been extremely warm for this season of the year and is bringing on stock very rapidly and indications are that the chrysanthemum season will come to a close about two weeks earlier than usual. The late varieties have been in for about ten days and some of the growers will be entirely cut out by Thanksgiving. Roses are fine

and are arriving in large quantities, but the demand at times is light and it is hard to clean up. Beauties and Killarney are having the heaviest call. Lily of the valley and orchids are much used in bridal bunches and having a good run. Easter lilies are nearly entirely off the market. Quite a quantity of peas are in and meet with brisk sales. Nurserymen are quite busy this fall planting shrubbery and hardy stuff.

Flower Market Reports.

(Continued from page 759)

The week opened with improved conditions and an appreciable increase in the demand for all kinds of cut flower stock. Prices have advanced generally and clearances were more easily effected than for some months past and all this, notwithstanding a general increase in the cut of small roses, due to the warm weather, and a crop coming on. Beauties and Richmonds were the exceptions, the supply of these roses being lighter. Carnations are not so very plentiful, unless they are being re-

served for Thanksgiving trade. Orchids are bringing high prices, some selling at a dollar each. Lily of the valley is a good seller with quotations firm. The chrysanthemum supply is as heavy as it ever has been Thanksgiving week, but they move at fairly good figures. As always, Thanksgiving business is an unknown quantity and if stock is not too plentiful ought to be good—weather permitting also. The price of violets is much below last year's, and it is not likely that they will go much higher than present quotations. Good gardenias sell readily.

PHILADELPHIA Sluggish conditions prevailed again last week.

Chrysanthemums came in in shoals, many of them appearing as if they had been held back for the Army-Navy

game—which never came. Many more were evidently intended for Thanksgiving; but refused to hold out that long. Such stock of course, having no regular market, went for anything it would bring—very little as a rule. American Beauty market picked up considerably towards end of week, and at present writing is showing quite some activity. Richmond is improving in quality with demand excellent. Maryland is the best pink, with Killarney a close second. White Killar-

Flower Market Reports

(Continued from page 701)

ney is the best in whites although there are some very fair Brides around. Enchantress, Bountiful, W. Perfection and Beacon are the carnation leaders, and show marked improvement. Orchids still scarce and high. Not so many violets coming in, quality very good. Lily of the valley normal—fine quality and enough for all demands. Gardenias took quite a jump in prices. Crop fell off. No slackening in demand. Thanksgiving orders in the shipping trade are now going out, and it looks as if an unusually good business was being done with distant points. Holly and other Christmas greens being looked up—some good early orders already reported as placed.

Twin Cities report business as very good. Chrysanthemums are sufficient except in time of football games, when there is generally a large demand in gold and maroon. Carnations are just about filling the demand, while there is still a shortage in violets.

The Pennock-Meehan wholesale house in Washington, D. C., has a new manager in the person of M. J. Moore. We think the firm is to be congratulated in securing the services of Mr. Moore.

"Please discontinue my advertisement in your paper, as all my violet plants are sold."

Nov. 18, '09.

CHRYSANTHEMUM SOCIETY OF AMERICA.

Address of Pres. Elmer D. Smith at the Annual Meeting in New York.

This is our eighth annual exhibition. It hardly seems possible so many years have passed since our initial assembly at Chicago. Well do I recall the many new and wonderful varieties then displayed for the first time. The majority of these have been cast aside and their places filled by newer kinds. This constant trend onward has taken place for years, and thus it will ever continue so long as we bend our energies in this direction.

We are mortals of emotion and our enthusiasm of today is tomorrow focused upon a newer and better creation. It is a happy thought and just as it should be. Our aspirations for greater achievement, with power and energy to execute these desires, are the stepping stones to success and mark the epochs of chrysanthemum history. We cannot mark time; our course must be onward and upward. We have not reached the limit. We must have larger and bolder flowers for our exhibitions; a race of commercial sorts which carry foliage to the bloom and hardier and earlier kinds to withstand our northern winters. Such a type would be of great value to all lovers of border plants.

In accepting the Presidency of this society a year ago, it was only the desire to do my part toward furthering the interests of so worthy an organization that induced me to consent. I fully realize the year has passed without achieving all that is desired. Financially we are in about the same condition as a year ago, and the membership has not been greatly increased. These matters are of vital importance and need our careful consideration, with the hope of devising some plans to enhance our treasury and increase our membership. There are too many private and commercial growers who hold themselves aloof. Our committees pass upon the new comers, pointing out those best suited for our purpose. This work alone is of sufficient importance to commend this Society to every grower. The two dollar annual dues is certainly a trifling consideration, when the private gardener from the reports of these committees can select for exhibition purposes and the florist the best commercial sorts. There ought to be some way to reach every chrysanthemum grower and impress upon them our desire for their hearty co-operation.

A very interesting article appeared in last February's number of Technical World upon parasitic insects, their culture and distribution under the direction of University of Kansas. This article suggested to my mind a possibility of finding a remedy for *Lygus pratensis*, commonly known as the tarnished plant bug. Letters were written the department of Agriculture at Washington and the University of Kansas but of no avail. As far as I

know we are still in need of an effective remedy for these persistent and destructive little insects. A parasitic fungus is now propagated and distributed among the western farmers to depose the chinch bug. The name chinch bug is often applied to the tarnished bug, but this is erroneous, as the former is distinct and known in entomology as *Blissus leucopterus*. Throughout the Middle West the tarnished bug is found everywhere during the summer months, puncturing the stem and extracting the sap from a large number of plants and weeds. The chrysanthemum and aster are especially favorite feeding places. It is to be hoped our institution of research will discover a remedy, either in the form of parasitic fungus or a parasitic insect that will keep them under control.

There are a few suggestions which I will submit for your consideration. It seems to me the President should be empowered to appoint special committees to examine and pass upon seedlings at exhibitions in localities which are not thus favored, provided the interest in seedlings or the exhibits are likely to be of sufficient importance to demand such appointments—the term of office of such committees to expire at the close of the exhibitions they are to serve. An exhibition of considerable magnitude, providing classes and premiums for seedlings which would attract exhibits from those interested, may be launched upon us at any time in such cities as Pittsburgh, Baltimore, St. Louis, Rochester, Detroit and Cleveland. You may deem it advisable to place some limitations upon the President's power in this matter to guard against an action which would be regarded as favorable to self-interests or that of intimate friends.

Another suggestion is that the Chrysanthemum Society become a standing committee of the Society of American Florists and Ornamental Horticulturists. It is evident that such an affiliation would minimize the expense and would better serve the trade. In taking such a course our records would be turned over for safe keeping, and the clerical functions performed by the secretary of the Society of American Florists and Ornamental Horticulturists. This suggestion came to me so late that I have not looked up the conditions under which such an affiliation could be enacted, so that definite action can not be taken at this time.

Since our last meeting we have been deprived by Divine Providence of one of the greatest geniuses of American horticulture, the most ardent lover and cultivator of the chrysanthemum. The familiar countenance and figure of John Thorpe we shall see no more; his pleasant address and enthusiastic admiration for Nature's gems will lend no charms henceforth. A devoted student whose eye detected the super qualities at a glance, he loved flowers and his enthusiasm knew no bounds. Always elated when fortune smiled on the efforts of others, he tried to make it possible for the world to have better things. He was the first to enter the show on the opening day and the last to turn away the closing night. His was not a passing admiration. You would see him all day long, often with a flower in his hand or possibly tucked away in his hat. It might not be a

WANTED

A bright active man to sell seed direct to market garden trade; one that has experience in selling seed and growing vegetables; also to be quick in doing up seed orders and waiting on customers. Give age, experience, references, and salary expected. Must be ready for work at once. Address Seeds, care HORTICULTURE PUBLISHING COMPANY, Boston, Mass.

WANTED—A good grower for general stock—roses, carnations, bedding plants, etc., in modern, well-equipped place in New York state. Permanent situation for right man, single, at \$15.00 per week with room. L. J. care **HORTICULTURE**.

WANTED—Grower of orchids and stove plants. Married man preferred; \$60 a month with cottage. C. N. E., care **HORTICULTURE**.

SITUATIONS WANTED

SITUATION WANTED—Carnation, violet grower; general stock; good references. J. P. Hersey, 725 South St., Roslindale, Mass.

MISCELLANEOUS WANTS

WANTED—Rose plants of any kind and seedling perennials, cheap. Melrose Garden Co., 90 Melrose St., Providence, B. I.

A TALK ON THE CHRYSANTHEMUM.

Abstract of the remarks by W. H. Waite before the Horticultural Society of New York.

Mr. Waite explained that on account of being busy with flower shows and similar matters, he had been able to prepare only a few rambling notes. He described the different sections of the chrysanthemum, as follows, showing examples of each class:

Section 1. True incurved.—This class is not seen so much in this country, as the flowers are not quite large enough to suit the demand here, but is very prominent in all exhibitions in England. The flowers have strap-shaped petals, curving regularly inward, and forming, when mature, an even spherical outline. A very good example of this section is the old variety Major Bonaffon.

Section 2. Japanese varieties.—This is the section to which belong the large varieties having long, loose petals, which sometimes are intertwined, as in the variety Nellie Pockett; and sometimes long and straight, as in F. S. Vallis. All the large varieties go into this section; in fact, the variations are so many that it has been found necessary to subdivide this section into two groups, known as the Japanese incurved and the Japanese reflexed. Good examples of the former are Col. D. Appleton and Merza, and of the Japanese reflexed, Mrs. Knox. Here the petals turn back horizontally and droop down toward the stem.

Section 3. Reflexed.—This section is entirely opposite to the incurved, in that the petals recurve from the centre of the flower to its base. Few of this section are grown in this country today.

Section 4. Anemone varieties.—The flowers in this section have broad strap-shaped ray petals, which stand out stiffly and horizontally, forming a regular collar to the numerous disc florets of the centre. The variety Garza is the most common example of this, and makes a beautiful plant in any form; it is also a splendid cut flower.

Section 5. Japanese anemones.—This section is similar to the previous one, the centres being much the same. The ray florets show considerable variability, in some being long and drooping, while in others they are curiously twisted.

Section 6. Pompons.—Here belong the really hardy varieties of the gardens. The heads vary from flat to spherical, having very short erect or reflexed petals, which in some varieties are fringed and toothed. These are most desirable plants and really everybody's flower. There are some beautiful varieties and their names are legion. They are perfectly hardy, easy to cultivate, and should be in every garden.

Section 7. Pompon anemones.—As the name indicates, this section resembles the anemone section in having the disc florets quilled and the ray florets flat, which are short as in the pompons.

Section 8. Single-flowered.—This section, in my opinion, contains some of the most beautiful flowers. It is only a few years since we have taken to them in this country, but they are becoming more popular every year.

HARDY ASTER "ANNIE."

PERENNIAL ASTER "ANNIE"

This profuse blooming new variety adds one more to the list of hardy asters now recognized as indispensable for the late fall garden. Long after all other hardy herbaceous material has finished its work for the

season these sturdy "Michaelmas Daisies" flaunt their clouds of bloom undismayed by November's frosts. The picture shows a single plant blooming in the Farquhar nurseries, which last spring was in a 2½-in. pot.

Characteristic of this section is the daisy-like flower, having a single row, or sometimes two or three rows, of ray flowers. No single should have more than three rows of such flowers. Commercial varieties should have more than one row, for in packing some of them are sure to be bruised or broken, and in the forms with a single row this damage makes the flower worthless; if there are two rows, the flower is not so liable to damage, and if one or two of the ray flowers are damaged they can be removed.

There are great possibilities in the cultivation from seed of the flowers from this section, treating them as half hardy annuals. A friend of mine procured a packet of seed last March, sowing the seed in the greenhouse at the time of starting his other half-hardy annuals. In due time they were transplanted, and when large enough transferred to the herbaceous border. They grew remarkably well, and from September up to quite recently they were the most beautiful plants in the garden. They were low and bushy, thus not requiring staking, and were a mass of blooms, every one a different color. When these early hardy singles become better known, I predict that they will be the most popular annual grown. They come into flower at the proper time of the year, just when other annuals and herbaceous plants are on the wane. These single chrysanthemums also make beautiful objects when grown in pots, either as specimens or for cut flowers.

Section 9. Spidery and fantastic varieties.—The members of this section

are merely curiosities. A comparison of the varieties Golden Shower and F. S. Vallis shows the variability and possibilities of the genus.

KILLARNEY DROPPING LEAVES.

I would like a few suggestions in the management of Killarney roses. We have had no trouble in producing the very best plants, cutting flowers with 1½ to 3½ ft. stem, disbudding so that the first crop lasted from Aug. 24 to Nov. 1st. A fair amount of young growth is coming on and still the old leaves are hardening and falling, out of all proportion to the good of the plants. The soil has been kept reasonably moist; syringing about once a week; night temperature about 60 degrees; feeding was done in small doses when the crop was on. If you know of anyone able and willing to give any pointers on this subject kindly let me know through HORTICULTURE.

New York.

J. P. A.

J. P. A. need not be unduly alarmed about his Killarney's dropping their leaves if they are otherwise doing as well as he says. It is characteristic of this variety to shed their old leaves, especially in dark weather. The best remedy seems to be to feed liberally and to keep them producing new leaves so fast that they can well spare any old ones they lose. Of course between crops a little extra care in watering is necessary but they should never be allowed to become dry.

Montrose, Mass.

E. HOLMES.

CHICAGO NOTES.

A Great Exposition.

At the Tribune's great Land Exposition at the Coliseum, now open, an interesting feature is the demonstration of what can be accomplished by irrigation in an arid country. The displays of fruit and vegetables from the irrigated sections are certainly grand and the free lectures with the aid of stereopticon views are of great educational value and are largely attended. The southern cotton exhibits are extremely interesting. Michigan has a large display of fruits and vegetables and the Western Michigan Development Bureau has enough produce displayed to make a whole show of itself.

Grain of all kinds to the extent of seventy bushels is here and the manager will tell you it was Michigan seed peas that took the first prize at the Detroit show.

General News Notes.

The Chicago Flower Show cleared about \$3,000 above all expenses.

November has made a record as the warmest November in 38 years.

A new retail store in the Masonic Temple and known as the Masonic Temple Floral Shop is the latest addition to the loop district. Geo. Visas is proprietor and the store has entrance on both Randolph and State streets.

Last week a man carelessly left his horse untied and the animal damaged a street tree by eating a large piece from it. At City Forester Probst's recommendation the owner of the horse was arrested and fined \$5.00 and costs.

The Freeport Floral Co. of Freeport, Ill., recently incorporated with Louis Bauscher, sec'y and genl. manager, has taken over the business of Louis Bauscher, established in 1883. They have erected during the past season four houses and contemplate extensive additions next season. Their new store in the business section of the city is just completed and they will build conservatories in connection next season.

Personal.

Anton Then is very ill with typhoid fever.

Henry Smith, Grand Rapids, Mich., is taking a trip to Texas and looking after his interests in fruit and vegetable farms there.

S. F. Willard, Jr., son of S. F. Willard, seedsman from Weathersfield, Conn., has taken a position in the office of Vaughan's Greenhouses at Western Springs.

Visitors in Chicago: H. E. Kidder, representing Ionia Pottery Co.; T. Mellstrom, representing Sander & Sons, St. Albans, Eng.; Alfred Mysterfeld, representing C. G. Gilbert, Oregon, Ill. The latter will build additional houses in the spring: Mr. and Mrs. J. J. Soper, Rockford, Ill.; Louis Bauscher, Freeport, Ill.; Mr. Cochrane, of Cochrane & McKay, West Pullman, Ill.

Washington is the proud possessor of another wholesale house, "The Florists' Exchange." It is an incorporated company of Washington florists with the following officers: J. Louis Loose, president; Theo. Dietrich, vice-president; William Bowdler, secretary; John Robertson, treasurer; Albert Schnell, manager.

New Chicago Sprayer

This sprayer is made of aluminum with two brass plates, one fine, one coarse. These are easily removed and quickly cleaned. Spraying face $4\frac{1}{2}$ inches wide, nozzle $6\frac{1}{2}$ inches long; $\frac{3}{4}$ inch pipe connections. These sprayers will never wear out and are said by users to be the finest on the market.

Send to us for testimonials from growers using them.

Price \$2.50 Each

A GRAND RAPIDS MARKETING PLAN.

N. B. Storer of the floral department of the Grand Rapids Greenhouse Co., Grand Rapids, Mich., spent several days in Chicago last week. This company was organized two years ago and in addition to flowers grows mushrooms and vegetables, including large quantities of lettuce. The Grand Rapids vegetable growers have established a central depot for the vegetables from all the growers and when the produce is received it is graded and prices fixed accordingly. After a few trial orders purchasers from out of town become

familiar with the grades by name as standard, etc., and can buy intelligently. The association consists of seven directors, five of whom are growers. S. J. Perry is sales manager.

NEWS NOTES.

The Growers' Cut Flower Company, New York city, is recorded as having entered judgment against Abraham Jacobs for \$140.00.

Portland, Ore.—N. L. Crouch has purchased of W. H. Wood his large greenhouse, containing 30,000 feet of glass.

PUBLICATIONS RECEIVED.

The American Flower Garden, Doubleday, Page & Co.—Here is a beautiful book and as useful as it is beautiful. The author is Neltze Blanchan and the planting lists which form a very important and practical part of the contents are by Leonard Barron. The first chapter is entitled "The Partnership between Nature and Art." This is the sentiment that runs through the entire work and this is one of the strong points that give it unusual value as a book for the lover of nature who is possessed of a longing to get very close to nature and know how to work in conjunction and harmony with her. And the civilized world is full of people who are hungry for the truths this work unfolds so enticingly and convincingly. It answers a thousand questions that are on the lips daily of the earnest amateur cultivators, many of which, unfortunately, the florist and local gardener are, by a large majority, unable to answer. For this reason the book before us has a place not alone on the library shelf of the amateur gardener but has also a distinct value for the florist who aims to serve satisfactorily the customers who look to him for advice and expect such advice, when intelligently followed, to prove infallible. So we earnestly recommend the volume to our trade readers as something they will find well worth having. There are ninety-two full-page half-tone engravings and four beautiful color plates all depicting garden scenery worthy of being studied as examples of garden art. The lists by Leonard Barron are well-selected and comprehensive. The price of The American Flower Garden is \$5.35 delivered. Copies can be supplied from this office.

SAFE GREENHOUSES

There is something to be said against columns in a house, but there is a whole lot to be said for them. There is a structural danger line, which if you pass, you simply take chances—and mighty long ones at that. The Sectional Iron Frame Construction has the fewest columns of any safe construction. It's safe to be on the safe side. Let the other fellow do the experimenting.

Important Announcement To Carnation Growers

At the earnest solicitation of a large number of commercial and private growers, the Cottage Gardens Company has decided to disseminate this year the two famous carnations

MRS. C. W. WARD and ALMA WARD

Two varieties which are well known to all the leading growers of the country. Four years test in the New York market has demonstrated their popularity and good staying qualities. For the past three years we have been growing from fifteen to twenty-five thousand of each, during which time they have always **COMMANDED THE HIGHEST MARKET PRICES**, and at no time has the supply been equal to the demand.

On the exhibition table they have taken the **HIGHEST HONORS**, and we believe it is safe to say these two carnations **STAND WITHOUT AN EQUAL**.

INVITATION

We extend a cordial invitation to all those interested to visit our establishment, where they will have an opportunity to see them growing and compare their good points with other standard varieties grown under the same conditions.

MRS. C. W. WARD

MRS. C. W. WARD is a perfectly formed flower with full centre; color deep pink several shades lighter than Lawson, deeper than Winsor; having strong, erect stems 24 to 36 inches in length. A vigorous, healthy grower and has never shown disease of any kind.

A very early and free bloomer, producing fine flowers as early as September 1st, which bring from twenty-five to fifty per cent more than any other variety on the market.

The keeping qualities of this variety are remarkable. Several shipments of blooms sent to Europe reached their destinations in perfect condition, and wherever exhibited it has always been the last to show signs of wilting.

AWARDS

Society of American Florists, Silver Medal, Boston, 1906; The Craig Cup for Best Seedling, Philadelphia, 1906; The Lawson Bronze Medal, Washington, 1908; The Horticultural Society of N. Y. Silver Medal, Sweepstake prize for best 100 blooms, New York, 1909; The Horticultural Society of N. Y. Diploma, for best new variety, New York, 1909.

Rooted Cuttings Ready December 15th

\$2.00 per 12, \$12.00 per 100, \$100.00 per 1000, \$95.00 per 1000 in lots of 2500. 25 at the 100 rate, 250 at the 1000 rate.

ALMA WARD

This beautiful Carnation is pure white except during dark weather when it shows delicate splashes of pink similar to the Cattleya Orchid, increasing its popularity.

ALMA WARD is the largest and most fragrant Carnation ever grown, producing perfect flowers 3½ to 4½ inches in diameter on strong, erect stems 36 to 42 inches in length.

This most remarkable variety takes the same place among carnations as the American Beauty Rose among roses, and has, during the past four years, been awarded numerous prizes including the following:

The Lawson Silver Medal, Toronto, 1907, (No Gold Medal having been awarded); The Lawson Gold Medal, Washington, 1908; The Society of American Florists Silver Medal, Washington, 1908.

Rooted Cuttings Ready January 1st

Notes From the Arnold Arboretum

The botanical exploration of Western and Central China in recent times has also resulted in the discovery of a number of new Conifers of which several have been successfully introduced into cultivation. Besides the species mentioned below there are of the genera *Pinus*, *Abies* and *Picea* a few other species to which it has not yet been possible to assign names and of which consequently nothing can be said at present.

A handsome new Pine which has already proved perfectly hardy at the Arboretum is *Pinus Armandi*, from the allied *P. koraiensis* chiefly distinguished by the glabrous branches. The bright green slender leaves, five in a cluster, are about four inches long; the cones resemble those of *P. parviflora*. This Pine was first introduced by the French missionary Armand David and distributed by Vilmorin, from whom the Arboretum received seeds about ten years ago; recently it has been again introduced by Wilson. Probably not hardy here will be *Pinus yunnanensis*, a three-leaved Pine related to the Himalayan *P. longifolia* and *P. Kashia*; the leaves are about eight inches long and the ovate cones measure about 3 inches in length.

Abies Delavayi is allied to *A. Veitchii*; the leaves are about one inch long or a little less, with strongly revolute margins and only slightly whitish beneath and are arranged in two rows. The oblong dark blue cones are about three inches long with the bracts exceeding the scales and spreading before maturity. An allied species is *Abies Fargesii*, but the leaves are not revolute at the margin and very white on the under surface and the dark purple cones are somewhat longer with the bracts not exerted. This is according to Wilson one of the finest Chinese Conifers and reaches a height of 175 feet. As both species grow at an altitude of about ten to twelve thousand feet, they will doubtless prove perfectly hardy here.

Keteleeria Davidiana will probably be hardier than the tender *K. Fortunei* which is since a long time in cultivation, but still very rare in collections. It is a tall tree resembling in appearance a Fir, but differing from that genus in its persistent cone scales; the obtuse leaves are arranged in two rows and are from one to two inches long, green and lustrous on both sides; the upright oblong cones are seven to eight inches long with thickish rounded scales.

Tsuga yunnanensis is allied to *T. Araragi* (*T. Sieboldii*), but easily distinguished by its larger leaves, nearly one inch long, entire at the margin and not denticulate; the nearly globose cones are a little over one inch thick.

Picea Neoveitchii resembles in foliage much the Japanese *P. Torano* (*P. polita*); the four-sided leaves are falcate, bright green and about three-quarters of an inch long, while the cones are similar to those of *P. Morinda* and about six inches long. *Picea Wilsoni* is allied to *P. Alcockiana* and has slender four-sided leaves, less than one-half inch long and very numerous cones not exceeding two inches in length.

Larix chinensis is allied to the Himalayan *L. Griffithii*; like in this species the bracts exceed much the scales of the oblong cone, but the cones are shorter, only about two inches long. The bluish green linear leaves

are about one inch long. Similar in foliage is *Larix Potanini*, but the cones are only one and a half inch long with the bracts shorter than the scales.

Libocedrus macrolepis is a very handsome tree, also as a young plant, and is related to *Arbor Vitae* and *Thuyopsis*. The flattened branches are densely clothed with scale-like pointed dull green leaves. In its native habitat it reaches a height of about one hundred feet, but as it comes from southern China, it will probably not be hardy in the North.

Cephalotaxus Oliveri does not differ much from *C. drupacea*; the leaves are about one inch long and obtusely pointed at the apex.

Though since a long time in cultivation *Cunninghamia sinensis* ought to be mentioned here, since Wilson secured seeds from trees growing at an elevation of four to five thousand feet. The plants raised from this seed will probably prove much hardier than those now in cultivation and may even be hardy in the neighborhood of Boston. In its native habitat it attains 80 feet in height and is a tree of very distinct and striking appearance resembling greatly the South American *Araucaria brasiliensis*.

Also of *Cupressus funebris* Wilson collected seeds at its altitudinal limit, about three thousand five hundred feet, in Western China. This will make it possible to grow this beautiful tree with the habit of a Weeping Willow and a tall straight trunk much farther north than now, though we can hardly hope that it will be hardy here.

Alfred Rehder.

Thalictrum dipterocarpum

At the last meeting of the Boston Gardeners' and Florists' Club a very good specimen of the above plant was shown from the Hunnewell Gardens and though it attracted considerable attention no special mention was made of it. This plant was sent into cultivation by Mr. E. H. Wilson and when shown on Aug. 18, 1908, by Messrs. Veitch of Chelsea before the Royal Horticultural Society it was worthily granted an award of merit. Generally speaking the *Thalictrums* are not particularly ornamental plants but this new species is quite one of the best of the many fine hardy plants Mr. Wilson has been so successful in introducing. In its native habitat, *Thalictrum dipterocarpum* is found on mountain slopes growing among the grass and other dwarf vegetation where it attains a height of six to eight feet and in this country it would succeed well in the herbaceous border where, during the early stages of growth, it received the shade of surrounding plants. The foliage is particularly light and graceful resembling a maidenhair fern and the flowers which are very freely produced on each stem are about three-quarters of an inch across and bright rosy purple with a profusion of conspicuous citron-yellow anthers. Mr. Wilson collected seed of this *Thalictrum* around Tachien-la on the frontier of China and Tibet and considers it one of the most delightful plants he found in China, an opinion one can heartily agree with.

"Once mair I hail thee, thou gloomy December."

Welcome
 December

It is with mingled feelings that the floriculturist sees "gloomy December" enter. He is no true floriculturist if he feels no pangs of regret at seeing outdoor verdure wrecked and the beauty of

flowers and verdure supplanted by the frigidity of snow and ice and yet the advent of the wintry days means to him opportunity and cheery inspiration for work which promises an ample return for well-directed effort. Christmas is coming—already the well-fed roses, bristling carnations and glowing poinsettias are bursting into the luxuriant harvest which the diligent grower has timed to a nicety. Thus every disagreeable phase of our life has its compensations. Let us hope that all conditions may conspire to bring success and substantial recompense to those who toil among the flowers and whose days are devoted to softening winter's harshness and brightening with Nature's fairest products the homes of their fellowmen.

The last
 flower of
 autumn

As remarked in another column of this paper, the hardy asters, of which America alone furnishes forty or fifty distinct species, are being given considerable attention in recent years by hybridists and improved forms are being brought forward from time to time for the use of the hardy garden planter. They are among the most desirable in the entire list of hardy perennial subjects and the only reason why they have not been seen more frequently in our suburban grounds is probably their great abundance in a wild state. It is only of late that American gardeners have begun to fully appreciate the worth of native plants and their adaptability for many purposes above any and all exotic material. We have nothing either native or foreign which can at all compare with the hardy asters for late display of flowers in the garden. They are the very last to stay with us, the later species seeming reluctant to go, and stray sprays of bloom may often be found as late as the last week in November.

Supplying
 a demand

Some of the most enterprising nurserymen now make it a part of their business to have in stock at all seasons of the year, hardy vines and climbing plants, as well as other ornamental outdoor nursery stock, in pots. These can be planted out at any time and are a valuable acquisition for people who are not prepared to do their planting at the usual dormant period. Of this kind of buyers there are always plenty, who, from force of circumstances or because of procrastination—that world-wide human failing—are sure to be looking for things with which to adorn their gardens and homes at seasons when transplanting from the open ground is out of the question. A very much larger trade than has been done in this line hitherto should and probably will be developed. The main requirement now is greater publicity. Special advertising and a wide-spread educational campaign with public demonstrations at the horticultural exhibitions everywhere, on this and analogous matters which the people should be better informed about, would give a big impetus to the most profitable end of the nurseryman's business.

Aster Nova-Belgii Evening Star

This beautiful hardy aster is a new variety raised in northern Europe, color a fine blue. These Michaelmas Daisies, so-called, are being used extensively at the present time especially in England, and indeed all over Europe. Large beds are planted in Hyde Park, England, for fall effect. About Boston, Mass., they are also becoming very popular and far-seeing nurserymen are cataloging them. At the Farquhar nurseries fully forty or fifty selected varieties are grown among which are some fifteen or twenty new sorts noticeably improved in color and size of flower and in floriferousness.

Progress in Geraniums

The Zonal Pelargoniums are mostly natives of Cape of Good Hope, a few from Australia. Few subjects that have ever been taken in hand have so richly and liberally rewarded the hybridist's labor. The great number of varieties listed in the catalogues embraces a range of form and color that is truly astonishing and bewildering, and the number is being added to, each year. It would seem every year as if the height of perfection had been reached, and yet when we see the results of the hybridizer's art in the new introductions each season we must confess that there is an improvement in many ways. What the future will be no one knows.

It would be difficult indeed to name a more universally popular flower than the "Geranium," or Pelargonium zonale with its allies, the Scented, Ivy Leaved and Fancys. The rose, the carnation, the chrysanthemum and other more or less popular flowers may all have their special seasons to fill, but it is for the Geranium to be everybody's flower. Everywhere and at all times, the joy alike of the rich and poor, the old and young, wherever civilized man may make his home, the Geranium is there to cheer and brighten by its presence today the same as it did in our grandmothers' time.

In the home of the tenement dweller we find it struggling for existence and succeeding well at the only window in the room. Perhaps the sun rarely if ever shines there, but yet, from early spring until long after the frosty nights have been followed by winter's death and destruction of all that is beautiful in nature we find the Geranium is still there, blooming to gladden the heavy hearts and revive the drooping spirit, and when trouble comes or cares oppress, it is often the only beam of sunshine that enters the dreary home.

In the conservatory of the wealthy we find the Geranium grown to magnificent specimens, that are a wonder to behold, masses of the most vivid scarlet dazzling to the eye, or covered with flowers of the most exquisite marking or blending of colors that win enthusiastic admiration from even the most careless observer.

As a summer bedding plant there is nothing that can take the Geranium's place. In the spring we have flowers, flowers everywhere, beautiful beds of hyacinths and tulips which in a few weeks are gone, to be followed by a magnificent display of shrubbery that makes our home look indeed like a paradise, but how soon they fade and their loveliness has passed away as the dream of the night. Then the roses come. With gladness we hail the "Queen of Summer" and the air is made fragrant with her presence. They are beautiful indeed but how soon they bid us adieu, and in their place we have an abundance of green bushes and vines. It is all through the entire category of summer flowers—anticipation, then realization for a short time, and then disappointment. It is then that we turn with a longing eye to the Geranium, as something we can depend on to fill our empty vases and window boxes, and beautify our lawns, from the time they are planted in the early spring until cut down by the late frost; even then if they are dug up and given a favorable opportunity they will continue blooming all through the winter. The Geranium is the one friend that we can depend on to stay with us and to always "make good."

Great strides have been made during the past quarter of a century in the cultivation of geraniums. Only a few years ago it was the custom for every florist to carry

his geranium stock over during the summer, and it was generally the stock that we had left from the summer sales, not the best stock either but such plants as we could not sell. These were planted out either in the nursery or in frames, in many cases to fight for existence with the weeds and trash; then about the middle of August the first batch of cuttings was taken off and laid on the greenhouse tables to wither a few days before they were put in the cutting bench. A little later, after it had gotten cooler, another batch was taken off and put direct in the cutting bench. If this did not make enough of certain kinds the old stock was dug up and kept for winter propagation, making the bedding stock for late sales. After the cuttings had rooted they were either potted up in thumb pots or planted in flats to be placed in the most out-of-the-way corner of the greenhouse until long about the last of February or first of March, or until the stevia, eupatorium and other necessary flowers had been cleared from the table, when they were brought forth to be gotten ready for spring sales. It was as necessary then as now that they should be in bloom, and that they should be fairly good plants, but now the flower-buying public has been educated to such a degree that to sell them a geranium it must be well branched, and have perfect foliage, leaves from the pot up, with a flower truss as large as a hydrangea held well above the foliage.

But this manner of carrying stock and propagation could not last long, for there was always the deterioration of stock, so that in a very few years the grower had bred for himself a stock of the very poorest geraniums that nature would allow him to, and he was face to face with the fact that his geraniums did not bloom as they should, and that they seemed to have a weak diseased constitution, which he could not understand. Why should he have such poor stuff, when his friend who happened to be a private gardener and who had started with the same kind of stock, perhaps from the same source, should have them so fine? He would then get this friend to let him have his surplus cuttings in the fall, and the same process of deterioration would be started over again with the same results.

Now the successful retail florist or the man that grows geraniums to the finished condition for the retail trade endeavors to sell completely out, and then buy new stock from a geranium specialist, in just the number and kinds that his experience has taught him his trade is likely to require. In this way he gets what is up to the highest standard of perfection and it is the specialist's business to keep his stock selected up to as true a type as possible, always on the lookout for those with a weak or diseased constitution or those plants that show the least variation from the true type.

The propagation of geraniums as carried on in this way has become a special branch of the florist business in which thousands of dollars are invested, requiring large ranges of houses. In most cases the stock is planted in greenhouses either on tables or solid beds, where it can stand for at least two years and propagation is carried on to a certain extent throughout the whole year, those propagated during the last summer and fall being used as pot plants for spring sales, those propagated during the winter for bedding stock and those propagated in the summer for winter flowering.

Whitemarsh, Md.

R. A. Vincent.

(To be continued.)

NEWS OF THE CLUBS AND SOCIETIES

ROYAL HORTICULTURAL SOCIETY.

At the committee meeting, Nov. 9, an award of merit was bestowed on *Laelio-cattleya* Corunna, whose parentage was unknown to the exhibitor, Lieut. Col. Holford. The petals and sepals were of a bright purple, the lip dark purple, with orange stain in the throat. The flowers measured generally about 6 inches in width. From this exhibitor came *Cypripedium Dante magnificum* = *Euryades* × *Charlesworthii*. The dorsal sepal has a white ground, and purple lines traversing it. The pouch is of a brownish tint, and petals brown on green, the flowers of moderate size. *C. Leeanum Niobe*, a flower of a dark brown varnished purple color with dorsal sepal white with purple lines, a pleasing flower. Other varieties were *C. Darius*, *C. Rossetti magnificum*, a yellowish flower, etc. Mr. Goodson, an amateur cultivator of repute, showed *Brassocattleya Lily Bourdas* = *Laelio-cattleya callistoglossa ignescens* × *Brassavola Digbyana*, a large flower, the throat light purple, striped purple at the mouth, paling off to faint lilac towards the edge; *Sophrocattleya Doris*, a cross of *Sophrontis grandiflora* and *Cattleya Dowiana*, the color a bright scarlet in all its parts.

Comte J. d'Hemptin of Ghent, received an award of merit for *Laelio-cattleya* Baroness Schröder variety Mme. Henriette. The solitary flower shown was of a light purple tint with a brighter purple streak down the lateral petals and sepals, lip orange, purple at the tip. The color is a singular one among *Laelio-cattleyas*. Some *Odontoglossum* hybrids of fine colors and well grown, six in number, came from the same exhibitor.

J. Cypher & Sons received a silver Banksian medal for a collection of *Cypripediums*. A beautiful *Odontoglossum* was shown by S. P. Walker, named Jasper Walker. It was circular in outline, and each segment, excepting the lip, is white with a light purple tip, and the lip is white spotted with brown.

Ed. V. Low showed *Oncidium incurvum album*, a pure white Mexican species. The specimen shown possessed an inflorescence 2½ feet in height, bearing 200 of its minute blossoms.

Messrs. Charlesworth & Co. showed many plants of orchids and among them *Sophrocattleya Eros*, of a crimson color; *Sophro-laelio Marriotiana*, orange scarlet; *Houlettia Brocklehurstiana*, a showy, distinct species, and several more species of orchids.

Stuart Low & Co. showed a small group including *Cattleya Armstrongae*, having flowers of pale lilac, throat yellow, the edge of the lip light purple; *Laelio-cattleya Tenos* = *C. Bowringiana* × *L. C. Nysa*, an orchid of a glorious color of two shades of purple; *Drewett's* variety of *Cypripedium Acteus*; *C. nitens magnificum*, *C. insignis* King Edward, *C. triumphans superbum*, a handsome, shiny, dark purple flower, and several other species and varieties.

Carnations—Messrs. S. Low & Co. were exhibitors of carnations, among

the new varieties of merit being Royal Purple, Pink Delight, Mrs. Crook, Rival, a full scarlet; *Rosedore*, also a fine scarlet; *Aristocrat* and *O. P. Bassett*.

Codiaeums shown by J. Veitch & Sons were excellent examples of good culture and to many persons were a great surprise. The leaf coloring was finely brought out, and the plants measured 2 feet to 7 feet in height. A silver gilt Flora Medal was awarded for the exhibit.

H. B. May showed excellent ferns in fine condition. The following were the newer varieties of *Nephrolepis*, viz., *N. exaltata Marshalli* with crested pinnae appearing on the upper surface of the fronds, which latter are superimposed in two or more layers, a highly decorative sport of *N. exaltata Amerpohli*. A first class certificate was awarded to it.

FREDERICK MOORE.

H. C. PHILPOTT,

President-elect Canadian Horticultural Association.

MINNESOTA STATE FLORISTS' ASSOCIATION.

At the meeting on November 18, Mr. Ch. Hansen, just returned from Copenhagen, entertained the members with his observations of the flower trade as carried on in that city, by florists exclusively. Mr. Dysinger read a very interesting and thoughtful paper entitled "Looking Outward." H. Will gave a talk on the Chicago and Milwaukee flower shows and Prof. LeRoy Cady read a paper on "Plant Breeding in Minnesota." He showed how Minnesota had advanced from a fruit-barren state to one of the most important in the fruit-growing list and praised the work of the Experiment Station, through the work of which the yield of wheat had doubled in about 25 years.

Exhibits of chrysanthemums and carnations were made by L. S. Donaldson and chrysanthemums by E. Nagel & Sons.

GARDENERS' AND FLORISTS' CLUB OF BOSTON.

Landscape Gardening Classes.

Members desiring to join these classes are reminded that they were resumed on Tuesday evening, November 23, and will be continued each Tuesday evening at 7.30 o'clock, at Horticultural Hall. The teacher is Mr. R. W. Aldrich, the tuition fee very low, and these classes give special opportunities for all desiring to gain more insight into landscape gardening than they possess, at a very low cost. These classes are restricted to club members; any not belonging to the club but desiring to join these classes must sign an application blank and forward one year's dues, \$2.50, to the Secretary.

Field Day.

The club will hold its next field day at the establishment of Geo. E. Buxton and August Gaedeke & Co., Nashua, N. H., on Saturday, December 11, 1909. This will be the first outing the club has had to the Granite State, and it is sincerely hoped that a large number will avail themselves of the opportunity to inspect the places named.

Trains leave North Terminal Station at 11.30 a. m., arriving at Nashua Junction at 12.33.

W. N. CRAIG, Sec'y.

NATIONAL FLOWER SHOW.

A meeting of the National Flower Show Committee was held Nov. 19, at Horticultural Hall, Boston, for the purpose of organization and arranging a preliminary schedule. J. K. M. L. Farquhar, Robert Craig, Edward A. Stroud, William J. Stewart of the S. A. F. committee, present. The committee inspected Mechanics' Hall and obtained an option on it for March 23 to April 4, 1911. About \$15,000 will be apportioned for premiums.

All the committee present were very enthusiastic over the outlook for Boston, 1911. President-elect of the S. A. F., F. R. Pierson, presided at the meeting and S. J. Goddard served as secretary.

The S. A. F. Committee Chairman Pierson requested the Massachusetts Horticultural Society, Boston Co-operative Flower Market, Park St. Market, Gardeners' and Florists' Club, to appoint each three members to compose a general committee. The Massachusetts Horticultural Society will appoint at next regular directors' meeting. Boston Co-operative Flower Market appointed Wm. H. Elliot, Norris F. Comley and John McFarland. Park St. Market—S. J. Goddard, E. Allan Peirce and Alex. Montgomery. Gardeners' and Florists' Club—P. Welch, Duncan Finlayson and Thos. Roland.

The next meeting will be upon the call of Committee on Preliminary Schedule.

S. J. GODDARD, Sec. of meeting.

PENNSYLVANIA HORTICULTURAL SOCIETY.

We have received copies of the schedules of special premiums offered for the spring exhibition to be held in Philadelphia, March 15, 16 and 17, 1910, by Hosea Waterer (\$215.50), Henry A. Dreer, Inc. (\$126.00) and H. F. Michell Co. (\$200.00). Waterer's premiums cover the various classes of tulips, narcissi, hyacinths, callas, spireas, lilies, lilacs, rhododendron Pink Pearl and hippeastrums. Dreer provides for roses in thirteen classes, irises, primulas, wall flowers, asparagus, Azalea mollis, campanulas, anthuriums, amaryllis, Nephrolepis Schoelzeli, Acanthus montanus, etc. Michell's list includes hyacinths, tulips, narcissi, lilies, lily of the valley, yellow callas, irises, cinerarias, amaryllises, violets, azaleas and similar spring forcing favorites.

CHRYSANTHEMUM SOCIETY OF AMERICA.

Work of Committees.

Cincinnati, Ohio.—Seedling 201-6-08, Jap., white tinted light pink. Exhibited by Elmer D. Smith & Co., Adrian, Mich. 87 points. Certificate.

—Seedling 299-2-08, Ref. Jap., shell pink. Exhibited by Elmer D. Smith & Co. 88 points. Certificate.

Chicago, Ill.—Seedling 109, Anem., lemon yellow. 78 points.

Philadelphia, Pa.—Seedling 299-2-08, Jap., light pink. Exhibited by Elmer D. Smith & Co. 83 points commercial, 83 points exhibition scale.

AMERICAN CARNATION SOCIETY.

New Carnations registered by W. H. Shumway, Berlin, Conn.: Elizabeth—Parentage uncertain. Color brilliant red. Size 3 to 3½ inches. A good grower of excellent habit. Not overmuch grass, every shoot flowers. Does not discolor after cutting, and a wonderful keeper. Almira—Enchantress x Wm. G. Scott. Bright pink like Wm. Scott. Size 3 to 3¼ inches. Upright and erect in growth, with good constitution. Free bloomer and has a good calyx. Easy to propagate.

A. F. J. BAUR, Sec'y.

CLUB AND SOCIETY NOTES.

The Colorado Florists' Club has elected the following officers: J. A. Valentine, pres.; T. D. Long, vice-pres.; A. H. Bush, sec.; Ben Boldt, treas.; C. R. Root, N. A. Benson and J. A. Sked, trustees.

The Tri-City Florists' Association were entertained on the evening of November 18 by Emil Boehm, superintendent of parks, Davenport, Iowa. A discussion was had on "Christmas Baskets." Fine carnations were shown by Messrs. Anderson and Ewoldt.

The fifteenth annual meeting and exhibition of the Vermont State Horticultural Society opened at Newport on November 16. At the session on Wednesday morning, Governor Prouty delivered an address of welcome. Apples were the main topic for discussion.

The following officers were unanimously elected by the Florists' and Gardeners' Club of Rhode Island at their last meeting: Robert Johnson,

PALM GROUP

By Danker at the Exhibition of the Albany N. Y. Florists' Club.

pres.; Eugene A. Appleton, vice-pres.; William E. Chappell, sec.; William Hill, treas.; executive committee, James Hockey, Cornelius Hartstra and Harry Clark; James Dillon, librarian.

On Tuesday evening after the closing and cleaning up after the Albany Florist Club Show, the hard workers and friends who helped to make the show the success which it was, drove to Henkes Bros' greenhouses at Newtonville and enjoyed a deer supper, which was served in the new greenhouse, Mr. Fred Henkes having just returned from the north woods with a great prize.

The Minnesota State Horticultural Society will hold its forty-third annual meeting in Minneapolis on Tuesday, Wednesday, Thursday and Friday, Dec. 7, 8, 9 and 10. In connection with this event will be held also the Minnesota State Forestry Association, the Minnesota Rose Society, the Plant Breeders' Auxiliary, the Women's Auxiliary, the Minnesota Florists' Society, the Minnesota State Beekeepers' Society, all being auxiliaries of the Horticultural Society.

THE INTERESTS OF RETAILER, WHOLESALE AND GROWER IN FLOWER SHOWS.

Remarks Before the St. Louis Florist Club, by J. F. Aumann.

Most retailers who do not exhibit give as a reason—too much trouble and expense. Yet a well-managed flower show is the best educator and cheapest advertiser known to the profession today. It is only the drones of the profession who will not grasp at the opportunity to advertise themselves as well as help the good movement along by taking active part in the exhibitions. The retailer is the only branch of our profession who comes in direct touch with the con-

sumer. The more ways and means he can provide to create a demand for the product the more he is benefited. Where is that means more at hand, and where can it be procured for less money than at a flower show, where he is paid for filling his space and where newspaper items are published for him (advertising he could not purchase at all) for absolutely nothing?

For the wholesaler I always have had a soft spot in my heart, for he stands between two fires all the time. The grower expects high prices and the retailer wants to buy cheap, so in steps the wholesaler and says, "We will split the difference," and it goes. If it were not for the wholesaler, the retailer and grower would not be on nearly such good terms as they are. On one thing we can all agree—that is, if the retailer can devise a scheme by which he can create a stronger demand for his goods the wholesaler is also benefited by it.

When we talk about the grower I begin to feel a little more familiar with my subject, for I have been a victim to this branch for nearly a quarter of a century and I only hope I may continue so for another quarter. If flower shows are a benefit to the retailer and wholesaler they are doubly so to the grower, yet no producer of any article manufactured or grown is so slow to take advantage of exhibiting his wares as the average grower of flowers and plants. We can readily recall where farmers and stock raisers, as well as manufacturers, pay exorbitant prices for space at various exhibitions and fairs to show their product. The flower grower on the contrary, is paid, and in most cases paid well for his exhibition, and in addition gets big advertisement for his goods. I hope the day is not far distant when all growers will see the flower shows in the light so many of our leaders have already and help to make them always a success.

FLORISTS' XMAS

Special Offer

HERE IS AN OPPORTUNITY that no far-seeing Florist can afford to overlook. MY XMAS OFFER IS A SURE MEANS OF PROFIT and just the opportunity for the Florist who has never handled Goldfish, Aquaria Goods, etc., and wishes to give this line a fair trial. This exceptional offer embraces a well chosen and wide range of Globes, Goldfish, etc., that will allow you to make excellent display. The outlay is small, the gain large and you cannot fail to profit by the investment.

**Goldfish and Aquariums are most acceptable Holiday Gifts.
Pleasing to young and old, rich and poor.**

XMAS NEAR.

BALTIMORE, MD.

LOOKING OUTWARD.

(A paper read before the Minnesota State Florists' Association by S. D. Dysinger.)

To a man cooped up in an office ten hours a day, the outward view in our business is always the rosy one. The fellows who work in the fresh air amid the growing flowers are to be envied. They work with their hands and gain a glorious appetite, and if they work with their heads the result is seen in better flowers, choicer varieties or improved sorts. Nature lends a helping hand and from the common weeds of our forefathers have been evolved the priceless beauties of today. Surely work with such surroundings ought to bring out the best there is in any man's mental or spiritual being. The office man in many ways becomes narrow, wedded to single ideas, systematic and automatic. He may admire what you growers produce, but he does not fall in love with his work and surroundings the way you fellows ought to.

What can be more interesting than to watch the seed swell, become a living plant, put forth roots and

branches, develop leaves, bud, blossom, seed and decay. Isn't the evolution of life in human, animal or vegetable kingdoms the most interesting thing possible on this old globe of ours? And when you assist Nature in the development of life and beauty aren't you more interested than you would be in chasing facts and figures in an office?

A Business to Love.

Someone has aptly said, "The undevout astronomer is mad," and it might truthfully be said, "The unbelieving florist is mad." Perhaps I may be called a "sentimental old maid" for expressing these thoughts, but I will go farther than the old maid and say that any florist who is not in love with the growing end of his business ought to get out and stay out. The trade is not suited by anyone who sees only the dark sides and difficulties of the business.

While the office man's position is not as pleasant as the outside man's, it is nevertheless an important one and right there is the weakest link

in the trade today. You may be a good grower and secure all the first prizes at the shows, your roses may be the talk of the country, your carnations and violets may be sought after by the best buyers, your geraniums and bedding plants may be the finest in the land, your chrysanthemums may be as large as wash tubs, and your fame as a grower may be national. You may be "it" in the florist world with a big I, but if you are all these and more and fail to look after the clerical end of your work, you will never be in the front ranks of the trade, but will drudge out your life for a mere pittance and go bankrupt in the end.

"Keeping Tabs."

No matter whether your business is small or large, no matter whether you have one 30-foot greenhouse or a million feet, it is essential for the success of your business that you have some method of bookkeeping, of keeping accounts, of knowing what your receipts and disbursements are and that your profits are. You need not

be an expert accountant to do this. You only need devise some method of accounting and, after devising it, follow it up until you know a better one. While there are many well-regulated places, but very few in the business can give even an approximate idea of what it costs to produce a rose, a carnation, a chrysanthemum or a bedding plant, and if you can't give even a good guess, how do you know whether you are selling your products at a profit or at a loss? I venture to say that not more than 25 per cent. of all in the business know what is the most profitable thing or things to grow. Of course we know that paying \$22.00 per 1000 for tulips which we sell for \$20.00 is unprofitable, but do we know whether we should obtain \$30.00 or \$40.00 or \$50.00 per 1000 for them in order to make the transaction profitable? Too many fail to keep tab on expenses; too few keep tab on receipts and disbursements. How many take inventory at the end of the year, and how many have any "end of the year" at all? How many go on the theory that if they owe less this year than last, they are worth more and must be making money? Or if their sales are larger this year than last, their profits must necessarily be larger. You may know the ins and outs of your business to perfection, but you will never reach the full limit of success until you know where you are making the most money and where you lose the most. It's the small leaks that eventually sink the ship and the small holes should be firmly plugged before they become large ones.

Use Brains as Well as Hands.

If employes would learn to grow one thing well at a time, and strive to do better than the other fellow, what a vast improvement in quality and quantity there would soon be. I know of no field of human endeavor where the chances for development are greater than in this. If some ambitious florist had not tried to improve on the old-fashioned "pinks" we would have "pinks" today instead of 4-inch carnation blooms. If some enthusiast hadn't put time and thought on the small chrysanthemums

EVER-BLOOMING CRIMSON RAMBLER,
FLOWER OF FAIRFIELD.

Showing flowers and young shoots on which
next crop of flowers will follow.

of a generation ago, we wouldn't have them today as large as dinner plates. So it is in every line of plants or flowers. If you can grow them a little better than your neighbor, your services will be worth more than his and someone will soon find it out. Brain work will develop you. If the bricklayer earns more in a year with his hands than you do with your brains, there is something wrong. Either there are too few bricklayers or too many florists, or the bricklayer has been using his brains and the florist his hands only. Be thorough in everything. If you can't pot as many plants in a day as your fellow worker perhaps you can do it better. How many employers are here tonight, but who started in the business at the foot of the ladder. Didn't you work for a small salary to start with and after you had made some progress start in with small capital for yourself? And what they have accomplished others can also accomplish. I honestly believe that the outlook for faithful greenhouse men was never brighter than at present. With an immense demand for all our products, with hoards of idle money waiting for investment, any young man who knows the business, is honest, sober and industrious, can in a few years be his own master. This has been proven over and over again in the Twin Cities the past fifteen or twenty years. If you are an employe in charge of a section growing roses you should know just how many of each variety you cut during the season, how many each plant produces; how much labor, fertilizer, etc., has been expended for

What A Good Judge Thinks

From *HORTICULTURE*
November 20, 1909.

M. Rice & Co., Philadelphia, Pa.—Catalogue of Florists' Supplies, Ribbon Specialties, etc. This beautiful album 11 x 14 inches, in covers of moss green with watered silk effect and embellished with halftone illustrations on heavy coated paper, is a credit to Messrs. Rice & Co., and the industry which they so worthily represent. "Don't turn your back on a good thing" is the motto on the introductory page. We should say that the florist who has not this useful book on his desk is certainly turning his back on a good thing. The illustrations are beautiful reproductions of beautiful handiwork, many of them new and representing every item of value to the up-to-date florist, from a complete wedding outfit of gates, kneeling stool, bell and vases, down to a toothpick. The issuing of such an elaborate work is an evidence of notable enterprise. The typographical make-up and finish are also of a high order.

Rice Stepping Stones:—

Twenty-five years of them. Every one a step forward. Do better every year—always the slogan. We rise: "on stepping stones of our past selves to higher things!"

Christmas Baskets and Ribbons

Five stories of our new building filled with these from the tiniest and lowest priced patterns to the most elaborate. You must have our catalog to get even the faintest idea of the lovely things in store for your eager buyers. They make trade for you on sight. You are losing money every day if you do not have a selection to show your customers. Plenty of red patterns for Xmas—in both baskets and ribbons. Have you one of our Ribbon Display Cabinets? \$4.50 to \$6.00—seven sizes. Don't forget red silk cords and ties. Great sellers.

M. RICE & CO.

growing them, and approximately what each blossom has cost to produce. Don't you think your employer would be interested in knowing all that, and wouldn't your services be worth more to him than if you simply put in ten hours a day doing what you were told to do?

Get Out of the Rut.

If you are a foreman or superintendent and can show your employer each week or month just what you have produced and what the market value is; how much you have expended for labor, coal and sundries; if you can show these to your employer, whether asked to or not, don't you think it will interest him more than if you simply kept on growing, and doing things in the same old rut? And finally if you are an employer and obtain weekly or monthly reports from your foremen and superintendents you know pretty near where you are at all the time, and if you don't obtain or require these reports, but guess at results, will not your business finally terminate in guessing?

I am an optimist; I believe in the business else I wouldn't be in it. I believe there is more money being made in the business today than ever before. I believe the present holds far greater inducements than the past ever did. I believe the business in this part of the country is still in its infancy. I believe that every employer should try to develop the best there is in every one of his employees, both for his interest and heirs. I believe that every employee should at all times do his level best to improve his mind and his methods. I believe that with

charity for all and malice towards none, we should assist one another and stand together in all matters pertaining to our business. I believe in mutual co-operation and assistance. If you can grow a rose or a plant better than your neighbor, you ought to tell him how to do it. There has never any harm come from the spread of knowledge. You never heard of any one becoming bankrupt because he told too much of what he knew.

Lack of Unity a Great Drawback.

In union there is strength. The lack of unity is the second great drawback to the business. Harmony and good fellowship should always abound. "Get together and stay there," should be our motto. If we would do this, "price cutting" and "ruinous competition" would become obsolete terms, and department stores and Greeks would be a welcome addition to our ranks. Petty jealousies and sectional bickerings have no place in our business. The statement has been made, and I think we all believe it, that the price of our products has not increased in proportion to those of other lines, but the cost of production has. Who is to blame for this condition? The trade and the members of the trade alone. I believe that there is room for all and that true merit will always be rewarded wherever found.

As I look outward and see the many points of the business as they come into view, I wonder if in any business under the sun there are more things to annoy and worry both employer and employee, than in this. When we retire at night we don't know whether the boiler will fail and frost put us out of business by morning or not.

When we arise in the morning we don't know whether the sun will add dollars to our coffers or the clouds take dollars from it. In hot weather we pray for cooler and in the winter we long for summer. We look forward for six months or a year to the coming of Christmas and Easter and rejoice when they are past. We sleep with one eye on the fireman and the other on the thermometer, and in our waking hours have one eye on the bank account and the other on the help. Today we worry because flowers are being dumped and tomorrow sweat because we haven't enough to fill orders. But with all its drawbacks and disappointments, its sunshine and shadows, its blights and blossoms, it is an alluring, enticing business, ever beckoning us onward and upward, and if our lives and those around us are sweetened by our contact with the beautiful things of nature in which we live and work, then our work is not in vain and the Great Master in looking outward will write success on each brow as we journey homeward.

"Bishop, the Bird Man," who advertises his specialties in pets, etc., this week is unique in his publicity methods and knows the value of saleable novelties. If you are a retail florist, ask him about his money-making specialties. It will pay to "get next" to these things for the holiday season.

Please discontinue want ad. in *HORTICULTURE*. I have had many applications and think that among them can find a man who will do for me.

ROSE DR. W. VAN FLEET.

NEW EVER BLOOMING RAMBLER ROSE, DR. W. VAN FLEET

This new rose, to be introduced by Peter Henderson & Co., in 1910, was the subject of an illustration in our issue of July 24, last, showing it growing and blooming profusely in the garden in the month of roses. Here we have it again as a fall bloomer. The photograph from which this picture was reproduced was the work of an amateur and the flowers were not

fresh when "posed," so the illustration does not do justice to the variety, but is interesting from the fact that it shows the perpetual blooming character of the rose—a characteristic rare among really hardy climbers. Dr. W. Van Fleet is a cross between Souv. de Pres. Carnot and Wichuriana. The flowers are four inches and over in diameter, color delicate flesh

pink, deepening to the centre. It is now in its ninth year and has stood the winters at Little Silver, N. J., without injury. The variety was awarded a silver medal by the Horticultural Society of New York, last year.

PACKING PLANTS AND FLOWERS FOR SHIPMENT.

Abstract of a paper read before the Canadian Horticultural Society by H. E. Philpott.

Packing Plants.

All will admit that this is a very important subject, for no matter how fine and nice the plants are before shipment, if improperly packed, or if they are handled carelessly by the express companies so that they arrive at their destination in poor condition, dissatisfaction is sure to follow.

First see that the plants are in perfect condition for shipping; that is, thoroughly hardened, or finished to stand the trip, and if to be shipped without pots, the plants should be well rooted through, that the roots may hold the ball of earth intact, and above all see that they are thoroughly watered before packing.

Palms and other plants not having fibrous roots to hold the soil, should be shipped in pots, some support being necessary to keep the soil from crumbling. The "Neponset," or paper pots, are excellent for this purpose, being light, not subject to breakage, also packing closer in the crate. Packing wrapper or sacking, firmly tied around is often used instead of pots, and answers the purpose.

In this connection, I might say that plants are usually packed without pots

SELECT FERNS for FINE STORE TRADE

We offer a grand lot of exceptionally well-grown plants of the different varieties of *NEPHROLEPIS* which will be found one of the best selling and most profitable plants that florists can handle. Our stock is in unusually fine shape, and we will guarantee it will please the most exacting, as it is exceptionally good value at the prices quoted.

IMPROVED ELEGANTISSIMA. The finest of all this type. It was introduced by us in 1905. This form of *Elegantissima* has been greatly improved, and shows no tendency to revert to the Boston, making it the most valuable fern of this type. Strong plants, 4 in. pots, \$3.00 per dozen; 6-in., \$6.00 to \$9.00 per dozen—according to size; 8-in., \$12.00 to \$18.00 per dozen—according to size.

SUPERBISSIMA. Introduced by us in 1908. A very-unique and distinct novelty. Its distinguishing characteristics are its dark green foliage and dense growth. Fronds are very heavily imbricated, making them very dense and compact. Strong plants, 4-in. pots, \$3.00 per dozen; 6-in., \$6.00 to \$9.00 per dozen—according to size; 8-in., \$12.00 to \$18.00 per dozen—according to size.

BOSTONIENSIS, PIERSONI, WHITMANI, SCOTTII. Extra fine plants, 6-in. pots, \$6.00 per dozen; 8-in. pans, \$12.00 per dozen.

F. R. PIERSON CO., Tarrytown-on-Hudson, New York

unless specially agreed upon, and in the latter case a small additional charge is generally made, to cover extra expense of crates and packing, as plants in pots require much more room and care; it also adds considerably to the expense of shipping owing to increased weight.

Such plants as table ferns, asparagus, small roses, chrysanthemums, geraniums, bedding plants, and plants of like nature, should be knocked out of pots, a little of the top soil removed, and each plant wrapped in a small piece of paper, with the top open in mild weather, and with larger papers, and the top closed in colder weather. In long distance shipments a little damp moss should be placed around the root of each plant.

Larger plants, such as Boston ferns, araucarias, ficus, palms, and flowering plants should first have paper wrapped around the ball of soil, or pot, and then a larger piece covering the entire plant and coming high enough to prevent the tops from being bruised in transit; and in the case of flowering plants and plants with tender foliage, tissue paper should be used inside the newspaper or other heavier paper to prevent bruising.

About Crating.

Experience has taught us that as a rule plants travel better, arrive in better condition, and give more satisfaction when packed upright in light, strong crates with plenty of ventilation in summer or mild weather. In cold weather boxes should be used instead of crates, well lined with paper, and in extreme weather use sheet wadding also to keep out the cold. In every instance the plants should be securely cleated, to hold them in place in the crates, should they be accidentally or carelessly tipped over while being handled in transit. There may be some objections to the packing of plants upright on the ground of extra expense of packing and transportation, but I believe that in ninety-nine out of every one hundred cases, the better condition of plants, and, consequently, greater satisfaction will more than make up for the additional expense.

I would strongly urge that no boxes, or crates, weigh more than 150 lbs.,

PREPARE FOR CHRISTMAS

Headquarters for Begonia Gloire de Lorraine. In perfect blooming condition, 6 in. 50c, 75c, \$1.00; 7 in. \$1.25 to \$1.50. I have the deep pink and the light pink varieties.

GODFREY ASCHMANN

WHOLESALE GROWER AND IMPORTER OF POTTED PLANTS

1012 West Ontario Street,

PHILADELPHIA, PA.

as they can be handled by the express company more easily. This would then prevent the danger of their being tilted on end, and in some cases turned upside down. If, however, it seems desirable to pack small plants of carnations, roses, chrysanthemums, and other stock, lying down, then comparatively small boxes should be selected, and plenty of excelsior used in the bottom and between the layers of plants to prevent heating and bruising of the foliage. The crates or boxes should always be well cleated over the top, to secure low freight rate, and the special plant rate of 20 per cent less than regular merchandise rate by express, which is allowed only when plants are well crated or boxed.

Crates or boxes should be plainly marked on top with name and address of consignee; also marked "This side up with care," "Live Plants, Perishable," "Keep from extreme heat and cold." Also, in express shipments, a notice calling the attention of express

agent to the classification, and to the fact that the shipment should be billed at 20 per cent less than regular merchandise rate.

In this paper I have treated the subject in a general way, and taken up points that are of importance to both consignor and consignee. There are, however, special kinds and sizes of plants that require special packing and handling, and they must be treated accordingly; but I cannot enter into details here.

One thing I have always been interested in and have found of great benefit, and that is to watch the various shipments unpacked at the conventions and exhibitions, and profit by adopting their good points, and avoiding their mistakes.

Packing Cut Flowers.

Now as to cut flowers. In the first place, I dwell mostly on carnations, as that is the flower chiefly affecting the Canadian florist. I prefer stock grown outside during the summer—these should be properly and carefully handled to keep them free from disease at all times. After they are put in the houses, which is generally done during the months of July and August, they should not be allowed to come into bloom until the last of September or the first of October. Carefully pinch back any shoots that are showing buds too early.

It is not a very hard matter to arrive at a decision as to how a carnation should be cut and handled during the early part of the season, or until the middle of November, or the first part of December, when the plants have been given practically no feeding at all, but the hardest time of the year to ship carnations and have them reach destination in perfect condition is from December 1st to March 1st, and again in the spring when the weather gets extremely warm and plants make a very quick, soft growth. Therefore, we will take into consideration the proper way to handle carnations through the middle of winter. In the first place, plants should never be given an uneven temperature at night, keeping the temperature from 48 to 54 degrees, according to the variety. Feed sparingly, but often, rather than give a heavy feed occasionally, and then in feeding, use only well-rotted cow manure or pulverized sheep manure, as I prefer it to commercial fertilizers. Keep the plants in a steady growth, but do not cause a soft growth to be made from over-feeding, or high temperature, giving as much air as possible during the day. It may be necessary to keep the steam circulating through the pipes to keep up the temperature, to allow the ventilation to be open to give the plants as much fresh air as possible, especially so on bright sunny days.

Preparing the Blooms.

When the bloom reaches the proper stage of development, which is not quite fully developed, it should be cut with a sharp knife between the joints. As soon as one or two hundred are cut, they should immediately be taken to the packing shed, where they should be placed in water—have the stems in from twelve to eighteen inches of water, if possible. A cold cellar for storing carnations where the temperature is about 45 is best. Never crowd too many carnations in one jar, giving

them plenty of room to absorb as much water as possible before shipping. From three to five hours I consider would be long enough for carnations to remain in the water before packing them, according to the distance they would have to travel. In cases where they are shipped one thousand miles, requiring forty hours to make the trip, flowers would be best in water from four to six hours before shipping.

Boxing.

Use strong wooden boxes for packing them in, if lined with paper inside. There are a variety of ways, some packing flat with wet paper over each layer of stems, others in bunches of twenty-five with a piece of ice laid on paper on the stems, others again with no wet paper or ice. I have unpacked thousands of each, and noted results of each way. I prefer them laid flat with stems in centre of box, and wet paper across each layer until the box is full. By wet paper, I do not mean a piece of paper simply put in water and taken out again, but one that is soaked through and through. Then place two cleats across the stems and nail them down securely so they cannot shift. The box is now ready for the lid. I prefer the box covered with paper, thus making it as air tight as possible.

The cutting and packing of roses is practically the same except that in long distances a piece of ice is preferred.

As regards the packing of sweet peas, as soon as they are cut, place them in water for two or three hours in a cold room at about 50 degrees, then pack them with wax paper and no ice. Place a sheet of wax paper between every row of bunches. Use flat boxes and only one layer in each box.

Express Companies.

I feel I cannot close this paper without reference to the necessity for better equipment for transit, and perhaps

WARD'S LILY BULBS

"NOT HOW CHEAP—
BUT HOW GOOD"

RALPH M. WARD & CO.

12 West Broadway. - - New York

more care in handling while "en route."

Express cars are not properly equipped for handling flowers, especially those on through trains, such as "Toronto and Winnipeg." In the first place, cars are loaded full and it is necessary for messengers to shift flowers from one part of car to another, when sorting express matter for the many routes throughout the West. It is impossible to maintain one temperature, or nearly so, as required for safety in handling these shipments during cold weather unless properly protected.

The only way flowers can be handled with satisfaction under such circumstances is that special apartments be built for same in through cars, about six feet from side door, in forepart of car (this need not be a fixture), and when placed in this compartment can be kept at almost one temperature.

A NEW KIND OF CORN FROM CHINA.

A small lot of shelled corn, of a kind that is new to this country, was sent to the U. S. Department of Agriculture from Shanghai, China, in 1908, and tested the same season. It proved to have qualities that may make it valuable in breeding a corn adapted to the hot and dry conditions of the Southwest. The plants raised in the test averaged less than 6 feet in height, with an average of 12 green leaves at the time of tasseling. The ears averaged 5 1-2 inches in length and 4 1-3 inches in greatest circumference, with 16 to 18 rows of small grains. On the upper part of the plant the leaves are all on one side of the stalk, instead of being arranged in two rows on opposite sides. Besides this, the upper leaves stand erect, instead of drooping, and the tips of the leaves are therefore above the top of the tassel. The silks of the ear are produced at the point where the leaf blade is joined to the leaf sheath, and they appear before there is any sign of an ear except a slight swelling.

This corn is very different from any that is now produced in America. Its peculiar value is that the erect arrangement of the leaves on one side of the stalk and the appearance of the silks in the angle where the leaf blade joins the sheath offer a protected place in which pollen can settle and fertilize the silks before the latter are ever exposed to the air. This is an excellent arrangement for preventing the drying out of the silks before pollination. While this corn may be of little value itself, it is likely that, by cross-breeding, these desirable qualities can be imparted to a larger corn, which will thus be better adapted to the Southwest.

The discovery of this peculiar corn in China suggests anew the idea that, although America is the original home of corn, yet it may by some means have been taken to the Eastern Hemisphere long before the discovery of America by Columbus. From descriptions in Chinese literature corn is known to have been established in China within less than a century after the voyage of Columbus. But this seems a short time for any plant to have become widely known and used. Besides, this particular corn is so different from anything in the New World that it must have been developed in the Old World, and for that to happen in a natural way would take a very long time. These ideas are brought out in Bulletin 161 of the Bureau of Plant Industry, which gives also an account of some cross-breeding experiments with the new corn and the changes which crossing produces in the grains the same season.

A CORRECTION.

Editor HORTICULTURE:

Dear Sir:—I notice that in last week's issue of HORTICULTURE you credit Mr. Burpee with a certain speech delivered at the Lonsdale Din-

ner in Philadelphia. It happens that this was delivered by yours truly. Of course, I feel highly flattered to think that any effusion of mine should be credited to such a distinguished citizen as Mr. Burpee, while on the other hand, he probably may not feel as elated as I did.

W. C. LANGBRIDGE.

We hope the above will reach the eye of at least everybody who read the wrongly credited communication. We make due apologies to the two eminent gentlemen, both of whom are talented enough and eloquent enough to shine at any speechfest.—Ed.

CHICAGO NOTES.

A Scholarship Plan.

The International Stock Show opened Saturday, Nov. 27. This is an event which brings many florists to Chicago. On account of the reduced rates, they come and book up holiday stock, etc. Twenty scholarships to agricultural colleges are to be awarded by J. Ogden Armour to students who can prove themselves expert stock judges. The close of the contest for Monday showed the first prize won by the students of the Iowa Agricultural College. Why would not some such competitive scheme prove an inspiration to would-be florists to better equip themselves with a thorough education along this line? Who can think it out in time for trial at the Nat. Flower Show in 1911?

Personal.

Mr. and Mrs. P. J. Fahy announced the engagement of their daughter, Florence, to Arthur L. Peffley of Minneapolis, in the Sunday Tribune.

Visitors—J. Willins, Danville, Ill.; Julius Staack, Moline, Ill.; Conrad Wolpe, foreman for W. W. Seekins, Duluth, Minn.; Raymond De Rycke, gardener for J. B. Grommers, Zanda, Wis.; J. Edw. Taylor, State Hort. Inspector, Salt Lake City, Utah; J. Landron, representing C. C. Moss Co., San Francisco, Cal.; Milo Crozier, Cedar Rapids, Ia.; Edw. Amerpohl, Janesville, Wis.; M. Bentzen, of Bentzen Floral Co., St. Louis, Mo.; John E. Lafres, Cedar Rapids, Iowa; Lacey Young, Thompsonville, Mich.

FORCING SPANISH IRIS.

Horticulture Pub. Co., Boston, Mass.

Sirs:—I would like to inquire the proper way to treat Spanish Iris as winter stock. I have the bulbs on hand but they are not planted. Is it to late or is there still time for late winter blooms. Thanking you in advance, I remain

Yours truly,

Maine.

H. L. C.

Plant in boxes having a depth of about 4 inches, setting the bulbs $2\frac{1}{2}$ to 3 inches apart and covering them about $1\frac{1}{2}$ inches. The compost should be a sandy loam enriched with well-rotted manure. When planted the boxes may be watered and placed in a cool cellar, or frame and kept there until the bulbs begin to start and show above ground, when they may be removed to the greenhouse. A temperature of 45 to 50 degrees suits them best.

INCORPORATED.

Princeton, Ind.—Princeton Gardens, Incorporated; capital stock, \$25,000.

Pittsburgh, Pa.—The Pittsburgh Cut Flower Co. and the Pittsburgh Rose & Carnation Co. have consolidated under the name of the Pittsburgh Cut Flower Co., with a capital of \$300,000.

FORCING GLADIOLUS

Many florists plant these in boxes, or among their carnations, in the winter. They are excellent for decorative purposes and realize good prices, either wholesale or retail. Gladiolus are a good catch crop and take up but little room. The following are the best for this purpose.

Gladiolus Gandavensis Hybrids

America. The flowers, which are of immense size, are of the most beautiful flesh-pink color. \$3.25 per 100; \$30.00 per 1000.

Augusta. The florists' best white Gladiolus. First size bulbs, $1\frac{1}{2}$ inches and up. \$2.00 per 100; \$18.00 per 1000.

Bulbs, $1\frac{1}{2}$ to $1\frac{3}{4}$ in., \$1.75 per 100; \$16.00 per 1000.

Shakespeare. White and rose. \$1.75 per 100; \$15.00 per 1000.

May. Pure white, flaked rose crimson; the best forcer. Selected bulbs, \$1.75 per 100; \$15.00 per 1000.

Brenchleyensis (true.) Fiery scarlet. Selected bulbs, \$1.50 per 100; \$13.00 per 1000. First size bulbs, \$1.25 per 100; \$10.00 per 1000.

Boddington's White and Light. Extra selected bulbs, $1\frac{1}{2}$ in. and up. \$1.50 per 100; \$14.00 per 1000.

Bulbs, $1\frac{1}{2}$ to $1\frac{3}{4}$ in., \$1.25 per 100; \$10.00 per 1000.

American Hybrids. A mixture of the choicest varieties of Gladiolus in cultivation. \$1.00 per 100; \$9.00 per 1000.

Gladiolus, Colvillei and Nanus (type)

Plant some of these among your carnations; they will come in handy at any time.

Peach Blossom. The most beautiful of all the Colvillei type of Gladiolus; the color is a lovely soft pink, on the order of the Killarney rose. \$0.90 per 100; \$8.75 per 1000.

Blushing Bride. Flowers are large, pure white, with delicate pink spot. Useful for early forcing. \$0.75 per 100; \$6.00 per 1000.

The Bride (Colvillei alba). This lovely white miniature Gladiolus makes a useful cut flower for early Spring use; will stand forcing. \$0.65 per 100; \$5.00 per 1000.

Ackermanii. Salmon-orange, with white blotches, edged scarlet; very pretty. \$0.75 per 100; \$6.50 per 1000.

Remember you may deduct 5 per cent if cash accompanies order.

Of Interest to Retail Florists

DETROIT FLOWER TRADE.

A very active Thanksgiving trade has put all of us in good humor and high anticipations for Christmas. The past has shown that it is safe to judge Christmas by Thanksgiving. Everything brought in moved freely at good prices and at the rate demand is keeping up, prices at wholesale as well as retail will have to remain the same and even stiffen up some. Carnations are now retailing at from 75c. to \$1.50, while roses bring from \$1.50 to \$5.00 per dozen with best Beauties at \$12.00 per dozen. There is plenty of work for receptions, balls and weddings in sight to insure a good season and enough of harmony among the trade to establish steady uniform prices. Looking back at the chrysanthemum season which is about closed, we can say that it was very satisfactory to all growers and retailers. The general demand is for medium sizes, selling at \$3.00 to \$4.00 per dozen; nevertheless,

Wholesale Flower Trade

Flower Market Reports.

Business has been quite dull for a few days past and there have been accumulations of flowers from time to time which have had rather depressing effect on market prices of many items. Thanksgiving business was generally satisfactory in advance orders, but inclement weather interfered with the finish and some material was left on the hands of both wholesaler and retailer. Roses are very fine at present time and carnations are advancing in quality and quantity. Violets are superb.

With a clean market on **BUFFALO** Monday trade opened brisk and while stock was not too plentiful prices have been better on all lines. The chrysanthemum was the Thanksgiving flower and the trade was well supplied in this line. Such varieties as Pink and White Maud Dean, Golden Wedding, White and Yellow Chadwick were of excellent quality and prices were good considering the amount which came in, together with the medium and ordinary quality. Carnations were on the scarce side and no left-overs while violets enjoyed their usual demand and there were plenty to be had. Peas were rather short in supply, Lily of the Valley, Roman Hyacinths and Narcissi were more plentiful and moved well. Beauties sold well, especially the medium grades; the slight advance in prices had a tendency to check the sale of large quantities and in many instances Richmonds took the place of Beauties. Maryland is the leader in pink and some choice blooms were had, as well as Pink and White Killarney. Other roses had a good cleaning up. Stevia, smilax, Crowe-anum fern and other greens in good supply. Reports from the trade indicate that the week's volume of business was better than previous years, for which all were thankful.

CHICAGO Chrysanthemum season is practically over, though there are plenty of the favorites, big and little, still in the market. The flowers, however, are not considered good enough for shipping, as their keeping qualities are not at their best. This does not apply to all the stock, but as a general rule will hold good. Some of the social affairs of the past week helped the florists to work off their stock of chrysanthemums to good advantage. The general verdict is that we have had a short season, but the returns will be fairly satisfactory. Carnations are quite plentiful and the price is lower than at any other time this fall for the same quality. There are plenty of violets from the east and also from local growers. Paper White narcissus is in. Long Beauties are fine and selling well, but the short ones are poor. Other roses are plentiful and prices keep fairly steady. Some cut poinsettias were brought into the market for Thanksgiving, but they did not take well. They seem to be a fixed holiday flower. Some elaborate coming out parties during Thanksgiving week and the demand for all kinds of flowers increased accordingly.

Flower Market Reports.

(Continued from page 795)

NEW YORK Trade is very quiet and demand light this week. Roses are coming in freely and there is an abundance of Beauty, Bride, Bridesmaid and Killarney, averages on which will run considerably lower than last week. Cattleyas, which have been very scarce and have brought very high prices are a little easier. Chrysanthemums are on the down grade and are losing favor with the buyers. Carnations are on the increase, quality good. Lily of the valley is strong and active.

It might have been worse. **PHILADELPHIA** Many will say—how could Thanksgiving week have been worse with such a storm Wednesday and Thursday? We can only illustrate the point by allusion to the old story of the lady who had the "might-have-been-worse" always at the tip of her tongue. One morning her gudeaman thought he had her stumped, all right. Said he: "Janet, I had an awful dream last night—I dreamt I was in hell!" "Oh," says Janet, "it might have been worse." The indignant "How so?" came like a shot, and was met with—"It might have been true!" So in the same way this past Thanksgiving week might have been worse if the hell dream of many had been true—but on comparison with last year's volume of

business it finally came out as a pretty fair Thanksgiving after all. At this writing (Nov. 30) American Beauties are up in price and there seems little chance of any surplus to cause a slump, so a gradually increasing schedule from now to after the holidays would seem to be in order. Marylands and Killarneys are much finer at present than they have been at any time this season. White Killarney is far and away the best in white roses, although there are a few good Brides here and there. Of course Kaiserin is running down some now. Carnations are finer and prices much better. Chrysanthemums are on their last legs, although there are still some very good flowers coming in. Gardenias are a little more plentiful; but the demand keeps up so well that there is but little easing in the high figures. Very little life in the violet market this season for some reason

as yet unexplained. Orchids holding firm at the high rates quoted last week.

If you sell pot plants to customers with taste and tidy habits, the Ever Ready Flower Pot Cover, advertised in this paper, is just what you want to please the buyer and multiply sales. In the eye of a particular customer it improves the appearance and adds to the attractiveness of the plant fully 100 per cent. It comes in all sizes and the cost is within everybody's reach. Try a few.

Obituary.**Carl Jurgens.**

Carl Jurgens the far-famed lily of the valley specialist and rose grower, died suddenly on November 26, at his home in Newport, R. I. He had been about attending to his usual duties until a short time ago when he got a cold which caused him to stay indoors as a precautionary measure, but his condition was not considered serious till he was suddenly affected with heart trouble and died in a short time.

Mr. Jurgens was born in Holstein, Germany, in 1844, served his florist apprenticeship in Hamburg, and worked at the trade for some time in Paris, then in London, and came to America in 1869, working at Astoria, L. I., for some time. He moved to Newport in 1871, when he built his first greenhouse there on Mill street, and established the business which he successfully conducted and continually

**CARL JURGENS**

extended up to the time of his death, his annual sales of lily of the valley the past few years amounting to several million and other bulb flowers more than a million. He also grew large quantities of roses, mostly American Beauties and Kaiserins, which have long been noted for their high quality. Mr. Jurgens has the distinction of having been the first to force lily of the valley commercially, and so originated the cold storage system used so extensively now, which enables us to have this choice flower at all times of the year. His first experiment with this was in 1871 in the first greenhouse which he erected on Mill street. The well equipped range of greenhouses which he has built up and which now cover about four acres of ground, stands as a monument to his energy and skill. He is survived by a widow, two married daughters and one son, Carl Jurgens, Jr., who has been assistant to his father for some years and who will now assume the management of the business.

The news of the passing of this

this honored representative of the florist business will bring a pang of sadness to many, who can truthfully say they have lost one of their best friends. Carl Jurgens was the very soul of integrity and he expected those with whom he dealt to live up to the same high standard of honor by which he governed his own life. To such his loyalty and kindness knew no bounds. By his employes he was respected and beloved.

The funeral took place Nov. 29, and was well attended, especially by the gardening fraternity, about forty employes of the deceased being present. The floral tributes were numerous and beautiful; one piece of lily of the valley was made so that it covered the casket entirely, except the glass plate.

George H. Brown.

This well known landscape gardener passed away on November 23, at the family home, 1357 Euclid street, Washington, D. C., following an illness which compelled him to take to his bed on Sunday. A severe cold was the indirect cause of his death.

In the death of Mr. Brown, Washington loses one of its shrewdest citizens. His keenness of intellect was a feature of his strong personality and his amiability was an attribute of character which won him friends by the score.

Early in life he became a landscape gardener, under the tutorage of his father, David Brown, whose work in England won him an enviable reputation. When Mr. Brown was fifteen years old he became his father's assistant in landscape gardening, and he mastered the arts, so that when he came to America his services were in wide demand.

George Hay Brown was born in Edinburgh, Scotland, on December 17, 1838. In 1840 he was taken to England by his father, receiving his education there in private schools. In 1850 the father came to America, going to Philadelphia in a search for a wider field in the prosecution of his profession. Two years later the son and his mother joined the father and husband in Philadelphia.

In 1856 the son came to Washington, where he planned and laid out the government experimental gardens at Third street and Pennsylvania avenue. He remained in the employ of the government until 1861, when the civil war began, and he enlisted in the Seventh Battalion, District militia. In 1864 he returned to Washington, soon after going to San Francisco. Later, he was superintendent of nurseries in Memphis, Tenn. In 1870 he was appointed superintendent of public buildings and grounds by President Grant, holding the position until about 1875. It was while he was thus employed that he supervised the laying out of the present grounds of the Capitol and White House.

Frederick C. Schneider.

Frederick C. Schneider, one of the old time florists of Detroit, Mich., died Monday, November 22. He had suffered for a long time and had been engaged in the florists' business over 40 years. He leaves a wife, son and two daughters.

Jens Petersen Brudahl.

Jens Petersen Brudahl of Racine, Wis., died of pneumonia at St. Luke

Hospital on Nov. 15. He had con-
ducted a florists establishment for
many years in Racine.

Miss Anna Cronan.

Miss Anna Cronan of Covington,
Ky., died November 22 from ptomaine
poisoning. Miss Cronan conducted a
retail florists business in Covington.

Bernard Breckner.

Bernard Breckner, one of the oldest
members of the New York Cut Flower
Exchange, died suddenly Sunday, Nov.
21, at his home at Bayside, L. I.

THE LATE H. F. A. LANGE.

We would add to the notes on the
death of H. F. A. Lange which we
published in last week's issue that
Mr. Lange was 62 years old, having
been born in Hamburg, Germany, in
1847. His father was a florist in the
old country.

After being graduated from one of
the German common schools when
only 13 years old, Mr. Lange became
apprenticed to a firm of gardeners for
a term of seven years. Having ac-
quired proficiency in the art quicker
than was usual he was graduated with
honors in five years, and received his
diploma as a professional florist.

Mr. Lange concluded to follow his
trade in America and came to this
country in 1866. He came to Worces-
ter in 1867 and took charge of a con-
servatory owned by Dr. Benjamin F.
Heywood. Three years later Mr.
Lange entered into partnership with
Dr. Heywood.

In 1877 Mr. Lange leased the con-
servatory upon his own account and
conducted the establishment until 1882.
In that year he purchased seven acres
of land at Grant Square. In less than
a year he had put 5000 feet under
glass besides erecting a substantial
residence. For 35 years he has con-
ducted a store on Main street and the
greenhouses establishment has now
grown to an area of 125,000 sq. ft. of
glass. His two sons, Carl C. and Al-
bert H., who have been associated with
him will continue the business.

PHILADELPHIA NOTES.

Ralph Shrigley, late with Niessen, has joined forces with Samuel Lilley.

Howard Earl will make his winter quarters this year at the Continental, the house where the Prince of Wales used to stop.

Philip Freud, of Michell's seed store, has been particularly happy in this year's window displays. An air-ship model and Japanese air plants are the main theme.

Godfrey Oschman reports large Christmas plant orders and is already nearly booked up to the limit. An important municipal contract from Baltimore swelled last Friday's engagements.

Papa Green, at the P.-M. Co.'s place, had a bad spell Thanksgiving Day and had to be taken to the Medico-Chi Hospital, where he did not recover consciousness until next day. At this writing he is reported to be getting along all right again.

Joseph Hurley, late superintendent on the Paul estate at Radnor, is now in charge of the Hunter place at Haverford. The latter is a new establishment and expensive landscape and building operations have been going on there for the past year or more.

Edward Reid claims that all the troubles of the grower and wholesaler at the present time come from overproduction. He cites as an instance the dose of bad medicine the lily of the valley men got a few years ago, and points to the normal and the resultant healthy condition of that market now.

M. Rice & Co. report an unusual demand for Christmas specialties, particularly in the way of beech sprays and red ribbons and red baskets. Their five floors of florists' supply goods are at present an inspiring sight and the Christmas buyer is simply overwhelmed in wonder and admiration.

Among our visitors this week were the distinguished, debonair and handsome Captain Lynch of West Grove, and the versatile and industrious Parker Thayer Barnes of Harrisburg, also H. Holmes of the Holmes Seed Co., Harrisburg, Pa. The faithful, fruitful and faultless Edwin Lonsdale, reported all well from Salt Lake—on his way to California.

Andoria Nuseries' business has been increasing so rapidly that additional room has lately been acquired in the Whitemarsh Valley. The new addition is near the Spring Mill station of the Reading's Schuylkill Valley branch, and has been known heretofore as the "Jerry Comfort Farm."

We congratulate Mr. Harper on this evidence of well-won prosperity. To make the nursery business pay and grow takes men of the highest ability.

J. Otto Thilow, chairman of the Florists' Club essay committee, reports that the subject for the monthly meeting, Dec. 7, will be: "The Follies of 1908-9—Will they be repeated in 1910?" by C. H. Fox. January, Edward A. Stroud; February, Adolph Fahrenwald; March, Albert M. Herr. Subjects of the latter three will be announced later. We think the new committee shows commendable spirit in planning four months ahead, and congratulate them on getting such able speakers.

OUR NATIONAL FRUIT.

By James Handley, Quincy, Ill.

(Dedicated to the National Apple Show, Spokane, Wash.)

How grand are the scenes when sweet spring is unfolding,

And loveliest pictures are opened to view;

And shining in splendor for eyes then beholding

The forests and fields robes of beauty renew.

Then warmly we welcome the songsters of morning.

When singing glad praises at advent of spring;

When buds and bright blossoms the orchard adorning,

Awakening our hopes of harvest to bring.

The red, rosy apple, the bright-golden apple,

The ripe, luscious apple, of all fruits the king.

The fading of bloom when fulfilling its mission,

Gives speed to our toil in the light of good cheer,

Inspiring our zeal for fullest fruition,

For picking in days when harvest is near.

We gather the fruits with an exquisite pleasure,

In tasting its flavor how closely we cling;

And sending to others rich gain of our treasure,

We echo the chorus and gleefully sing:

The red, rosy apple, the bright-golden apple,

The ripe, luscious apple, of all fruits the king.

We choose the sweet bloom for the flower of our nation.

To reign with our banners where'er unfurled,

And ruling o'er homes from the power of its station,

The light of its blessings will shine through the world.

And, rising in heights of grandest promotion,

The sway of its scepter will speed on the way,

Till all o'er the land and far o'er the ocean

In strains of sweet music its cadence will sing:

The red, rosy apple, the bright golden apple,

The ripe, luscious apple, of all fruits the king.

— Southern Orchards and Homes

ABOUT INFESTED PLANTS.

Editor HORTICULTURE.

Dear Sir:—As a retail florist for the past several years I have always made it a rule to buy my stock of plants twice each year from wholesalers who have the highest reputation and whose prices are not always the lowest, but still I keep getting disappointed and discouraged from the fact that instead of obtaining stock free from disease and insect pests, in about two weeks after I receive such stock trouble develops so that a continuous battle has to be waged until I either dispose of such stock or throw them in the trash pile. It seems to me that in the florist business like every other business nowadays, the little dog has to bear all the woes and troubles of life while the big dog can wag his tail and lay the blame where it doesn't properly belong and continue to foist the same inferior stock on the unsuspecting buyer who has yet not learned the way of crookedness or deceit, but who learns to his grief, about the time he expects to begin to realize on his purchase, that the plants are unsaleable from the fact that the germ-laden plants have had about time to develop Mr. Scale in his different shapes, kinds and habits and, as to White Fly, Mealy Bug and some new ones not yet gotten properly named, he is up against the real thing, without any apparent relief or sympathy and only rebuke from his customers, who when they do buy a plant, expect it to be perfect in every detail and often require a guarantee as to its health and condition generally.

I would like to have your opinion as to who should bear the loss when such infested stock is sent out and what is the remedy for such practices. The little dog is thoroughly tired of suffering for the misdeeds of the big dog.

Yours truly,

Roanoke, Va. PATRICK FOY.

Mr. Foy has surely run into a streak of misfortune. The introduction of injurious bugs into any florist's place is a crime meriting severe punishment, and the bigger the dog the bigger the club should be. It would be a plan worth trying, to ship the plants back to the place from whence they came, with a bill for the board of the bugs during the time the plants were on the place. Otherwise never buy any more goods from the offending party, and in the meantime seek a remedy among the many excellent insecticides advertised in every issue of HORTICULTURE.—(Ed.)

WIZARD TRADE BRAND MARK MANURES

Dried, screened and packed in bags of 100 lbs. each.

PULVERIZED SHEEP MANURE

PURE — UNIFORM — RELIABLE

A strong and quick acting manure, highly recommended for carnations and chrysanthemums.

OUR CAST IRON CENTRE GUTTERS

Not cast of brittle stove plate iron — but high grade, tough iron. Are not crooked — are cast smooth and straight.

Lengths of 8 feet 4 inches, making it necessary to use only half the posts required with the shorter gutters that are on the market.

Every gutter of ours is equipped with roof bar brackets which stiffen the roof and prevent bar end rot.

A Lean-to House Is Cheaper To Build In Some Cases

For example, if you have a retaining wall or building with a southern exposure, against which you can build the lean-to, the expense of the north side is done away with.

There was a root cellar wall here which was carried up a few feet to give height enough for the right roof slant. It is 50 feet long and has two benches.

It is Sectional Iron Frame Construction which is a guarantee for its lightness and durability. Built with our Curved Eave they make decidedly good looking houses.

Whether you want a lean-to, or whatever kind of house you want, it's good business sense to have us fill your want.

The Rookery

ABOUT ITS RIGIDITY

A house may be rigid to start with, but will it stay rigid — which is the same thing as asking, is it enduring?

Listen: All cypress core bars are dipped in a chemical preservative, and the portion exposed to the moisture of the house is incased in steel—every

roof bar then becomes a rigid rafter—resulting in increased strength and decreased shade. Just as a circular piece of pipe is stronger than a square one, so is a U-Bar curved eave stronger than one spliced at that point. It is undoubtedly the house of greatest endurance and greatest lightness.

The ideal construction for private estates, parks, public institutions and florists' showrooms.

STEPPING STONES TO FORTUNE

The Rice Stepping Stones of twenty-five years successful business and honorable achievement — "Stepping Stones of our past selves to higher things" — are not merely that. They are also the trodden steps to fortune for countless thousands who follow the banner:

RICE STANDARD

Says Emerson: "Let a man make a steam engine or a lead pencil better than any other in the world—and the tread of humanity will make a beaten track to his habitation, even should he live in an untrodden wilderness." A recognition of that truth, and constant effort for something better **all the time** explains in a measure

RICE SUCCESS

No one ever become a leader in his chosen field who always waited for the other fellow to do something and then copied. The Rice originals have had copies without limit; but unfortunately for the copiers they have always been a year or two behind the times.

"To win Dame Fortunes Golden smile
Assiduous wait upon her,
And gather gear by every wile
That's justified by honor."

To do something better than they have ever done before; to work honorably, faithfully and assiduously for the florists of America, that's the Rice slogan and the Rice principle.

— A — PUBLIC TEST — OF — APHINE

The Insecticide that kills plant lice of every species

Will be held at the

MANHATTAN FLOWER MARKET

46 West 28th Street, New York City, N. Y.

On Monday afternoon, December 13th, 1909, from two to five o'clock.

All interested in floriculture and horticulture are cordially invited to attend this test. Bring plants, shrubs, or any stock that is infested with insects and disease, in order that the real effectiveness of APHINE, as an insecticide, may be fully demonstrated and established.

If you have used APHINE and have not been perfectly satisfied with the results obtained, but are not able to be present at this exhibition, write us and tell wherein you have been disappointed.

We will endeavor to show you that APHINE will do all that is claimed for it and (as many experts agree) MORE.

Trade papers are requested to have their representatives present at our exhibition, so that distant readers may be fully informed on the merits of the tests made.

APHINE is used at an average strength of 1 part to 40 parts of water—full directions on each can. Price \$2.50 per gallon.

APHINE is now on sale in New York, Philadelphia, Baltimore, Washington, Boston, Rochester, Buffalo, Detroit, Chicago, St. Louis, Denver and San Francisco; with negotiations pending for agencies in other cities in the United States and Canada.

APHINE is endorsed by the leading experts on insecticides.

If your house does not handle APHINE write us and we will send you name of our nearest selling agent.

Two Splendid ROSE NOVELTIES

Raised by JACKSON DAWSON

NOW OFFERED FOR SALE FOR THE FIRST TIME

LADY DUNCAN

Rosa Wichuraiana fertilized with Rosa rugosa. Absolutely hardy.

WINNER

of the Silver Medal of the Massachusetts Horticultural Society 1900. One of the finest hardy ramblers ever raised.

Has the prostrate long rampant growth of the mother, while the Rugosa blood shows in the foliage, spines and flowers, the petals being a warm, lively pink and making a delightful contrast to the yellow stamens.

DAYBREAK

Wichuraiana type, formerly known as seedling No 7 (Wichuraiana X The Dawson). A vigorous grower, profuse bloomer and easy forcer. Foliage light yellowish green. Hardy as far north as Canada.

Flowers single, in loosely pyramidal clusters. Color deep yellowish pink, a shade darker than Lady Duncan, slightly lighter tint towards centre. Stamens very bright orange. Flowers full, round, cupped. See illustration of plant in issue of November 6.

EVERY NURSEYMAN AND EASTER PLANT FORCER WILL WANT THESE TWO NEW ROSES

Stock limited, order now for prompt delivery.

PRICES—Strong three-year-old plants, \$1.00 each; \$10.00 per dozen.

We carry a very large stock of fine Conifers, Deciduous Trees and Shrubs and Hardy Herbaceous Perennials.

EASTERN NURSERIES

Henry S. Dawson, Mgr.

JAMAICA PLAIN, MASS.

Notes From the Arnold Arboretum

Among the new broad-leaved evergreens from Western China by far the most important in number as well as in horticultural importance are the *Rhododendrons*. Of the more than one hundred species now known from China, more than sixty have been described during the last fifteen years from Western China alone, a number which hardly anyone would have thought possible before the botanical exploration of that country was begun. Almost all of them belong to the true *Rhododendrons*, while of the *Azalea* section no new species has been introduced. Some of the more noteworthy are the following of which at least several can be expected to prove hardy at the Arboretum, as they have been collected at high altitudes, in some cases at elevations of ten thousand feet or more.

Rhododendron Augustinii is a shrub reaching ten feet in height with oblong-lanceolate acute or acuminate leaves, from three to four inches long and glabrous except hairs on the midrib of the under surface which is sprinkled besides with brown dots. The flowers appear in few-flowered clusters and measure about one and three-quarters of an inch in diameter; in color they vary from white to pale purple.

A very handsome species is *Rhododendron auriculatum* with big leaves and the largest flowers of all. The oblong leaves are cordate at the base, from seven to nine inches long, whitish on the under surface and thinly covered with a dun-colored tomentum disappearing with age. The funnellform flowers are four inches long and measure over four inches in diameter; they vary from white to pink and are marked with a maroon blotch.

Rhododendron Benthamianum is a shrub with oblong leaves only one to two inches long, rounded at the base and furnished on the under surface with yellow and brown scales. The purple flowers measure little over one inch in diameter and appear usually in clusters of three. It is allied to *R. yunnanense*, another species of recent introduction, and begins to flower when only one foot high.

Rhododendron calophytum grows into a tree forty feet high. The lanceolate leaves are from nine to twelve inches long and whitish and glabrous on the under surface. The flowers vary from white to purple, measure two inches in diameter and are produced in large many-flowered clusters.

Rhododendron Davidii is also a tree up to thirty feet high. The oblong obtuse leaves narrowed at the base are from two to three inches long and glabrous and pale on the under surface. The rose-colored flowers measure about two inches in diameter and appear in clusters of six to ten.

Rhododendron maculiferum is a shrub with oval leaves cordate at the base, about two inches long and glabrous and pale on the under surface. The flowers are pale purple and marked with dark spots, measure about one and a half inch in diameter and appear in clusters of five to ten.

Rhododendron orbiculare is a shrub with very striking foliage calling to mind that of the Yellow Pond-lily. The leaves are broadly or nearly roundish, deeply cordate at the base, from three to five inches long and glabrous and whitish on the under surface. The rose-colored flowers are campanulate, two and a half inch in diameter and are produced in clusters of eight or ten.

Rhododendron Souliei much resembles the preceding, but the leaves are smaller and narrower, only about two to three inches long and but slightly cordate at the base.

Rhododendron sutchuense is a shrub with lanceolate leaves from five to seven inches long and glabrous and whitish on the under surface. The pale purple broadly campanulate flowers measure nearly three and a half inches in diameter and are produced in clusters of five to six.

Of a type very different from the preceding species are *Rhododendron intricatum* and *R. micranthum*. The former is a low densely branched shrub, from one to three feet in height with oval leaves only one-third of an inch long, silvery white or later brownish on the under surface. The lilac flowers measure little more than three-quarters of an inch across and appear usually in clusters of five. *Rhododendron micranthum* is a shrub up to eight feet high resembling in foliage and flowers a *Ledum*. The lanceolate leaves are from one to two inches long and covered beneath with brown scales. The white flowers appear in dense many-flowered clusters and measure only one-third of an inch in diameter.

Alfred Rehder.

Trans-Atlantic Notes

SOME OPINIONS ABOUT NEW ROSES

It is of much value to rose cultivators to observe that which foreigners write or speak of new varieties. The well known rosarian Herman Kiese wrote in an Erfurt gardening journal too slightly of the Lyon rose and the illustration, which does not approach anything like a good bloom of that variety. The flower is as beautifully formed as Kaiserin or Belle Siebrecht, and of a charming red-gold color which does not become paler in rainy weather. The variety is a capital autumn bloomer, a strong grower, and when grown in a frame the color is improved. It is said that it will become one of the most desirable roses of the future for cutting purposes, and inquiries concerning this variety are very numerous.

5091 1 3 270

The variety Bismarck will without doubt supersede the degenerating Caroline Testout, and a correct verdict in this case will be afforded in the coming year when a great number of budded stocks come into bloom. A grand rose which many persons have overlooked is Lady Fair of the La France tint and fine form, which nearly always comes singly on the stalk. Leuchtfeur is regarded as superior to Grus an Teplitz, and is a good bedding rose, with dark foliage.

THE JUBILEE EXHIBITION, HAARLEM, 1910

In the beginning of the month of October about 1,000,000 bulbs in variety in 1500 groups and beds were planted in the grounds. The parterre on the north side of the area bordering the Exhibition buildings are located in a formal manner; and the remainder of the area in landscape style. Two large buildings have been erected for special exhibitions. The Exhibition commemorates the 50th year of the existence of the Netherlands Society for Bulb Culture. The more important home and foreign societies will send deputations.

CARNATION PAUL MARTIN

As a variety of the Perpetual flowering class this carnation may be described as a desirable acquisition in regard to size of the bloom, which is very large, of fine double form, and of great freedom in flowering, making the variety a good decorative plant when grown in pots, and a remunerative plant for the florist. The color is rosy-salmon. The plant is readily increased by cuttings; and hitherto it has been quite free from the carnation rust and other maladies.

BEGONIA THE GEM

This charming novelty is a hybrid variety, the result of a cross of an unnamed tuberous rooted begonia with *B. Socotrana*. The hybrid has a branched inflorescence, and semi-double flowers of a carmine rose tint, 3 inches in diameter. It is a decided acquisition to the dwarf class of winter-flowering begonias; and obtained an award of merit when shown by Messrs. J. Veitch & Sons at the meeting of the R. H. S., on November 9.

TWO EXCELLENT ROSES FOR THE FLORIST

These two highly recommended new varieties of Hybrid Tea Roses are of German origin, viz., Kaiser Wilhelm II., a cross of Kaiserin Auguste Viktoria with Van Houtte, made by Mr. Nekola Welter, of Pallien, and a seedling—a cross of Frau Lilla Rautenstrauch with Sunset. The first named is distinguished by an erect habit freedom of growth, and dark green foliage. The flower is firey red, velvety very dark central petals. The flowers open readily, and the variety is certain to take a high place among dark colored H. T's. This variety comes into commerce this season. The second variety, likewise a H. T., is of the tint of old gold with

orange, and is a rose of the future—of first rank. The flower buds are long, the flower very full, and fragrant; valuable as a cut flower and for florists' work.

ACALYPHA HYBRIDS

When the two introductions of Mr. F. Sander, viz., *Acalypha Sanderiana*, and *A. Godseffiana* came into commerce, several horticulturists in Great Britain and abroad were of the opinion that both novelties might form suitable objects for hybridizing. Herrn Rettig wrote in "Die Gartenwelt" in 1899 in reference to *A. Sanderiana*, that doubtless it would soon—if not already done—be crossed with some species having variegated leaves, which would certainly give rise to a number of useful varieties. Nine years have passed, and we have not heard of any hybrids of these two species, although several hybridists have engaged in the endeavor to obtain crosses; and the pursuit seems to have been abandoned. Sir J. D. Hooker showed years ago that *A. Sanderiana*, N. E. Brown, had been known for some years as *A. hispida*, Burm.

Herrn Herman Sandhack, head gardener at Mehlem on the Rhine has given great attention to this crossing of *Acalyphas*, but without results; and the vegetation of the seed offered greater difficulties than the obtaining of it. The latter was in so far associated with difficulties from the fact that *A. Sanderiana* as seedbearer was the only available species and this bears no male blossoms, or only produces female blooms under certain conditions that lead to pollination. In the summer of 1907 he had the satisfaction of obtaining seedlings of *A. Sanderiana* and *A. Godseffiana*, and some months after vegetating he saw that these seedlings differed in leaf and growth from the parents. In the course of last spring Herrn Sandhack was enabled to discover flowers that differed in color from the dull red of *Sanderiana* and giving place to pale rose, orange, whitish green, and mignonette tints. He has selected the finest colored varieties, and intends to offer only these to the trade, in the hope that many gardeners and plant lovers will take up their culture which is as simple as that of *A. Sanderiana*. Some figures of these new varieties are given in "Die Gartenwelt" for November 7 last, viz., *A. Camphausiana*, *A. Beissneriana*, *A. Hessdorfiana*, *A. Wagneriana* and *A. Sandhackiana*, all of them differing slightly in habit, foliage, flower color and shape. It would occupy too much space in this journal to describe them, and it will suffice for me to state that the plants succeed under conditions found suitable for the more temperate orchids and adiantums, and later in the year they may be placed in a cool greenhouse along with coleus, pelargoniums, etc., for several weeks. The plants may be kept for six weeks or longer period of time in corridors and apartments, if not deprived of a modicum of sunlight.

Fredrick Moore

London, Eng.

Begonia Gloire de Lorraine

This beautiful greenhouse flowering plant has been before the gardening world since 1892. Its beautiful pink flowers last so well that from early fall until spring the plant is a mass of bloom, almost entirely obscuring the foliage. If the old flowers are cut off about the end of March and the plant given a slight shift, it will, in a few weeks, again yield as good a crop of flowers as at the first, lasting well into the summer. We have used these cut-back plants for piazza decorations, they lasting six weeks in that position.

November or early December is a good time to put in leaf cuttings, if large plants are desired the following fall, in ten or twelve inch pans. We get our best plants from medium sized, well ripened leaves. They root quickly in a temperature of seventy degrees, but I think it is a good plan to leave them in the sand until they begin to throw up the young shoots from the callous formed at the end of the leaf stem. I fail to find any difference between a leaf cutting with a heel attached and one with the plain leaf stem, equally good plants being raised from either.

For a first potting take equal parts of loam and leafmould, with about a fourth of charcoal added to keep the soil sweet and porous, the compost being as rough as can be conveniently used in a two-inch pot. One of the best begonia growers I ever knew never used a particle of sand for potting them, except what was naturally in the soil, using equal parts of fibrous loam, leafmould, dried cow manure, or well decayed horse droppings, and to every four pails of that mixture one of charcoal, all as rough as could be equally worked around the plant while potting.

I think pans are the best receptacle to grow them in, paying strict attention to drainage. Leaf cuttings treated in the above manner, and grown in a rather humid atmosphere, during the summer, if so desired can be in ten or twelve-inch pans by Sept. 1, and some of the largest ones can be staked out with small twigs and made to measure about three feet through when in full flower. If allowed to droop equally around the pan without any support they make a very handsome hanging plant. Nice small plants in six-inch pots or pans may be grown from cuttings secured from the base of a cut-back plant in April or May.

Lorraine Begonias, we find, do best grown close to the glass; a good plan is to hang them to the rafters. No flowers should be allowed to develop earlier than October first. Pinch the shoots and it will make them break good and strong from the base of the plant. A slight shading is necessary up to about the middle of September. After they are well rooted in their last shift, waterings with stable manure water will be beneficial; weak and often is the better way. They also

like "Clay's Fertilizer." Two teaspoonfuls to a ten inch pan, scattered on the surface once in three weeks is a good dose; water the plant after putting it on. Soft coal soot is also a good thing to give the pink flowers a nice brilliant color, a good handful to three gallons of water and change with the above stimulents occasionally.

When the plants begin to develop their flowers, they ought to be in a nice airy greenhouse with a night temperature of from fifty to fifty-five. They will, however, stand a much lower temperature. One of the best plants we ever grew was flowered in a north house where the glass stood quite often at forty degrees. The begonia is given to sporting, and one should exercise care and take cuttings from the best formed and most floriferous plants. The most distinct of the several varieties is "Turnford Hall." I don't consider the color good; it is neither a pale pink nor a white. However, it is much more vigorous than any of the pink varieties I have grown.

George F. Stewart.

West Medford, Mass.

Progress in Geraniums

NO. II.

At these geranium farms where thousands of stock plants are grown the real business of propagation commences about the middle of September when the cool nights are supposed to put in their appearance, for a geranium cutting will not always live when the thermometer hovers around the nineties; they are very apt to get the black rot, especially if they are the least bit over watered or if the cuttings are soft; and yet, good strides can be made in the summer. The wood should be in a fairly hard condition; wood that is just about showing a bud is generally in good shape. Cuttings should be short-jointed, about 2 inches long, cut just above the first small leaf, the first leaf cut off and the other trimmed about one-half. If they are wanted as rooted cuttings, the sand should be about 3 inches deep on the table and of a good, sharp quality, firmly packed. After the cuttings are planted they are given a good watering and then not watered again until they are rather dry, and must be kept on the dry side until rooted. In some places these are potted four or six in a pot and grown for a short time before being sent out; at other places they are left in the cutting bench until they are well-rooted and ready to ship away.

Where the business of growing and shipping 2-in. pot plants is carried on the stock is grown in the same way as for cutting trade. Cuttings are prepared in the same way, but instead of putting them on the cutting bench they are firmly potted in 2-in. pots in a light sandy loam. They are then taken directly to the greenhouse and given a thorough watering, which, if properly done, will not have to be repeated for at least ten days, when the cuttings should be showing roots through the soil to the edge of the pot. They are then watered and handed over and all dead leaves and litter removed. In about three or four weeks the plants are ready for shipment. They are knocked out of the pots, about one third of the soil removed, and then wrapped 2 or 3 together in a bundle with moss at the roots. Whenever the weather will permit they are packed upright in slatted boxes for shipment. In the winter they are packed lying down in a paper-lined box and in this manner they will carry for several days in good condition.

A quarter of a century ago we had our Queen of the West, single General Grant, known generally as the single light red, and the single dark red; then we had our dark red, brick red, light pink, and deep pink, single and double, and such appellations as in our own estimation best suited the special variety. On very few places was there any attempt at proper nomenclature, so that the result was confusion in the extreme when new stock was needed, and the confusion became even greater when stock was sold. We are glad to note that this condition of affairs is to a great extent being remedied and that nearly everywhere geraniums are now grown under their proper name.

Among those which ought to be in every first class collection and which have been introduced during the past quarter of a century are such varieties as Alphonse Ricard introduced by Braunt in 1894, having large

semi-double flowers, often measuring 2 inches in diameter, produced in enormous trusses, on long stalks, and so freely as to almost conceal the foliage; in fact almost every joint produces a flower. It is a semi-dwarf, robust grower, foliage large and of good texture and slightly zoned. In this class of scarlet we might mention Peter Henderson—a rather more upright grower; Pres. Baillet, a little darker in color and more heavily zoned. These are all good all around varieties either as pot plants or for bedding.

In the salmon we would mention Beaute Poitevine, another of Bruant introductions, which is a true representative of the type of short-jointed, robust grower, free-flowering and first class in every respect. In this color we have Anais Segalas, a 1906 introduction, not so well known, but a favorite when ever seen; enormous trusses freely produced. Mme. Landry is one of the choicest and handsomest of this class, a bright rosy salmon color. We have seen trusses of this kind that would measure 20 inches in circumference. Mrs. Lawrence is indispensable as a light salmon pot plant, of dwarf, compact habit of growth, wonderfully free in flowering and strongly recommended for winter blooming; a great favorite at Covent Garden market, London. In the pink class there have been so many noteworthy introductions within the last few years that it is really a question which is the best. M. Anatole Roseleur, a beautiful rose pink with a distinct white center, has been the most admired of any we have, and will unquestionably soon be a universal favorite, superseding all others, even the grand old favorites—Miss F. Perkins and Mme. Barney. Bertha de Presilly is a silver pink which is a fit companion to that great, dark red bedding variety—S. A. Nutt. In 1905 when Mr. Bruant disseminated Dagata he said that it represented the highest development of geraniums at that time and so far we have had no reason to dispute the claim. It is an exquisite shade of mauve rose with a large blotch of white at the base of upper petals; the individual flowers and trusses are immense.

Fleur Blanc, Bruant 1905, was the first pure white of the Bruant race and was a grand acquisition to the already splendid set of semi-double white, including such grand varieties as Mme. Recamier, Mme. Buchner, Madonna and others.

Among those reds which may be specially classed as bedders we have S. A. Nutt—the best known and most used geranium we have; John Doyle, Gen. Grant and **Mary**, de Castellane, are all universal favorites, too well known to need a special description. Col. Thomas, Brt. 1906, is a most magnificent addition to this list and one that is destined soon to rank among the highest grade of standard geraniums, an attractive shade of deep cardinal red.

Mme. Jaulin, 1904, and Jean Oberlee, Brt. 1906, are in an entire different shade, best described as peach pink; Mme. Jaulin is a true representative of the Bruant type, heavy foliage, semi-dwarf, vigorous, short jointed growers, with large trusses. Jean Oberlee is an exquisite shade of hydrangea pink, shading tenderly to almost pure white at the outer edge of each petal. Its habit is exceptionally strong and vigorous. The trusses are actually immense and undoubtedly it has a great future.

White Marsh, Md.

(To be continued.)

Dendrobium Sanderae

The discovery of a new orchid of showy character is rather a rare occurrence nowadays. When this new Dendrobe was exhibited in London at the Royal Hort. Society, August 3rd, 1909, it gained a first class certificate. It is a beautiful orchid. The flowers are three

inches wide, sepals and petals of the purest, glistening white, the lip white, lined with dark purple in the throat. The plant comes from New Guinea and its nearest ally is Dendrobium Dearei, which it resembles in general habit. It will require a moist, tropical house.

British Horticulture

A SPRAYING AND FUMIGATING DEMONSTRATION

An interesting demonstration of spraying appliances recently took place at Waltham Cross, a big market growing district. A machine known as the Carlton sprayer was exhibited. Another invention shown was the cucumber spot fumigant, introduced for the benefit of many southern growers who annually suffer through the ravages of this insidious pest. By the use of the lamp a dense volume of smoke was emitted, which is stated to be effective in eradicating the spot disease. Another serviceable apparatus was the new safety cyanide packages. These consist of tins, with sides of a certain gauge zinc, filled with cyanide of soda. After the bowls are filled with sulphuric acid and water, the packages are dropped one in each bowl. Owing to the fact that the acid necessarily takes some three minutes to eat through the zinc sides, the operator is enabled to walk through the house to be fumigated, placing the packages as he proceeds. The idea is extremely ingenious, and abolishes the old-fashioned method of using a long string and wrapping the cyanide up in brown paper. The growers present were particularly impressed with the safety of this method, which appears to minimize the risk of using the cyanide to the lowest possible limit.

ITEMS OF INTEREST

A leading grower of chrysanthemums for market in Middlesex is using out doors a special lamp as a preventive against the havoc caused by frost.—The

British Columbian Government is making a meritorious display of apples grown in that province at some of the leading shows in this country. A bioscope series of fruit ranches is also a popular "side show."—Mr. J. Cheal, a well known Sussex nurseryman who has extensively travelled in America and Canada, this week gave some of his reminiscences at a meeting of the Horticultural Club in London.—An attractive show is being arranged for Dec. 8th, by the Perpetual Flowering Carnation Society.—There is a movement on foot to amalgamate the Royal Botanic Soc. and the Royal Horticultural Society, the former society haven fallen on "evil days."—A new apple, "Renown," raised by Mr. Charles Ross, of Newbury, is now being offered to the trade. It was obtained as a cross from Beasgood's Nonsuch and Cox's Orange Pippin. An award has been obtained from the Royal Horticultural Society.—Recent practical trials of Nitro-Bacterine treatment of soil have been very encouraging, peas showing increased yield of 37 per cent and beans 28 per cent.—The philanthropic efforts of the Vacant Land Cultivation Society and similar organizations have met with gratifying success the past season. Many scraps of vacant and waste land have been brought under cultivation and several hundred unemployed men have been able to partly support themselves from the sale of crops.

London.

W. H. Adsett.

Soils and Fertilizer for Rose Growing

It is not possible to state definitely what amount of phosphoric acid, potash and nitrogen should be contained in a soil that would bring the rose to its highest state of perfection. Nor in the present state of our knowledge of such matters can this be done for any plant, though it is possible as the result of experiment to offer certain general recommendations for the fertilization of many plants.

Where roses are grown for cut flowers applications of fertilizing materials containing relatively a large proportion of phosphoric acid with small amounts of nitrogen and potash produce the best results. In many cases application of bone meal, used singly, is sufficient to supply the phosphoric acid and nitrogen, the soil itself containing sufficient potash. This is especially the case when certain clay or clay loam soils were used, these soils being derived from rocks rich in potash bearing minerals.

The idea of analyzing the plant and the soil and adding to the latter the kind and amount of fertilizing material shown to be necessary as the results of such analysis is an old one. This method is adapted only for laboratory experiments where all conditions are controlled. When attempted on a large scale in either greenhouse or open air cultivation, where the soil is constantly undergoing many changes, chemical, physical and biological, this results in the introduction of many factors over which it is impossible to exercise the necessary control, thereby rendering such a method useless for practical purposes.

It is true that a sample of soil can be accurately analyzed and the exact composition of the sample determined, but by reason of the changes noted above the analysis should be held to represent the soil only in a general way. Such an analysis is valuable chiefly for showing a general deficiency of some particular substance, lime for instance, rather than as a guide to the proper fertilization. Moreover, there is no method by which the availability for plant use of the substances found can be determined.

The value of grass roots—in fact all vegetable matter in a soil is due to the formation, by its decomposition in the soil, of humus, and to the further fact that during the process of decomposition there are produced acids that enter into combination with the minerals present in the soil, rendering some of them more soluble in their new form, hence more available for the use of the plants. Besides which, all green plants contain all the mineral elements necessary for plant growth, and by the decay of such vegetable matter these minerals are left in the soil for the succeeding crop. When too great a quantity of green plant matter is added to the soil there is danger of producing excessive quantities of acids, more than necessary to act on the soil minerals, thus leaving the soil itself in a "sour" or acid condition. The addition of lime hastens the de-

composition of such vegetable matter and neutralizes such acid conditions. Lime also has a physical effect in soils—rendering clayey, stiff soils more open and porous and causing sandy soils to become more compact.

It is not likely that the amount of lime found in water that is fit for domestic use, even if "hard," will be sufficient to produce any appreciable effect on roses. Some classes of plants, azaleas, rhododendrons, etc., are intolerant of any small amounts of lime, however.

High grade acid phosphate is the most quickly available source of phosphoric acid and contains neither nitrogen or potash. Animal bone is less quickly available and contains both nitrogen and phosphate of lime. For roses, when potash is needed, sulphate of potash is to be preferred to the muriate or to Kainit. Use by mixing thoroughly throughout the soil before planting, and by dissolving in water and applying as a liquid after plants are established and it is desirable to force them.

Still, after all chemical fertilizers have been applied (to what would seem an ideal soil for growing roses) in the proper proportion and form it has never been known that a house planted in such soil will run a full season without the addition of a sheep manure top dressing, cow manure mulch, cow manure liquid applications, or some other form of feeding, and be a success.

I would suggest that at the next regular meeting of the American Rose Society to be held in New York in the coming March, our president appoint a permanent committee of five members to study this question of soils and fertilizers for Rose growing purposes to co-operate with our several agricultural departments and if possible secure aid from national or state sources in this work.

We should not claim that our position is as important as that of the farmer, but we are entitled to something, as we have large investments, employ large forces of labor and pay big taxes.

This is a question that should come before the S. A. F. and O. H., but the rose growers should bring this matter up and maintain a position or they will not receive the individual attention which they should have.

It is a known fact that soil containing an ample supply of phosphoric acid in a proper form and containing absolutely no nitrogen is practically worthless, or if a soil contains plenty of all other plant food elements in their proper proportions and is lacking in one it is of no benefit. Each grower should also bear in mind that if his soil is perfection and his cutting, ventilating, watering, etc., are not properly attended to his labors go for naught.

Chatham, N. J.

Three New Chrysanthemums of Merit

Elmer D. Smith & Co.

OROBA

ARLEE

NAOMAH

Oroba.—A large early white in the way of Beatrice May, being of the easiest culture with fine stem and foliage. It may not excel Beatrice May in size but its other splendid characteristics are so much superior that it will soon gain ascendancy with the commercial grower. Three feet; ready Oct. 20th. Best bud Aug. 15th.

Arlee.—A rich golden amber of dwarf sturdy growth, excellent either as a pot plant or for cutting. Is a true single of the large flowering section producing large sprays which are borne erect. Entirely distinct and of exceptional merit. C. S. A. Cert.

Naomah.—Large Japanese incurved, a seedling from Merza, more conical in form than its parent. This variety was not judged by C. S. A. Committee but we have decided to send it out on its merits as a worthy addition to the exhibition section. If the stem were a little more rigid this would be an ideal commercial sort as it possesses every other qualification and may prove very acceptable to those who plant early and give generous treatment. Pure white. Four and one-half feet; ready Nov. 1st. Bud Aug. 25th.

Chrysanthemum Notes

DECORATIVE CHRYSANTHEMUMS

For garden culture and for pot plants many of the little Japanese decorative chrysanthemums are really most useful and there is now a distinct race of dwarf, free flowering varieties that are a great advance upon some of the older sorts. Aug. Nonin of Paris is a great specialist in this line and we have now quite a collection of his in cultivation here. The flowers are mostly as full and double as the larger sorts and among some of the best we have seen this season are the following: Eden; with stiff short florets, nice shade of rosy pink passing to pale pink in the centre. Provence; small compact flowers, bright rose. Picardie; dainty flowers of good size, color pale rose. Fee Parisienne; rosy mauve, paler towards the centre. Savoie; a pretty little Jap., very narrow florets, pure white. Aquitaine; a decorative Jap., semi-globular in form and petals reflexing, golden buff passing to gold in the centre. Normandie; purple amaranth. Fee Orientale; rather larger than

the preceding, yellow centre, shaded rose and cream. Gascagne; pale yellow deeper in the centre. Feu Follet; fine pot plant, petals like a cactus dahlia, reddish crimson, golden bronze reverse.

SINGLE CHRYSANTHEMUMS

Wherever we go we find the rage for these flowers increasing and in all the large miscellaneous exhibits at our shows the nurserymen include large numbers of the most recent seedlings. They are certainly selling well and our trade growers are now doing a larger business in singles than they are in the large show varieties. This applies not only to plants and cuttings but also to the flowers themselves when in season. At the nurseries of our leading growers the singles are grown in large numbers and form a considerable portion of their autumn displays.

Going around the shows this year we have noticed many of the most effective and promising sorts and a few notes may be useful to our American readers. One thing struck us as curious. Hitherto the French have shown no desire to embark in the cultivation of the singles but at the recent show of the N. C. S. we met an

old French friend who had a commission from a fellow countryman to procure a score of the best singles for introduction to the French flower-growing public. We spent some time going round the show to make a selection and from the French point of view it is as evident that the daisy, or marguerite-like single, was most in accordance with our friend's taste. We think this is right, as the semi-doubles, so often termed single, are a long way in arrears of what we regard as the pure florist's type and for decorative purposes have not the light artistic character of the real single.

Among the best of recent introductions J. H. Greswold Williams with long florets of medium width, pale yellow, is a neat flower. Mrs. Colles is a single of good form, old rose red, centre yellow. Florence Mountstephen is large. Freedom pure white like a marguerite, florets very long, rather narrow, centre yellow. Morning Star very long florets, creamy white, centre yellow. Eureka is purely a show flower of great size, outer florets white with large yellow centre. Blush Beauty is very large, rosy blush pink, centre yellow. Innovation is more of a decorative single, velvety reddish crimson. October White is very fine; it has long white florets, and a very small yellow centre. Gertrude; medium sized florets, yellow centre, pure white. White Duchess has several rows of florets, pure white, centre yellow. The Lion is a fine shaped typical single dull rosy red. Gladys Gaywood is a flat petalled starry-shaped flower, small yellow centre, florets velvety crimson. Lorna Kensington has very long florets thin and narrow, white tinged lilac mauve. Miss George has several rows of ray florets, centre yellow; color pale rosy blush.

Charmian Payne

CATTLEYA GASKELLIANA

Grown in the open with shading of bamboo twigs, at "The Roses," St. Clair, Trinidad, B. W. I.

Cattleya Wavriniana

The above is a beautiful hybrid between *Cattleya granulosa* and *C. Warscewiczii*, or *C. gigas*, as it is usually called. This cross was first flowered by Mr. Peeters of Belgium in 1900. The plant illustrated here was raised by the writer of these notes and forms now a valuable addition to Mrs. B. B. Tuttle's interesting collection of orchids. Up to now four plants out of the same sowing have flowered and all are equally as good; all of them showing the influence of *C. granulosa* in the shape of the flower, whereas *C. gigas* has given additional size and a beautiful color towards the make-up of this lovely hybrid. The sepals and petals are a deep rose of a metallic hue due to the combination of the green color of one parent and the lavender of the other. The strongly three-lobed lip has the rose-colored side lobes veined with deep purple on the inner surface; the front lobe is of a rich shade of purple-magenta, growing paler towards the front margin and shading off to a deep carmine on the isthmus formed between the front lobe and side lobes of the lip. The yellow markings of *C. gigas*, so conspicuous in most of its offsprings, are here almost entirely cut away, only a trace of yellow being noticeable along the edge of the isthmus. The flowers measure about 6 inches across the petals.

The plant illustrated was exhibited before the N. Y. H. S. at its recent flower show and was awarded first prize for hybrid orchid. It happens to be a free grower and a good bloomer, having produced five of its large blooms at its first flowering.

The East and the West

II.

DECIDUOUS AND EVERGREEN TREES

We find that the same species are hardy or tender according to the location in which they have grown for thousands of years. The box elder of Nebraska is worthless in Manitoba. Pines and maples from the extreme East do not do so well in Nebraska as trees of the same species grown in the West. I have known eastern elms to kill to the ground, while western ones would be uninjured. A tree may be hardy in the north and yet not be able to endure the winter drought of the plains. Prof. Hansens of South Dakota originated the Sunbeam raspberry—a cross between Shafer's Colossal and a Manitoba wild red variety. These are hardy and very prolific in the Dakotas and Minnesota, but kill to the ground at this experiment station. They simply dry down in winter. The tulip tree may live here in sheltered places, but would be an utter failure in the open.

Nebraska is 400 miles long and so has a variety of conditions. The Horticultural Society has cut the State up into several districts with recommendations of trees, shrubs and fruits for each district. White pines do well on the Sterling Morton place at Nebraska City which could not live a year at the western limit. Thousands of white pines have been planted here in York County and there are perhaps 25 yet living. As a general thing evergreens with soft foliage cannot endure the extremes of our variable climate. Most of the eleven kinds of the eastern slope of Rocky Mountain conifers do well. Those with soft foliage, like the Douglas spruce, need shelter from the sun and do well in groves surrounded by other trees. Scotch pine will do well in Manitoba but can't endure conditions at the 100th meridian.

The ponderosa or bull pine is the hero of the West. It laughs at hot winds, blizzards, and droughts, and grows right on. All the plains from the Missouri river to the Rockies can be covered with it, and since fabrics are being made of its long needles, you plant a grove of this species and you also plant a flock of sheep that the dogs can't worry and you know where they are nights. White spruce from Europe is a failure; that from northern Maine is of but little account. That from northern Minnesota is better while the belt which swings around into the Black Hills fits our conditions and they are being raised by the million.

Trees of variegated foliage soon revert to their original type. On the grounds of Robert Douglas of evergreen fame I saw some variegated catalpas of great beauty. I secured some. They put on their gala dress and then the sun commenced persecuting them and burned that charming foliage to a crisp. Then the trees seemed to say: "Well, if you don't like our style we will try something else," and they all reverted to the green dress just like their neighbors. Deutzias, altheas and weigelas are a little tender and are not planted to a great extent.

The reader might think we were badly circumscribed and had but a few things to rely on, yet there are about twelve kinds of evergreens that do well and all of our 150 kinds of lilacs with two or three exceptions. Even we have about 50 kinds of native trees and shrubs; the whole family of syringas and spireas, the large collection of cornus, tamarisk and the Russian olive do better here than in the East. Most of the perennials are a success.

In short, with a careful selection we can pull down a section of paradise and live in it and so win a victory over adverse conditions.

York, Neb.

C. S. Hammon

Pruning Peaches

In the peach house, pruning is one of the most important operations. To have the proper fruiting wood for this year's crop depends upon whether the trees were properly cared for the past year when disbudding was done and the proper training depends upon how the new wood was tied in. A perfectly trained tree can only be secured by great care in the first training and pruning. All of the strong and rank growth must be taken off unless it is needed to form the shape desired. Cut off the wood that fruited last year when possible and leave the bottom new wood to take its place.

When peaches are in flower all the air possible should be given; keep the atmosphere dry. To ensure fertilization some gardeners put a hive of bees into the house when the trees are in flower, with great success. If this is done it is well to have an opening on the outside of the house so they can get back to their hive if they should get out of the ventilator, which they will naturally do if the day is warm. When the peaches are in full bloom the outside entrance could be closed up for a few hours and make them all come out into the house. Others use a camel's hair brush to distribute the pollen. I prefer tapping the trees with my hand, to dislodge the pollen, three or four times a day; this must be done when the house has ventilation on, or dried up with fire heat.

When the fruit is set and the growth starting give them a good syringing every bright morning and in the afternoon on bright days when closing the house up. This should be done early, so they can dry up before sunset. A good watering should be given as soon as the fruit is set for now root action has started. This should be done with the chill taken off. The best and easiest way I have found is to have a faucet attached to the hot water pipe and run the water into a barrel, then use a Kinney pump to syphon the hot water from the can and water through the hose. This should be done early in the morning while the water is good and hot.

James Wheeler

An Appreciated Appreciation

I think you have been especially successful in producing timely and well-directed editorials in your publication and in my estimation they add very much to the worth of the paper.

Yours sincerely,

J. A. VALENTINE.

What think you now of HORTICULTURE? Five years old This present issue marks the birthday anniversary of "the new paper." Time flies and we can hardly realize that our fifth milestone has already been reached and that our "newness" is already pretty well brushed off. HORTICULTURE was started with a definite purpose, a large factor in which was to provide for those engaged in floriculture and allied horticultural industries a publication on lines somewhat different from any then in existence. We confess that we have fallen far short of our ideal, but promise to keep striving away on the same course and hope, as we grow in strength, to continue to approach nearer and nearer to the standard aimed at from the beginning. We need make no boast as to the value of this paper as an advertising medium for the trade. Better and farther-reaching than anything we might say or claim is the very positive stamp of the trade's approval which its advertising columns bear from week to week—unparalleled in the case of any other paper of its class, at the same age.

A wonderful development and its effect

The comparatively small number of varieties commercially grown for the cut flower trade has for many years been a favorite taunt with the "old-fashioned" gardener and the alleged decadence of the fine art of flower growing under glass has been often bemoaned both in public and in private. "All you know is Bride, 'Maid and Beauty, carnations, and chrysanthemums" is the refrain which many a florist has often had to listen to. No doubt some foundation for the criticism existed in years gone-by but the commercial flower grower was industriously and profitably improving the culture of those popular specialties to a standard of quality such as the world had never before seen and he had the public with him—heart and soul and pocket-book—and so he kept on his way. Indeed, there was a long period when, if one wanted to procure "odds and ends" of promiscuous flowers, the small obscure shop was the place they were most likely to be found. A reaction was sure to come, in time. The vastly increased production of the standard varieties of roses, carnations, violets, chrysanthemums and forced bulb flowers resulted in their becoming "common" and then the street fakir got busy and the result is well known in most of the large flower-producing centres.

Tendencies and outlook

But there is "always room at the top" and here history begins once more to repeat itself. Perhaps it was the plant grower who was the first to recognize and take advantage of the popular yearning for "something different." For some years back the cut flower specialist has had a most uncomfortable realization of the plantsman's activity and the public's approval thereof at Easter and the Christmas holidays especially. But the cut flower grower has also heard the call and his product, as seen in the daily stock of the society florist in New York City and other centres which practically set

the pace for the rest of the country, begins to show a new complexion. Not only rich orchids in many species, luscious gardenias, and prim camellias but lancifolium lilies, ericas, bouvardias, wall flowers, daisies, pansies, antirrhinums and mignonette, together with half a score of new roses, now occupy places of honor in every Fifth Avenue show case and find favor among aristocratic buyers. The "old-fashioned" gardener can now see the dawning of the day he has longed for and he may rest assured that the present demonstration is but the beginning of what is to come.

The increasing appreciation for promiscuous small flowers will, we hope, prove a boon to many growers who, with small, old fashioned houses, have found themselves unable to compete successfully in highly specialized products against the vast modern-equipped ranges of glass houses which are constantly going up. This varied auxiliary material which now seems to have a fair chance in sight has no need for glass palaces; neither have the majority of the flowering plants for which a good regular market has now been established. Azaleas, ardesias, Lorraine begonias, primroses, cyclamens, poinsettias, ericas, small ferns and very many other things now grown or that will yet be grown for the holiday trade, do famously in antiquated structures—some of them undoubtedly better and more lasting than if more luxuriously housed. We call attention to these gradual tendencies in the commercial florist's business because they indicate a wider sphere and enhanced opportunity and because it is wise to observe and draw conclusions as to the future trend, from the centres where floral whims and fashions have their source. He prospers most who keeps a sharp outlook, not alone to learn what others are doing but with a purpose to utilize the knowledge thus obtained in determining the direction of general movements and development in the immediate future.

Treatment of Newly Imported Orchids

When a cultivator receives orchids direct from their native country, which may be hundreds or thousands of miles distant they should be unpacked, and all decayed growths, pseudo-bulbs and roots removed with a knife, and those that are sound and uninjured sponged with a mild insecticide or soapy water: as scale insects and others, besides cockroaches are pretty sure to be present on them. Having been cleansed, place them on sphagnum or wood moss in the glass house and afford shade from bright sunshine, and lightly syringe them with tepid water. Some orchidists after cleansing the plants hang them on rods or to the staging with the heads upwards, and use the syringe once daily besides keeping the air in the house in a moist state by sprinkling the floor and walls. This kind of treatment may be per-

sisted in, for ten days or a little longer, the application of water to the plants direct being very sparing. Another method and a good one is to place the plants on the top of suitably sized clean pots filled with clean crocks, sprinkling the plants and crocks once a day, until they begin to grow at the ends of the roots. With this method of restoration there is less fear of decay occurring, and the plants break freely. When the plants have fairly started to grow a small quantity of sphagnum or rough orchid peat, and pieces of charcoal may be laid on the crocks for the roots to cling to. Hanging the plants with the heart growths downwards is the better plan with Phalaenopsis, Aerides, Saccolabiums, Angraecums, etc., as by this means water cannot lodge in the breaks. When symptoms of growth are evident, those plants which come from hot climates, such as the Philippines, Burmah, India, etc., should be put into the warmest house unless they are natives of the mountains of those countries. Growth having become active the plants should be placed in suitable mixtures, consisting of sphagnum, peat, and charcoal (this last for the sake of its moisture-holding property) in pots having perforated sides, on wood blocks) in baskets made of soft earthenware or in copper wire baskets.

Fredrick Moore

French Gardening

There is now a boom in the French system of intensive culture on this side. Several important experiments have been made in this method of raising produce by the use of hot-beds and the bell-glasses (cloches). Interest in the subject has been further stimulated by the publication of several books describing the commercial possibilities this method of growing offers. The system has been successfully put into practice by Misses Jones and Peers, at Thatcham in Berkshire, under the guidance of a French expert. It is contended by the advocates of this French system that it is possible to raise the crops of early vegetables and salads which are imported in such large quantities from the market gardens in the environs of Paris. Similar gardens have been constructed at Maryland in Essex, and Evesham in Worcestershire. One of the largest gardens of the kind is being now prepared in the Thames Valley. In England the bell glasses have for many years been utilized in private establishments, but it is only in recent times that its use has been adopted on an extensive scale by commercial growers in this country. Some four years ago, a party of market growers from Evesham paid a visit to the market gardens in the suburbs of Paris, and were impressed with the advantages of the French plan of raising heavy crops from a small area of land. On their return to England one or two of the more enterprising of the party determined to introduce the system to this country. Others followed the example, and then the popular Press had sensational articles on the potentialities of "The Golden Soil," attractive but somewhat misleading to the unpractical. The new gardening has evidently come to stay.

W. H. ADSETT.

London.

Autumn Show at Edinburgh

On the 18th, 19th and 20th November last, the Scottish Horticultural Association held its annual show of chrysanthemums, fruit and vegetables, in the Waverley Market, Edinburgh. The site is an extensive one and measures about 150x380 feet. The schedule provides for 111 different classes which may be briefly divided into cutblooms, bouquets and floral designs, chrysanthemum plants, other plants, fruit and vegetables. The prizes amount to over £400, mostly in cash, although a few medals are included. Among the most valuable prizes were the City of Edinburgh cup and £20 for the 1st, £15 for the 2nd, £10 for the 3rd and £5 for the 4th; the Scottish Challenge cup and £8 for the 1st, £6 for the 2nd, £4 for the 3rd and £3 for the 4th, both for cut flower exhibits.

The whole of the exhibits were arranged on tables and a marked feature was the absence of those fine decorative miscellaneous groups we are in the habit of seeing in and around London, and which contribute so materially to the general artistic effect. There was only one such group and that came from W. Wells & Co., of Merstham. The pot plants of chrysanthemums, of course, were staged on the ground level.

Alex. Morton, gardener to the Dowager Countess of Seafield, won the City of Edinburgh cup with a truly grand show with his 45 superb blooms, 3 of each in 15 vases. They are well worthy of special mention, viz.: Lady Talbot, Lady Conyers, Reg Vallis, Bessie Godfrey, Mrs. A. T. Miller, Mrs. G. Mileham, Alg. Davis, Mme. G. Rivol, Mme. P. Radaelli, Miss Hickling, W. Beadle, Victoria and Albert, Elsie Fulton, Edith Jameson and J. H. Silsbury.

The second prize was awarded to D. Nicol who had several of the same varieties, but Splendor, Purity, F. S. Vallis, Mrs. F. W. Vallis, Mrs. C. Beckett, Hon. Mrs. Lopes, Mytchett Beauty, were in the place of those not shown by the first exhibitor. Altogether there were six exhibitors and the collections staged by them formed unquestionably the leading feature of the show in cut blooms.

The next important prize, the Scottish Challenge cup, was awarded to John Finnie for a lot of grand blooms, F. S. Vallis, Mrs. F. W. Vallis, Lady Talbot, Marquise Visconti Venosta, Bessie Godfrey, Reg. Vallis, Mrs. A. T. Miller, J. H. Silsbury, being those shown.

For the second prize the award went to L. McLean, who showed some fine blooms of Mrs. L. Crossley, Jumbo, Alg. Davis, Lady Conyers.

Class 3 had no fewer than ten competitors. The conditions of this class were as follows, viz., 6 vases of Japanese chrysanthemums in 6 varieties,

BESSIE G. PAYNE

Awarded Silver Medal at Edinburgh, as best New Chrysanthemum not in Commerce.

3 blooms in each vase. Mr. McKellar's lot came in first. We noticed in the four prize winning exhibits almost every flower shown in the bigger classes was represented, showing the importance that the exhibitors attach to certain sorts for the purpose.

In the class for new chrysanthemums not yet in commerce, first prize—the Association's silver medal—was awarded to W. Wells & Co., who staged a very fine display of their golden chestnut novelty, Bessie G. Payne. Second prize went to a novelty, Mary, that was a long way off the first, shown by Mr. McLean; only one bloom was staged. Mrs. W. Iggulden, a sport from Mme. G. Rivol, Mrs. W. Hookey, a sport from Mrs. F. W. Vallis, and a

single called Miss Kate M. Cowan were the only other novelties in this class.

In the pot plant classes for chrysanthemums there were many entries. Japanese, pompons and singles were all represented but the culture was rather below the average. In the miscellaneous trade groups of chrysanthemums, W. Wells & Co. had a group of finely flowered plants arranged in a most effective style, edged and relieved here and there by autumn foliage and ferns. Among the singles were Narcissus, Mary Ellis, Crown Jewell Improved, Robert Thorp, Mrs. Will Jordan, White Pagram, Kitty Bourne, etc. Large Japs of superior merit were also included.

Messrs. Geo. Williams & Son showed

a most interesting collection of cut flowers. Specially noteworthy were the huge strain of singles, almost worthy of the name of giant singles. Mrs. Chas. Howe, Leslie Spencer, Manor House Park, Caledonia, Mrs. Chamberlain and Florrie King were some of the best.

John Forbes showed a miscellaneous group, of which palms and foliage plants formed the background and among the numerous subjects worthy of notice were Bouvardias Bridal Wreath, Pres. Garfield, Elegance and Alfred Neuner, Salvia Glory of Zurich, Michaelmas daisies, Begonia Gloire de Lorraine and carnations in quantity, of which Enchantress, Nelson Fisher, Midas, Queen Louise, Enchantress, Robt. Craig, Britannia, Mrs. H. Burnett, Lady Bountiful, etc., formed no inconsiderable a portion. From Young & Co., of Cheltenham, carnations were staged in lightly arranged bunches in vases. They were Beacon, Irene, Britannia, Rosedore, Mrs. H. Burnett, Mikado, White Enchantress, Fortuna, Harlowarden and several others.

A very good stand from H. W. Ellison was contributed consisting of ferns nicely and effectively set up. Wilson & Co. also showed ferns.

There were many fine displays of bouquets and floral designs from Scottish florists and some excellent designs were among the number. Specially interesting from an artistic point of view were the bridal bouquets. The Misses Todd exhibited a set each of a bride's bouquet and two bridesmaids' bouquets that were well worthy of a Paris florist. The dinner table decorations, seven in number, were on the contrary very poor in execution and scarcely worthy of so great a show.

Fruit was numerous and formed the classes 71 to 88. The chief products were grapes, apples and pears, but here again there were many small exhibits. The first prize in class 71, for a table of fruit, was awarded to D. Kidd. In this lot the decorative effect was of the highest order and the quality of the fruit staged amid surroundings of decorative chrysanthemums and smilax was excellent. Apples and pears on plates, grapes, Eros Maroc Muscat of Alexandria and Appleby Towers were remarkable fine examples of cultivation.

In the grape classes, 72 to 79, there were 88 bunches shown in the usual English style. In one class for two bunches of Alicante, 12 exhibitors competed. The remaining classes, 80 to 88, were well filled by numerous exhibitors and occupied a large portion of the space.

Among the fruit and vegetable classes there were many and varied displays in most cases of a high order of merit.

The jury, exhibitors and officers of the Society were entertained to dinner, the chair being taken by Mr. Whytock, president of the Society, and head gardener to the Duke of Buccleugh.

C. HARMAN PAYNE.

At the annual meeting of the El Paso County (Colo.) Horticultural Society the following officers were elected: Dr. D. H. Rice, president; Dr. W. W. Arnold, first vice-president; J. F. Lilly, second vice-president; F. W. Holman, secretary; W. W. Williamson, treasurer; Fred Horn, John Berry and Edwin Pierce, members of schedule committee.

THE FOLLIES OF 1908-9—WILL THEY BE REPEATED IN 1910?

Charles Henry Fox, before the Florists' Club of Philadelphia, December 7th, 1909.

It is highly probable that this title has an air of familiarity about it, for I believe it is a billboard term, but nevertheless this very negative subject that I have chosen may help us as florists—I would rather say brother florists. After all, we are one and the same, and the names we are known by—growers, wholesalers, and retailers—are terms designating the little corner we fill in the great game. You and I are neither independent nor dependent, but we are interdependent. Who says I am independent commits the worst folly of 1909, and I hope you will not find him in 1910. Primarily a folly is the act of a fool. In order to succeed and advance our business we must not be fools. No one would commit the folly of selling old stuff for fresh. No grower would purposely leave his carnation range closed at night when he should carry an abundance of air and a pipe, yet the folly of cutting the crop, shipping it the next day to the wholesaler, who in turn sells it to the retailer the next day or the next (as they just came in), and who in turn sells them to the customers (as they just came in), who comes back the next day to complain they were not fresh. Were they? Do we depend on each other? No one will question that. Are the follies of one the follies of all? This subject truly concerns all of us. We are a cosmic whole; what affects one affects the other directly or indirectly. We do not know where it stops. Life is but a change, and we must change with it. What was O. K. five years ago will not go today. Our customers are changing; they demand more, better goods, better service, intelligent service. I think I have a fine side light on this subject.

What are gifts anyway? What can flowers be used for? Why are not more of them used at Christmas and on every occasion? Someone has said, "Flowers are frozen music." Now there is hurdy-gurdy music and grand opera music; both have their use. But be careful you do not supply the hurdy-gurdy kind to a grand opera customer.

We sell impressions, sentiment, and sympathy. Flowers properly used can form any expression you desire and will reach the sternest business man, as well as the most cultured and refined woman. Every birthday should be garlanded with flowers. Every anniversary should be honored with flowers. Married toles as well as single should remember St. Valentine's day and send flowers. A Thanksgiving table looks twice as good if flowers are used on it. But these sales cannot be encouraged as long as the public considers flowers extravagant, and almost a prohibitive luxury. We must get rid of these impressions, and the time to do it is when they want flowers.

Have you ever stopped to think of the wonderful possibilities of the business we represent? Into what the business can be developed? What we must do to correct the errors in order to develop? One of the greatest of these errors is the extortionate prices at Christmas. No matter how good or how poor a season we have had, or what the outlook for the mid-winter and early spring social season may be, it is "wait for Christmas"; lay back; store the stuff; salt it down, and unload to your customer at the highest possible price!

Catch the dubs that want flowers for Christmas, and soak them good and hard. We think they have to have them, but they don't. They are ready at this holiday time to spend their money for gifts. All Fall you

PEONY FLOWERED DAHLIA QUEEN WILHELMINA
Light Pink.

have led them along from cosmos and dahlias to chrysanthemums, violets and orchids. You sold these at a profit, and pleased your customer, the wholesaler and yourself. You have spent good money, in advertising to bring the buyers to your store, but now with our 300 per cent. advance we undermine the good we have done all fall.

All your advertising, all your catering, all your good ideas are wasted energy. Instead of leading up to Christmas, and seizing the psychological moment to persuade your customer to buy flowers for Christmas gifts, and use flowers in connection with all other gifts, you turn on the cold water spigot, and give them a chill that they do not get over for three or four weeks, with your extortionate prices.

And for what, gentlemen? One day. This one day ruins a whole month's business. You can't wipe it out of people's minds. They will not go near a flower shop unless they are absolutely compelled to. When you turn on this cold water spigot, they do not get over it in three or four weeks or a year. They may get over the chill, but the effect of the high prices at Christmas shows itself throughout the year; and you lower their vitality as buyers of flowers, and when you turn it on again at the next flower season, be it Christmas, Easter, or Thanksgiving, you gradually give them consumption, and they leave us altogether.

Why it is a yearly occurrence that for a week before, and three or four weeks after Christmas, the first remark a customer will make will be, "Flowers are awfully high now, aren't they?" Before you have had a chance to say anything, showing what is upmost in their thoughts.

Now if those who come into your store think that way, what must the

thousands that pass by think? You know it is the thinkery that does the work, and on this account they resolve to buy gloves, confectionery, jewelry, etc., and so florists lose thousands of dollars' worth of sales.

Do these merchants advance their prices because their customers want their goods? Not on your life; they are too clever. They have spent good money all season advertising and building up trade, and they are not going to detract from that valuable asset, the customer, that they have psychologized into buying their wares just because there is an increased demand for them.

I have actually heard florists say, direct to the customer, who is complaining of the awful advance of 300 per cent., "Well, flowers are very expensive at Christmas, and we have a great demand for them and they are very scarce." And then your customer immediately thinks, "Well, it does not have to be flowers; I am not going to be Buffaloeed that way. Why not send candy at 80 cents per pound for the best, or why not jewelry same price as at any other time of the year?—and it will keep, too, while flowers would be gone in a few days, anyway." So they go and spend their money elsewhere. Aside from this, we not only lose the sale but the confidence and respect of the customer as well.

You will see flowers for sale the next day on the street at every corner at one-third less than you ask. Violets for which you yesterday asked \$1.50 or \$2.00 per bunch—and, by the way, violets are never worth \$1.50 or \$2.00; I mean a bunch of 50—the next day after Christmas they will be poked under your nose for 50 cents per bunch. If they were so scarce as you told your customer, how is it that there are so many on the street

the next day?

Gentlemen, put yourself in the position of the retail customer and note the impression you get. Could you have confidence and respect for a business man who tried to charge you three times the fair price just because he thinks you must have the goods? Now, though the retailer has much expense at this rush season, although he must employ extra help at high prices and he has extra delivery expense, and he has extra wrapping expense to protect from frost, and he must make good anything that is frozen, yet all this does not account for the exceedingly high prices asked by him. What is the reason? It is the wornout system of trying to crowd out of one day's business the profit which should be spread over a month. We would make this profit, and more too, if prices were at a slight advance—say, 50 per cent. There would not be any to sell to the street man the next day.

The commission man would be happier, for if anyone has his troubles it is he. He is between the devil and deep sea, trying to please his store man and his grower. You can go to any commission man a week before Christmas and he is afraid to tell you the price for fear his grower will declare he is too low. How are we going to sell under these conditions? Drop the follies of 1908. Let us be sane, and make a play for the biggest end of this Christmas shopping. Turn the tide our way, and explode this idea that the public has, that flowers are awfully extravagant at Christmas.

Now, after all is said and done about follies of 1908, and extortionate high prices at Christmas, I must not be construed as an advocate of cheap prices or cheap work, but there is a vast difference between a square deal and "get what you can" plan.

Obituary.

Albert Du Planty.

Albert Du Planty, a pioneer florist of Vineland, N. J., died suddenly, Nov. 29, at Johnson City, Tenn.

Robert Marks.

This capable gardener, long employed as general superintendent of the estate of Mr. Darlington at Mamaronock, N. Y., died on November 29, aged sixty years.

Andrew Irwin.

Andrew Irwin, aged 75, died Nov. 28th, after an illness of twelve weeks. He was a veteran of the civil war and a life-long employee of the Pennsylvania railroad. Mr. Irwin was not connected with the florist trade but was the father of Mrs. Albert M. Herr, of Lancaster, Pa., treasurer of the Ladies' Society of American Florists.

Raymond Moore.

Following a very short illness, Raymond Moore, the only son of Mr. and Mrs. S. H. Moore, died Nov. 29, at his home, 94 Lake place, New Haven, Conn. Mr. Moore would have been 19 within a few weeks. He was a member of the class of 1909 at the New Haven High school and was a member of the High School fraternity of Theta Sigma. He was very popular with his associates. Since graduation he had been employed in his father's florist establishment in Chapel street.

John Seligman.

John Seligman, wholesale florist of New York city, died on Sunday, November 28, aged 36 years. Mr. Seligman has been ill and unable to attend to business for the past five or six months. He has been in business at 56 W. 26 street for four years, previous to which he was engaged for thirteen years as a salesman in the wholesale store of M. A. Hart. He was an honest, industrious young man and the news of his death was received with sadness among the florist trade. He leaves a widow and two children. The business will be continued under the management of his partner Joseph Levy.

PROTECTION AGAINST INSECT PESTS.

In his annual report just issued, Secretary Wilson of the Department of Agriculture says:

"What we need is a federal statute which shall not only forbid the importation or interstate transportation of injurious insects in all stages, with adequate penalties for its violation,

The distinguished author (alluded to in the above name) was so pleased with this beautiful sweet pea, which Burpee will send out in 1910, when it was exhibited in London in 1909, that the name has been changed from Prince of Wales Spencer to Marie Corelli. We give below the introducer's description:

This brightly colored variety might be described briefly as a glorified "Spencer" type of the popular grandiflora Prince of Wales. Because of increased size and fluted character of flowers the effect is brighter and more pleasing.

but also provide for a thorough system of inspection and quarantine, at ports of entry, for nursery stock and other materials on which such insects may be imported, as well as a sufficient means of control of interstate transportation of such materials. Such an inspection, in conjunction with the admirable systems now in existence in the states, would provide the country with a reasonable degree

The flowers are brilliant rose-carmine or red, of good size and fine form. The wings are a pure rich rose-crimson and the standard is the same with a tint of cherry-red. The whole effect is that of a brilliant crimson—clear, distinct and beautiful.

The standard is large, round and wavy; the wings are full and inclined to remain boldly outright instead of drooping.

The strong stems are long and usually bear four blossoms each. The plant is very vigorous and free flowering. This is a variety that belongs in all first dozen sets and will become one of our standard shades in Spencers.

of protection against additional introductions of insect pests."

The West Virginia Horticultural Society, in session at Keyser, elected the following officers: John Cornwell of Romney, president; V. F. Alhire of Keyser, vice-president; A. L. Dair of Morgantown, secretary, and H. L. Smith of Martinsburg, treasurer.

A MODEL OF FORMAL GARDENING.

Those who would lay out an estate after the fashion of the formal garden may well take lessons from the magnificent effects obtained at Miramar, near Trieste, the home of the ill-fated Maximilian of Mexico. Miramar, as

the name might indicate, lies next the sea, and this serves as basis for the plan.

Up from the beach the first terrace slopes gently, almost imperceptibly, a hollow square. At the center there is a formal, circular flower bed. Thence north, south, east, west, walks of paving stretch. At either side these lead to stairs of stone, ascending to the

heights. A railing of heavy pillaring helps here wonderfully. On the top, too, one has this heavy rail.

Miramar's great charm, however, is the porches along the sea. These, by simple addition of a trellised roof, are covered with vines of varied sort, through whose leaves the sunlight filters. Miramar is an almost unoccupied chateau. It ranks, however, among the most impressive of all the continent. **FELIX J. KOCH.**

LAND DEVELOPMENT FOR CIVIC BEAUTY.

Abstract from a paper read before the National Land Congress at Chicago, November 18, 1909, by E. F. A. Rehnisch, Topeka, Kans.

We are just beginning to understand the mission of the landscape gardener, the importance of his work and the value of the park as a means of instructing and familiarizing the public with the possibilities and beauties of the art of landscape development. We are educating the people to appreciate the beneficial influence of the beautiful outdoors on the moral as well as the physical conditions of society. We have learned to realize that beside the esthetic our parks have a great economic value in as much as they raise the standard of health, happiness and contentment of the people, especially in large centers of popula-

tion. Appreciating this fact, many cities of this country have reserved and acquired considerable land for park purposes; have improved, and are maintaining the same in the best possible condition. First in this movement were the cities along the Atlantic coast, but by and by the idea moved west and we have magnificent park and boulevard systems in the middle west.

Railroad Gardening.

Railroad station parks offer a great field for the landscape gardener of the future. In the past little more has been done in ornamentation of station grounds than planting of tender greenhouse material, or bedding plants, which are generally grouped into more or less appropriate designs, carpet effects, names and trade-marks. This is not landscape gardening in its proper sense. It is quite expensive and transient, as the beds have to be renewed every year and at best only last a few months in this latitude, leaving the ground bare and unsightly from the time of the first frost in fall till the warm weather in May. The landscape gardener uses hardy material such as trees, shrubs and herbaceous plants. This material is cheaper and the plantings perennial; it gives a more natural effect and is attractive the year around. What could be more pleasing than a generous expanse of green turf with a background of varying forms of masses of shrubs with the ever-changing tints of foliage and succession of flowers? In winter the different colors of bark range through all the tints of white and gray to almost black; yellow and crimson to brown, contrasted with the heavy green of the interspersed evergreens.

Besides the ornamental—the emergency and economic plantings play an important part in railroad gardening, such as screens for shutting out unsightly features which are beyond the control of the railroad management, hedges along the property lines, snow hedges to protect cuts from filling up with snow and lastly timber plantings for posts, cross ties and telegraph poles. The Santa Fe railroad has carried out this simple plan of using hardy plants for the embellishment of station grounds and has improved most of the larger stations in this manner; several grounds are more than one acre in extent. This area of well kept rich green turf, fringed by a background of masses of shrubs with a varying skyline, is a picture long remembered by the weary traveler. Besides the Santa Fe, the Union Pacific maintains well planted station parks and at present is branching out into timber culture in planting extensive tracts of land with catalpa for cross ties, etc. Other large roads are planning systematic improvement of their stations in the same manner.

Adorning the Home Grounds.

The proper planting of trees, shrubs, vines and hardy perennials for the adornment of the home grounds extends the habitation beyond the mere walls of the house, and makes for the inhabitants a beautiful, large and grand living room outdoors, and a pleasant sight for the passerby. It is within the reach of every farmer to have a

beautiful green lawn with a fringe of shrubs and a few trees to give shade and coolness during the hot summer days. He can also have a summer house, pergola, tables and benches; however rudely built, they are of great comfort, and their enjoyment much more than pays for the little cost and trouble of building them. All these things add to the comfort and beauty of the home, and have a tendency to forestall the discontent with farm life of the growing up sons and daughters of the twentieth century farmer. Give the home and its surroundings a touch of beauty and refinement, set apart a little portion of land for play and recreation, and you will have destroyed the monotony of farm life, and the city will have far less attractions to the young folks. Instead your place will attract your city friends and a visit to it will be a great privilege to them.

County Parks.

I would also suggest rural parks, owned and maintained by the county or township, provided with shelters, necessities and conveniences for holding picnics, and other meetings, and gatherings for play and recreation. These parks, and good roads, will go far toward elevating the standard of environments of the farmer and make country life more desirable and beautiful.

WORK OF THE BOSTON LANDSCAPE CLASS.

On page 831 we give two illustrations of the work which is being done by the Landscape Class of the Gardeners' and Florists' Club of Boston.

The upper illustration shows the student's solution of the problem of locating a house and stable in suitable positions on an irregularly and awkwardly shaped lot of land of very uneven surface, the outlines of which, as well as of the buildings, were given him. The lower picture illustrates the original topographical condition of the lot, and also shows the grades which the student has established. His further task, as shown by the plans, has been to arrange conveniently a driveway and paths, and to produce a good general landscape effect.

The arrangement of trees, shrubbery, flowering plants, fruit trees, small fruits and vegetable garden is a branch of the work in which the practical young gardener has a decided advantage over the so-called landscape architect.

With the growing demand for the creation of large residential estates all over the country at the present time, there are greater opportunities for the trained gardener having practical knowledge of landscape construction than ever before. The commendable work of the Boston Landscape Class will do much to enable the ambitious gardener to avail himself of these opportunities, and will at the same time enable him to meet the landscape architect on the vantage ground.

The class meets every Tuesday evening, 7.30 p. m., at Horticultural Hall, Boston. Visitors are always welcome and will find the proceedings very interesting.

LAY OUT AND PLANTING PLAN

GRADING PLAN

About New Carnations

The present season, which had given no special promise of any strong favorites among the new introductions, has now brought forward several new sorts which are quite sure to attract no small amount of attention. There are several varieties which surely have qualities deserving the attention of all carnation growers.

Such varieties as *Admiration*, *Dorothy Gordon*, *Sangamo*, *Shasta* and the two well-known sorts, *Alma Ward* and *Mrs. C. W. Ward*, furnish the expert with promising varieties to say the least. Besides these already mentioned there are *Mary Tolman*, *Conquest* and *Scarlet Glow* to be included with the list which is steadily lengthening.

Admiration was closely inspected last season by visitors to the carnation convention in Indianapolis and made many friends at that time. It would be surprising if this variety did not fulfil expectations. The growth is very strong, clean and healthy. The stem is stiff and the flower very attractive. The flower is a satiny, clear pink, between *Winsor* and *Winona*, which holds well through all degrees of sunshine and it is a grand keeper and shipper.

Dorothy Gordon and *Sangamo* both

ADMIRATION

appear to be sterling sorts, and are especially promising in the general habit of growth.

Mrs. C. W. Ward and *Alma Ward* have been admired by carnation growers for some time and there is no

doubt that many will be glad to be able to get stock of these varieties.

Mary Tolman should sell well for its color alone if for no other reason. It is a light pink with plenty of life and a favorite in the retail trade.

Conquest may be termed a fancy, somewhat after the style of the old favorite *Prosperity*, but having a pink background instead of white. It is very attractive and it is hoped that this sort will fill the place left vacant by *Prosperity*.

Scarlet Glow will be remembered by those visiting the carnation convention in Indianapolis last season, as it was shown in excellent form and also gave a good impression to those seeing it growing at Lafayette.

Shasta has many good points, one of the strongest being keeping qualities. The color is clear and always true, form is good and in general it seems to be a good sort.

An item of considerable importance as regards the value of any of these varieties is keeping qualities. This must be considered, as it is becoming of more vital importance each season. We must have sorts with good habit of growth, freedom and several other qualifications, but the keeping qualities are too often considered of little importance. This will not do, as it is largely because of this quality that the carnation is such a strong favorite among flower buyers and it is every carnation grower's interest to do everything possible to increase this popularity.

ALMA WARD

New Everblooming Crimson Rambler Rose
FLOWER OF FAIRFIELD

Flowers in June and continues constantly in bloom until frost;
identical in appearance with the old Crimson Rambler.

Orders booked now for immediate or Spring import.

Strong field-grown plants, \$35.00 per 100; \$320.00 per

PHILADELPHIA NOTES.

James Mapes, the Rustic Work and Natural Foliage expert at Clayton, N. J., is having an excellent demand at present for window boxes, laurel and pine branches, and other materials for rustic effects.

Berger Bros. are exhibiting a new pink rose from Stockton & Howe, Princeton, N. J., said to be larger and finer than Bridesmaid. Our opinion and further particulars will be forthcoming soon.

Leo Niessen Co.—especially the junior member of the firm, Arthur Niessen—are keen admirers of John Cook of Baltimore, and look with especial interest on his latest new rose, "Radiance," which they think is bound to create a great sensation in the near future.

Edwin Lonsdale reports from Lompoc, Cal.: "All well and family settled on the Burpee Seed Farm December 1st." Some views and reviews from his experience there we hope to publish as soon as space permits. Mrs. Lonsdale's health has already improved wonderfully in the glorious climate.

We regret to report that our veteran horticulturist, W. K. Harris, has not grown any stronger during the past month or two. His old friend, Robert Craig, was over to see him last Sunday (December 5) and found him cheerful of spirit and as indomitable as ever; but very weak and wasted physically. Many other friends, the leading horticultural lights of our community, are frequent and anxious visitors these days.

The Michell Purity Aster which we illustrate herewith has attracted considerable attention in the wholesale flower markets during the past season. We understand that the Michell Co. are to introduce it in 1910. It is especially desirable for cutting on account of long, strong stems and branching habit. The flowers are of excellent form and texture and snow white. We are informed that for freedom of bloom there are few strains on the market today that can approach this.

"Ha! Ha! Mr. Rice, I fool you once! I open your book at the right page. So send along that clothes brush to yours truly.—Kansas." "My dear Mr. Rice: I found the page all right. It's at ——. I need that clothes brush;

also a wash boiler. Ship same at once to yours truly, —, Buffalo." These are samples of some of the entertaining replies received by M. Rice & Co.

MICHELL PURITY ASTER

to their "follow up letter" for their new catalog. We may mention that the brush is a good one, and that this office had no difficulty in finding the page and the phrase.

Godfrey Aschmann remains a hardy perennial in our midst. He can show his guests around and talk to them as his advertisements entertainingly indicate. "Great statesmen may die; great financiers may die; even Godfrey Aschmann may die—but his plants live on forever!" That's one of Godfrey's own phrases—quoted with glee by one of Godfrey's rivals in the plant business of Philadelphia. So you see it's the City of Brotherly Love all right.

PERSONAL.

Christian Rosenquist, a florist and gardener, of Oakland, Cal., has been committed to the Stockton Asylum for the insane.

Charles W. Smith, for many years secretary of the Rhode Island Horticultural Society, is seriously ill at his home, 39 Angell street, Providence. While his advanced age is looked upon by his attending physician as unfavorable to his speedy recovery, hopes are entertained that he will be able to attend to his usual duties in a short time.

Visitors in New York: S. S. Pen-

nock and C. E. Meehan of Pennock-Meehan Co., Philadelphia; W. J. Palmer and Mrs. Palmer, Buffalo, N. Y.

Visitors in Boston: James Comont, representing Carter, Dunnett & Beale, London, Eng.; Robert Paterson, Port Jefferson, N. Y.; E. O. Orpet, South Lancaster, Mass.; Ed. Roehrs, Ruthersford, N. J.; A. Zirkman, representing M. Rice & Co., Philadelphia, Pa.; E. Andre, Trinidad, B. W. I.; E. J. Harmon, Portland, Me.

Some Holiday Essentials

The illustrations on this page were taken at the plant-growing establishment of the Robert Craig Company, Philadelphia. In addition to those shown here we have others which will appear later. The poinsettia, notwithstanding the avalanche of gaudy cloth imitations with which the country has been flooded for several years past, continues to hold its own as a Christmas favorite. One plausible reason for the acceptance of the artificial poinsettias for some purposes is found in the softness and proneness to wilt which the natural material has sometimes been guilty of. But this is not the fault of the plant but of the grower. Poinsettias are not the only subjects that have suffered severely in reputation because of indiscreet and unreasonable forcing. Craig's is one of the places where these unnatural methods are not employed, and if we had more Craigs we should see fewer artificial poinsettias. The picture shows the method of growing in pots for window decoration, and in low pans of small plants for use on the table. The other illustration gives some idea of the vast quantity handled by this establishment. The dwarfs in four-inch are very popular and house after house is devoted to this size. They are bought mainly for making up in basket and design work and anyone who knows anything of our ninety million country can imagine the immense demand.

There is a dwarf pot (or tall pan)—a compromise between a pot and a pan—for which we have not yet found an appropriate name—I suppose a "deep pan" would express the meaning—anyhow, these, filled in eight-inch with poinsettias surrounded by ferns or asparagus are fine specimens for window plants. The ten-inch flat pans have shorter plants, mixed with foliage, giving a broad or flat effect, such as is necessary for table decorations. Many houses are devoted to this size and an immense business is done in same.

Madame Pedrick Azalea, according to Mr. Craig, is far and away the best Christmas variety extant. This stands in the same class as *Vervaeana* does for Easter. Another favorite azalea for Christmas seen here in fine shape and in quantity is *Hexe*, a miniature or dwarf form, brilliant crimson which was popularized by Sander under the name of *Firefly*.

Crotons—or more properly *Codiaeums*—are the subject of the remaining illustration. These richly colored plants have long been a leading specialty with Mr. Craig, who has undoubtedly done more to popularize them than any other man in America. The first and third specimens shown are the new variety *Edwin Lonsdale*, one of the most beautiful, sturdy and free-growing varieties ever introduced. The second in the picture is *Fasciatus*, the best yellow foliaged sort, and the last is *Delicatissima*. We would refer our readers to the excellent article on the culture of *Codiaeums* by that expert grower, George F. Stewart, which appeared in our issue of November 27.

CROTONS (*CODIAEUMS*).

DIFFERENT FORMS OF POINSETTIAS.

HOUSE OF POINSETTIAS, AT CRAIG'S.

Best of all Dracaenas for the house.
 6-inch pots, well colored, \$15 and \$18 per doz.

DRACAENA FRAGRANS

6-in. pots, strong plants, \$6 & \$9 per doz.

DRACAENA TERMINALIS

3-inch pots.....\$15 and \$20 per 100
 4-inch pots.....\$25 per 100

DRACAENA LORD WOOLSELEY

4-in. and 5-in. pots, at \$6 & \$9 per doz.

ARECA LUTESCENS

5-inch pots.....\$6 and \$7.50 per doz.
 6-in. pots, very heavy, \$15 & \$18 per doz.
 7-in. pots, very heavy.....\$24 per doz.

PANDANUS PACIFICA

6-inch pots.....\$12 per doz.
 7-inch pots.....\$18 per doz.

PANDANUS VEITCHII

Well colored; for basket work, 2½ inch pots.....\$25 per 100

BOXWOOD PYRAMIDS

3½ to 4½ feet high, well shaped, in tubs..at \$3.50, \$4 and \$4.50 each

PHOENIX ROEBELENI

Most satisfactory plant; It is as durable as a Kentia and as graceful as a Cocos. 4½-inch pots..\$9 & \$12 per doz.

GARDENIA VEITCHII

5-inch pots.....\$35 per 100

ROBERT CRAIG CO., Philadelphia
MARKET and 49th ST. Branch: Norwood, Pa.

IT WILL HELP US AND YOU IF WE HAVE YOUR XMAS ORDER EARLY.

SELECT FERNS for FINE STORE TRADE

We offer a grand lot of exceptionally well-grown plants of the different varieties of *NEPHROLEPIS* which will be found one of the best selling and most profitable plants that florists can handle. Our stock is in unusually fine shape, and we will guarantee it will please the most exacting, as it is exceptionally good value at the prices quoted.

IMPROVED ELEGANTISSIMA. The finest of all this type. It was introduced by us in 1905. This form of *Elegantissima* has been greatly improved, and shows no tendency to revert to the Boston, making it the most valuable fern of this type. Strong plants, 4 in. pots, \$3.00 per dozen; 6-in., \$6.00 to \$9.00 per dozen—according to size; 8-in., \$12.00 to \$18.00 per dozen—according to size.

SUPERBISSIMA. Introduced by us in 1908. A very unique and distinct novelty. Its distinguishing characteristics are its dark green foliage and dense growth. Fronds are very heavily imbricated, making them very dense and compact. Strong plants, 4-in. pots, \$3.00 per dozen; 6-in., \$6.00 to \$9.00 per dozen—according to size; 8-in., \$12.00 to \$18.00 per dozen—according to size.

BOSTONIENSIS, PIERSONI, WHITMANI, SCOTTII. Extra fine plants, 6-in. pots, \$6.00 per dozen; 8-in. pans, \$12.00 per dozen.

F. R. PIERSON CO., Tarrytown-on-Hudson, New York

CANNAS

A select list of 30 extra good sorts, very heavy supply.

DAHLIAS

Jack Rose, Virginia A. Maule and many of the free blooming kinds that pay. Very large clumps, critically grown.

GLADIOLI

America, Augusta, Jessie, May, Mrs. King, Princess the extra good ones for florists; good for all purposes; surest bloomers.

IRIS

The cream of over 500 sorts. Every florist should grow a few; they add variety and pay well.

OXALIS

Deppel—Lasiandra—Shamrock.

PEONIAS

1200 sorts—greatest collection worldwide. La France (Lem.), M. M. Cahusac, Baroness Schroeder, Milton Hill, P. Duchartre, La France (P. M.), Sara Bernhard, Marie Stuart, Dorchester, etc., in extra supply; strong plants.

VINES

Cinnamon and Madeira vines.

An excellent growing season has given us very fine clumps, bulbs and tubers. Our supply is very large—exceptional quality. Send us a list of wants for **SPECIAL LOW PRICES**. Our aim is to have the best sorts, best quality, harmonized with low prices—too low for the quality.

WE CAN USE QUITE A LOT OF ITEMS IN EXCHANGE, CARNATION R. C., etc.

C. BETSCHER, Canal Dover, Ohio.

We also offer a lot of fine bulbs of *Calanthe Veitchii*, also materials such as Peat and Moss, Baskets, Books on Orchids, etc. Write for prices.

LAGER & HURRELL,

Summit, N. J.

SOME RESULTS OBTAINED BY GERMAN PLANT HYBRIDISTS.

In a lengthy interesting article from the pen of Walter Danhardt, published in a recent number of Moller's Deutsche Gardner-Zeitung, and in which the earlier dependence on English, American and French hybridists of roses, carnations, chrysanthemums, dahlias, and herbaceous perennials is freely acknowledged, attention is drawn to the great advances made by the Germans in various directions.

If German novelties in plants receive but scant notice in the gardening press of England and France, more particularly the latter, the reasons for their silence are not intentional, but are due to the lack of interest in the German's endeavors to work in this field; and of looking around. Among cultivated plants which mostly have been improved by German hybridists and cross-breeders, and outside the empire are greatly valued and admired are the English or Odier pelargoniums. Among professionals it is well-known that the name Burger is inseparably connected with these plants in their improved form; and it is likewise generally known wherein the improvements consist. He has after many years of effort succeeded in obtaining a new dwarf race, which produces 90 per cent of seedlings true to the type; that is, that the dwarf habit of the Burger race remains unaltered in almost every seedling; and in union with this is a great variety in coloring in the flowers, and other features. After innumerable crosses of florists' varieties and botanical species, Herr Burger succeeded in getting a dwarf, compact, bushy race of plants, which he re-crossed with such Odier varieties as Mabel, Mad. Thibault, and Perle von

Wien, which have no lilac tint in their flowers. From these crosses he got 20,000 seedlings in which scarcely two colors were alike, and the lilac tint was almost wholly obliterated. This amount of progress was frustrated by the crossing with the taller race, and the resulting seedlings grew higher again. This misfortune being at length got rid of, the colors had to be improved. There was a scarcity of the scarlet color; and in order to obtain this crossings with brick-red and scarlet-flowered zonals was undertaken—an uncommonly tiresome work. Burger was unsuccessful at the first in his efforts to obtain a zonal pelargonium as seed parent, a zonal being always used as the pollen parent and the zonal blood was predominant; moreover, the seedlings were mostly unfruitful, and for further work, useless. Attempts were then made by grafting the one on the other; but this sexual union was at the first not a success, but finally this disinclination was overcome by inarching, followed fortunately, by the formation of seeds, and the raiser obtained brick-red colored seedlings: as for example, Perle von Halberstadt, and the carmine-red Feurball, out of which sprang the pure scarlet-colored varieties. There was now a new feature to be gained, for the scarlet varieties had lost through the influence of the zonal blood the characteristic spot of the true Odier pelargoniums; and in order to replace it crosses with the spot-free scarlet, and the spotted violet-flowered varieties were made. These crosses had, however, not been successful, as the scarlet color was spoilt by the influence exerted by the lilac-colored varieties; and further crosses and re-crosses had to be made till this fault was at length obliterated, and brilliant colors with beautiful dark spots obtained. By the influence of the zonal blood in the Odier race of pelargoniums, growth and fo-

liage were improved. Growth was more luxuriant and vigorous, the foliage more sappy and of a darker tint, and above all, it withstood the attacks of greenfly, the chief plague of the English pelargonium. The raiser is still at work on the problem how to obtain varieties immune to the plant louse; and he is hopeful of obtaining by further crosses with zonal varieties. Chance has played a role in the development of the new English pelargoniums. He had crossed ten years ago varieties of *Pelargoniums peltatum* with his seedlings, but he had obtained no visible results thereby with *P. peltatum*; and yet the *P. peltatum* had imparted very valuable properties to the new race which had for several years remained in abeyance, and which in many cases were awakened all at once, viz., the capability to bloom more than once. The pretty variety Ballkonigen, is one of these and it shows distinctly its *P. peltatum* origin. This fact is a valuable lesson for all hybridists, viz.: that valuable features of the parent plants often appear after a numerous series of crosses. The varieties of Herr Burger's raising have all the properties of continuous flowering, are, indeed, "hybrid perpetuals"; and the plants bloom the more abundantly when they are not allowed to set their seeds.

It was once said that these new pelargoniums come true from seed. It may be stated that seedlings in general grow better and remain healthier than plants raised from cuttings. The seeds may be sown from July to September, and the seedlings by good treatment may be as good as cutting-raised plants, and make excellent ware for selling purposes. It is an unpleasant fact that the seeds vegetate irregularly; but this misfortune may be overcome in future.

The varieties Burger has been so fortunate as to raise from his numerous crosses, extending over a long series of years, are worthy of the attention of hybridists and gardeners in other countries, no other section of the pelargonium family possessing their good characteristics.

Important Announcement To Carnation Growers

At the earnest solicitation of a large number of commercial and private growers, the Cottage Gardens Company has decided to disseminate this year the two famous carnations

MRS. C. W. WARD and ALMA WARD

Two varieties which are well known to all the leading growers of the country. Four years test in the New York market has demonstrated their popularity and good staying qualities. For the past three years we have been growing from fifteen to twenty-five thousand of each, during which time they have always **COMMANDED THE HIGHEST MARKET PRICES**, and at no time has the supply been equal to the demand.

On the exhibition table they have taken the **HIGHEST HONORS**, and we believe it is safe to say these two carnations **STAND WITHOUT AN EQUAL**.

INVITATION

We extend a cordial invitation to all those interested to visit our establishment, where they will have an opportunity to see them growing and compare their good points with other standard varieties grown under the same conditions.

MRS. C. W. WARD

MRS. C. W. WARD is a perfectly formed flower with full centre; color deep pink several shades lighter than Lawson, deeper than Winsor; having strong, erect stems 24 to 36 inches in length. A vigorous, healthy grower and has never shown disease of any kind.

A very early and free bloomer, producing fine flowers as early as September 1st, which bring from twenty-five to fifty per cent more than any other variety on the market.

The keeping qualities of this variety are remarkable. Several shipments of blooms sent to Europe reached their destinations in perfect condition, and wherever exhibited it has always been the last to show signs of wilting.

AWARDS

Society of American Florists, Silver Medal, Boston, 1906; The Craig Cup for Best Seedling, Philadelphia, 1906; The Lawson Bronze Medal, Washington, 1908; The Horticultural Society of N. Y. Silver Medal, Sweepstake prize for best 100 blooms, New York, 1909; The Horticultural Society of N. Y. Diploma, for best new variety, New York, 1909.

Rooted Cuttings Ready December 15th

\$2.00 per 12, \$12.00 per 100, \$100.00 per 1000, \$95.00 per 1000 in lots of 2500. 25 at the 100 rate, 250 at the 1000 rate.

ALMA WARD

This beautiful Carnation is pure white except during dark weather when it shows delicate splashings of pink similar to the Cattleya Orchid. Increasing its popularity. ALMA WARD is the largest and most fragrant Carnation ever grown, producing perfect flowers 3½ to 4½ inches in diameter on strong, erect stems 36 to 42 inches in length.

This most remarkable variety takes the same place among carnations as the American Beauty Rose among roses, and has, during the past four years, been awarded numerous prizes including the following:

The Lawson Silver Medal, Toronto, 1907, (No Gold Medal having been awarded); The Lawson Gold Medal, Washington, 1908; The Society of American Florists Silver Medal, Washington, 1908.

Rooted Cuttings Ready January 1st

\$3.00 per 12, \$5.00 per 25, \$9.00 per 50, \$15.00 per 100, \$35.00 per 250, \$65.00 per 500, \$120.00 per 1000.

KNIGHT & STRUCK, No 1 Madison Ave., New York

HARDY ROSES

For Forcing

Ready for Immediate Delivery

The right time to buy Roses is when they are fresh and well ripened. Roses potted up in the fall or late winter become better established and force better, and are far more satisfactory in every way, and you can retard or force at your leisure. We recommend the American-grown "Ramblers." Don't attempt to force imported Ramblers; the general experience is that they are failures.

Something New in Roses for Florists

Half Standard Baby Ramblers

These are Baby Ramblers, grown on stems or standards about one and a half feet high, and will be a novelty for your trade you cannot profitably overlook. They are offered for the first time in this country in the following varieties:

BABY DOROTHY (Half standard). Deep pink. 60 cents each, \$6.00 per dozen, \$45.00 per 100.

BABY RAMBLER (Half standard). Crimson. 45 cents each, \$4.50 per dozen, \$35.00 per 100.

BABY CATHERINE SEIMETH (Half standard). White. 45 cents each, \$4.50 per dozen, \$35.00 per 100.

BABY "STARS and STRIPES" (Half standard). White and red grafted on the same plant; most attractive, 50 cents each, \$5.00 per dozen, \$40.00 per 100.

Hardy Perpetual Roses

We offer extra strong forcing two-year-old dormant, low-budded stock, in the following varieties, true to name.

Price, 75c. for 5 (of one variety), \$12.00 per 100, \$110.00 per 1000.

Alfred Colomb. Carmine.
Anne de Diesbach. Bright carmine.
Ball of Snow. Pure white.
Baron de Bonstetten. Dark crimson shaded.
Baroness Rothschild. Satiny pink; extra.
Captain Christy. Delicate flesh color.
Duke of Edinburgh. Bright vermillion; very fine.
Fisher Holmes. Dark rich scarlet.
FRAU KARL DRUSCHKE. The finest white in existence.
General Jacqueminot. Rich velvety crimson.
General Washington. Beautiful red, shaded carmine.
John Hopper. Beautiful rose-pink.
La France. The finest light pink.
Margaret Dickson. White, pale flesh center.
Magna Charta. Clear rosy pink.
Mme. Gabriel Luizet. Light satiny pink.
Mme. Plantier. White.
Mrs. John Laing. Soft pink. Most desirable variety.
Paul Neyron. Beautiful dark pink.
Princess Camille de Rohan. Velvety crimson.
Ulrich Brunner. Cherry-red.

Forcing Rambler Roses

American Grown. The Only Stock for Forcing
CRIMSON RAMBLER

Large heavy plants, two years old, mossed and packed in bundles of 10. 10 100
3 to 4 feet.....\$1.25 \$12.00
3 to 5 feet.....1.75 15.00
4 to 6 feet, extra strong and heavy.....2.25 20.00

DOROTHY PERKINS

Shell Pink. \$1.25 for 10, \$12.00 per 100. Extra strong, \$1.75 for 10, \$15.00 per 100.

Tausendschon

The new Rambler Rose. The name translated means a "thousand beauties." Color beautiful rose, shading to pink. \$2.25 for 10, \$20.00 per 100.

Tausendschon (standard grown). Each 50c., doz. \$5.00, 100 \$40.00.
HIAWATHA. The flowers are single and are of a deep, intense crimson shade with the petals shading to a pure white base. Flowers very freely and is undoubtedly one of the best of the single Roses for forcing. Extra strong, two-year, field-grown, \$3.25 for 10, \$30.00 per 100.

WEDDING BELLS. A seedling of the Crimson Rambler. The most floriferous Rose yet produced. The color is white with the upper part of the petals soft-pink. Fine for forcing. Perfectly hardy. Extra strong two-year-old field-grown flowering plants, 3 to 4 feet. \$2.25 for 10, \$15.00 per 100.

LADY GAY. A seedling from the popular Crimson Rambler, which it resembles in habit and general effect. The flowers are of a delicate cherry-pink color, which fades to soft white. Strong plants, field-grown, \$2.25 for 10, \$15.00 per 100.

Baby Rambler Roses

BABY DOROTHY. The Pink Baby Rambler, and bound to find favor where the Baby Ramblers are popular. \$1.75 for 10, \$16.00 per 100.

BABY RAMBLER

(Mme. Norbert Levavasseur)

Strong field-grown plants, \$1.75 for 10, \$15.00 per 100.

AMERICAN BREEDERS' ASSOCIATION.

The sixth annual meeting of the American Breeders' Association, in session this week at Omaha, Neb., has included in the papers to be read and discussed in the plant improvement department, the following: "Report of Committee on Breeding Roses" (Dr. W. Van Fleet, chairman); "Report of Committee on Plant and Animal Introduction," by Davis C. Fairchild, Washington, D. C.; "Some Problems in Plant Improvement," by Dean H. J. Webber, Ithaca, N. Y.; "Report of Committee on Breeding Cereal Crops," (Prof. C. A. Zavitz, chairman); "The Breeding of Barley," by Prof. J. H. Shepperd, Agricultural College, N. D., and Prof. Alvin Keyser, Fort Collins, Colo.; "Wheat Breeding," by Prof. H. F. Roberts, Manhattan, Kas.; "A Large and Small Grain Experiment," by Supt. L. R. Waldron, Dickinson, N. D.;

"The Breeding of Cotton," by Dr. D. N. Shoemaker; "Report of Committee on Breeding Tea, Coffee and Tropical Fruits," (Dr. O. F. Cook, chairman); "Report of Committee on Breeding Vegetables," (W. W. Tracy, chairman); "Report of Committee on Breeding Corn," (J. Dwight Funk, chairman); "Hybridization Methods in Corn Breeding," by Dr. Geo. H. Shull, Santa Rosa, Calif.; "Variability in the Maize Plant," by J. R. Stewart, Chicago; "The Breeding of Corn," by Prof. L. S. Klink, MacDonald College, Que.; "Report of Committee on Breeding Forage Crops," (Dean Thos. F. Hunt, chairman); "Report of Committee on Breeding Tree and Vine Fruits," (Prof. S. A. Beach, chairman); "Single Character Breeding in Grapes versus General Character or Tout Ensemble Breeding," by Prof. T. V. Munson, Denison, Tex.; "Progress in Breeding Hardy Fruits," by Prof. N. E. Hansen, Brookings, S. D.; "Report of Committee on Pedigreed Seed and Plant Business," (Eugene G. Funk, chairman); "Report of Committee on Breeding Fiber Crops," (Dean J. H. Shepperd, chair-

man); "Report of Committee on Breeding Sugar Crops," (Dr. C. O. Townsend, chairman); "Breeding Sugar Cane," by Prof. W. R. Dodson, Baton Rouge, La.; "Breeding the Sugar Maple," by W. A. Orton, Washington, D. C.; "Some Phases of Sorghum Breeding," by Dr. C. O. Townsend, Washington, D. C.; "Report of Committee on Breeding Tobacco," (A. D. Shamel chairman); "Report of Committee on Breeding Nut and Forest Trees," (Prof. Geo. B. Sudworth, chairman); "Proposals for a System of Tree Breeding," by Prof. Frederick E. Clements, Minneapolis, Minn.; "Walnut-Oak Hybrids," by Prof. Ernest Babcock; "Principles and Methods of Tree Seed Selection," by Raphael Zon, Washington, D. C.; "A Plan for Breeding and Use of Tree Crops," by Prof. J. Russell Smith, Philadelphia, Pa.; "Breeding to Improve Physical Qualities of Timber," by Prof. Geo. L. Clothier, Agricultural College, Miss.; "Report of Committee on Breeding Citrus Fruits," (Dr. W. T. Swingle, chairman); "Graft Hybrids," by Prof. C. C. Guthrie, University of Pittsburg.

Seed Trade

CROP ESTIMATES AND SHORT-AGES.

Since last Crop News was published in HORTICULTURE final estimates on the bean crop have been made. These range on the wax varieties from sixty to eighty per cent and on the green pods from twenty to seventy per cent. On Burpee's Bush Limas estimates range from sixty to ninety per cent.

Early varieties of sugar corn are a little short, but on late varieties estimates run close to one hundred per cent. It should be borne in mind however that corn has not yet been delivered, nor is it in condition to be delivered, and when the actual shipments are made there may be some shortages not now expected.

Garden beets with the exception of Crosby's Egyptian, Detroit Turnip and Edmand's Turnip will be delivered nearly or quite in full. Of the three varieties named deliveries will be short, ranging from forty to sixty per cent. The Yellow Mangels are all short; probably deliveries will not exceed fifty to sixty per cent. Many of the fancy varieties of pumpkins are reported a total failure and the same may be said of several varieties of muskmelons. While there are numerous other shortages these are the most conspicuous.

RELATIONS OF SUPPLY MEN AND CANNERS.

A meeting of the Board of Directors of the Machinery and Supply Men's Association, was held in Chicago on the 7th inst. and in addition to the usual routine, the question of an exhibit at the annual convention of the Canners at Atlantic City in February next, was discussed. In view of the fact that the convention at its annual meeting in Louisville voted unanimously to make no exhibits the coming year, the directors felt that notwithstanding certain members of the association desired to make an exhibit, they had no authority to veto the action of the Association and it may therefore be accepted as settled that there will be no exhibit at Atlantic City in February next.

The question of the relations between the Machinery & Supply Men's Association and the Canners' Association, was discussed and strong ground was taken against the assumption of the latter to dictate to the Supplies Association as to how their affairs were to be conducted at the annual convention, and especially with the

practice which has grown up during the last few years of charging the Machinery and Supply Men an entrance fee to view their own exhibits, which fee went into the treasury of the Canners' Association. It may not be advisable to state in detail all that was said but it is earnestly hoped by the members of the Machinery and Supplies Association that the canners will take a reasonable view of the relations which should exist between them, and recognize that they are an independent and important organization representing a greater capitalization by far than the Canners' Association, and entitled to something more than being the tail of the Canners' kite. Unless the latter are prepared to make this concession and agree to a reasonable recognition of the Machinery and Supply Men, they are very likely to hold independent conventions after 1910. In this connection it may be entirely proper to say that the date of the next annual convention will be February 6th to 11th, 1910, at Atlantic City as already stated. The headquarters to be The Rudolph.

It is practically the unanimous sentiment among both machinery men and the majority of the canners, that the attendance at the forthcoming convention will be much smaller than usual as the exhibits of the machinery and supply men are recognized by all as having been powerful drawing cards. A small body among the leading canners have antagonized the Association to a considerable extent, and it was for this reason that they voted at their last convention to make no exhibits the coming year. The result will be watched with keen interest by all interested parties.

DUTCH SEED TRADE.

Renewed American Purchasing—Current Price Quotations.

Deputy Consul-General Ernest Volmer makes the following report from Rotterdam on the renewed activity in the seed trade of Holland:

The Netherlands is a country of intensive agriculture, usually with certain crops highly specialized in certain regions. Thus from The Hague to the Hook of Holland, in the so-called "Westerland," most of the country is devoted to fruit raising; in the Sassenheim-Hillegom region flower bulbs form the main agricultural product. Seed crops, however, are grown from one border of the country to the other, and they form an important item in the trade with the United States.

The total declared exports of seeds to the United States through the Rotterdam consulate-general during 1907 amounted to almost \$300,000, divided

Burpee's

The Leading American Seed Catalog for 1910!

AN ELEGANT BOOK OF 178 PAGES,—it is "THE SILENT SALESMAN" of the World's Largest Mail Order Seed Trade. It tells the *plain truth* about the Best Seeds that can be grown,—as proved at our famous FORDHOOK FARMS,—the largest, most complete Trial Grounds in America. Hand-omely bound with covers lithographed in nine colors it shows, with the six colored plates. Nine Novelties and Specialties in unequaled Vegetables, and five of the finest Beautiful New Flowers, including two superb "Gold Medal" Spencer Sweet Peas.

With hundreds of illustrations from photographs and carefully written descriptions it is a SAFE GUIDE to success in the garden and should be consulted by every one who plants seeds, whether for pleasure or profit. While too costly a book to send unsolicited (except to our regular customers), we are pleased to mail it **FREE to every one** who *has a garden* and can appreciate **QUALITY IN SEEDS**. Shall we mail you a copy? If so, kindly name this paper and write **TO-DAY!**

W. ATLEE BURPEE & CO.
Burpee Building Philadelphia

 Our Blue List containing wholesale prices for Florists and Market Gardeners mailed free. Send for a copy.

as follows: Grass, \$147; caraway, \$63,052; linseed, \$168; nasturtium, \$767; rape, \$207,657; canary, \$406; flax, \$1,163; mustard, \$7,254; poppy, \$11,984; spinach, \$406. Taking into consideration large shipments through the Amsterdam consulate, the total seed exports to the United States in a good average year may be estimated at from \$450,000 to \$500,000.

The year 1908 showed a general decline in the volume of trade of many leading articles, and seeds, being to a certain extent luxuries showed a decreased exportation by some \$100,000, the exports via Rotterdam having dropped to \$192,406. With the general business revival during 1909, however, more seeds are again finding their way to America, the exports during the first two quarters of the year being as large as previously, with increased heavy shipments recently, since the harvesting of this season's crop.

There seems to be a slight upward trend in the prices of the seeds, which mainly interest the American buyers at present. In caraway seed there has been some heavy buying, owing, it is said, to the fact that orders booked for October delivery have proved hard to fill, as supplies are somewhat low. Stocks in brown and white mustard are also a little below normal, poppy seed seems very fine, rape seed is quiet. Prices quoted on October 20 in not less than ton lots, f. o. b. Rotterdam or Amsterdam per 112 pounds gross were: Caraway seed, 1909 crop, \$7; brown mustard, 1909 crop, \$8; white mustard, 1909, choice, \$4.75; 1909, 1st, \$4.62, 1909, 2d, \$3.88;

poppy seed, 1908, 1st, \$7; canary seed, \$2.68; rape seed, 1908, choice, \$4.18, 1909 broadleaf, \$3.75. At these prices seeds are guaranteed to be unmixed Dutch grown.

William A. Duncan, formerly a seedsman in St. Joseph, Mo., is in bankruptcy. Assets, \$5,700; liabilities, \$10,000.

INTERNATIONAL HORTICULTURAL EXHIBITION AT BRUSSELS, 1910.

In order to correct many erroneous views it is authoritatively stated that German horticulture will be represented, as well as German art, industries and manufacture. There will be no special gardens as is commonly inferred, but gardens will be laid out facing the halls and other buildings of the German section in which, according to the scheme of the Imperial Commissioners, as far as possible all branches of horticulture will be united in one harmonious whole. By this

We are also submitting contract figures for the 1910 crop.

Schilder Bros., Chillicothe, Ohio

arrangement the various objects and their uses and employment will be shown in a practical manner and their value brought fully into notice. Custom charges and rent for sites in the open air are not to be taken into consideration; and rail charges in the German Empire will be reduced one-half, and no charge is made for transport on Belgian lines.

NEWS OF THE CLUBS AND SOCIETIES

THE AMERICAN ROSE SOCIETY.

The coming Rose Show is gaining attention in various ways. Mr. John Cook of Baltimore, Md., sends on a prize of \$15 for the best 50 My Maryland. Robt. Scott & Son, Sharon, Hill, Pa., say, "We would like to offer a prize of \$25 for the best vase of Mrs. Jardine." The Conard & Jones Company say: "We offer a prize of \$4 for the best pot-grown American Pillar, and also \$4 prize for the best six sprays of the new rose, American Pillar." Henry A. Dreer of Philadelphia, \$5 for the best six plants in bloom of Harry Kirk and \$3 for the second prize for the same. Peter Henderson & Co., New York City, for the best vase of roses, not less than 25 nor more than 50 blooms, one or more varieties, arranged for effect, accessories in other flowers, foliage and also ribbons permitted; exhibitors may supply their own vase for this prize; first prize, \$15, second \$10. The Dingee Conard Co., for the best pot-grown new rose, "Charles Dingee," first prize \$4, second \$2. For the best blooms of "Charles Dingee," first prize \$4 and second prize \$2. His Honor, Mayor Breitmeyer of Detroit, offers a prize of \$100 for exhibit of pot-grown roses.

The Horticultural Society of New York under whose auspices this show is to be held in the American Museum of Natural History, 77th St. and Central Park West, are desirous of having an exhibit commensurate with the splendid quarters offered to the rosarians of America for their display in the greatest flower-consuming city in the world.

BENJAMIN HAMMOND, Sec'y.
Fishkill-on-Hudson, N. Y.

FLORISTS' CLUB OF WASHINGTON.

The regular monthly meeting of the club was held at Gude's Hall on Tuesday evening last. The principal business was winding up the loose threads of the late flower show. Certificates of merit were awarded Wm. R. Smith of Botanic Garden, Wm. Byrnes of Department of Agriculture, R. Vincent Jr. and Sons of White Marsh, Md., Messrs. Dudley of Parkersburg, W. Va. and Mrs. L. Z. Leiter of Washington, D. C. A vote of thanks was tendered Wm. F. Gude for refreshments.

A committee composed of Wm. F. Gude, Geo. Cooke and E. C. Mayberry was appointed and later reported the following resolutions on the death of Geo. Hayes Brown, Supt. U. S. Propagating Gardens and Public Parks and Buildings:

Resolved, Whereas this organization has lost by death of G. H. Brown an honorary member, one whose fellowship was uplifting and ennobling;

And whereas The community at large loses the services of one who combined in himself the qualities of a valuable public servant and devoted husband and father, and a generous public-spirited citizen;

Therefore, be it resolved by the Florists' Club of Washington, D. C., that we record an expression of the keen sorrow felt by each member in this loss and extend to the family of our late member our deep sympathy in their bereavement.

Be it further resolved, that this resolution be spread upon the minutes and a copy forwarded to the family of the late George Brown.

WM. C. HALL.

The New Secretary of the Canadian Horticultural Association.

The gentleman whose portrait is here presented is a Montrealer, born and bred. His age is 38. He was brought up in a market garden, but in 1896 he built a small greenhouse and started growing plants for market—a line in which he had had little experience, but with hard work and regular perusal of the florist trade papers, he succeeded in working up a good business and in 1902 a partnership was formed with George A. Robinson under the firm name of Hall & Robinson. The business has been a

WILLIAM C. HALL.

success from the start, Mr. Robinson attending to the producing end and Mr. Hall the business management, and they have now 45,000 square feet of glass, growing a general line of stock for their store on St. Catherine street, West. Mr. Hall's selection for the position of secretary of the Horticultural Association, is universally approved.

AMERICAN CARNATION SOCIETY.

Carnation registered by Backer & Co., Billerica, Mass.

Red Prince. J. H. Manley × Queen. Scarlet. Size 3 to 3½ inches. Continuous bloomer and free. Does not burst calyx. Holds color in hot weather. Stems 24 to 30 inches from start.

A. F. J. BAUR, Sec.

CHRYSANthemum SOCIETY OF AMERICA.

Work of Committee.

Chicago, Ill.—Constellation Single, white. Exhibited by James Livingston, Lake Geneva, Wis. 80 points.

FLORISTS' CLUB OF PHILADELPHIA.

The topic of the day for the monthly meeting of the above club was ably handled by Chas. Henry Fox, and turned on the perennial subject of supply and demand in the cut-flower trade. All the orators, both growers and commission men, had something good to say, and ably held their ends up. Adolph Fahrenwald, Leo Niessen, Robt. Kift, Edward Reid, John McIntyre, Robert Craig, Joseph Heacock, Samuel S. Pennock and John Westcott were the principal speakers. Antoine Leuthy, Boston, was a visitor. A new carnation was exhibited by Henry Eichholz, a sport from Enchantress, named "Washington"—Lawson shade of pink; also a white chrysanthemum, a sport from Heien Frick. We understand the stock of the carnation has been sold to the Chicago Carnation Co. Edward A. Stroud's subject for January meeting will be "Establishing a retail trade in a growing community."

ELBERON HORTICULTURAL SOCIETY.

The society held a meeting on December 6, 1909. President Peter Murray was in the chair. It was decided to make a carnation night of the first meeting in January. A paper will be read on the "Culture of Carnations." The season's competition for points started at this meeting. The score was as follows: B. Duncan, 90 per cent for mushrooms; A. Bauer, 90 for Nephrolepis Amerpohli; P. Ewen 85, W. Seymour 80, W. Bryan 70, and B. Weycoff 65, for carnations; Grieb; 55 for lettuce.

ALEX. FLEMING,
Rec. Sec.

LENOX HORTICULTURAL SOCIETY.

At the annual meeting of the Lenox (Mass.) Horticultural Society on December 4, officers were elected as follows: President, George Foulsham of Highland; vice-president, George Breed of Naumkeag; treasurer, Walter Jack of Spring Lawn; secretary, George Instone of Allen Winden. The officers will be installed in January and President Foulsham will then announce his committees and the date for the ball which will take place in January.

N. Y. AND N. J. ASSOCIATION OF PLANT GROWERS.

At the annual meeting of this Association Dec. 7th, 1909, the following were elected:

President, Julius Roehrs, Jr.; Vice-pres. A. L. Miller; Secy., Wm. H. Siebrecht, Jr.; Treasurer, H. C. Steinhoff; Directors, Louis Dupuy, F. R. Pierson, J. Roehrs, Sr., and David McKenzie.

NETHERLANDS SOCIETY FOR BULB CULTURE, AT HAARLEM.

At the last meeting of the committee for tuberous plants, first class certificates were awarded to show dahlias Flora, Brigadier and Debutante; and an award of merit to show dahlia Snowstorm.

CHICAGO NOTES.

Plants for Christmas.

It is a happy fact that azaleas are coming on much better for Christmas than was expected and will probably be in ample supply. The appearance of the plants when received gave the impression that there would be difficulty in getting them ready for the Holidays, but upon being put under mild heat the buds developed rapidly, so that there were many in for Thanksgiving and they will require very little, if any, forcing to get them in now. Poinsettias will also be plentiful and in good condition. Indications are that the supply will be 50 per cent in excess of last year, though, of course, demand is also increasing. Cyclamens will be in fair supply and in fine condition. Chicago growers are giving special attention to the best strains of this favorite plant so that what plants are in will have fine large blooms and of the best colors. Primula obconica will be in no excessive quantity. Begonia Gloire de Lorraine are not so much in evidence this year

as formerly and stock will be decidedly limited. Purchasers must order early. The berried plants will be in fair supply. There is a good stock of Christmas peppers of various sizes. Of Jerusalem cherries there are somewhat less. Ardesias and aucubas will be in limited supply, though probably enough for the local demand. Pandanus Veitchii is to be had in quantity, particularly in the small and medium sizes, 6-inch pot plants especially being heavy in supply. They are well colored and make very salable plants. Dracaena terminalis is in fair quantity and well colored. Dracaena Masangeana and Fragrans are to be had in abundance. The stock of green plants as Boston ferns, palms, araucarias, etc., is ample and in splendid condition.

A Useful Device.

The Geo. M. Garland Co. have disposed of their old foundry at Des Plaines, Ill., and have a new one well under way. The new structure is planned on the latest models and will have every convenience for manufacturing the well-known Garland gut-

ters. Arrangements are also completed for the manufacturing of their soil conveyor which will be put upon the market in the spring of 1910. This conveyor is a device of their own and makes simple and easy one of the hardest tasks in greenhouse work, that of carrying out and replacing the soil. With this conveyor three wheelbarrow loads can be handled at one time and dropped in place without employees being exposed to the heat under the glass for more than a few seconds at a time. The carrier is used only with houses built with the Garland truss, to which is attached arms bearing the ends of a steel bar, on which the carrier runs by means of ball-bearing wheels. These carriers are to be installed in a range of houses at Poehlmann Bros.' plant B.

City News.

Since Sunday this city is in the grasp of a genuine blizzard, bringing a fall in temperature and snow enough to make the florists happy who have so long looked for this event to make trade brisk. We have had the warm-

ALL ORDERS FILLED PROMPTLY, PROPERLY AND TO YOUR SATISFACTION.

est November in thirty-eight years and florists have reason to regard more seasonable weather as an advantage in their business.

A novel and appropriate setting for a game dinner was arranged at the Grand Pacific Hotel, Friday. Whole trees were cut from the forests and brought in with their branches intact. They were sawed down the middle and joined again over the pillars of the room, their branches spreading out overhead as in the natural forest. Above and in the branches were hung electric lights and the effect on the autumn foliage was beautiful.

An ordinance has been recommended to the city council for passage, turning over to the South Park Commission Michigan avenue between Jackson Boulevard and Randolph street for boulevarding purposes. Present traffic is to be allowed for five years.

Personal.

Frank A. Budlong of Chicago, and J. J. Budlong of Providence, R. I., are yachting and automobiling in Florida.

J. W. Starrett, with Benthley & Coatsworth, has invested in land near Tampa, Fla., and will raise oranges, grape fruit and vegetables.

New York.—The Fernwood Nurseries have supplied \$1000 worth of dwarf boxwood for the exterior decoration of the magnificent new Café de la Opera at the corner of Broadway and 41st street. The effect of the green against the light-colored stone and the arrangement on ledges, window balconies, etc., is very beautiful.

NEW ORLEANS NOTES.

The weather for the month of November was phenomenally fine, only two days rain marring a perfect month. Trade in the stores continues brisk and the volume of business done at Thanksgiving was a small advance on last year. More attention is being given to window displays and some pretty effects are noted. Chrysanthemums, except the late white Yanoma, are just about over for the season, which has been a very good one for them. Bride and Bridesmaid roses from the north are rather poor in quality, hardly so good as the local stock, while the color of Bridesmaid is away off. T. G. Owen, of Columbus, Miss., is sending some nice Kaiserins and Perles to this market.

J. A. Newsham has commenced the erection of a new orchid house 28x100. Cattleya Trianae are blooming nicely with him and he is contemplating another trip to Central America and Colombia.

Representatives from three New York seed houses called on the local trade this week and J. A. Peterson of Cincinnati, also had a drummer here handling Christmas specialties—Cyclamen, Lorraine Begonias, A. Farleyense and Dracaena terminalis. They all booked good orders.

With Poinsettias flaunting their gorgeous bracts in the open ground it is difficult to realize that Christmas is at hand, yet so it is and the stores are already dressing up. Trade continues good, cut flowers and flowering

plants selling well. The funeral of the foremost Jewish citizen and noted philanthropist, Isadore Newman, gave all the stores quite a lift. All of \$3000 was spent for designs, although the family made the request, "Kindly omit flowers." Carnations and roses from southern points are coming in nice shape now with the exception of Bridesmaid, which is washed out in color.

Sweet peas, Christmas and Mont Blanc are blooming in the open and sell well.

Abele Bros. have just completed a new house, 100x20 feet, for asparagus. This firm grows all the plants for the Steckler Seed Co.'s catalogue trade, and the amount of work and attention to detail this involves is enormous. It speaks well for their ability that seldom is a "kick" registered from a dissatisfied customer.

The sympathy of the trade goes out to Frank Faessel on the death of his mother, which occurred early Sunday morning.

Eau Claire, Wis.—Because the landscape gardener, employed by the county board to beautify the courthouse lawn, began his work by preparing to cut down about twenty-five trees, which belonged to the primeval forest, a public protest was filed with the board. This failed to stop the work and an injunction has been asked upon the grounds that cutting down magnificent shade trees is not "beautifying" the lawn, and a violation of the contract.

Flower Market Reports.

BOSTON The past week has not been satisfactory in all respects although it cannot be denied that the flower business has been remarkably good, exceeding in volume anything in the past for a corresponding date. The trouble has been simply overproduction. This market could not possibly consume to advantage and at standard prices the enormous product which has been let loose on it for the past two weeks. Reports from other centres show like conditions while the smaller communities which depend to a greater or less degree upon the supply from the large shipping centres are getting all they want from local sources, for the time being. The cause of all this is undoubtedly the remarkably genial weather which has brought along very rapidly many crops which ordinarily would not come in until the Holidays, when the increased demand would absorb them all right. The outcome of the present overabundance may make trouble later on if inclement weather should set in and thus bring about famine conditions at an inopportune time. But this is something nobody can foretell. It is well to add that the general quality of stock now in market is exceedingly fine and much credit is due the growers for the high degree of cultural skill displayed in all lines of greenhouse product.

CHICAGO The week succeeding Thanksgiving was very dull so far as local sales went. There was little doing of a social nature and Christmas shopping occupied the time of those who usually buy the flowers. The cold wave which reached here Sunday was no half-way affair and florists are likely to find out promptly just what effect it will have on trade. It is to be hoped their happy anticipations will all be realized. At any rate, if the weather continues cold it is more than likely that Christmas stock will be shortened. American Beauties have advanced in price 25 per cent already. Carnations more quickly cleaned up Monday morning and roses are not far in excess of demand. Christmas green is beginning to line the streets, and boxes of holly give the Christmas look to the florists' houses. So far the holly seems unusually full of berries.

DETROIT Some dealers have been kept hustling at a lively clip all through the week; the majority though suffered from the usual after-holiday effect. This year's Thanksgiving paralleled the experiences of former years; while there is an increased demand it does not justify either the saving up of stock or any increase in prices. The need to keep prices at a medium level is still more accentuated by the fact that this holiday is practically the closing day of the chrysanthemum season. Locally we were fortunate to be a little off crop in carnations, roses, etc., which enables us to keep them at a slightly higher figure than ordinarily. A few days last week being very warm supply was soaring up to the danger mark but now that a cold snap has struck us it will be used up in a manner satisfactory to all.

Flower Market Reports.

(Continued from page 859)

NEW YORK The flower trade has been most inspiring for the past few days, as a retail proposition. From the wholesale point of view the outlook is not so rosy. The fact is, that a tremendous business is being done in both plants and flowers and no fault can be found with the New York public—upper ten or lower ten. Business lags in the wholesale marts and markets, however, for it takes nothing less than a blizzard to shut off the tremendous tidal wave of material which rolls into the wholesale establishments here every day. The retail trade may be booming but no inroad that it can make will disturb to any extent the lethargy that annoys and irritates the wholesale dealer. The truth is that the growers are producing too much for the legitimate needs of the local market and history tells why the shipping trade of the largest flower market in the world is moribund. It is true that no city can digest a surplus in better fashion than New York can. It is also true that the best surplus digester that ever was found—a shipping trade—is “a dead one” long ago and there is nothing left except local trade. All kinds of flowers are abundant and quality was never better. Chrysanthemums are nearing their end but wherever one turns that old standby, Mrs.

Jerome Jones, is in evidence. Contemporary with Ivory this unrivalled standard chrysanthemum still holds its own. Is there any other variety except Mrs. Jerome Jones and Ivory left of the brilliant stars of 1892?

The first week of **PHILADELPHIA** December proved fairly normal as to demand, but there was far too much stock. The quoted figures were all light for early sales; but there was a big accumulation by end of the week, and the slaughter of the innocents, then, was frightful—bringing the average returns for the growers down to almost unbelievable figures. There was no special class suffering more than another—too much of everything all along the line. The plant market is brisk. Holly and other greens also in lively demand.

John Young, who has been identi-

fied for many years with the wholesale flower trade of New York City, has given up his store in 28th street to devote his entire attention to his extensive rose houses at Bedford, N. Y.

FOR SALE—Hinsdale, Ill., E. C. Crosby greenhouse plant, running order, 45,000 ft. of glass 20,000 carnations, etc., 10 acres, 1 house, 2 cottages, 3 barns, 2 cisterns and village water; value \$25,000, for \$16,000 if taken at once; might divide; 30 minutes from Chicago.

WASHINGTON NOTES.

After a much-needed rain, it has turned very cold and at the present writing high and severe winds prevail. There has been a very decided improvement in the tone of the market during the past week. Washington's social season is fully on and with the recent opening of Congress practically everyone is at his post.

There has been a very decided scarcity of red carnations and prices on them have gone up accordingly.

THE APPLE GROWING INDUSTRY.

Modern conditions and the increasing demands for clean fruit of color, size and flavor have made apple-growing a highly profitable industry in the Northwest, as it should be throughout New England, and there are many, including the foremost pomologists, who believe that in three years the products of the commercial orchards in Washington, Oregon, Idaho and Montana will exceed in value the total yields of the bonanza grain fields in these states. Indeed, the fruit areas are being extended so rapidly that computation of the probable crop in 1915 is bewildering because of its enormity; but there is room in the apple belts of the United States and Canada for armies of growers, opportunities to make millions of thousands of dollars, to establish pleasant homes, to develop horticulture and to have a part in the growth and progress of the country.

Probably it is in this that the National apple show, now an annual institution at Spokane, Wash., is of the greatest educational value to the grower and the prospective orchardist. The primary purpose of the exposition is an educational one, even though that object be lost sight of for the moment by the dazzled spectator at the monstrous piles of apples; but it is hazardous no guess to say that the grower has that primary purpose steadily in his mind as he compares and contrasts his fruit with the neighboring exhibits.

Lessons peculiarly of interest to the growers in America are taught in showing the possibilities of intensive cultivation, and this may be shared by orchardists in all parts of the continent and the world, for the reason that the Spokane exposition is neither insular nor sectional. People of every state, territory and province in America and every country in the world are interested in the supply of food, fruit and material for the manufacturing industries of every other district, and the value of the lessons in comparisons cannot be over-estimated.

The various methods of selection and pack can be balanced at an exhibition devoted exclusively to apples as at no other exposition. Whether complacently secure in the belief that his exhibit does not suffer from comparison or is suddenly upset in a cherished notion of cultivation or pack, the grower is there to study the methods of others. While this feature, in a measure, is attendant at the various state and county fairs, it is most peculiarly patent in the apple show. There is a good reason: It is not possible at an exposition of the products of any state to show why a certain fruit or other agricultural product of that district is better than its neighbor by the process of multiplication of exhibits. There is not the space, there are not the exhibitors in sufficient numbers and there is not the centralized motive.

No more convincing argument in behalf of the excellence of the products of apple orchards in the Northwest has yet been presented than that put forth by the handlers of fruit in the United States and Europe during and since the first apple show. They were quick to see the possibilities of high grade apples in eastern and foreign markets and they snapped up every offering of fruit at top prices. It is not out of

place to say there was a ready market for 5000 cars of northwestern apples over the output of the orchards this season. The crop is reduced in the Northwest this season, but the growers will receive more money for their apples than ever before in the history of the industry.

There were periods in the history of apple growing in America when the fruit was almost a drug on the market. That was before orchards became an established industry in the Northwest. Eastern farmers then did not have to grow apples; in fact; all they did was to pick them from the trees and dump them into barrels. Time worked changes, and the apples of Washington and Oregon gradually found their way eastward. They created a market for themselves, limited as it was, and the growers began to extend their orchards, and make a business of apple culture.

Conditions developed the fact that a much better apple could be grown by intelligent cultivation than by the haphazard method of letting the trees care for themselves. The products of the orchards of the Northwest were received with favor not only at home, but also abroad, and when the people found the better apple, they were no longer satisfied with the inferior fruit. They demanded the best, and, in many instances, the growers were not prepared to supply the new standard. They were not equal to the task of improving their orchards; they permitted their trees to run down, and, as a result the fruit became so unattractive that it could not be sold, and thus the position of supremacy gradually slipped away.

Apples were so plentiful and cheap in the New England and other eastern states, from 1895 to 1897 and in 1899 and 1900 that farmers with orchards would not invest money in what appeared to them to be an unprofitable crop, and they gave little or no attention to the gradually changing conditions. Those were the days when apples brought from 40 cents to a dollar a barrel. The higher figure was paid for fruit then graded as fancy. Then there was improvement in the appearance and texture of the fruit and the demand became stronger and soon there were no cheap apples. The crops of eastern orchards were not sufficient to supply the demand, and growers in the western states found it profitable to ship their apples thousands of miles to the markets once controlled almost exclusively by growers in the New England states.

There has been an awakening in the east, more especially throughout New England, and there are many who believe that the time is not far distant when the orchard districts in Massachusetts, Maine, Rhode Island, New Hampshire, Connecticut and Vermont will again become prominent factors in the industry. Eastern growers admit that their western brethren have outstripped them by the adoption of modern methods in cultivation and sending clean and attractive fruit, honestly packed and guaranteed as to condition and quality, to the markets, and they will profit by following the example in growing cleaner and better fruit and more of it. This is also true in other eastern, middlewestern and southern

states, where apple culture is being taken up as an industry. There is room enough for all. The apple market is world-wide and overproduction is out of question now and will be for generations to come.

AUGUST WOLF.

CONTROLLING THE SAN JOSE SCALE.

A Professor of Clark University (Worcester, Mass.), wrote to Professor H. A. Surface, State Zoologist of Pennsylvania, as follows:

"Will you kindly advise me whether the San Jose scale is being controlled in your State, and, if so, what remedies are being used to destroy it?"

The answer of Professor Surface was as follows:

"Replying to your recent letter asking if the San Jose scale is being controlled in this State, I beg to say that this depends upon the man behind the spray rod. We have many striking examples of men who are controlling it in an eminently satisfactory manner, as well as examples of persons who have not controlled it. It is true that where no spraying is being done for it, or where the wrong materials, such as the soluble oils, or too greatly diluted commercial preparations of any kind, are being used, or where the spraying is not done thoroughly, it is not being controlled. But this does not discourage our progressive fruit growers who know by experience that the San Jose scale problem in Pennsylvania is solved by the application of the boiled lime-sulphur wash, either home-boiled or in the form of the commercial preparation. The latter should not as a rule be diluted more than one to eight, instead of one to eleven as the manufacturers almost universally recommend. Our fruit growers have found this year, above all others, that absolute thoroughness is the keynote to success, and that not a spot or speck of the bark from the most remote twig to the base of the trunk must be left unsprayed.

"The fact that it is being controlled in an eminently successful manner is indicated by the very expensive planting that is now going on in all the fruit growing sections of this State. Our fruit growers are taking renewed courage, and there never has been a year when nursery stock has been so completely bought up, notwithstanding the unusually high prices, and when planting has been so extensively carried on as this fall, and for next spring it promises to be still greater. We are satisfied with results.

"If any prominent and intelligent person like yourself would doubt any of these statements in any regard, and will come into the State of Pennsylvania, I shall take him over the State and prove to him exactly what is herein said, and if I do not give him ample and sufficient proof of the full truth of these statements, I shall personally pay all the expenses of the inspection tour."

An article having recently appeared in a Harrisburg newspaper in regard to the remarkable apple crop which Mr. Gelwicks, of Franklin County, realized from an orchard which three years ago he had decided to abandon, on account of its unpromising condition, due to the ravages of San Jose scale, Professor Surface, whose name

was used in the article, has been the recipient of a number of letters inquiring as to the truth of the statements made. To each letter an affirmative answer was given. As the article is worthy of the widest publicity, it is given here in full:

"What is considered the most remarkable 1909 apple crop in Pennsylvania has just been sold at the orchard of C. C. Gelwicks, St. Thomas, York Township, Franklin County. Gelwicks raised 4500 bushels of apples on a 30-acre plot and sold them at the orchard for \$5000.

"Three years ago, Mr. Gelwicks was unable to get even ten cents a bushel for his apples and decided to chop down all of his trees and raise wheat and corn.

"The entire orchard in 1906 was affected with San Jose scale. The trees were withered looking and the apples very small and wormy. Economic Zoologist Surface heard of the decision of Gelwicks, visited the orchard and found it filled with trees about eleven years old. He advised the spraying of the trees with a boiled lime and sulphur solution.

"The trees were sprayed in 1907 and that year off of six acres he got 600 bushels of the finest kind of apples. Last year the crop was fine again, but this year, when all the neighboring orchards were bearing only a third to one-half a crop the trees were loaded down with apples, some of the limbs being pressed to the ground by the weight of the fruit.

"After spraying the trees none of them died and now all are in a most flourishing condition. The spraying has had a beneficial effect upon all of the orchards in the neighborhood, for all of the farmers, who formerly believed only peach trees could be helped by spraying, now know that the San Jose scale can be driven off of apple trees for good.

"It is necessary in spraying that the proper solutions be used. S. B. Rinehart, of Mercersburg, recently sprayed 22,000 trees in his orchards with an oil solution and practically every tree has been killed."

NEWS NOTES.

Toledo, Ohio.—Charles A. Schramm, 1315 Cherry street, has taken his brother, Bernard G. Schramm, into partnership. The name of the firm will be Schramm Bros.

Owing to the spread of the gooseberry mildew in European countries, an enactment has been recently signed by Queen Wilhelmina and both ministers of agriculture, trade and commerce, and finance, forbidding the entry into the Netherlands or transportation through, of gooseberry, red and white currants, black currants and raspberry plants or parts of plants, from any other country; the same applying to all materials used in packing one or more of these bushes, or which have been so employed.

VALUABLE BOOKS

No one man can "know it all," no matter what line of business he may be engaged in. Oftentimes one point gleaned from some good book nets him many dollars over the price he paid for it.

The books in the following list are all good books for the lines they cover. You may reap a golden harvest from some of them.

The American Carnation. C. W. Ward. Price, \$3.50.
Chrysanthemum Manual. Smith. Price, 40 cents.
The Chrysanthemum. Herrington. Price, 50 cents.
Manual of the Trees of North America. C. S. Sargent. Price, \$6.00.
Soils: How to Handle and Improve Them. S. W. Fletcher. Price, \$2.20.
Daffodils—Narcissus and How to Grow Them. A. M. Kirby. Price, \$1.10.
The Art of Landscape Gardening. Humphrey Repton. Price, \$3.20.
Roses and How to Grow Them. By Many Experts. Price, \$1.21.
The New Encyclopedia of American Horticulture. L. H. Bailey. Four Volumes. Price, \$20.00.
How to Plan the Home Grounds. S. Parsons, Jr. Price, \$1.10.
How to Make a Vegetable Garden. Edith L. Fullerton. Price, \$2.20.

We can supply all of the above books postpaid at the prices listed. Any book, foreign or domestic, which treats of horticultural topics can be secured through this office.

IN TIME OF TROUBLE

An Ever-Present Help

Some people know their heating apparatus is defective but keep procrastinating. Some others find their troubles unexpectedly after they begin firing.

The Castle Automatic Circulator

is the infallible remedy in both cases. It overcomes all irregularities and defects in piping and circulation and saves coal. Many leading growers are using this device and their verdict is uniformly approving and enthusiastic. Write to us for testimonials, advice and estimates.

MERRY CHRISTMAS

Here we are again at Christmas and another year almost gone. It is time to be making plans for next season and taking thought as to how this year's work can be improved on in 1910. If you have greenhouses you are probably thinking of making an addition; if you are a retailer you expect to make your store nicer and neater than ever, possibly build a conservatory or a show house. If you have anything in the greenhouse line don't forget to consult us before you build and get our prices. We can interest you in our material if you only give us a chance. . . . This is our 41st successful year. We wish you all a Merry Xmas and much success for the New Year.

On Securing A Practical Greenhouse

It is no small matter, that of designing and building a greenhouse which will be decidedly ornamental, fit attractively in its location and still has none of its practicalness sacrificed. It must be practical, that's sure. It should be economical to run and heat, and be free from the everlasting repairs that annoy and discourage one.

We build houses that fully meet all these requirements.

Here is one in the illustration. If you want some such thoroughly up-to-date, entirely reliable house, we shall be glad to send you illustrated matter or come and talk things over directly with you.

Hitchings & Company

Designing & Sales Offices
1170 Broadway, N. Y.

General Offices & Factory
Elizabeth, N. J.

A Feature Not Practical With Other Houses

Most greenhouses look quite alike, differing only in arrangement. To make them ornamental means adding shade-casting features, making the house too dark for practical growing. But the U-Bar being so much lighter than other construc-

tions, it can be handled ornamentally, as in the illustration and still be the lightest house built. Send for new catalog, showing other views of this same house.

U-BAR GREENHOUSES

PIERSON

DESIGNERS AND BUILDERS

U-BAR CO.

1 MADISON AVE. NEW YORK

Curvilinear House at Saugatuck, Conn.

IT is on the estate of Arnold Schlaet, where Patrick Anderson is the gardener.

As an example of harmony in design with surrounding buildings and adaptability to the grounds, it certainly is a gem. There is an ornamentalness and beauty in the curvilinear house built L. & B. way, that you cannot secure in any other house built any other way. In the language of the sailor, it looks "staunch and true."

This one is 50 feet long, 18 wide, with two compartments. The benches are all galvanized iron frames, with tile bottoms and slate sides.

Note the design of the gable entrance, how splendidly proportioned it is. The dog is a self-appointed guardian. Speaking of dogs, that reminds us, we are watching for your next order; hot on your trail in fact.

HARDY ROSES

For Forcing

Ready for Immediate Delivery

The right time to buy Roses is when they are fresh and well ripened. Roses potted up in the fall or late winter become better established and force better, and are far more satisfactory in every way, and you can retard or force at your leisure. We recommend the American-grown "Ramblers." Don't attempt to force imported Ramblers; the general experience is that they are failures.

Something New in Roses for Florists

Half Standard Baby Ramblers

These are Baby Ramblers, grown on stems or standards about one and a half feet high, and will be a novelty for your trade you cannot profitably overlook. They are offered for the first time in this country in the following varieties:

BABY DOROTHY (Half standard). Deep pink. 60 cents each, \$6.00 per dozen, \$45.00 per 100.
BABY RAMBLER (Half standard). Crimson. 45 cents each, \$4.50 per dozen, \$35.00 per 100.

BABY CATHERINE SEIMETH (Half standard). White. 45 cents each, \$4.50 per dozen, \$35.00 per 100.
BABY "STARS and STRIPES" (Half standard). White and red grafted on the same plant; most attractive. 50 cents each, \$5.00 per dozen, \$40.00 per 100.

Hardy Perpetual Roses

We offer extra strong forcing two-year-old dormant, low-budded stock, in the following varieties, true to name.

Price, 75c. for 5 (of one variety), \$12.00 per 100, \$110.00 per 1000.

Alfred Colomb. Carmine.
Anne de Diesbach. Bright carmine.
Ball of Snow. Pure white.
Baron de Bonstetten. Dark crimson shaded.
Baroness Rothschild. Satiny pink; extra.
Captain Christy. Delicate flesh color.
Duke of Edinburgh. Bright vermillion; very fine.
Fisher Holmes. Dark rich scarlet.
FRAU KARL DRUSCHKI. The finest white in existence.
General Jacqueminot. Rich velvety crimson.
General Washington. Beautiful red, shaded carmine.
John Hopper. Beautiful rose-pink.
La France. The finest light pink.
Margaret Dickson. White, pale flesh center.
Magna Charta. Clear rosy pink.
Mme. Gabriel Luizet. Light satiny pink.
Mme. Plantier. White.
Mrs. John Laing. Soft pink. Most desirable variety.
Paul Neyron. Beautiful dark pink.
Princess Camille de Rohan. Velvety crimson.
Ulrich Brunner. Cherry-red.

Forcing Rambler Roses

American Grown. The Only Stock for Forcing
CRIMSON RAMBLER

Large heavy plants, two years old, mossed and packed in bundles of 10.

	10	100
3 to 4 feet.....	\$1.25	\$12.00
3 to 5 feet.....	1.75	15.00
4 to 6 feet, extra strong and heavy.....	2.25	20.00

DOROTHY PERKINS

Shell Pink. \$1.25 for 10, \$12.00 per 100. Extra strong, \$1.75 for 10, \$15.00 per 100.

Tausendschon

The new Rambler Rose. The name translated means a "thousand beauties." Color beautiful rose, shading to pink. \$2.25 for 10, \$20.00 per 100.

Tausendschon (standard grown). Each 50c., doz. \$5.00, 100 \$40.00.
HIAWATHA. The flowers are single and are of a deep, intense crimson shade with the petals shading to a pure white base. Flowers very freely and is undoubtedly one of the best of the single Roses for forcing. Extra strong, two-year, field-grown, \$3.25 for 10, \$30.00 per 100.

WEDDING BELLS. A seedling of the Crimson Rambler. The most floriferous Rose yet produced. The color is white with the upper part of the petals soft-pink. Fine for forcing. Perfectly hardy. Extra strong two-year-old field-grown flowering plants, 3 to 4 feet. \$2.25 for 10, \$15.00 per 100.

LADY GAY. A seedling from the popular Crimson Rambler, which it resembles in habit and general effect. The flowers are of a delicate cherry-pink color, which fades to soft white. Strong plants, field-grown, \$2.25 for 10, \$15.00 per 100.

Baby Rambler Roses

BABY DOROTHY. The Pink Baby Rambler, and bound to find favor where the Baby Ramblers are popular. \$1.75 for 10, \$16.00 per 100.

BABY RAMBLER

(Mme. Norbert Levavasseur)

Strong field-grown plants, \$1.75 for 10, \$15.00 per 100.

P. OUWERKERK, 216 Jane St., Weehawken Hgts. P. O. No. 1, Hoboken, N. J.

Notes from the Arnold Arboretum

Besides the Rhododendrons there are a number of other broad-leaved evergreens among the new Chinese introductions. Some have already been mentioned in previous issues as *Sarcococca*, *Sycopsis*, *Xylosma*, *Lonicera pileata*, *Clematis Armandi* and some evergreen species of *Viburnum*, *Cotoneaster* and *Rubus*, but there remain still a few not yet noted which may be briefly described here.

A very handsome evergreen shrub is *Berberis acuminata* with arching spiny branches bright red when young. The lanceolate leaves are spiny along the margin and from three to four inches long. The slender-stalked bronzy yellow flowers appear in clusters and are followed by ovoid bluish black fruits. A shrub similar in appearance and habit is *Berberis Gagnepainii* with slender spines about one and a half inch in length. The lanceolate leaves are from one to almost two inches long and spiny along the margin. The yellow flowers are borne on slender stalks in clusters of three to five and are followed by ovoid violet-purple berries. *Berberis Wallichiana*, though known to cultivation since a long time, may be mentioned here, since the plants raised from recently introduced Chinese seeds have proved much hardier than the Himalayan plant. It is a handsome shrub with oblong or lance-oblong leaves about two inches long and bright green on the upper and bluish white on the lower surface. The flowers appear in many-flowered clusters and are followed by ovoid bluish black berries. A very distinct and handsome species is *Berberis verruculosa* with yellow branches and spines which form a pleasing contrast with the glossy bright green foliage. The branches are rough with minute warts and the slender spines are about one half inch long. The oval leaves are from one half to three quarters of an inch long and have a few spiny teeth; on the upper surface they are bright glossy green and pale on the lower. The yellow flowers appear solitary or in few-flowered clusters on short stalks and the violet purple berries are ovoid. Only half evergreen is *Berberis Wilsonae* a low spiny shrub similar in habit to *B. Thunbergii*. The oblanceolate entire leaves are from one half to one inch long, dull green and strongly veined and assume late in autumn a brilliant scarlet color. The flowers appear in dense and short clusters along the branches and are followed by very ornamental coral-red globose berries.

A neat evergreen shrub of dense habit is *Ilex Pernyi* with short-stalked oval dark green leaves about one to one and a half inch in length and furnished with four spiny teeth. The small white axillary flowers are followed by red fruits about one third of an inch in diameter. *Ilex Fargesii* has lanceolate slender-stalked leaves finely toothed and from three to four inches long. The axillary fruits are red like in the preceding species.

A handsome evergreen Privet is *Ligustrum strongylophyllum* with dark green short-stalked leaves broadly oval and about one inch long. The small white flowers are disposed in loose terminal panicles from three to five inches long. Very variable in the shape of its foliage is *Ligustrum Henryi*; the leaves vary from broadly ovate or nearly round to ovate-lanceolate and from less than one half to one and a half inch in length. The flowers are borne in dense and short panicles.

The largest flowers of all the Jasmines in cultivation, has *Jasminum primulinum*; they measure one and a

half inch in diameter and are usually semi-double and of a rich yellow color. The leaves are trifoliate with the middle leaflet oblong in outline and one and a half inch long and the two lateral ones shorter and broader. *Jasminum floridum* has also trifoliate, but smaller leaves and much smaller flowers in loose terminal corymbs; it is known to cultivation since a long time from the Himalayas, but the recently introduced Chinese form is apparently hardier.

Stranvaesia undulata belong to genus little known in cultivation and allied to *Photinia*. It is a half-evergreen shrub with elliptic to oblong entire leaves from one and a half to three inches long and turning late in autumn to a brilliant scarlet. The small white flowers are disposed in terminal corymbs and followed by red fruits about one quarter of an inch in diameter.

Alfred Rehder.

Geranium Red Wing

The illustration shows a flower truss of this new zonal pelargonium raised by F. H. DeWitt & Co., of Wooster, Ohio. The variety is described as a strong grower and its introducers express the belief that with its splendid color it will divide honors with S. A. Nutt for first place among bedding geraniums.

Progress in Geraniums

While this great improvement alluded to in last issue has taken place with the double or more properly the semi-doubles,—which are the greatest favorites with the majority of the American people—the Singles, the favorites of Europe, especially England, have kept pace with them, so that the Single Geranium of today is a flower of marvelous beauty, such as a comparatively few people realize. Those who have not kept informed as to the newer introductions cannot form any conception of the grand colors and shades we have in this family, rivaling even the rose in beauty. In fact it would be almost impossible to compare a bed of Geraniums such as we had, say 20 years ago, with a bed of Paul Crampel, for instance—a perfect mass of most intense fiery scarlet, almost completely concealing the foliage with trusses of enormous size. Our Eugene Sue with its exquisite shade of russet orange is a color that carries extremely well, and so it is, on through an almost unlimited number of varieties, embracing all the colors, shades and combinations of colors that it is imaginable to find in the Geranium, and while the singles are not well suited for the market trade where they have to stand rough handling, yet where there is a home trade they will meet every requirement of the most critical, and for the conservatory a lasting effect can be produced with them not excelled by any other flowering plant.

As a few of the leading singles we might mention Pamela, one of Cannell's English round-flowered type, large pure white center shading through a maculated effect to a crimson lake border, an unusually strong grower for one of this race; Mrs. E. G. Hill, the standard rosy salmon among the single bedders; Nuit Poitevine a handsome dark rosy purple; Feuer, which comes to us from Germany very highly recommended as a candidate for first place among the dwarf scarlet bedders; The Sirdar, a beautiful shade of intense scarlet and a true representative of the large English round-flowered class, and so on through a bewildering collection of splendid sorts.

A comparatively new race of Geraniums is the Cyclope. They are especially suitable for fancy pot plants, being distinguished from the other double varieties by the particular shape of the flower. The petals, which are elegant and showy, leave the white center visible in a very marked manner; we now have several handsome varieties in this class. Jules Vasseur, semi-double bright cardinal red, upper petals shaded carmine purple with a white eye; Leon Baudrier carmine lake shaded cerise to a white center, and others all capable of passing the most critical judgment; the Single Cyclope are the most striking of all Geraniums with the clear white centers of the individual flowers giving the open truss the appearance of having a light center surrounded by a border of the color of the flower.

The Cactus-Flowering Geraniums are a very unique and striking beautiful distinct type originating in England about 1904. They have won a place of popular

form as a novelty for the conservatory and window boxes, for which they usually are pleasing and attractive on account of their admirable elegance of form and exquisitely graceful, narrow, curled and twisted petals similar to those of the finest grade of Cactus Dahlia.

With regard to the introductions of the last two years, we have refrained from saying much about them, confining ourselves as nearly as possible to those kinds which experience has taught us are useful and are already classed among those that measure up to the highest type of standard varieties or those which we are satisfied are capable of producing the most satisfactory results, and will be classed among the standards as soon as they become known to the geranium growers. Yet there are many among the novelties that are great advancements towards perfection and well worthy of a trial. Among them we would especially mention Edmond Blanc, Bouc. 1907, semi-double and one of the most exquisite striking shades of deep carmine with a violet tinge, that we have seen; Jamaïque, Lem. 1907, a grand variety, rich cherry red, enormous trusses and splendid habit; Suzanne Despres, Lem. 1907, large semi-double flowers of the delicate shade which can best be described as apple blossom white, each petal bordered rose; Jean Lamarque, Brt. 1908, an effective color of violet not very much in evidence among other standard sorts, stained with rose; Mauna Loa, Lem. 1907, bright orange red, a color not very much in evidence among our standard sorts; Genitrix, Brt. 1907, light turkey red, in speaking of which Mr. Bruant says: "We have a group of this variety in our experimental garden; it has shown itself to be remarkable for its uninterrupted blooming and its resistance to inclement weather." Jean de Vries, Brt. 1907, has very large semi-double flowers, velvety violet purple with the center splashed like a nasturtium. With these there are many others that will supersede some of the older varieties as soon as they are well disseminated.

Among the 1909 imported novelties will be found the most beautiful colors that can be imagined—magnificent splendid solid colors that fairly dazzle the eye; others are exquisite combinations that baffle successful description and must be seen to be appreciated. Most of them are strong robust growers with beautiful foliage and we are confident there are some among them that are destined to become leaders in their different classes.

Another new type described by Mr. Lemoine is Pelargonium Peltata Zonale, a cross between an Ivy and a Zonal and retaining all the best points of both parents, including the beautiful soft tinge of the Ivy and the hardy constitution of the Zonal. The flowers are semi-double and produced in fine trusses. Alliance is a beautiful representative of this type; it is an exquisite shade of pale lilac pink, the upper petals feathered and blotched rich crimson maroon. As a vase plant or for window boxes where they are exposed to the sun this type will be found superior to the Ivy Leaved kinds.

More trouble for the seedsman

The seed trade appears to be threatened with another hardship, according to the report in our seed news column, which we sincerely hope will prove to have been incorrect. The insistence on first class postal rates on all sealed seed packets would certainly make a lot of trouble and expense, for a while

at least, until some ingenious inventor has solved the problem of a sealed, yet not sealed, packet.

A wasteful custom

Societies devoted to the protection of native plants are making a strong appeal on behalf of the Mountain Laurel (*Kalmia latifolia*) which is being used up in such quantities for garlanding at all seasons, but especially at the Christmas holidays, that it is becoming very scarce and almost extinct in many sections. It is much to be regretted that this beautiful native flowering shrub should be wantonly destroyed, especially as neither artistic taste nor any other purpose of real beauty are served by the present approved methods of festooning the exteriors and interiors of buildings with this laurel roping, so called. Bouquet green, lycopodium, ground pine or princess pine, as it is variously termed, has been mostly superseded by the laurel, however, in a large section of the country and, as to its use in bouquet making, that was abandoned by florists long ago. Let us hope that the same advance in good taste which has banished bouquet green from the florists' work room may yet bring forward some acceptable decorative material that will supersede the wasteful "roping" methods and so help to preserve our mountain laurels for more noble purposes.

The florists' duty

While feeling much in accord with the sentiments and aims of the organizations which are endeavoring to arouse public interest on behalf of the holly, laurel and other gems of the wildwood we fear their efforts will avail but little at the present time. Florists should really be their most active allies, and for the best of reasons. The florist business must depend for its development and success upon the general utilization, by the people, of the cultivated products of the florists' industry and skill rather than upon the use of material gathered in the wild or upon the trade in artificial manufactures or imitations of any kind. It is manifestly the florists' duty to himself and to the business he follows to place first and foremost the products of his craft before the public in such shape and manner as to develop a more general taste and appreciation for fresh flowers and plants and to discourage the use of substitutes in any place where natural twining vines or florists' products of any kind are practicable. Have we not already too many make-believe palms in hotels and other places of public resort; too many artificial cattleyas and violets on the ladies' muffs; too many gaudy cloth poinsettias in the windows? Florists follow the most elegant and beautiful avocation on the face of the earth; they should stand up for it in its purity and use every means at their command to educate the public to the idea that nothing in existence can ever take the place of a fresh flower or a growing plant with people of refinement.

DEATH OF WILLIAM K. HARRIS

Respected and beloved of his neighbors and the trade of the entire continent, Wm. K. Harris of Philadelphia, has entered into rest after a long period of suffering. Other pens have lovingly recorded on this page tributes to his memory that tell the story so much better than we are able to that we refrain from any extended obituary notes. Personally, we have lost a very dear friend and our heart is filled with emotion as we glance reminiscently of more than a quarter of a century back over a very intimate friendship with this genius and philosopher and feel honored that it has been our privilege to share

"That best portion of a good man's life, —his little, nameless, unremembered acts of kindness and of love."

Although a keen and shrewd business man, Mr. Harris never was known to intrude questions of trade or bargain into the social hours which he enjoyed so much in the company of his friends. His was a unique personality, a sunshiny temperament, a big, kindly heart, a well-spent life devoid of selfishness or guile. He was an honor to his profession.

Robert Craig's Story of Mr. Harris' Life.

Wm. Kennard Harris was born March 10th, 1838, in Philadelphia. He went to work at the age of ten years for Robert Dunk, who lived in the "Neck" in the southern part of Philadelphia, who was a grower of herbaceous plants and who had probably the best collection in the state at that time. He was also a raiser of small fruits and garden truck. Mr. Dunk was a basket-maker and taught the art to young Harris, who became very expert at the work and at about twenty-five years of age started in business on his own account. At the age of twenty-nine he gave up basket-making and started in the greenhouse business, buying out Wm. Hobson, who had three small greenhouses at 55th street and Darby road; the houses were in poor condition and Mr. Harris having little capital had a long struggle before he got the business in a prosperous condition, but it did finally grow so that Mr. Harris was able to start in a larger way at his present location, 55th street and Springfield avenue. He became one of the best commercial plant growers of Philadelphia and has been a noted specialist for the last thirty years.

He was one of the earliest to grow in quantity *Ficus elastica* and *Pandanus Veitchii*. He raised many new seedling chrysanthemums, introducing many standard sorts. He also introduced *Lilium Harrisii*. He was a great observer and quick to detect the merits of a new plant. No one grew zonal geraniums better than he did. About twenty-five years ago he grew by the houseful the then new varieties such as Madame Lemoine, Marie Lemoine, New Life, etc. He also raised many seedlings, one of the best of which was Bishop Wood. He was probably the foremost man in this country in growing the once famous tri-color geraniums, of which Madame Pollock was a good example.

As to his personal traits, he was noted for his strong common sense and good business qualities. His word "was as good as his bond," and he was withal kindly and considerate. He was a good bowler, a good shot and an all-round good fellow.

He died at 9.30 a. m. on the morning of December 13, in his rocking chair, passing away as one falling quietly into sleep.

ROBERT CRAIG.

John Burton's Reminiscences.

There are few of our readers who have not known or heard of Wm. K. Harris, and all who have known him will be grieved to hear of his death. We of Philadelphia do not yet know what we have lost. His great personality in his business and social life made its impression on all who met him.

It was the writer's good fortune for

WILLIAM K. HARRIS

a number of years to be one of his near friends. A week rarely passed that we did not meet once or twice and with other of his friends spend an hour or so in a social game of bowling, or talk over old times, or matters of interest to our local or national societies, often having supper together afterwards, when our discussions would be renewed, at times reaching the point of argument but always ending in good nature on William's part; for, while positive in his views, he was always ready to listen to the other fellow.

He would occasionally speak of his childhood and tell of his struggles as a youth. When ten years old he ran away from a brutal farmer and with one penny in his pocket, and twelve hours without eating, bought two small cakes, one of which he gave to another little fellow who seemed just as hungry as himself. This he afterwards considered the greatest act of generosity of his life. His generous actions did not stop with his childhood, but he never spoke of them.

Though without much early education, he read a great deal and had his favorite writers, one of whom was Goldsmith. I once heard him say, "I can understand and learn more from one page of Goldsmith than a whole chapter of Emerson," though he believed Emerson the greater writer.

Mr. Harris had been a sufferer for years with a chronic trouble, but he rarely complained and never when it might interfere with the pleasure of his friends. He was confined to his home for several months, but was unable to gain strength, slowly getting weaker. He said a few days before he died, "I am too tired, John." This was the last time I talked with him.

I thank my old friend for having added to my pleasure in life.

JOHN BURTON.

George C. Watson's Word.

William K. Harris belonged to an older generation than the writer. A respectful diffidence restrains any strong expression of opinion as to the place Mr. Harris will finally hold when the history of horticultural achievement for his generation comes to be finally written—that is, it does not seem modest or proper for a younger man like the writer to size up a man like Mr. Harris. That duty is left to abler pens and more matured judgment and experience. One thing may be said with propriety, however, he was a big man! Strong in personality, strong in will power, keen as a business man, far-seeing, saving, industrious. In his personal relations, simple and innocent as a child; kindly, charitable, impulsive, full of good humor and sociability. A close association extending over twenty years served only to deepen and accentuate the bonds of amity and admiration. This is a personal word and is given in all sincerity and with love and reverence to the memory of our dear friend, "The Deacon." We do not get many original and unique characters like him in a life time. He shed lustre on the horticultural profession in many ways, and we believe his name will be remembered in history.

GEORGE C. WATSON.

John Westcott's Tribute.

I have lost a dear, personal friend in the passing away of William K. Harris. I grieve not only for myself, but for the horticultural community of Philadelphia and the country at large. He gave us many good things in his time. He gave us *Lilium Harrisii*, he gave us Ivory chrysanthemum, he gave us Mrs. Wood geranium. He gave us branched rubbers and countless other good things; but to us who were closely associated with him he gave of himself—a pearl without price—the finest personality I think that I have ever had the fortune to meet during my life time. He was the truest, kindest, best of friends, and no one can ever tell my sense of personal loss—so I will not attempt to speak of it. It is certain that horticulture has lost one of its brightest stars in the passing away of William K. Harris.

JOHN WESTCOTT.

A Word from George Anderson.

To my mind one of the most marked features in the make-up of William K. Harris was his emulation of excellence. He was ambitious in everything he undertook. Another strong feature in his excellent record was his hard working, industrious methods. Away back in 1871, when I was with Robert Buist, I can remember that excellent judge of human character sizing W. K. Harris up as a man who was sure to make his mark. Time has borne out the truth of this prophecy. I knew Mr. Harris for nearly forty years and a better man as friend, neighbor, or fellow-workman I never knew. We will all miss him.

GEORGE ANDERSON.

From Hosea Waterer.

Mr. Wm. K. Harris was one of the best florists and men I ever met. I knew him for twenty-eight years and always found him the same. He will be much missed by all who knew him well.

HOSEA WATERER.

Resolutions by the Florists' Club of Philadelphia.

At a special meeting of the Florists' Club of Philadelphia, held December 14th, 1909, to take action on the death of their late fellow-member and ex-president, William Kennard Harris, the following resolutions were adopted:

Whereas, the members of the Florists' Club of Philadelphia have learned with deep regret of the death of their esteemed and beloved fellow-member; therefore be it

Resolved, That feeling the sense of loss of one of such sterling worth, whose kindness, benevolence and courtesy so resplendent in his whole life, endeared him to all who knew him; therefore be it further

Resolved, That these resolutions be

published, and a copy of same be sent to his family as a token of high regard, and also as an expression of a sense of the great loss the club has sustained.

ROBERT CRAIG,
JOHN WESTCOTT,
J. OTTO THILOW,
Committee.

By resolution it was agreed the club room should be draped in black and closed all day Thursday. The club's floral emblem was entrusted to John Westcott and A. B. Cartledge. A portrait of Mr. Harris, suitably framed, was ordered for the club room. Joseph Heacock, president of the club, presided at the special meeting which was largely attended, among those present being Fred Hahman, S. S. Skidelsky, George Anderson, David Rust, John Westcott, A. Fahrenwald, George C. Watson, David Rust, Gus Eickmeyer, Jno. Fowler, S. S. Pennock, J. Otto Thilow, H. Waterer, Alfred Burton, J. W. Colflesh, Robert Craig, Edward Towill, James Griffin, A. B. Cartledge and Edward Reid.

OTHER DEATHS.**Sewall Fisher.**

Sewall Fisher, formerly in business as a florist at Framingham, Mass., died at the home of his daughter, Mrs. R. Symmes, in Boston, on Sunday, December 13, aged 76 years. Besides the daughter above mentioned, he leaves a widow and one son.

Mr. Fisher was widely known as a carnation raiser in the early days of that specialty, being a contemporary of the late John Thorpe. Silver Lake, introduced in 1884, Anna Webb, 1885, and Mrs. Fisher, 1890, were his most noted productions, the last named being still grown in some places. Among his introductions were also Cardinal,

Crystal, Clifton Fisher, Florence Fisher and Orient.

Mr. Fisher was a man of very retiring disposition, modest and unassuming to an extreme, affable and kindly always, and enjoyed the respect and esteem of the Boston florists and the carnation fraternity everywhere in the fullest degree.

Mrs. H. J. Franks.

We are very sorry to learn of the death at Allegan, Mich., December 12, of Mrs. H. J. Franks, mother of our Chicago representative, Mrs. M. B. Hancock.

NEW CHRYSANTHEMUM HOWARD GOULD (BESSIE G. PAYNE.)

Editor of HORTICULTURE.

Dear Sir: I notice that in your interesting notes of the Edinburgh Show, you mention the Wells variety which under the name of Bessie G. Payne, captured the Silver Medal. I would say that this chrysanthemum in both England and this country, will be sent out and known under the name of Howard Gould.

Owing to the fact that Mr. Wells was not in England at the time the flower was named, the distinguished gentleman Mr. C. Harman Payne named this variety, as he did not know the circumstances of the case, as it was growing in this country under a seedling number. With Mr. Gould's sanction it was named after him.

The variety is a splendid one and the mix-up in the names, while it could not be avoided, is perhaps to be regretted. However, Messrs. Wells in sending out their new catalogue for the coming year will explain this circumstance and as I before stated this variety will be called Howard Gould and not Bessie G. Payne.

C. H. TOTTY.

HOUSE OF THE LONSDALE "LIGHT PINK LORRAINE" BEGONIA
at Robert Craig Co., Philadelphia.

ABOUT FLOWERS

If you are in the flower business you have something to think about between now and Christmas. I have been connected with the wholesale flower trade of New York for nearly twenty-six years. I know the goods and the people who grow them. So, when you think of Christmas Flowers

THINK OF CHARLES MILLANG.

If there is anything in the great variety of fine stock grown for the New York market that you want I can supply it, in good condition and at fair rates. My central location in the big flower market building of the Metropolis affords Unexcelled facilities for knowing what is available and its value.

I am receiving every day large shipments of superb stock from the best growers.

Every Order Will Receive Careful Personal Attention

Charles Millang

Telephone, 7062 Madison Square.

NEWS OF THE CLUBS AND SOCIETIES

NEW YORK FLORISTS' CLUB.

It is a long time since the New York Florists' Club had so big a meeting as on last Monday evening when, braving the rain and slush of the most inclement day of the season, nearly one hundred members were in attendance. Election of officers for the coming year was the principal cause of the excitement. However, everything passed off very quietly, the election of president and secretary being unanimous and the defeated candidates for the other offices accepting the situation very good-naturedly and severally asking that the election of their rivals be made unanimous.

Harry Turner, the present presiding officer, W. E. Marshall and R. M. Schultz all declined to run for the presidency, thus leaving the field clear for A. L. Miller, whose portrait adorns the title page of this issue. For the vice-presidency, Jos. A. Manda defeated Robert E. Berry, and for the treasurership, W. C. Rickards, Jr., the present incumbent, outdistanced J. K. Allen, Mr. Langjahr having declined. A. M. Henshaw declined to run for secretary against John Young, and so the services of this efficient officer are again, as for many years before, at the club's command. H. A. Bunyard, F. R. Pierson and Phil F. Kessler were elected trustees for three years, and Wm. Duckham for one year.

W. H. Siebrecht, Jr., made an interesting report for the joint committee of the Club, the N. Y. Market Association and the N. Y. & N. J. Association of Plant Growers on the availability of the property wanted for a plant market site, and the city's title to same. A. L. Miller, John Birnie and others urged that the club make an early effort to attain the desired object.

Messrs. C. H. Totty, F. R. Pierson and Robert Simpson were constituted a committee to make preparations for the reception and entertainment of the American Rose Society at its approaching meeting and exhibition in this city. Messrs. Wm. Duckham, J. H. Pepper and C. B. Weathered were appointed transportation committee to the meeting of the American Carnation Society at Pittsburg in January. J. Austin Shaw, W. J. Elliott and John Young were appointed to prepare resolutions on the death of John Seligman.

On the exhibition table were sweet peas Christmas Pink, Mrs. Alex. Wallace, Snow Bird, Florence Denzer, Chas. H. Totty and Wallacea, to which the judges awarded a cultural certificate. Chas. H. Weber showed two seedling carnations, one white and one pink, the latter scoring a preliminary certificate. Frank E. Witney, Fish-kill, showed seedling carnation Wodinethe and this also won a preliminary certificate.

The "House Committee" put up a generous spread and a special vote of thanks was accorded J. B. Nugent for the gift of a luscious turkey.

A. L. Miller, President-elect.

Sound and successful, practical and popular, is the gentleman whom the prosperous New York Florists' Club has selected as its standard bearer for the year 1911.

Abraham Lincoln Miller was born May 1, 1865, in East New York, now a part of Brooklyn, Greater New York. Twelve years ago he succeeded to the florist business established in a small way thirty-three years before by his father, Henry Miller, on Jamaica avenue, Brooklyn. His foresight and confidence in the business was demonstrated by the addition of several new greenhouses and a little later, by the purchase of fourteen acres of land at Jamaica, L. I., where a range of houses was erected and the business run in conjunction with that at East New York. The Jamaica establishment comprises about 50,000 sq. ft. of glass, under which are grown Christmas and Easter plants and cut flowers. The collection of herbaceous and nursery stock is also very extensive.

Mr. Miller has been a very active member of the N. Y. & N. J. Association of Plant Growers and president of that association. He has been a devoted member of the New York Florists' Club for twenty years and no one has ever been elected to the highest office in the club's power who has enjoyed the confidence and esteem of the members and of the trade in general more than Mr. Miller has.

A VISIT TO NASHUA.

Saturday, December 11, was a "red-letter day" in the history of the Gardeners' and Florists' Club of Boston. Secretary Craig had called for a good turn-out of members in acceptance of the invitation to visit the respective establishments of George E. Buxton and August Gaedeke & Co., at Nashua, N. H., and the response was an enthusiastic one, there being fully 75 in the party, comfortably filling the special car which had been attached to the 11.30 a. m. train from Boston. A trio of musicians accompanied the party and music was at no time lacking.

On arrival at Nashua the visitors were met by their hosts and Judge C. W. Hoitt and escorted to the Tremont House where a fine dinner was enjoyed. Special cars were boarded for Mr. Buxton's range of greenhouses, which were found in a condition of splendid fertility and neatness. After a thorough inspection the route to the Gaedeke establishment was taken up and a brief stop was made at Judge Hoitt's beautiful home where the poultry-loving members had an opportunity to admire a dazzling array of prize winning pheasants, bantams and other feathered kind. At each of the above places refreshments were lavishly provided and at Gaedeke's they found the long potting shed transformed into a refreshment room of unlimited resources.

At the dinner there had been no speech-making other than a few words of welcome by Judge Hoitt, who presided, and a brief response on behalf of the visitors by President Downs. At the wind-up at Gaedeke's, however,

considerable oratory was turned loose, together with singing, cheering and general hilarity which was well maintained on the homeward trip to Boston. The most unassuming and modest of the whole party were Messrs. Buxton and Gaedeke, who well exemplified the quiet modesty which Judge Hoitt declared to be a universal characteristic in New Hampshire statesmen.

At Mr. Buxton's place were seen three carnation seedlings, all white, viz., Granite State, No. 3 and No. 7, in their fourth year and all showing strong points of superiority. Pink Beauty, another seedling, was much admired. It is a cross between Marion Buxton and Mrs. Patten, color deep pink. Among the standard varieties showing up particularly fine were Winoona, Rose Pink Enchantress, Beacon, White Perfection, Pink Delight and Enchantress. Mr. Buxton is an "old stager" at the carnation business and has lost none of his skill.

At August Gaedeke & Co.'s a bench of Bay State was most creditable and a house of the old stand-by, Fair Maid, was acknowledged by its raiser, Albert Roper, to be equal to the best he had ever seen. Very few carnations have earned so much money per square foot for the grower as this "bread and butter" favorite. Another specialty greatly admired at Gaedeke's was the Lorraine begonias—equal to the best produced anywhere. There are two carnation seedlings here also which may yet be heard from.

The Utica (N. Y.) Florists' Club held its annual banquet at Genesee Hall, on the evening of Dec. 2, and a very pleasant time was enjoyed.

MILWAUKEE FLORISTS' CLUB.

The artistic success of the Milwaukee Flower Show was so marked that the Milwaukee Florists' Club has practically decided to hold another one next year, even though the affair was not a financial success. The annual meeting and election of officers of the club was held December 4, when the following officers were elected:

President, Nicholas Zweifel; vice-president, Alex Klokner; treasurer, J. G. Heitmann; secretary, Eugene Oestreicher; trustee for three years, Arthur Leidiger, and trustee for one year, Gust Pohl.

NEWPORT HORTICULTURAL SOCIETY.

At the annual meeting of this society, held on the evening of December 14th, the following officers were elected for the ensuing year:

President, James Robertson; first vice-president, John P. Hammond; second vice-president, John Forbes; recording secretary, Daniel J. Coughlin; financial secretary, Andrew S. Meikle; treasurer, A. K. McMahon; sergeant-at-arms, William F. Smith. The following with the above officers comprise the executive committee: Samuel Speers, Alex. McLellan, Charles

JAMES ROBERTSON

Re-elected President of the Newport Horticultural Society.

Newton, Bruce Butterson, Patrick F. Reynolds, William Mackay, John B. Urquhart and C. M. Bogholdt.

The society voted to celebrate its twentieth anniversary in January with a dinner and appropriate accompaniments for this is in the hands of an able committee. A good time is fully expected.

David McIntosh, now of Tuxedo Park, N. Y., former secretary of the society, was present at the meeting.

Important Announcement To Carnation Growers

At the earnest solicitation of a large number of commercial and private growers, the Cottage Gardens Company has decided to disseminate this year the two famous carnations

MRS. C. W. WARD and ALMA WARD

Two varieties which are well known to all the leading growers of the country. Four years test in the New York market has demonstrated their popularity and good staying qualities. For the past three years we have been growing from fifteen to twenty-five thousand of each, during which time they have always **COMMANDED THE HIGHEST MARKET PRICES**, and at no time has the supply been equal to the demand.

On the exhibition table they have taken the **HIGHEST HONORS**, and we believe it is safe to say these two carnations **STAND WITHOUT AN EQUAL**.

INVITATION

We extend a cordial invitation to all those interested to visit our establishment, where they will have an opportunity to see them growing and compare their good points with other standard varieties grown under the same conditions.

MRS. C. W. WARD

MRS. C. W. WARD is a perfectly formed flower with full centre; color deep pink several shades lighter than Lawson, deeper than Winsor; having strong, erect stems 24 to 36 inches in length. A vigorous, healthy grower and has never shown disease of any kind.

A very early and free bloomer, producing fine flowers as early as September 1st, which bring from twenty-five to fifty per cent more than any other variety on the market.

The keeping qualities of this variety are remarkable. Several shipments of blooms sent to Europe reached their destinations in perfect condition, and wherever exhibited it has always been the last to show signs of wilting.

AWARDS

Society of American Florists, Silver Medal, Boston, 1906; The Craig Cup for Best Seedling, Philadelphia, 1906; The Lawson Bronze Medal, Washington, 1908; The Horticultural Society of N. Y. Silver Medal, Sweepstake prize for best 100 blooms, New York, 1909; The Horticultural Society of N. Y. Diploma, for best new variety, New York, 1909.

Rooted Cuttings Ready January '15, 1910

December and first part of January cuttings all sold.

\$2.00 per 12, \$12.00 per 100, \$100.00 per 1000, \$95.00 per 1000 in lots of 2500. 25 at the 100 rate, 250 at the 1000 rate.

ALMA WARD

This beautiful Carnation is pure white except during dark weather when it shows delicate splashing of pink similar to the Cattleya Orchid, increasing its popularity. ALMA WARD is the largest and most fragrant Carnation ever grown, producing perfect flowers 3½ to 4½ inches in diameter on strong, erect stems 36 to 42 inches in length.

This most remarkable variety takes the same place among carnations as the American Beauty Rose among roses, and has, during the past four years, been awarded numerous prizes including the following:

The Lawson Silver Medal, Toronto, 1907, (No Gold Medal having been awarded); The Lawson Gold Medal, Washington, 1908; The Society of American Florists Silver Medal, Washington, 1908.

Rooted Cuttings Ready February 1, 1910

January cuttings all sold.

\$3.00 per 12, \$5.00 per 25, \$9.00 per 50, \$15.00 per 100, \$35.00 per 250, \$65.00 per 500, \$120.00 per 1000.

WANTED

CALCEOLARIA, in 3-4 in pots — price per 100.

KNIGHT & STRUCK, No. 1 Madison Ave., New York

Come and See DOROTHY GORDON

growing and judge for yourself of its good qualities.

Orders for 60,000 R. C. have been booked without spending anything for printers' ink.

DOROTHY GORDON is beyond question the best commercial pink carnation in sight today. Its pedigree, *Lawson on Enchantress*, alone should recommend it to every carnation grower, but pedigree is by no means its chief merit. It possesses many of its own, such as

- 1st Vigorous constitution and freedom from disease.
- 2nd Size. Blooms average over 3 inches, of excellent form.
- 3rd Color. Resembles *Rose Pink Enchantress*, but is superior to that variety in being more uniform.
- 4th Long stiff stem.
- 5th Fragrant.
- 6th Keeping qualities of the best.
- 7th Blooming qualities 30 per cent. better than *Enchantress*.

We had a stock of 6,000 plants last season. The flowers were all sold at the holidays to the trade in Philadelphia at \$12 per 100 and uniformly sold for 50 per cent. more than we got for *Enchantress* during the rest of the season.

DOROTHY GORDON will be disseminated during the winter of 1909 and 1910 at the popular price of \$10.00 per 100, \$75.00 per 1000. Strictly on its merits. No carnation grower can afford to be without it. Come and see it, examine our books, and decide for yourself. It must be sold on its merits or not at all. Orders filled in strict rotation.

Joseph Heacock Company, Wyncote, Pa.

SELECT FERNS for FINE STORE TRADE

We offer a grand lot of exceptionally well-grown plants of the different varieties of **NEPHROLEPIS** which will be found one of the best selling and most profitable plants that florists can handle. Our stock is in unusually fine shape, and we will guarantee it will please the most exacting, as it is exceptionally good value at the prices quoted.

IMPROVED ELEGANTISSIMA. The finest of all this type. It was introduced by us in 1905. This form of *Elegantissima* has been greatly improved, and shows no tendency to revert to the Boston, making it the most valuable fern of this type. Strong plants, 4-in. pots, \$3.00 per dozen; 6-in., \$6.00 to \$9.00 per dozen—according to size; 8-in., \$12.00 to \$18.00 per dozen—according to size.

SUPERBISSIMA. Introduced by us in 1908. A very unique and distinct novelty. Its distinguishing characteristics are its dark green foliage and dense growth. Fronds are very heavily imbricated, making them very dense and compact. Strong plants, 4-in. pots, \$3.00 per dozen; 6-in., \$6.00 to \$9.00 per dozen—according to size; 8-in., \$12.00 to \$18.00 per dozen—according to size.

BOSTONIENSIS, PIERSONI, WHITMANI, SCOTTII. Extra fine plants, 6-in. pots, \$6.00 per dozen; 8-in. pans, \$12.00 per dozen.

Seed Trade

Opposition to Pea and Bean Contract Prices.

As was expected, the advance in contracting prices of peas and beans over last year's figures has met with considerable opposition from both seedsmen and canners, but in both instances it is largely due to the buyer not fully understanding conditions. It was pointed out in these columns a few weeks ago that such an advance was inevitable, because the growers were compelled to pay to the farmers an advance over last year, and as all were operating on as close a margin as was possible and leave them even a meagre profit, there was no alternative but to charge the advance to the consumer.

It would be of course unfortunate for the growers to take advantage of the situation to increase prices to an unjustifiable degree, but they should make due note of the congested condition of the canned goods market, and especially affecting canned peas. Many years ago when testifying before a committee inquiring into operating expenses of railroads, William H. Vanderbilt was asked on what the railroads based their charges. His reply was, "All that the traffic will bear." This should not be the attitude of the seed-growers at this time, nor in fact at any time, and generally speaking it can be said with confidence that it is not, and the advances asked on future pea seed are, as a rule, amply justified. It is earnestly hoped that both canners and seedsmen will duly appreciate this fact, and accept the situation, even though it apparently involves some hardship to them.

More will be said along this and kindred lines in future issues of HORTICULTURE.

Postage on Sealed Seed Packets.

We have been informed that the Postmaster General of the United States has had presented to him for approval a ruling made by the postmaster in a western city to the effect that a packet of seeds sealed is not mailable at their office as third-class postage, unless the packet is made of transparent paper.

From the beginning of the seed business in this country, packets of this character have been accepted for mailing as third-class matter, notwithstanding that they were sealed and any change in this matter would work serious hardships on the very large business interests concerned. It is necessary to seal the packets in order to preserve the germinating quality of the seeds and to avoid mixture between the different kinds of seeds in the various packets which are ordered at one time by a customer.

In its final analysis, of course, the matter would resolve itself into one of hardship to the customer as the increased postage required would necessarily have to be added wholly or in part to the price of the seed. Inasmuch as the seed packets must be made up several months before they are sold, however, the first and immediate injury would be done to the seedsmen who already have prepared their stock of seeds and opaque packets for the following spring's business.

that they are bringing the matter to the attention of their congressman in the hope that they will enter a protest against any change in the classification for mailing purposes of seed packets.

Short Deliveries on Garden Beet Seeds.

In the edition of HORTICULTURE of date the 11th of December, appeared an article on crop estimates which in some respects may lead to a misconception as to supplies in sight.

The article referred to stated that seed of Garden Beets with the three exceptions of Crosby's Egyptian, Detroit, and Edmunds will be delivered nearly or quite in full, but on the three exceptions there may be only a delivery of forty to sixty per cent. We sincerely wish this were correct, for as in the case of many contracts made between us and European contractors we cannot point to any such experience as reported in the article referred to.

The general average of deliveries expected by us from Europe are instead of forty to sixty per cent of Crosby's Egyptian, and Edmunds, only twenty-five per cent, while of no other sort will the expected delivery reach over sixty per cent instead of one hundred per cent as reported, and in many cases the deliveries will be from twenty, or thirty to forty per cent. One London house on a contract of 6000 pounds Detroit has sent 448 pounds or eight per cent and write that will be the entire quantity they will send us on the contract.

D. LANDRETH SEED CO.
Bristol, Pa.

Notes.

The executive committee of the American Seed Trade Association will hold a session in Boston on December 27.

J. B. Gibson, representing Routzahn Seed Co., Arroya Grande, Cal., was a visitor in New York last week.

The crop of best quality lily of the valley pips has run short of the demand and the stock is very scarce here and in Europe.

The delivery of Manetti rose stocks from Europe has also been cut short, no more being available. This will be a great disappointment to many people who will have to accept a partial supply. The heavy stock such as is used by nurserymen is particularly scarce.

Morganhill, Cal. — The Leonard Coates Nursery Co., formerly of San Francisco, has removed to this place.

POTASH FOR SALE TO ALL.

Farmers who farm on business principles and fertilize their soils as a manufacturer puts money into a plant—for investment—have never needed much argument to be convinced that "Potash Pays." The trouble for the farmer has been not only the price, but the difficulty of getting Potash at any price. The manufacturers have heretofore absorbed it all.

All this has been changed, and growers will now be able to buy all the Potash Salts they need, in any quantity they want it, of local dealers everywhere.

The great German potash mines are now producing enough potash to enable the American selling agency to guarantee delivery of all that is required both by fertilizer manufacturers and by local dealers and farmers. Ask your dealer to carry these invaluable salts in stock. Write to the German Kali Works, Continental Building, Baltimore, Md., for their "Farmers' Note Book" and their valuable literature on fertilizing and cultivation. Mention what crops you are most interested in. It will pay you to do it.

As is generally known, Robert Craig's keen judgment and foresight in the case of *Ficus pandurata* made a lot of money for that gentleman, besides giving the florist trade at large a plant of unexcelled qualities for decorative work. Mr. Craig, we understand, has another new "rubber" in store which, it is believed, will also prove an equally great winner. Perhaps the trade will do well to remember this even if "altissimus" has to take a back seat in the meantime.

Of Interest to Retail Florists

The new store of Julius A. Zinn at 1 Park street, Boston, was opened on December 10. It is unique in that it has a wide frontage, facing Boston Common and an equally wide back window opening on the old Granary Burying Ground, thus insuring bright daylight from both ends of the store. It is finely decorated and adorned with a big display of holiday material and there is no finer location for business in Boston than Mr. Zinn has thus come into possession of.

PERSONAL.

F. J. Farney, of M. Rice & Co., Philadelphia, and the Beyer Bros., of South Bend, Ind., were visitors in Indianapolis, Ind., last week.

Arthur Griffin, who was gardener for a number of years at the E. T. Gerry Estate, Newport, R. I., has accepted a similar position for Mr. Isaac Guggenheim at Port Washington, L. I.

C. N. Dickinson of E. H. Hunt, Chicago, had a bad fall the first of last week in crossing where some street repair work was being done, and has been confined to his home with an injured arm, in consequence.

E. G. Hill delivered a talk to the students of Earlham College, Richmond, Ind., on December 10, on his favorite topic, "Plant Breeding" and dwelling especially on the subject of cross-fertilization of roses. In speaking of the floral scientists of the day, Mr. Hill said he thought that the Frenchman who had produced the double geranium had a claim to a higher honor than Mr. Burbank.

PHILADELPHIA NOTES.

The "California red berry" with its panicles of red fruit like an ardesia, has become quite a popular holiday subject in the east, but it should be remembered that it will not stand frost in shipment. Most of the Philadelphia commission houses are now handling this item.

Another red-berried subject is the "Japanese miniature holly"—leaves about the size of boxwood, berries like small red currants. This is labeled Ilex cassine and is from North Carolina, but if it is the Japanese species it should be Ilex latifolia. Ilex cas-

BUSINESS CHANGES.

Salt Lake City, Utah.—The property of the Salt Lake Floral Company, between State and Main streets, Eleventh and Twelfth South, has been sold by Mayor John S. Bransford to W. W. Wilson and D. E. Law, of Butte. This is the property established several years ago by William A. Clark, Jr., for an associate who failed to make the business a success. It finally became a possession of the mayor, and has been prosperous under his ownership.

Flower Market Reports.

BOSTON Demand is very light this week and so it is fortunate that very little stock is coming in. The supply is remarkably light considering the amount of good sunlight which we have had most of the time. The wholesalers are busy with their greens trade which is very heavy this year. Holly is fine in quality with prospect of scarcity before Christmas comes. Lycopodium is in full supply and it has been offered to parties in Chicago, where it is represented to be very scarce, at a moderate price but was declined. The prospects for Christmas flower trade are not yet sufficiently developed to warrant any forecast and holiday prices will not be fixed until first of the week.

BUFFALO Trade has been a little quiet in the flower market the past two weeks, though everyone is busy getting things in shape for the holiday trade. In the cut flower line carnations have been short in supply and as the chrysanthemums are about over the demand has been better on all lines. Giganteum lilies have moved better, also roses and other material. Beauties were in good supply, also lily of the valley, peas, mignonette. Narcisi and Roman hyacinths have had a good call.

CHICAGO The market for the past week has been rather stiff in prices owing to the very unsettled weather. The demand has been good and the supply equal to it. Carnations are soft and do not ship well. We must have some good clear, bright, cold days to bring them in shape again. A few chrysanthemums were on the market, but were slow of sale as prices were high and quality not very good. Callas are beginning to come in, also Harrissi lilies. Roman hyacinths and Paper Whites are plentiful and demand slow. Holly is being received in small quantities and prices high, with prospects of still higher prices. Unless the weather changes considerably this week the prospects for Christmas supply will be very bad; the dark damp days keeping the flowers from developing and causing them to be soft and faded.

DETROIT Last week gave plenty of time to prepare for the holiday trade. It is an annual experience, people being too busy with shopping to think of florists till the last minute. Fortunately, one might say, cold and dandy weather kept the supply short and prevented a slump in prices. The latter is just now more harmful than a few slow days, because retailers cannot withstand the temptation to cut their prices. This, in view of the fact that in about a week there will prevail holiday prices and a consequent rise in retailing, makes an extremely poor impression on our customers. A slow but steady advance in the retail price of all our product beginning three weeks before the holidays is much more preferable to a rapid advance during the last days. As a rule prices at present are slightly lower than at Thanksgiving. Violets are in most stores the same and long Beauties have advanced.

(Continued on page 897)

Some CHRISTMAS Specialties with us in Greens HOLLY

Extra selected, the best our gatherers can obtain in the Holly fields of Delaware and Maryland. P-M quality.

Per case, \$5.00.
In lots of 5 cases, \$4.50.

Flower Market Reports.

(Continued from page 845)

The past week has
INDIANAPOLIS been a rather quiet one, there being a decided falling off in trade since Thanksgiving. A few weddings and a number of debutante parties created quite a demand for fancy stock which at times was difficult to secure. Chrysanthemums have about dropped out, but those who still have some to cut are realizing good prices for them. An increased demand for roses and carnations is noticed, the quality and quantity of which is sufficient for all inquiries. Sweet peas are more plentiful, also narcissi and Roman hyacinths. Stevia is a welcome addition and quantities are being used. Violets, orchids and lily of the valley have been in heavy demand mostly for corsages. The prospects for a good crop of everything for Christmas is very encouraging. Quite a liberal quantity of poinsettias are to be had around this vicinity. There is already considerable activity in Christmas greens, but we are only at the beginning of the Christmas season and must not anticipate. Galax, magnolia and leucothoe sprays are being handled in large quantities at the present time. Green goods of all descriptions are in good demand with supply ample.

Business is in the
NEW YORK customary languid condition which we have learned to expect during the two weeks preceding Christmas. The stock offered is of exceptional quality as a rule, but that doesn't appear to help it to move. The receipts on some lines have been light—due in part to a spell of colder weather—and consequently the accumulation in wholesale hands

has not been so unwieldy as it would otherwise have been. Price quotations are low enough for the season and to place them at a still lower figure would be of no advantage, but gross returns to the growers will be found to bear little relationship to quoted values as the dealers in those quarters where best grades are usually called for are buying but very little—"from hand-to-mouth" as it were. It is in evidence on all sides that My Maryland has almost completely eclipsed the old favorite Bridesmaid rose at the present time, and White Killarney is also blocking the way for Bride to a considerable extent, although the latter is seen in unexcelled quality. Violets and lily of the valley have never been finer and the same is true of lilies and callas. Gardenias and cattleyas are in very light supply. The flower growers are certainly to be credited with placing before the buyers a very varied and high class selection, and should the flower trade fall short at Christmas this year the blame must be placed elsewhere than on the character of the goods. We hope nobody will attempt to swell his income by "salting down" his flowers in advance of the holiday.

Conditions im-
PHILADELPHIA proved a little the past week, the demand being good all along the line with some stiffening in the prices—especially so in the carnation mar-

ket. Roses continue of excellent quality and remain fairly steady at quoted rates. There are still a few chrysanthemums coming in, the most conspicuous varieties being Jennie Nonin and Bonnaillon. Poinsettias have made their advent, and are being favorably received. Christmas prices will go into effect on the 22nd. These run about the same as last year on most items. Advance bookings seem to indicate every confidence in a fine holiday demand. There has been a scramble for greens during the past few days in consequence of freight delays. This has affected particularly the supplies of boxwood sprays and loose lycopodium.

AMERICAN CARNATION SOCIETY.

The schedule of premiums for the nineteenth annual meeting to be held in Pittsburgh, Pa., on January 26, 27, 1910, has been sent out. Anyone not having received a copy can procure same on application to Secretary A. F. J. Baur, Indianapolis, Ind. Secretaries of local clubs and societies, whose judges are not always expert at awarding on points will no doubt be glad to peruse the instructions to judges of seedling classes as coming from a body of expert specialists, which will be found on page 19 of the schedule.

On page 25 will be found the new section which has been added to the list this year and from which the A. C. S. expects great results. It was the aim to have in this section every variety of carnation introduced last season and the Secretary has succeeded in getting fourteen out of the sixteen varieties introduced last season. We think that it will take only a year or two to demonstrate the advantages in this arrangement and that in the future disseminators will voluntarily offer to list their varieties in this section, which it intended shall be permanent. Secretary Baur informs us that the trade is taking a great interest in the coming convention as shown by the unusually fine lot of advertising matter in the schedule.

Carnation Registered.

New carnation registered by Messrs. Stuart Low & Co., Bush Hill Nurseries, Middlesex, England: Black Chief; deep crimson seedling.

A. F. J. BAUR, Sec'y.

MORRIS COUNTY (N. J.) GARDEN- ERS' AND FLORISTS' SOCIETY.

The annual election of officers of this society took place on Dec. 8th, with the following results: President, Thos. Stokes; vice-president, John Downing; treasurer, Wm. H. Duckham; secretary, Edward Reagan; assistant secretary, Robt. M. Schultz. The executive committee for next year is as follows: A. Herrington, D. Falconer, Wm. G. Badgley, C. H. Totty, Wm. Muhlmichel, Geo. Harvey, Ernest E. Wild, John Forbes, C. J. W. Ottolander, Ernest Wise, J. A. Manda and Robt. Tyson.

Preliminary arrangements are already begun for the flower show of next year. A hall near Morristown, entirely suitable to our purposes, and large enough to accommodate any show that we could get together, can be secured and, unexpectedly and all the more gratifying of course, we find we can raise our prize list from our former figures \$500 to \$3000—quite a jump, but we are "Johnnies on the spot," and we did not hesitate to take advantage of this liberal inducement. This money is all to be given in prizes and we want the people who put the money up to get a good show. The premiums will be big enough for the exhibitors to come a long way to get them and we want them to come. The people of Morristown want a good show, are willing to pay for it, and now it is up to us to give it to them. The following committee has charge of the work, with power: A. Herrington, Wm. H. Duckham, H. B. Vyse, John Downing, C. H. Totty and R. M. Schultz.

The 14th annual smoker will be held in Madison on Jan. 12th at 8 p. m. The committee in charge is the same as in the past thirteen years, and we look for a good time. In fact, if we don't get it, it will be our first time to be disappointed.

E. R.

NORTH SHORE HORTICULTURAL SOCIETY.

At a special meeting, December 10, a charter for incorporation having been received from the state, the old society was dissolved, its rights and property taken over by the new organization and the charter was accepted, the Constitution and By-Laws adopted, and the North Shore Horticultural Society, Inc., began its career.

The officers are: James Salter, president; Dr. Waldo H. Tyler, vice-president; John D. Morrison, secretary; James McGregor, treasurer; James Scott, librarian; executive committee, Wm. Till, Joseph Clark, Wm. Swan, Eric H. Wetterlow, George Gordon.

At the next meeting, December 17, Prof. Waugh of Massachusetts State Agricultural College will lecture on "American Landscape Gardening."

AMERICAN PEONY SOCIETY.

The 1910 meeting of the American Peony Society will be held in June next at Horticultural Hall, Boston, Mass. The exhibition will be held in connection with the regular Peony show of the Massachusetts Horticultural Society; the exact date will be announced later.

A. H. FEWKES, Secretary.

CHICAGO NOTES.

Weather Erratic and Discouraging.

If weather conditions have as much to do with regulating the supply and demand for Christmas plants and flowers as some florists are inclined to think, then everyone will have a share of the kind he regards most favorable. The storm we reported a week ago to have just reached Chicago was a genuine blizzard of fair proportions, and raged Sunday and Monday. Tuesday the thermometer dropped to four below zero and continued in that vicinity constantly for three days, warming up the last of the week and ending with a rain Sunday. This is the fifth successive rainy Sunday and those who look to that day for heavy sales are feeling decidedly blue.

Wm. H. Gast has opened a new retail store at 2556 Linden place, opposite Logan Square station.

The scarcity of bouquet greens is very marked. The price asked this week is \$11 a crate and very little obtainable even at this price.

Personal.

Mr. A. E. Hunt, a grower in Evanston, with offices at No. 60 Wabash avenue, Chicago, was a passenger of a Chicago and Northwestern train which was wrecked at the limits of Chicago, Sunday, December 12th. He was badly shaken up and cut by the broken glass, but is not thought to be seriously injured. He is confined to his home.

Recent visitors: G. B. Dobremysl, representing Frank Darrow, New York; E. Amerpohl, Janesville, Wis.; Mr. Shepherd of C. W. Shepherd Co., Joliet, Ill.; J. Aldous, Jr., Iowa City, Iowa; W. H. Drake, Colfax, Iowa; Geo. W. Jack, with A. C. Brown, Springfield, Ill.; J. R. Detweiler, Enid, Okla.; A. L. Glaser of Dubuque, Iowa; E. E. Shed, Valparaiso, Ind.; E. E. Scott, Garfield, Wash.; Swan Peterson, Gibson City, Ill.

HELP WANTED

GARDENER—Married man, positively no children, to take care of small lawn and orchids, and fine stove house plants, in private conservatory located in central residence section of Philadelphia. Best references required as to ability and character. Apply to Louis Burk, Girard Ave. & Third St., Philadelphia.

SITUATIONS WANTED

SITUATION WANTED—As foreman or manager, on a commercial establishment, where roses, carnations, chrysanthemums are grown. I have had years of experience and always produced good salable stock; am used to all kinds of floral work and accustomed to manage help; will be pleased to know of any party requiring the services of a good all around man, married. Address, Box 276, Bar Harbor, Maine.

A THOROUGHLY competent Gardener and Florist wants to change his position; good commercial or private place required, or would go in partnership with somebody. Address P. O. Box 95, Cambridge, Mass.

FOR SALE

FOR SALE—Special 16 x 18 and 16 x 24 double thick glass in "A" and "B" qualities. Buy now and save money. Write PARSHESKY BROTHERS, INC., 80 Montrose Ave., Brooklyn, N. Y.

FOR SALE—Greenhouse property, with stock and all; 12,000 sq. ft. glass, 1 13-room house, 1 5-room house with all improvements; a nice big store front; good retail trade; established 15 years; acre of ground, with lot on main street. 7710 Lorain Ave., Cleveland, Ohio.

LENOX HORTICULTURAL SOCIETY.

The annual meeting of the Lenox Horticultural Society held December 4, 1909, was largely attended. Letters were read from the judges of our fall exhibition, congratulating the members upon the magnificent display, special praise, however, being bestowed upon the plant group and vegetable collections. The treasurer and secretary read their annual reports, which showed the society to be in a very flourishing condition, financial and otherwise. Special applause greeted these announcements and everyone agreed that this had been a banner year in the annals of the society.

The following were unanimously elected officers for the ensuing year: George Foulsham, president; George Breed, vice-president; Walter Jack, treasurer; George H. Instone, secretary; and Joseph Pybus, assistant secretary. Before leaving the chair, President A. Jenkins thanked the members for their loyal support during his tenure of office and trusted the same good fellowship would always exist amongst the members. A rising vote of thanks was accorded the retiring officers, after which the newly elected ones were installed in their respective stations. After business had been concluded, refreshments were served. The rest of the evening was enlivened with speech-making, recitations and singing. A most enjoyable time was brought to a close just before midnight by singing "Auld Lang Syne."

GEORGE H. INSTONE,
Secretary.

ALBANY (N. Y.) FLORIST CLUB.

A large attended meeting of the Albany Florist Club was held on Thursday, December 2nd. The committee on the flower show reported that it was a good financial success for a first show. Election of officers for the ensuing year resulted as follows: President, Fred Goldring; vice-president, John N. Sambrook; treasurer, L. Menand, Sr.; secretary, F. A. Danker; trustee three years, Fred Henkes. One new member was elected. Four applications received.

THE SOLUBLE OILS FOR SAN JOSE SCALE.

Editor of HORTICULTURE:

I have read with interest the article in your issue of Dec. 11th, under the heading, "Controlling the San Jose Scale." I wish to take exception to a few of the statements made in this article. It states: "It is true that where no spraying is being done for it (referring to the Scale) or where the wrong material, such as the soluble oils or too greatly diluted commercial preparations of any kind are being used—it is not being controlled."

I will also quote from this article as follows: "It is necessary in spraying that the proper solution be used." Then referring to some party who sprayed 22,000 trees with an oil solution and practically every tree had been killed.

The writer happens to be in touch with fruit growers in all parts of the country, especially as pertaining to the territory in which is found San Jose Scale and other scale insects. In a recent conversation with one of the very large Pennsylvania fruit growers, located near the Pennsylvania Experiment Station, the fruit grower in question made the statement that for fall spraying he was so decidedly in favor of a properly made soluble oil that he would not use the lime-sulphur wash if it cost him nothing. He had used very extensively both the lime-sulphur wash and soluble oils, and he made the further statement that the soluble oils, if properly made, did more in controlling the scale in one season's spraying than he had ever been able to do in four or five seasons' spraying with the lime-sulphur wash.

In the past few weeks a number of the large fruit growers' associations have sent out circular letters to the effect that after five or six years of persistent spraying with the lime-sulphur wash, they had found it impossible to effectually destroy the scale in badly infested sections by the use of the above mentioned material.

In one of the states where fruit is grown the most extensively, the growers, after two or three years of thorough and careful experimenting, are using the soluble oils, and have even gone so far as to put up a plant for the purpose of attempting to make their own soluble oil, the results being so much better than they obtained with the lime-sulphur wash.

It is safe to assume that the sales of soluble oils—properly made soluble oils—are this year at least five times greater than any year before.

It is a significant fact that many large nurserymen who have thorough-

ly tested out the matter and who use anywhere from 20 to 100 barrels a season, have decided definitely on the use of soluble oil, and give the other material mentioned no consideration whatever.

All unprejudiced growers realize that properly made soluble oils have come to stay, and thorough tests have proven that they are much more effectual in destroying the scale than the lime-sulphur wash.

It is not the intention to endeavor to represent that the lime-sulphur wash is not worthy of consideration, for it is, but more largely as a spray for use in the spring, and quite largely for its fungicidal value.

As to the question of injury by the use of oil, there have been some worthless products put on the market that have never deserved the name of soluble oil, as they were more nearly a combination of ammonia, rosin and alkali, and such oils are injurious, especially on peach trees when sprayed in the spring; but this has no bearing on the value of a properly made soluble oil as a scale-destroying spray.

It is my opinion that such an article as that you published in your paper is decidedly misleading, as more growers are every year trying the soluble oils, and more growers are adopting their use as scale-destroying remedies, and the writer is of the opinion that more illustrations of saved orchards through the use of soluble oils can be offered than could be shown from the use of the other wash. **F. G. STREET.**

Rochester, N. Y.

AN APHINE TEST.

The Geo. E. Talmadge Co., Inc., gave an interesting demonstration on December 13 at 50 West 28th street, New York, of the efficiency of Aphine as an insecticide. This preparation, which has now been on the market for some time and giving excellent results, as testified to by many growers of high repute, has been working irregularly of late and complaints of injury to plants have been coming in to the office of Mr. M. C. Ebel from some who have been using it. Investigation disclosed the fact of unaccountable carelessness in the mixing of the ingredients at the factory in Madison, N. J., and the result has been the discharge of Mr. Talmadge, who has hitherto had entire control of the manufacture. Mr. Ebel, who is the responsible financial head of the concern, has undertaken to undo the mischief, replace the spurious article with the proper compound and maintain the recognized virtues of the insecticide by careful compounding. The demonstration at New York was

in pursuance of this object and it is understood that a similar test will be made at Boston, where large quantities of the liquid have been sold—directly after the holidays.

In compliance with Mr. Abel's published request portions of plants infested with green fly, scale, mealy bug, etc., were supplied by various growers and there was no question but what the solution destroyed all the insects with which it came in contact, and without any apparent injury to the foliage. White chrysanthemums and other flowers thoroughly soaked with the liquid showed no indications of discoloration, and altogether the test was quite convincing to those who were present.

WIZARD BRAND MANURES

Dried, screened and packed in bags of 100 lbs. each.

PULVERIZED SHEEP MANURE

PURE — UNIFORM — RELIABLE

A strong and quick acting manure, highly recommended for carnations and chrysanthemums.

SHREDDED CATTLE MANURE

EASY TO HANDLE AND APPLY

Stronger and better in every way than rough manure. Lasts much longer on the benches. Unequalled for mulching and feeding roses, liquid manuring and mixing with bench and potting soil. Used by all the largest growers.

Ask Your Supply Man or Write Us for Circulars and Prices.

SPRAYED

POTASH

The German Kali Works have talked Potash and its benefits for twenty-five years. They have never sold a pound direct to local agents or farmers.

You know how hard it was to buy and get Potash. Things have changed. The mines are now producing enough to enable us to offer

POTASH FOR SALE

in carload lots of twenty tons, to local dealers without interfering with the requirements of those to whom we have sold Potash to be used in mixed goods. We have, therefore, established a Selling Agency in Baltimore, Md., and in **Delivery Guaranteed** 1910 will sell all potash salts in carload lots for cash, direct from the mines to the buyers in original sealed bags, or kainit in bulk, at lower rates than were ever before quoted.

Potash Pays

You can buy the real potash salts—plant food without fillers or make-weights—you save all the money you have been spending for interest, freight, excessive profits on fillers and mixing charges.

Newburgh, N. Y.—Henry C. Spengler, Jr., at Cohecton Turnpike one house 30 x 100.

AN EXPLOSION.

On the morning of December 9, an explosion in the hot water boilers of Edgar Bros., at Waverley, Mass., did considerable damage to the heating apparatus and glass, and for a time the stock in the houses was in danger of ruin from the cold weather. Neighbor Peirce proved his neighborliness by securing for Messrs. Edgar, after a big hustle, temporary heating apparatus just in time to save the plants. The explosion was not due to any defect in the boilers, but to neglect to open the valves when building the fire.

FIRE RECORD.

Nonantum, Mass.—Fire caused by an overheated furnace caused a loss of about \$100 to the greenhouse of John McCarthy.

Rockport, Me.—Fire destroyed the greenhouses of George Glarentzel, just over the Camden line, on Dec. 2. The Atlantic Engine Co. of Camden responded early, but the greenhouses were a total loss, with no insurance. The ell of the house was destroyed and this was insured. The fire caught around the heating apparatus of the greenhouses.

INCORPORATED.

Yankton, S. D.—George H. Whiting Co. Nurserymen.

Glastonbury, Conn.—J. R. Morgan & Co. Nursery and florist business. Capital, \$30,000.

THE TEST PRACTICAL

The practical part is this: to manufacture materials only, is one thing, but to prove their defects by erecting them ALSO, is quite another. We both manufacture and erect our own materials, which gives us every chance to see defects and make improvements. The question is do you or do you not want the up-to-date enduring construction? If you do, then get into communication with us.

Send at once for Half Iron Frame Circular.

Important Announcement To Carnation Growers

At the earnest solicitation of a large number of commercial and private growers, the Cottage Gardens Company has decided to disseminate this year the two famous carnations

MRS. C. W. WARD and ALMA WARD

Two varieties which are well known to all the leading growers of the country. Four years test in the New York market has demonstrated their popularity and good staying qualities. For the past three years we have been growing from fifteen to twenty-five thousand of each, during which time they have always **COMMANDED THE HIGHEST MARKET PRICES**, and at no time has the supply been equal to the demand.

On the exhibition table they have taken the **HIGHEST HONORS**, and we believe it is safe to say these two carnations **STAND WITHOUT AN EQUAL**.

INVITATION

We extend a cordial invitation to all those interested to visit our establishment, where they will have an opportunity to see them growing and compare their good points with other standard varieties grown under the same conditions.

MRS. C. W. WARD

MRS. C. W. WARD is a perfectly formed flower with full centre; color deep pink several shades lighter than Lawson, deeper than Winsor; having strong, erect stems 24 to 36 inches in length. A vigorous, healthy grower and has never shown disease of any kind.

A very early and free bloomer, producing fine flowers as early as September 1st, which bring from twenty-five to fifty per cent more than any other variety on the market.

The keeping qualities of this variety are remarkable. Several shipments of blooms sent to Europe reached their destinations in perfect condition, and wherever exhibited it has always been the last to show signs of wilting.

AWARDS

Society of American Florists, Silver Medal, Boston, 1906; The Craig Cup for Best Seedling, Philadelphia, 1906; The Lawson Bronze Medal, Washington, 1908; The Horticultural Society of N. Y. Silver Medal, Sweepstake prize for best 100 blooms, New York, 1909; The Horticultural Society of N. Y. Diploma, for best new variety, New York, 1909.

Rooted Cuttings Ready January 15, 1910

December and first part of January cuttings all sold.

\$2.00 per 12, \$12.00 per 100, \$100.00 per 1000, \$95.00 per 1000 in lots of 2500. 25 at the 100 rate, 250 at the 1000 rate.

ALMA WARD

This beautiful Carnation is pure white except during dark weather when it shows delicate splashes of pink similar to the Cattleya Orchid, increasing its popularity. ALMA WARD is the largest and most fragrant Carnation ever grown, producing perfect flowers 3½ to 4½ inches in diameter on strong, erect stems 36 to 42 inches in length.

This most remarkable variety takes the same place among carnations as the American Beauty Rose among roses, and has, during the past four years, been awarded numerous prizes including the following:

The Lawson Silver Medal, Toronto, 1907, (No Gold Medal having been awarded); The Lawson Gold Medal, Washington, 1908; The Society of American Florists Silver Medal, Washington, 1908.

Rooted Cuttings Ready February 1, 1910

January cuttings all sold.

\$3.00 per 12, \$5.00 per 25, \$9.00 per 50, \$15.00 per 100, \$35.00 per 250, \$65.00 per 500, \$120.00 per 1000.

For Forcing

Ready for Immediate Delivery

The right time to buy Roses is when they are fresh and well ripened. Roses potted up in the fall or late winter become better established and force better, and are far more satisfactory in every way, and you can retard or force at your leisure. We recommend the American-grown "Ramblers." Don't attempt to force imported Ramblers; the general experience is that they are failures.

Something New in Roses for Florists

Half Standard Baby Ramblers

These are Baby Ramblers, grown on stems or standards about one and a half feet high, and will be a novelty for your trade you cannot profitably overlook. They are offered for the first time in this country in the following varieties:

BABY DOROTHY (Half standard). Deep pink. 60 cents each, \$6.00 per dozen, \$45.00 per 100.
BABY RAMBLER (Half standard). Crimson. 45 cents each, \$4.50 per dozen, \$35.00 per 100.

BABY CATHERINE SELMETH (Half standard). White. 45 cents each, \$4.50 per dozen, \$35.00 per 100.
BABY "STARS and STRIPES" (Half standard). White and red grafted on the same plant; most attractive. 50 cents each, \$5.00 per dozen, \$40.00 per 100.

Hardy Perpetual Roses

We offer extra strong forcing two-year-old dormant, low-budded stock, in the following varieties, true to name.

Price, 75c. for 5 (of one variety), \$12.00 per 100, \$110.00 per 1000.

Alfred Colomb. Carmine.
Anne de Diesbach. Bright carmine.
Ball of Snow. Pure white.
Baron de Bonstetten. Dark crimson shaded.
Baroness Rothschild. Satiny pink; extra.
Captain Christy. Delicate flesh color.
Duke of Edinburgh. Bright vermilion; very fine.
Fisher Holmes. Dark rich scarlet.
FRAU KARL DRUSCHKI. The finest white in existence.
General Jacqueminot. Rich velvety crimson.
General Washington. Beautiful red, shaded carmine.
John Hopper. Beautiful rose-pink.
La France. The finest light pink.
Margaret Dickson. White, pale flesh center.
Magna Charta. Clear rosy pink.
Mme. Gabriel Luizet. Light satiny pink.
Mme. Plantier. White.
Mrs. John Laing. Soft pink. Most desirable variety.
Paul Neyron. Beautiful dark pink.
Prince Camille de Rohan. Velvety crimson.
Ulrich Brunner. Cherry-red.

Forcing Rambler Roses

American Grown. The Only Stock for Forcing
CRIMSON RAMBLER

Large heavy plants, two years old, mossed and packed in bundles of 10. 10 100
 3 to 4 feet.....\$1.25 \$12.00
 3 to 5 feet.....1.75 15.00
 4 to 6 feet, extra strong and heavy.....2.25 20.00

DOROTHY PERKINS

Shell Pink. \$1.25 for 10, \$12.00 per 100. Extra strong, \$1.75 for 10, \$15.00 per 100.

Tausendschon

The new Rambler Rose. The name translated means a "thousand beauties." Color beautiful rose, shading to pink. \$2.25 for 10, \$20.00 per 100.

Tausendschon (standard grown). Each 50c., doz. \$5.00, 100 \$40.00.

HIAWATHA. The flowers are single and are of a deep, intense crimson shade with the petals shading to a pure white base. Flowers very freely and is undoubtedly one of the best of the single Roses for forcing. Extra strong, two-year, field-grown, \$3.25 for 10, \$30.00 per 100.

WEDDING BELLS. A seedling of the Crimson Rambler. The most floriferous Rose yet produced. The color is white with the upper part of the petals soft-pink. Fine for forcing. Perfectly hardy. Extra strong two-year-old field-grown flowering plants, 3 to 4 feet. \$2.25 for 10, \$15.00 per 100.

LADY GAY. A seedling from the popular Crimson Rambler, which it resembles in habit and general effect. The flowers are of a delicate cherry-pink color, which fades to soft white. Strong plants, field-grown, \$2.25 for 10, \$15.00 per 100.

Baby Rambler Roses

BABY DOROTHY. The Pink Baby Rambler, and bound to find favor where the Baby Ramblers are popular. \$1.75 for 10, \$16.00 per 100.

BABY RAMBLER

(Mme. Norbert Levavasseur)

Strong field-grown plants, \$1.75 for 10, \$15.00 per 100.

Notes from the Arnold Arboretum

Though the number of new Chinese trees and shrubs mentioned and described in these notes during this year is very large, it includes by no means all of the new introductions. The numerous species belonging to well-known genera as *Salix*, *Prunus*, *Pyrus*, *Malus*, *Sorbus*, *Photinia*, *Fraxinus*, *Quercus*, *Betula*, *Rosa*, *Tilia*, *Juglans*, *Hydrangea* and many others, also many species belonging to genera mentioned in the previous issues, have not yet been noted, chiefly for the reason that we are not sure of their correct names.

As most of these Chinese plants are represented only by young seedlings we do not know much of them from a horticultural point of view except that we can gain some idea of their ornamental features from the herbarium specimens and the descriptions, but of their behavior in cultivation and of their hardiness in our climate we know little or nothing. Even this meagre information shows us that our gardens will be enriched by a large number of highly ornamental plants, some of types not yet represented in our gardens, some similar to kinds already in cultivation, but possibly superior in some way to the cultivated species; some, as the new *Rhododendrons*, *Deutzias*, *Spireas* and others will furnish valuable material for developing new types by hybridization, and in the case of some Himalayan species in cultivation for a long time, the Chinese forms recently introduced have proved hardier than the plants from the Himalayas.

In the coming year we may expect many of the new introduction to bloom for the first time and besides we shall have the experience of this winter which will give us valuable hints about the hardiness of these plants. Furthermore we shall now be able to name even those plants which have not yet flowered, as the extensive herbarium collections brought together by Mr. Wilson are now being put in order by him and will soon be available for study and for the determination of the names. The numbers of the herbarium specimens correspond with the seed numbers and thus we can find in our herbarium fruiting and in most cases also flowering specimens of the young seedling plants and these will enable us to name the plants. Besides collecting the herbarium specimens Mr. Wilson took a large number of photographs showing the trees and other plants in their native habitat and this gives us a good idea how the trees will look at full maturity.

The notes from the Arnold Arboretum will be resumed as soon as in spring the first of the new introductions begin to bloom and the effects of the past winter are discernible. These future notes will with the other information then available do much more justice to horticultural interests than it has been possible during the last year.

Alfred Rehder.

Ardisia crenulata

This splendid tree or shrub is no doubt the best berried plant we have for the Christmas holidays. Its nice dark green shiny foliage makes a fine setting for its rich red berries, and for decorative purposes it is superior even to the red-berried *solanums*. Another point in its favor is its great keeping qualities. I have known a plant to keep in good condition, in an ordinary living room, for over two years, meanwhile retaining one crop of berries until another had grown and ripened. The genus is quite large, but it is very seldom we see any varieties except *A. crenulata*, it being considered far superior to any of the others, for florists' purposes.

A. crenulata is of easy culture, although of somewhat slow growth. It is nearly always propagated from seed, but I believe a plant can be had more quickly and better from a cutting. Quite often when a plant is over three years old, it gets bare of foliage and rather "leggy." It is the custom of many to root the bushy top by girdling as described in my article on *Codiaeums*. These plants from which the tops have been removed, are excellent for getting cuttings from and they will break quite readily if placed in a good warm close atmosphere. The wood should be half ripened before being placed in the cutting bed, which is better to be rather tight, and having a top and bottom temperature of seventy degrees. If these conditions are followed, cuttings will root in a month, after which they should be transferred to small pots. The potting material should be a rather sandy loam, to which about a fourth of broken charcoal has been added. As the plant increases in size and vigor, the potting material may be enriched by adding about a fifth of sheep manure. If quick growth is desired, the plants should be kept in a moist, humid, atmosphere, the temperature being sixty-five to seventy at night.

The advantage of a cutting over a seedling will be quickly seen, the cutting branching quite near the pot, whereas the seedling will grow a few inches of stem first. As soon as the plants begin to show signs of flowering, they should be given more air, and wetting overhead should be avoided until the berries are well set, also during the summer months the glass should be slightly shaded to prevent the leaves from burning. About October 1st the berries will be well developed, and the plants may be removed to a light sunny greenhouse, the night temperature being from fifty to fifty-five degrees, giving occasional waterings with manure water. These, with a little Clay's fertilizer once in three weeks, will produce fine colored berries, and add a glister to the foliage.

I may here add that it will do no harm to the plants to let them occasionally get on the dry side; this will prevent the leaves from turning yellow, which they are liable to do if kept wet all the time. The large brown scale is the worst of the insect pests that bother *Ardisias*. To prevent, we find that sterilizing the soil helps, but if the plants get affected we use a two-inch potful of kerosene to three gallons of water, keeping well agitated while applying the mixture to the plants with a "Stott nozzle." If this is done once in two weeks, syringing the plants next day with clean water, one will soon eradicate the scale.

Merry
Christmas

HORTICULTURE extends the compliments of the season to its rapidly increasing family of readers and advertisers hoping they will enjoy the holiday season to the fullest extent; to those, as well, who are still outside the family, hoping that they will promptly recognize the wisdom of getting within the lines; to the profession at large, gardener, florist, nurseryman and seedsman, wherever his lot may be cast, hoping that everyone will have the wherewithal to procure that rare luxury of these days—a big turkey—and the keen appetite and good digestion which is due such a bird on such an occasion.

Get busy
for parcel post

We wish to record our approval of the appeal on behalf of the adoption of a parcel post system, which the Connecticut Horticultural Society has issued and which is published in full in this issue. Every line should carry conviction to the reader. It is a matter of common knowledge that the opposition of the big express monopoly is primarily responsible for the present conditions which place the American public at the mercy of those companies. If it be true, as asserted that the annual deficit of \$20,000,000 in the post office department is attributable largely to the fact that the railroad companies get about four times as much for the transfer of low-class mail matter as they do for commercial merchandise, it would seem that it is about time for the people to wake up and do something. We don't forget the lame excuse advanced by the attorney for the United States Express Co. when the S. A. F. had that concern before the Interstate Commerce Commission, that they were forced to charge exorbitant rates to their customers because of the exorbitant rates they were obliged to pay the railroads! As to what the parcel post privilege has done for horticulture in France, since its extension to shipments of cut flowers, our readers will find something worth reading and thinking about in our notes on the growth of French horticulture, which appear in another column of this paper.

Paying
the piper

Two subjects are disturbing the peace of mind of the florists around Boston at the present time. One is the avowed purpose of the Framingham board of assessors to levy a tax upon the stock of the flower growers and nurserymen of that town. The other is the failure of the Board of Public Works of Woburn to allow the horticulturists the benefit of the low water rates which manufacturing concerns enjoy. As to the Framingham affair we presume the proposed levy is in the nature of an "emergency" tax. The good people of Framingham allowed a dishonest town treasurer to steal \$150,000 of their funds and the amount must be made good somehow. Local florists, believing their growing stock is not legally taxable, do not take kindly to this proposed move on the part of the assessors and some have already engaged counsel to act in their behalf and defend their position. We have no opinion to advance on the merits of the case but will say that we are very sorry to see any additional burdens of any kind placed upon our horticultural industries. We fear, however, that this Framingham affair is only a beginning—a sort of entering wedge—and that this movement to mulct the florist to the limit is liable to prove a "rapid propagator." The popular opinion of the florists' affluence is well-known to our readers. Perhaps a little less display of automobiles and a little less newspaper rant about "harvests" and holiday profits, might tend to put off for a time the day of reckoning.

Trans-Atlantic Notes

SOME UNCOMMON ROSES

The cultivation of roses in pots has diminished somewhat, but it still forms an important branch of the florists' work and can now show a revival, in the increased attention paid to pot roses. The plants are more useful to the private gardener who possesses a limited space for his plants; and they are portable, a matter that is unthinkable with plants grown on benches without pots. At one time pot culture was a paying business, but since imported blooms have become cheap, only such varieties as grow and bloom well in pots are now grown. The raisers of new varieties have brought into commerce some of great excellence, the forcing of which may begin in October, if the previous culture has been of the right kind. Forcing in the earlier stages must be very slow and then by the end of December fine flowers are obtainable. Naturally, most of the varieties chosen should be the popular favorites in regard to color and shape; and the florist should choose such as do not readily drop their petals when sent to a distance. Of varieties not plentiful in gardens at the present time mention may be made of *Elsie von Schwichow*, a H. T. which is really a new *Caroline Testout* in habit and other properties except that the bud is longer and the color a different one—red carmine. It is mildly fragrant. The flower is good for every purpose, and may be forced early much more willingly than *C. Testout*. *Reichskanzler*, H. T. an extraordinarily large flower of a rose tint with a silvery glimmer, in form full, and with the fragrance of *La France*, is suitable for every purpose, retaining its shape to the last, and is always long-stemmed. The plant succeeds in middling heavy soil, and is 8 days in advance of all other H. T. Whether this variety is identical with *Otto von Bismarck* which some persons assert it is, remains to be proved. *Mrs. E. G. Hill*, H. T. is a flower of alabaster white and blush—a rare color, a pretty bud, full form and good fragrance; an excellent variety for cutting, requiring stiff rich soil. *Mrs. Aaron Ward*, H. T. a magnificent yellow flower of moderate size, deliciously fragrant, graceful shape, very enduring and for this reason it bears traveling without loss of petals. An excellent variety for forcing. *Mad. P. Varin Bernier*, T., light yellow, partially double with a strong fragrance. Fine large buds. The flowers if cut should be in the bud stage. The rose makes a fine subject for pot culture.

PERPETUAL FLOWERING CARNATION SOCIETY

The Horticultural Hall, Westminster, in which an exhibition of winter flowering carnations was held on Wednesday, December 8, was made very gay with these charming flowers. There appeared to be considerable improvement in the quality of the flowers, and a few new colors were seen. American carnations introduced since 1907 had a class to themselves, namely one of three vases with 12 blooms in each; and the first prize—a challenge cup—presented by the American Carnation Society was awarded to *Bell & Sheldon*, Castel Nursery, Guernsey; *Pink Delight*, *May Day* and *Winona* being among the varieties shown. First prize for a group of 12 varieties was taken by *C. F. Waters* of Deanlands, Balcombe, who staged very choice flowers of *Rose Dore*, *Mrs. C. Knopf*, *Ruby*, *Mrs. M. A. Patten*, *Mikado*, and others. In the color classes first for 25 white was taken by *W. H. Lancashire*, with *Perfection*; first for 25 salmon fell to *W. H. Lancashire* for *Rose Dore*; *Bell & Sheldon* were first in cerise with *Afterglow*. *Carnation Mary Vilden* shown by *Blackmore & Langdon*, received

an award of merit. A considerable number of carnations growing in pots formed an interesting feature of the show.

Frederick Mowbray

London, Eng.

Sweet Pea Notes

The trials and troubles of all sweet pea growers for 1909, will soon be forgotten, but at the same time many will be greatly benefited by the experience gained and a little retrospect will, perhaps, be acceptable to all intending growers for 1910.

The sowing period was anything but favorable, cold and wet land working disastrously against early sown seed, especially the white varieties, many blanks occurring because of the seeds' rotting.

With this difficulty over another and more serious stumbling block to the production of good sweet peas had to be contented with. I refer to the demon Drought, which perhaps is the most serious enemy the grower has to face. Weeks of scorching sun retarded the growth of the halum, reducing the length of stem and greatly shortening the blooming period.

This condition must impress upon all the real necessity of deep and thorough cultivation, accompanied by their sowing and facilities for giving the plants a periodical drenching (to the roots) with weak liquid manure water.

As to the best varieties to come through the trying season none did better here than *Frank Dolby*, which without doubt is the finest lavender up to date, its strong constitution, large blooms and long stems making it a most desirable variety. Coming to white, none pleases better than *Nora Unwin*. Grown side by side with that standard variety, *Dorothy Eckford*, a decided improvement is noticeable.

For the first time, here, *Primrose Spencer* came true to color, growing strongly on stout, long stems, with large blooms, stamping it as a variety which has come to stay.

Helen Lewis is still one of the best of its color and it can be highly recommended for its sturdy habit and long stem.

The bright, large, clear pink of the *Countess of Spencer* characterizes it as still head and shoulders above any other of the *Spencer* varieties which are becoming as prolific on the market as the introducer (*W. Atlee Burpee*) is becoming famous on both sides of the water. We are looking forward with no little expectancy to see how these new varieties pan out in the coming season. Again we cannot overlook the merits of the two leading scarlets, viz, *Queen Alexandra* and *King Edward*, which have been subjected to thorough trial and are still gaining in popularity as the best scarlet varieties up to date.

I cannot conclude these short notes without a word of praise to the new variety introduced last year—*Apple Blossom*—which is surely one of the best doers, with enormous blooms on giant stems. It is worthy of a trial by every grower.

I hope to supplement these notes nearer the next sowing period.

John Horn

Westerly, R. I.

NEWS OF THE CLUBS AND SOCIETIES

CONNECTICUT HORTICULTURAL SOCIETY.

The annual meeting of this Society was held at the County Building, Hartford, on the 10th instant; and the following officers were elected, to serve for the ensuing year: President, John F. Huss, Hartford; first vice-president, Thomas W. Fagan, New Britain; second vice-president, J. Vidbourne, Hartford; third vice-president, C. O. Purinton, Hartford; secretary, George W. Smith, Melrose; treasurer, W. W. Hunt, Hartford; librarian, William T. Hall, Hartford; botanist and professor of vegetable physiology, George W. Smith; pomologist, C. H. Sierman, Hartford; executive committee, J. M. Adams, J. A. Weber, C. A. Helfricht, Francis Roulier, of Hartford; W. H. Shumway, of Berlin.

It is expected that vice-presidents for the several counties other than Hartford county will be elected at the next meeting.

The treasurer's report showed the Society to be in a flourishing financial condition; and the secretary reported that the present membership, 148, is the largest that the organization has ever had, to his knowledge. President Huss, in a comprehensive written statement, reviewed the principal events in our history, and the salient features of our work, during the year past, and urged all to labor for greater triumphs in the year just about to commence.

A leading feature of the meeting was the exhibition, by J. A. Weber, gardener for Walter L. Goodwin, of a half dozen beautiful and thrifty Poinsettias in pots, bearing gorgeous red bracts. Mr. Weber was awarded a certificate of merit.

A short discussion ensued concerning methods of extermination of the white fly. It was hoped that the new insecticide, Aphine, would prove effective in this direction.

At a previous meeting, the secretary was appointed a committee to draft resolutions in favor of the parcel post, and to present them for consideration by the Society. In pursuance of this request, the resolutions of approval were unanimously adopted, with a vote that a copy thereof be sent to the president of the United States, to the postmaster general, to each Connecticut congressman, and to each of the Hartford daily newspapers.

ROYAL HORTICULTURAL SOCIETY OF LONDON.

Some Orchid Awards.

At the Dec. 7th meeting of the Royal Horticultural Society, a first-class certificate was awarded for *Cypripedium Alciades Illustre* (C. M. de Kurt × C. *Leeanum giganteum*) a glorious flower. Award of merit for *Cypripedium Lion* (C. *Boadicea* × C. *Sallieri Hyeanum*.) Both the above named were shown by F. Sander & Son.

GARDENERS' AND FLORISTS' CLUB OF BOSTON.

The last monthly meeting was held on December 21, and as there was a considerable amount of business no special lecture was provided, but Prof. White of the Massachusetts Horticultural College at Amherst gave a short address on the objects of the college and explained the different subjects which the students are expected to undertake. His remarks were very practical and received abundant applause. Several new members were elected. The election of officers was the principal business and after a ballot had been taken the result was as follows: President, John W. Duncan; vice-president, Peter M. Miller; secretary, W. N. Craig; treasurer, Edward Hatch. Of the several nominations for the executive committee the following were chosen: Messrs. W. E. Fischer, J. P. A. Guérineau, Thos. Pegler and H. E. Fiske.

Some very interesting exhibits were before the members and specially noted.

J. W. DUNCAN

worthy was a collection of *Zonale Pelargoniums* from Secretary Craig. The best varieties were *Richmond Beauty*, *Emile Zola*, *J. R. Barrie*, *Mrs. Brown Potter*, *Florence Leeds*, *Jacquerie*—a very fine crimson; *Lucania*—an extremely good salmon pink, and *Maxine Koralevski*—a beautiful salmon rose. The twenty-four bunches all showed evidence of high culture. F. W. Fletcher exhibited *Lopezia miniata*—a pretty greenhouse plant with coral-red flowers. A variety of well-grown *calanthes* came from Duncan Finlayson. Roses in variety came from Eber Holmes, Montrose, and a splendid vase of carnation *May Day* from Peter Fisher. President Downs announced that the annual banquet will be held on January 27.

It was urged that more members take advantage of the Landscape class and, if necessary, a sum of \$50 will be devoted to it.

HORTICULTURAL SOCIETY OF NEW YORK.

The regular monthly meeting of the society was held at the American Museum of Natural History, on Wednesday, December 8th, 1909, at 4 p. m. The lecture announced for the day was delivered by Mr. William Solotaroff: "Shade Trees in Cities." Mr. Solotaroff is connected with the Shade Tree Commission of East Orange, N. J., and is well qualified to speak upon this subject, as the following abstract of his lecture will make evident:

The speaker opened his remarks by saying that upon the arrival here of the first settlers in this country, the first idea had been to procure a shelter and obtain ground for the raising of crops. These being the main and essential things, the preservation of trees, in the laying out of their villages and towns, had not been considered of importance. This habit, thus engendered, had grown with the people, and it was only comparatively recently that the necessity of trees in cities has been appreciated. For the city is not only a place of commerce, but it is largely made up of homes, and anything which adds to its beauty, which trees certainly do, increases the value of its property. The tree, therefore, as an essential thing in the city is being recognized, and it is also becoming evident that the trees in a city must not be left to the care of the individual, but must be placed under the charge of the city itself. If left to the individual there will be many kinds of trees on the same street, a condition usually to be avoided; they will be planted in different ways and at unequal distances; the pruning will not be properly done, nor the trees systematically treated for insect and fungus pests. To insure uniformity in the planting of trees and their proper maintenance after planting, it is necessary to place the whole matter under official control. In cities where this has been done for many years, notably, for example, in Washington, D. C., the results are most satisfactory. To insure this uniform result the street must be treated as a unit; that is, only one species of tree must be employed, and the pruning must be done with a definite aim in view; to provide shade without obstructing the sidewalks or roadways, interfering with the view, or preventing the free circulation of the air.

It was the state of New Jersey which first recognized the necessity of vesting this power in a central body, and in 1893 that state enacted a law, a local option law, for the planting and care of shade trees. Passaic was the first city to adopt this law. Newark followed, and the third city to make it active was East Orange. There are now 22 cities in New Jersey which have shade tree commissions. So successful have these commissions been that other states and cities have followed the example thus set them, the state of Pennsylvania exacting a similar law in 1907.

The lecturer then exhibited a series of lantern slides, showing streets in various cities, planted as they should and should not be. The illustrations were certainly convincing. A number

of the views were taken in Washington, D. C., the speaker remarking that it was the abundance of fine shade trees and the care used in their selection and planting which made that such a beautiful city. One street shown was planted entirely with the American elm. In Indiana Avenue the oriental plane, *Platanus orientalis*, had been used, the lecturer speaking in the highest terms of this as a street shade tree. The American linden had been assigned to Massachusetts Avenue. We were then taken to his home city, East Orange, by the speaker by means of slides showing some of his own work. The results achieved in a few years were certainly most gratifying. The work has been accomplished economically, at a small expense per capita.

Mr. Solotaroff here remarked upon the importance of the choice of trees in street-planting. The desire was often for a rapidly growing tree, at the sacrifice of other more desirable qualities. The Carolina poplar was often selected on account of its rapid growth, but it was not recommended by the speaker, as its roots soon pervaded everything, filling drain pipes, lifting pavements, and becoming a nuisance generally. The soft maple was also condemned as being undesirable. The oaks were highly recommended, especially the red and pin oaks. A slide was exhibited of 12th St., in Washington, planted with red oaks, which, the speaker said, should be an inspiration to every tree-lover. The prejudice against the oaks was laid by the speaker to the fact that trees of this kind were often taken directly from the woods. This is a severe test for any tree, and especially for the oaks, as the feeding roots are a long way from the base of the stem, and are all left in the ground when the tree is dug up. In nursery-grown trees this difficulty is overcome, the constant plowing and root-pruning to which they are subjected resulting in a ball of roots close to the stem, insuring a mass of feeding roots when the tree is transplanted. A series of slides illustrated this point admirably.

The subject of the pruning of trees was discussed. A fruit tree must be pruned to produce the greatest quantity of fruit; a lawn tree to preserve its odd or peculiar shape; but shade trees in streets must be pruned a uniform height, and in such a manner as to make a compact top, at the same time retaining in so far as possible the natural habit and growth of the species. The proper methods of pruning were illustrated with lantern slides, a number portraying the disastrous results which follow pruning improperly done. Tree surgery was recommended for comparatively small wounds, but the speaker did not seem to feel so sure of it for large cavities.

The pests of shade trees formed a part of the discussion. These the speaker divided into three classes. Those which feed upon the foliage, such as the caterpillar of the tussock moth; the borers, represented by the caterpillar of the leopard moth, and third, the scale insects, including the cottony scale. Methods of spraying were described, and several forms of spraying machines illustrated.

The lecture aroused much interest,

and at its close was freely discussed by Mr. Southwick, Mr. Troy, and others.

ELBERON HORTICULTURAL SOCIETY.

The society held a meeting on Dec. 20th, '09, President Peter Murry in the chair. Chas. C. Dewild of Redbank, showed three seedling carnations. They scored as follows: white seedling, certificate of culture; red seedling, 73 points; pink seedling, 76. Arthur T. Boddington donated three medals, gold, silver and bronze for competition in points during the season. In the report of the last meeting a misinformation in the date of the carnation night was made. It will be held on January 24th, 1910.

ALEX FLEMING, Rec. Sec.

WILLIAM REID.

Secretary Elect, N. J. Floricultural Society.

We present the portrait of the successful candidate for secretary of the

WILLIAM REID

New Jersey Floricultural Society. Having served his time in one of the largest estates in Scotland, Mr. Reid emigrated to this country in search of better fields, entering the estate of Mr. J. Brown of Flatbush, L. I., as head gardener, where he served until the death of his employer. He afterwards went to the large estate of Sidney and Austin Colgate, at Orange, N. J., where he now is. Mr. Reid is a good grower and highly esteemed by employers and associates.

NEW JERSEY FLORICULTURAL SOCIETY.

The New Jersey Floricultural Society of Orange, N. J., held its annual meeting on Friday last with a very large attendance. Flowers exhibited were numerous and attracted much attention. Albert Larson, gardener for Mr. A. B. Jenkins, exhibited a very fine seedling carnation of a light red color. A preliminary certificate was awarded for it. William Reid, gardener for Sidney and Austin Colgate, showed a vase of carnation O.

P. Bassett, a magnificent flower and good stem, also a vase of White Enchantress, receiving a cultural certificate for each. Max Snyder, gardener for Mr. Charles Hathaway, showed sweet peas, narcissus paper white and chrysanthemums, receiving a cultural certificate and two certificates of merit.

The following were unanimously elected officers for the ensuing year: President, Albert Larson; secretary, William Reid; vice-president, Deitrich Kindsgrab; treasurer, Walter Gray. The January meeting will be installation night.

PITTSBURGH FLORISTS' AND GARDENERS' CLUB.

As usual of late at our club meetings, the attendance was large at the Dec. 7th meeting. On Nov. 11th there had been a joint meeting of all the committees at the Fort Pitt Hotel, having in charge the entertainment of the carnation convention, and a tentative programme outlined. At the regular meeting on the 7th the entertainment committee outlined, still tentatively and subject to revision, a smoker with music, in the Grill room, for the first evening and a banquet and ladies' theatre party for the second evening.

There is no doubt that the Fort Pitt Hotel will be the headquarters of the Convention; its size, convenient location, enterprising and liberal management, combining to put it at the head of Pittsburg hotels.

At the November club meeting a committee had been named to consider the advisability of securing a site for and erecting a horticultural hall. Wm. Falconer, chairman of the committee, put several hard facts before the club for consideration, as to the difficulty of getting suitable ground and the expense of the building. Mr. Negley, another member of the committee, said that this was not a horticultural section and the more he looked into the matter the more obstacles he found. Other gentlemen also spoke, the gist of their remarks being that it was first necessary to form a society before seriously considering a location and the erection of a hall. And further, that the club might find ample scope for its energy and money in making its own organization stronger and more useful. On motion the committee was discharged.

The subject for consideration was, "Christmas Plants and Decorations," with a competitive display of plants suitable for Christmas decoration; also cypripediums. The judges, Wm. Falconer and J. A. Peterson, awarded first prize for Christmas plants to Jas. Wiseman, second prize to Frank Crook. First prize for three cypripediums to Frank Crook.

They also awarded a cultural certificate to Jas. Moore, foreman Phipps' Conservatories, for group of cypripediums and primroses; certificates of merit to Henry H. Negley for group of hybrid cypripediums, and to Jno. W. Jones for very fine group of begonias, poinsettias and cyclamen. A vase of fine seedling carnations was shown by the Finleyville Floral Co.

The subject for the January meeting will be "Roses."

H. P. JOSLIN, Secretary.

MINNESOTA STATE HORTICULTURAL SOCIETY.

The annual meeting of this society, held at Minneapolis, Dec. 7-10, was, as usual well attended. The old pioneers in Horticulture would not miss this meeting for anything, and their sons and grandsons who attend go home with better knowledge after having taken part in the very interesting discussions followed the reading of valuable papers.

The ever active president, Professor Sam B. Green of St. Anthony Park, opened the meeting with an address, urging the creation of a friendly relationship among the members, and Prof. Hansen of the Dept. of Horticulture of South Dakota prophesied the production in the near future of a Minnesota winter apple, that will keep until the early apples are ripe and ready to be picked. Minnesota has at present summer, fall and late fall apples; apples which can hardly compare in size with the fruit from the far West, but are fully as good in color and far superior in flavor to any of the Western apples. The Society has offered a prize of \$1000.00 for an apple of such keeping qualities.

N. E. Chapman read a very able paper, glorifying the Minnesota strawberry. Messrs. D. W. Valleau and F. J. Crider gave demonstrations in grafting and cross-pollination. At the plant breeders meeting, many eminent men participated. C. M. Loring, father of the Minneapolis Parks, offered two prizes of \$100.00 and \$50.00 for the best Minnesota plums.

In the basement was a fruit exhibit consisting of over 1000 boxes and fruits raised in the Northwest.

D. W. Longfellow, a Minneapolis commission merchant advocated the removal of the tariff on apples between the U. S. and Canada.

The Minnesota State Florists' Association, an auxiliary to the Horticultural Society, held a meeting on Wednesday with Pres. Wirth in the chair. Poinsettias, cyclamens, azaleas, chrysanthemums, primulas, carnations, and all the standard varieties of roses were on exhibition and added considerably to make the hall attractive. Papers were read by C. J. Smith, Lakewood Cemetery; E. Meyer, nurseryman with the Minneapolis park board, and others. In the afternoon the Woman's auxiliary held their meeting.

At the election of officers Prof. Sam B. Green of the State College of Agriculture was elected president for the third term. Other officers were chosen as follows: treasurer, George W. Strand, Taylor Falls; secretary, A. W. Latham, Minneapolis; executive board, Wyman Elliott, Minneapolis. Thomas E. Cashman, Owatonna.

Seven members were given honorary life membership for long and meritorious service.

Resolutions were unanimously adopted indorsing J. M. Underwood, Lake City, as candidate for the presidency of the State Agricultural Society.

C. N. RUEDLINGER.

The success of this Society is without precedent in all the annals of horticulture. It now has a membership of 3023, probably the largest in the world. It was about 10 below zero

and yet at the opening the great church was well packed. The program included papers short and sharp, and to the point, followed by rattling comments and questions. This Society gathers under its wings all the affiliated societies of the state. When the time comes the chairman of each society conducts his own organization. Thus the rose society, plant breeders' association, forestry, women's auxiliary, and the florists' association all have their places and the report of each meeting is published in the annual report of the parent society. In this way every body is interested.

There are many progressive men in this society who are engaged in producing new and hardy apples.

The apple display was amazing. A thousand plates and boxes galore. Hundreds of choice seedlings were on exhibition.

Experiments in top grafting on the hardy Hibernian and on the crabs showed remarkable results. For instance the tender Jonathan and the luscious Grimes' Golden have been moved 200 miles north by being grafted on iron-clad stocks.

One man brought 10 Missing Link apples from Illinois and lost every one. But he had taken the precaution to graft some scions on the Hibernian, and every graft lived and bore enormous crops. Some of the very finest specimens were from top worked fruit.

From start to finish the four days were filled with good things, without a hitch or jar.

C. S. HARRISON,
Nebraska Delegate.

NASSAU COUNTY HORTICULTURAL SOCIETY.

This Society held its regular monthly meeting at Glencove, N. Y., December 8th. President Everett occupied the chair. Members turned out in force to elect their officers for the ensuing year. Treasurer Brown in submitting his annual report gave a satisfactory account of the financial standing of the Society. Secretary Gant read a letter from J. F. Huss, of Hartford, Conn., one of the judges at the fall show, complimenting the Society on the magnificent exhibition held last October. The points competition ended with P. Reul well in the lead. Mr. Reul exhibited a vase of gardenias this month which was awarded 91 2-3 points; V. Cleres and G. Wilson, Begonia Gloire de Lorraine, 89 and 85 1-3, respectively. P. Reul was awarded the gold medal with an aggregate of 1054 1-3 points; V. Cleres, silver medal, with 1035 1-3 points; G. Wilson, bronze medal, with 1031 1-3 points. V. Cleres was awarded cultural certificate for vase of carnations. A. Reidenbach, P. Reul, and H. Macdonald each staged nice exhibits which were awarded honorable mention.

The officers elected for the coming year are: J. Duthie, president; E. Reidenbach, vice-president; E. J. Brown, treasurer; J. Ingram, recording secretary; O. Ador, corresponding secretary; executive committee, G. Wilson, J. Everett, E. Barton, H. Gant, W. Eccles, J. Robinson. J. F. Johnson was appointed trustee for three years. A. Mackenzie, J. Duthie and J. Holloway acted as judges for the monthly exhibit.

W. H. MACKENZIE,

MASSACHUSETTS HORTICULTURAL SOCIETY.

The inaugural meeting of the Massachusetts Horticultural Society for the year 1910 will be held at 12 o'clock, noon, on Saturday, January 1, at Horticultural Hall, Boston.

The business of the meeting will be the hearing of an inaugural address by the President, the report of the Board of Trustees, the reports of officers, and the reports of the chairmen of the various committees.

There will be a free exhibition of 700 photographs illustrating the flora, fauna, and scenery of central and western China, at Horticultural Hall, Boston, beginning Dec. 27, and lasting two weeks.

These photographs are the property of the Arnold Arboretum and were made by Mr. E. H. Wilson, the head of the Arboretum botanical exploration expedition, during the years 1907-1908.

The collection is of great value and interest, for it contains the first pictures which have been made of the plants of western China, many of which are new to science. In addition to the botanical subjects there are photographs of birds, animals, and objects of architectural and archaeological interest.

The exhibition will be open daily from 10 to 4 o'clock.

WM. P. RICH, Secretary.

IOWA STATE HORTICULTURAL SOCIETY.

The annual meeting and exhibition of this society was held at Des Moines on December 8 and 9. On the afternoon of Dec. 8, the Iowa Florists' Association had the floor. Papers were read as follows: "Observations on Gladiolus," by G. D. Black of Independence; "Begonias," by C. W. Davidson of Des Moines; "Carnations," William Trillow of Des Moines; "Lilies," John T. Temple of Davenport; "Hardy Perennials," J. T. D. Fulmer of Des Moines; "Plants of Recent Introduction Worthy of Further Trial," J. S. Wilson of Des Moines.

An evening session was held at which Dr. A. B. Dennis of Cedar Rapids spoke on "The Story of the Chestnut," Eugene Secor of Forest City on "A Glimpse of Elysium," William Langham of Cedar Rapids on "Agriculture in Our Public Schools," and W. A. Burnap of Clear Lake on "Southern Florida."

PENNSYLVANIA HORTICULTURAL SOCIETY.

The Pennsylvania Horticultural Society held its annual meeting Tuesday night. All the officers were re-elected: President, C. B. Newhold; vice-presidents, H. F. Michell, J. G. Cassatt, Dr. J. Cheston Morris, Randall Morgan; treasurer, S. W. Keith; secretary, David Rust. The judges of vegetables at the November show made a report stating that they found Spanish onions, Long Island cauliflower and stock grown under glass, among the exhibit. This report resulted in lively discussion as to proper rules to govern such matters; and next year any such exhibits will be promptly disqualified. Vaughan's seed store made a special offer of prizes for the new

GREETINGS:

*"Time steals our YEARS;
But seals our FRIENDSHIPS true."*

Christmas Greetings and Sincere Good Wishes for the Coming Year

M. Rice & Co.

PHILADELPHIA, DEC. 25th, 1909.

M. RICE & CO. LEADING FLORISTS' SUPPLY HOUSE
Of America **Phila.**
1220 RACE STREET

A. H. Deal sweet pea for the show next June. Prizes were also offered by the Moore Seed Co. of Philadelphia, for *Primula Chinensis* for the January meeting. All arrangements are completed for the joint exhibition of the Pennsylvania Horticultural Society, and the National Gardeners' Association, March 15, 16 and 17 next. A very good show is promised. Many exhibitors will be on hand from New York state and New England.

ROCHESTER COMMERCIAL FLORISTS' ASSOCIATION.

About sixty of the members of the Rochester Commercial Florists' Association met Dec. 13, in the store of James Vicks' Sons. Dr. Algernon S. Crapsey addressed the members on "Vacant Lot Gardening," and the association adopted a resolution commending the work of the Vacant Lot Commission and pledging it support. President F. W. Vick presided.

The committee appointed some time ago to select suitable association rooms announced that such rooms had been rented in the Cutler building and that they would be ready for occupancy by the beginning of the new year. The committee was composed of E. S. Osborne and J. W. Keller.

A committee to superintend the furnishing of the rooms, consisting of George B. Hart, Charles H. Vick, R. G. Salter and E. S. Osborne, was appointed. A committee to revise the constitution and by-laws of the association was appointed. It is expected that the changes will make provision for the reception of members who are not commercially allied to the association. The committee includes H. B.

Stringer, W. L. Keller and E. P. Wilson.

J. O. Pridmore, W. H. Dildine and C. H. Ogsten, who constitute the nominating committee, will report at the meeting of the association set for January 10th, at which time the annual election of officers will be held.

AMERICAN ROSE SOCIETY.

The fame of the American Rose Society is spreading to the ends of the earth. The people in New Zealand have heard of the last Bulletin and write from Wellington in behalf of their parks, for a copy.

The Bulletin, giving the doings at the Buffalo Exhibition and transactions during the year, will be ready for mailing about Christmas. We had an inquiry from one of the private gardeners at Madison, N. J., who promises to make an entry for the prize for Pot Grown Roses.

At the Chicago Exhibition Vaughan's Seed Store made a show in that class which took the Ladies' prize for its general attractiveness. In the great city there are thousands of places where pot plants may be tended with much attention and made a thing of real beauty. In the metropolis of America, there is no place for large or even small gardens, but there are tens of thousands of places where a pot rose or two may be placed and we want this fact known on behalf of the Horticultural Society of New York, whose aim is to reach the people in an educational way and thus afford encouragement to the men who make their living by raising and selling flowers. We expect to send out an additional list of prizes next week.

BENJAMIN HAMMOND, Sec'y.

MARYLAND STATE HORTICULTURAL SOCIETY.

This society at its meeting in Baltimore last week, elected the following named officers: President, R. Vincent, Jr.; vice-president, J. S. Harris; secretary-treasurer, C. P. Close; local vice-presidents, C. L. Seybold, George Morrison; executive board, the officers and E. P. Cohill, W. I. Walker and J. W. Kerr.

There was a very fine exhibition in connection with the meeting—said to have been the best on record. Among the principal exhibitors were: R. Vincent, Jr., & Sons Co., John Cook, H. A. Dreer, H. F. Michell Co., H. Weber & Sons Co. and J. G. Harrison & Sons.

George E. Ta'madge, Inc.
MADISON, N. J.

SOCIETY OF AMERICAN FLORISTS AND ORNAMENTAL HORTI- CULTURISTS.

A Few Words to the Members.

As the year is fast drawing to a close, I hope you will not feel it an infliction if I address a few words to you before stepping down and out.

The most noteworthy work accomplished by our Society during the year is the securing of a revision of the tariff in relation to bulbs. The duty is now based upon the number and not the value of the bulbs. This is simple, tends to the importation of a better average grade and does away with the accusations of sharp practices by removing the inducement and the opportunity. Under the old arrangement the honest importer was handicapped but now he starts from scratch.

This alone is much but it is significant of more. It means that this Society has been able to secure attention in the halls of Congress and still more to have it apparent that the weight of its influence is cast on the side of honest and upright methods. Now that the Society has accomplished so much in this direction let us make it a continuing habit to do things that need doing.

What about those florists who are not members? When they realize that efforts are constantly being made to secure results that will benefit them, there are few of them that will not contribute their portion of the expense. Each present member should start the new year right by getting a new member.

Tell your friends that the next President was one of the men who spent their own money and went to Washington and produced results. It is safe to predict that still greater results will be the outgrowth of his administration.

The retailers are going to be with us at the next convention. They are already knocking at the door by scores, for we are showing them that there is something inside that is worth coming after. The committee in charge of that movement is actively at work.

My personal thanks are due to every vice-president who has done his duty and nearly all of them have. Some few of them seem to have overlooked the fact that when they accept an appointment they thereby incur an obligation to work for the society that honors them.

To the members of the different committees I acknowledge a debt of gratitude for the hard work they have done and the results secured.

To Mr. Rudd, the efficient secretary, is largely due the credit for the advance the Society has made during the past year. His years of experience with the Society have made his counsel invaluable and I have frequently profited by his advice.

The Society is larger and richer than ever before. Let us work together the coming year and see if we can not greet President Pierson with a membership of two thousand at Rochester instead of one thousand as at Cincinnati.

Reports indicate an unusually prosperous condition in all parts of the

country and the outlook for the immediate future is very encouraging, but history should teach us that booms are followed by depressions. Let us, therefore, use present profits in a conservative manner so that if hard times should come in two or three years, we will have money in the bank instead of ranges of new glass that are not yet paid for.

With a cordial Christmas Greeting for every one of you, I am,

Enthusiastically yours,

J. A. VALENTINE,

President S. A. F. and O. H.

President Valentine has appointed Mr. John K. M. L. Farquhar of Boston, as chairman of a Committee on Federation and Affiliation of Amateur Societies.

This appointment is made in pursuance of a recommendation by President Valentine at Cincinnati, and endorsed and ordered put into effect by vote of the Society.

W. N. RUDD, Secretary.

December 17, 1909.

NEW ORLEANS HORTICULTURAL SOCIETY.

The regular monthly meeting of this Society was held on the 16th inst. There was a good attendance of the growers, but the retail representation was meagre owing to a business rush. The committee appointed to select a site for a new clubhouse ran against a snag. It appears that the New Orleans Land Company have bought a large tract of land including that where it was proposed to build the new clubhouse, and have already commenced alterations and improvements to make a fine residential section of it. The Mayor, however, came to the rescue. The city is reclaiming another section of the lake front in the neighborhood and a site has been promised them as soon as improvements are completed. The committee was continued with power.

The tables were filled with a beautiful display of foliage and flowering plants. Abele Bros. exhibited Begonia Pres. Taft. Richard Eichling, grower for U. J. Virgin, had azaleas and crotons and a nice collection of smaller plants suitable for baskets, all well grown, also a fine specimen *Adiantum O'Brienii*. The Metairie Ridge Nursery Co. had beautiful specimens of Begonias Gloire de Lorraine, Lonsdale's Pink and Pres. Taft, ardisias well berried, heaths, *Epacris pallidosa*, poinsettias, *Adiantums* Farleyense and *Croweanum* and *Dracaena terminalis*. J. A. Newsham had a fine specimen of *Cattleya Trianae* alba, cut blooms of *C. Trianae* and *Odontoglossum grande*, the individual flowers of the latter measuring seven inches.

E. Baker, an old and highly valued member of the Society, was congratulated on his appointment as superintendent of the new Parking Commission which will have hereafter full control of all tree planting in the streets of the city. Mr. Baker, in thanking the Society, showed where the new commission would be a help to the nurserymen. The work of incorporating is progressing favorably.

THAT VISIT TO NASHUA.

A Word from One of the Seventy-Five.

Gardeners and florists, like most other people, all like to see a sunny, cloudless day, a day without squalls and sudden changes, sudden drops or rises in temperature or any untoward events, which would prevent us from enjoying it to its utmost. The same applies to our inner nature, when we set out to enjoy ourselves, either singly or in company of congenial souls. We like to look back to such a day with pleasure and we see ourselves and others in a better light, if no shadow of discomfort falls across our memory of such a day.

There are too many dull and disagreeable days in our lives, as it is, and a well and pleasantly spent day will greatly help us to forget the others and at the same time make us look forward to anticipate and wish for more of the same kind.

The excursion of the Gardeners' and Florists' Club of Boston to Nashua on December 11 certainly was one of the sunshiny sort all over. Glorious sun and fresh crisp air, all day; a jolly, big crowd of jolly men; lots of things, new and old, in fine condition, to be seen and to cap it all, a trio of hosts whose hospitality it would be a severe task to excel, tried to outdo each other in making it pleasant and worth while for their brother florists and gardeners, and certainly succeeded.

GUSTAVE THOMMEN

Billerica, Mass.

Notes.

The Utica Florists' Club held an exhibition and later a dinner on the evening of December 8. Guests were present from Little Falls, Ilion, Canastota and Rome.

The Springfield (O.) Florists' Club is considering the advisability of holding an annual flower show. At its regular meeting on Monday evening, Dec. 13, at the office of the Good & Reese Company, with President Roger Murphey in the chair, an informal discussion was had on the subject of the great annoyance and frequent excessive over-charges in connection with importations of stock from Holland.

The Engelmann Botanical Club of St. Louis held its monthly meeting at the Central High School in Botanical Laboratory Hall last week. The program included the nomination of 1910 officers and a talk by Mr. Henry Stark, with illustrated lantern pictures on "Nature Photography" from both the technical and the practical standpoint. W. W. Ohlweiler, secretary, invited all local florists to be present at this meeting.

A. C. Mattaz, of Hardin, won the first prize in the sweepstakes offered by the Illinois State Horticultural Society for the best collection of apples grown in Illinois, exhibited at Champaign, Dec. 17. The society, which held its annual convention at the University of Illinois, elected officers as follows: President, R. O. Graham, of Normal; vice-president, F. D. Vories, of Neoga; secretary, W. B. Lloyd, of Kinmundy; treasurer, J. W. Stanton, of Rich View.

NEW ORLEANS NOTES.

The Holiday Supply.

The mercury the past week got down to 32 degrees, but did not injure the tender plants even. About two cool nights followed by the same number of warm, rainy ones is the way the weather man has been serving it up of late. The outlook for Christmas is good. Certainly there never was such a fine and varied collection of flowering and foliage plants offered for sale in this city before, and if all goes as expected all hands will rejoice.

Miscellaneous.

Abele Bros. are propagating a white perpetual phlox and expect to have enough to offer it to the trade in the spring. J. A. Newsham has installed a new ice box in his show room. The Metairie Ridge Nursery Co. have made connections with the new city filtered water supply whereby they get good pressure and avoid staining the plants, as was the case when they had to depend on the dirty water from the bayou. H. Redfeld has just finished a new greenhouse. H. C. Doescher is in a peck of trouble, a serious leak having sprung in one of his boilers. His crop of cucumbers is coming along nicely. C. D. Otis of Lake Charles was a visitor this week. He is contemplating building a range of houses.

PERSONAL.

We are informed on good authority, contrary to the announcement which appeared on page 892 of last week's issue, that Arthur Griffin is not at the estate of Mr. Isaac Guggenheim, Port Washington, L. I.

Visitors in Boston: H. S. DeForest, of Pierson U-Bar Co., New York; Arthur A. Niessen, Phila., Pa.

Ada, Ohio.—The greenhouses of Henry Young have been sold to J. H. Milner & Son for removal.

this section. A seedling from A. J. Balfour but a few shades lighter. The incurving petals give the blooms the appearance of pond lilies and being a most pleasing shade of pink they are very useful for decorative work.

HORTICULTURE IN FRANCE.

The following information concerning the recent action of the French Government for the promotion and development of horticulture is furnished by Consul-General A. Gaulin, of Marseilles:

By virtue of a ministerial decree published in the Journal Officiel on October 14, 1909, a Technical Board of Horticulture has been created and attached to the French Ministry of Agriculture. The object of this new board is to promote the development of horticulture in France, and particularly to examine and report upon all important matters relating to the industry.

In the letter submitting the above decree for the signature of the President of the Republic, the Minister of Agriculture states that the French horticultural production, which was officially estimated at \$57,000,000 in 1892, exceeds at the present time \$77,000,000. The extension of the parcel-post privileges to the shipment of cut flowers is considered as one of the principal causes of this increase. But while existing economic conditions are held to be on the whole fairly satisfactory, it is claimed that a great deal still remains to be done, and an earnest attempt will be made to coordinate the individual efforts of the numerous horticultural societies and syndicates and of the transportation companies, technical experts, and inventors, from which it is expected that greater unity and cohesion among the interested parties will result.

The technical board comprises a certain number of ex-officio members and

thirty other members appointed by the Minister of Agriculture, who is also its president. The ex-officio members are the director-general of customs, the director of agriculture, the director of the board of foreign trade, the assistant director of agriculture, the inspector of the Ministry of Agriculture, the president of the National Horticultural Society of France, the president of the Horticultural Society of Versailles, the chief of the Board of Agricultural Information, and the chief of the technical department. The minister designates a vice-president among the members of the board, and the secretary and assistant secretary from his official staff.

BUCKBEE CUP.

Awarded to Elmer D. Smith & Co. for 12 best American Seedling Chrysanthemums at New York.

FIRE RECORD.

Kennett Square, Pa.—A large greenhouse and mushroom plant of Walter A. Scarlett burned Dec. 13. Upset lamp, cause. Loss, \$7,000; partly insured.

Irvington, N. J.—A fire was discovered in the hothouse of Theodore Kemper, at Lyon and Union avenues, on the morning of Dec. 12. Origin unknown. Loss about \$200.

Kalamazoo, Mich.—A fire broke out here early in the morning of Dec. 9, which threatened to destroy the entire business section. The Central Nursery salesroom was destroyed, together with its contents, about \$1,300 worth. No insurance.

Hamilton, Ohio.—The greenhouses at the country home of Col. J. C. Hooven, south of Hamilton, were partly destroyed by fire on Dec. 10. Neighbors went to the rescue and saved much of the property. Col. Hooven's magnificent country home was burned to the ground last August.

Perrysburg, Ohio.—A greenhouse and barn belonging to S. J. Lang, two miles east of town, were destroyed by fire on the morning of Dec. 8. The residence was slightly damaged. The loss is about \$1,500, partially covered by insurance. It is believed the fire originated from the heating plant in the greenhouse.

New York City, N. Y.—A fire broke out Dec. 15, a. m., in the fruit and flower store of Estrapos Gostardio at 2704 Broadway, badly damaging the store and contents. The fire was caused by the explosion of a gasoline lamp. Gneis Banos, 18 years old, a clerk in the store, was badly burned about the face and body, but will probably recover.

SELECT FERNS for FINE STORE TRADE

We offer a grand lot of exceptionally well-grown plants of the different varieties of **NEPHROLEPIS** which will be found one of the best selling and most profitable plants that florists can handle. Our stock is in unusually fine shape, and we will guarantee it will please the most exacting, as it is exceptionally good value at the prices quoted.

IMPROVED ELEGANTISSIMA. The finest of all this type. It was introduced by us in 1905. This form of *Elegantissima* has been greatly improved, and shows no tendency to revert to the Boston, making it the most valuable fern of this type. Strong plants, 4-in. pots, \$3.00 per dozen; 6-in., \$6.00 to \$9.00 per dozen—according to size; 8-in., \$12.00 to \$18.00 per dozen—according to size.

SUPERBISSIMA. Introduced by us in 1908. A very unique and distinct novelty. Its distinguishing characteristics are its dark green foliage and dense growth. Fronds are very heavily imbricated, making them very dense and compact. Strong plants, 4-in. pots, \$3.00 per dozen; 6-in., \$6.00 to \$9.00 per dozen—according to size; 8-in., \$12.00 to \$18.00 per dozen—according to size.

BOSTONIENSIS, PIERSONI, WHITMANI, SCOTTII. Extra fine plants, 6-in. pots, \$6.00 per dozen; 8-in. pans, \$12.00 per dozen.

F. R. PIERSON CO., Tarrytown-on-Hudson, New York

ROEHRS, RUTHERFORD N. J. LORRAINE BEGONIAS

Railroad Gardening

The illustrations of railroad gardening from the Reading system, given in this issue, are good examples of the effective use of flowering and foliage plants in embellishing stations. The Philadelphia and Reading Railway has long been a conspicuous and creditable force in this direction, and under the able management of Paul Huebner has become the Mecca of the railroad gardeners of the country. The community which the Reading system so efficiently serves are given constant pleasure by this policy, and are inspired thereby to efforts of their own along horticultural lines. Of course, the management of the company look at the matter from a purely utilitarian standpoint—a dollars and cents' proposition entirely—nevertheless, they are to be commended for their breadth of view and far-seeing good policy. There can be no question but what travel and settlement along its lines is increased thereby, while at the same time the value of its real estate is greatly enhanced. Mr. Huebner uses plenty of flowering shrubs and hardy plants in his work; but as the illustration shows, he is wise enough not to despise the splendid and glowing effect that can be secured only through the use of the cannas, geraniums and other tender subjects which make these erstwhile dull and unsightly locations a glory all summer long. A spirited discussion took place at the third annual convention of the Railroad Gardeners' Association of America, held in Philadelphia last August, on the subject of "Shrubs vs. Flowering Plants," and the consensus of opinion there was undoubtedly in favor of a liberal use of both. After going over the Reading system in a body, the members of the Association were almost unanimous in the aforesaid view, more especially as they had an opportunity of comparing the other idea in the Pennsylvania Railroad system—which does not use flowering plants in its gardening.

G. C. WATSON.

Station Gardening Notes

Moose Jaw, Saskatchewan.—N. Stewart Dunlop, chief of the floral department of the C. P. R., has sent out some half a million bulbs to station agents all along the system.

These are arranged in packages, both for indoor and outdoor growth, the idea being to encourage the station agents and employes in beautifying the grounds around the stations, especially in the rugged country to the north of Lake Superior and also the stations on the western prairies.

Last summer the company had over fifteen hundred gardens between the two oceans, and this fall an additional five hundred packages have been sent out. A prize of \$10 is offered for the best garden of each superintendent's division, and an additional prize of \$50 for the best on the division of each general superintendent. Pipestone, Leduc and Grand Forks received the premier prizes this year.

Carl Hirsch, of Hillsdale, Mich., in addition to his regular product of florists' stock, roses, carnations, etc., furnishes all the plants, shrubbery, etc., for the station grounds of the Lake

BEDDING AT TRENTON JUNCTION, READING R. R.

Shore R. R. in his district. He has charge of all the gardening between Chicago and Toledo.

Paul Huebner.

We have much pleasure in giving herewith a very good portrait of that picturesque and lovable personality, Paul Huebner, landscape gardener for the Reading Railroad system. Some of Mr. Huebner's work is illustrated in this issue. He has held this position for nearly twenty years and by his

PAUL HUEBNER

splendid work, combined with executive ability and tact of a high order, has made the Reading famous. His early training in horticulture was obtained in Berlin, Paris, London, and New York. The Reading management are justly proud of him, and if they don't pay him ten thousand a year on account of advertising it is not because he does not deserve it. G. C. W.

A GLIMPSE OF CALIFORNIA.

The following is a synopsis of an interview with Edwin Lonsdale by our Philadelphia representative, George C. Watson, previous to Mr. Lonsdale's final departure for Lompoc.

The valley of Lompoc, Cal., is an ideal situation from the standpoint of the seed grower. Although most of the crops had been harvested there were evidences of the yield having been very heavy. Sweet peas were a great seed crop, I was assured by those who had grown them. In some fields where the crops had been gathered, some of those self-sown were in fine flower and there was a freshness to the colors and a general vigor to the plants that did one's heart good to see. It should be borne in mind in this connection that no rain had fallen on the ground where these self-sown plants were blooming, since last May. It is evidently a soil that retains moisture for a great length of time. This is largely owing to its depth, and which is unknown, so the neighbors say, a statement which is backed by the whole of the residents of the valley. What is meant by that is—when wells are being drilled a black material is brought up which has the appearance of loam. No manure or other concentrated fertilizers are needed on the ranch, its natural fertility is so great.

I noticed some verbenas growing and seeding in the garden surrounding the cozy cottage which is on the place, and a fair-sized bush, in tree shape, of the well-known "lemon verberna" (*Aloysia citriodora*). Among roses thriving with great luxuriance, were Marie Van Houtte, Papa Gontier, Safrano, Mme. Lombard and several others. Salpiglossis were blooming in great profusion, so also were ten-week stocks. The zonal pelargoniums, or geraniums as we call them generally, were evidently very much at home there. A clematis of the Jackmann type trained on our cottage porch, was in full bloom when we were there,

which seemed to me quite unusual at this season of the year. It seems to me it might have been a second crop of flowers.

In other parts of the Lompoc valley I saw asters, Semple's branching I presume, doing well; also sweet peas were in bloom in some of the gardens.

One of the most wonderful sights in this favored locality—right in the heart of Lompoc—was a very large plant of the Banksian rose, and this was growing on the sidewalk, between the flagging and the curb. The streets and sidewalks in Lompoc are laid out on a very generous scale—100 feet in width—and the sidewalks are proportionally wide. The latter are so wide that a generous strip of ground is left upon which to plant palms or anything the owner of the property on which same fronts may fancy. In some cases this space is planted with an ivy geranium which does well in southern California, namely, *Souv. de Charles Turner*. Nothing could thrive and make such a cheerful impression as does this very variety of *Pelargonium peltatum*. This valuable variety is a warm shade of rose pink and is a double flowering variety the flowers and trusses of which are produced in great profusion. It was introduced into California by Samuel Cole of Ventura, through the Philadelphia firm of Henry A. Dreer. Mr. Cole is a specialist and grows some of his products for that firm. Among same is the somewhat rare *gladiolus White Lady*, which I understood is somewhat difficult to manage.

Speaking about Ventura reminds me that we paid a visit to this noted place made famous by the late Mrs. Theodosia B. Shepherd. The place established by Mrs. Shepherd is now operated as the Theodosia B. Shepherd Co. with Mr. Francis as manager, who is doing some good work here. Mr. Thomas Gould is also located here, and double-flowering petunias are one of his principal specialties. I have never seen better than were to be found here. It was with Mr. Gould that re-selected Early Blanche Ferry sweet pea originated—which was sent out a few years ago by W. Atlee Burpee & Co. Mr. Gould still grows the stock for Burpee. By the way, some good judges of the early flowering varieties of sweet peas declare that re-selected Early Blanche Ferry and Christmas Pink are identical as to type, or so nearly so that they cannot be distinguished apart.

One of the most conspicuous plants in California is *Phoenix Canariensis*. This date palm has a majestic grace all its own and will grow under only half-favorable conditions, 10 to 12 feet high in from 8 to 10 years, and the larger arching fronds spring from the space with great vigor and grace. This palm is more suitable for the lawn than as a street palm. The street palm par-excellence is the *Brahea filamentosa*, sometimes called *Washingtonia filifera*. This sturdy palm is frequently seen as a street palm in many of the cities of southern California. It resembles at first glance the well-known *Latania Borbonica* excepting that from the divisions of the leaves filaments are gracefully suspended.

I could go on talking like this but I know your space is limited. I look forward to my work in that favored valley with enthusiasm and delight.

PARCEL POST ADVOCATED.

Resolutions Adopted by the Connecticut Horticultural Society.

Whereas, The parcel post, as already long established and in successful operation by the leading nations of Europe, is one of the greatest and most pressing needs in the economical, commercial, industrial and social affairs of the people of the United States; and

Whereas, Under our present postal system, it costs 64 cents to mail 4 pounds of merchandise from Hartford to West Hartford, and the package is limited to 4 pounds in weight; and

Whereas, Citizens of Germany can today, under the parcel post system, send 110 pounds of merchandise, to any part of the German empire, for 30 cents; and

Whereas, The railway, steamboat and general transportation facilities of this country are second to those of no nation in the world, and are constantly increasing in efficiency; and

Whereas, The adoption of the parcel post would involve no question of paternalistic or socialistic functions by our government, but simply a reduction of the present comparatively enormous postal rate for merchandise, and an increase of the present very low weight limit of 4 pounds; and

Whereas, Patriotic and civic pride imperatively require that the United States shall no longer suffer the humiliation of standing far behind the nations of Europe in postal reform and improvement; and

Whereas, All objections to the institution of the parcel post in this country are factious, fictitious, or emanate mainly from private monopolistic corporations; and

Whereas, Nothing insuperable stands in the way of the prompt introduction of the parcel post in this country, except an unenlightened and unaroused public sentiment on the subject;

Resolved, That the Connecticut Horticultural Society places on record its unqualified desire for the speedy adoption of the parcel post in the United States; affirming the Society's conviction that horticulturists, farmers, merchants, manufacturers, and people of all other occupations, shall assiduously agitate for the realization of this desire, by means of correspondence, by word of mouth, by press and platform utterances, by the use of suitable stamps on envelopes and letterheads, and by all other legitimate and proper means, until public interest is so awakened that the people of this nation come to realize that they are losing hundreds of millions of dollars a year for lack of the parcel post, and until this country, by following the successful leadership of Germany, Switzerland and other European nations, shall begin to take her rightful position, if not in the vanguard, at least in the ranks, of the civilized nations of the earth, in this very important matter of postal progress and reform.

Resolved, That these resolutions be made known to the agricultural and horticultural press of America, and that they be otherwise disseminated over the United States as far as the influence of this Society may be exerted.

GEORGE W. SMITH, Secretary.
Melrose, Conn., Dec. 14, 1909.

PROPOSED FLOWER SHOW AT LINCOLN, NEB.

Acting upon a suggestion from the Commercial Club, Lincoln florists have agreed to take part in a big flower show which will be given at the auditorium next year, in the latter part of October or the early part of November. It is expected that the display will be, for the most part, a chrysanthemum exhibition. The show will probably be repeated every year, as it is thought the public will show decided interest and furnish plenty of support for it.

Besides the professional florists, the state farm, the hospital for insane, other state institutions and some private owners of greenhouses, among whom is W. J. Bryan, may be induced to participate.

LOCATED AT LAST.

The Cannery and Their Allies.

Supplementing what was said in a previous issue about the conference between a committee of the Machinery & Supplies Association and the National Cannery Association, it may be said that after a more or less heated discussion of the matters at issue, it looks as if the cannery would be reasonable enough to meet their colleagues of the Machinery & Supplies Association half way, and if this proves to be true, there will be no serious difficulty in reaching an amicable adjustment of all difficulties between the two organizations. There is no reason why there should be any unpleasantness where each is willing to recognize the other as an independent organization, but as things have been conducted during the last few years, the Machinery & Supplies Association have been simply the tail of the dog and a very short one at that. It was remarked by one of the Machinery men that the governing party of the cannery regarded the Machinery & Supplies Association as an asset in negotiating for terms and other conditions desired by them at these annual conventions. To illustrate, it was said that the cannery had received an offer from the city of Toledo of \$3,500 if they would hold the next annual convention there, but whether this was demanded by the cannery cannot be definitely stated, although it is regarded as probable. Now with this \$3,500, together with an admission fee of \$2.00 to \$3.00 which the National Cannery Association proposes to charge the members of the Machinery & Supplies Association and their friends, the cannery would have a very tidy sum to bank after the convention, as it is estimated that at least another \$3,500 would be received in the form of admissions.

Taking everything into consideration, the cannery have shown marked business astuteness in the way they have worked not only the Machinery & Supplies Association, but all the members of their own organizations, both those who are members of the National Association and those who are not. There never has been any doubt that had the little body of men who are now in control of the Cannery organization, submitted this admission fee to a vote of their own organization, it would have been overwhelmingly defeated, therefore they have been very careful to refrain from doing this.

It is earnestly to be hoped that they will show due regard for the associate organizations, which have usually met with them in their annual conventions, to insure cordial co-operation between the different bodies, as either open or suppressed hostility is highly detrimental to the aims and purposes which all hold in common; that is, the development and success of the Cannery.

The fact that there will be no exhibits at the forthcoming convention at Atlantic City is generally regarded as operating against a large attendance, and in all probability the number present will not exceed half those that attended the two last conventions.

NEW SEED PHOENIX ROEBELENI

THE ONLY SEED TO BE OFFERED

SANDER

T. MELLSTROM 235 Broadway **New York**
Representative Room 1

Postage on Sealed Seed Packets.

It appears that the agitation as to classification of seed packets as first-class matter has had a favorable result. We learn through H. A. Bunyard of A. T. Boddington, that the acting Third Assistant Postmaster General has dug up a departmental regulation of direct application to the question at issue. This provides that merchandise sealed for the preservation of its contents is mailable at third class rates, etc., etc.

Postmasters who have made rulings of local application to the contrary have been notified to be good, and in one or two cases, at least, there is likely to be a change of administration in the local postoffices involved.

Danish Cabbage Seed Crop.

Hjalmar Hartmann & Co., Copenhagen, report that on the night of November 12 a snowstorm, of such extent that according to the meteorological observation was unsurpassed in 20 years, was followed by severe freezing and many cabbages and other vegetables intended for the market were entirely spoiled, winter coming so suddenly that no preparations had been made to cover the stock. This means a large loss to the inhabitants of Amager, who are growing all kind of vegetables for the Copenhagen market and for export to Russia, Finland and Germany. Considerable lots of cabbage intended for seeds for the American trade were affected by the frost.

Notes from Lompoc.

The acreage for sweet peas on the new Burpee farm at Lompoc, Cal., will be 37 acres this season. Mr. Lonsdale, in a letter, says that the paying crop in seed beans in that section is Kentucky Wonder, which is a big yielder and is easily threshed. The farmers do not like Lazy Wife or Sunshine Cluster, neither of which yield satisfactorily. Sunshine Cluster and Golden Wax are hard to thresh out clean. Kentucky Wonder is called Old Homestead in some catalogues. The Lima does not do well in Lompoc because the plant does not stop growing and producing in time to ripen up the crop.

Notes.

Shindler & Co., seeds and flowers, have been incorporated to do business in New Orleans, La. Capital \$5,000.

Alfred Thomas Bridgeman, traveling auditor of the D. L. & W. R. R., died at Morristown, N. J., December 12, as the result of a stroke of apoplexy. Mr. Bridgeman was the son of the well-

known seedsman, the late Alfred Bridgeman.

The Rhudy and Hall Seed Company of Kansas City, Kan., has bought for \$1,200 the stock of the William A. Duncan Seed Company of St. Joseph. Duncan filed a voluntary petition in bankruptcy, November 30. The sale was made through J. J. Garth, temporary receiver for the bankrupt firm.

The Ewing Seed Company, Nashville, Tenn., has been incorporated; capital stock, \$15,000; incorporators, W. B. Ewing, J. I. Newsom, Jr., B. R. Wilkerson and William B. Shelton; for the purpose of buying and selling seeds, fertilizers, florists' supplies, garden implements, poultry, supplies, etc.

CATALOGUES RECEIVED.

Chase Nursery Co., Huntsville, Ala.—Chase's Extra Special Bulletin, "Clean-up" Bargains.

Franz Birnstiel, Coburg—Illustrated catalogue and price list of Jardinieres, Fancy Flower Stands, Baskets, etc.

John C. Moninger Co., Chicago—"Boilers," an interesting descriptive list of the different types of heating apparatus offered by this house. Especially useful are the "Rules for Figuring Greenhouse Heating," given on page 19. Other tables and plans on the following pages will be found very instructive and helpful.

W. F. Cobb & Co., Franklin, Mass.—Catalog of Farm Seeds. Corn, oats and potatoes, northern grown, "None Except the Best," are the specialties in this well-printed catalog. "Catalog of Vegetable and Flower Seeds" is an attractive companion to the above, fully illustrated.

PATENTS GRANTED.

- 943,373. Hotbed. George H. Barbour, Pittsburg, Pa.
- 943,461. Hose Coupling. Charles E. Judkins, Coeur d'Alene, Idaho.

WOW!

Edward Moon, a prominent young farmer of Williamsfield, is something of a horticultural scientist. He has succeeded in producing an entirely new and strange weed of the hybrid class and he openly boasts of his skill and acumen along these lines, it being his opinion, openly expressed, that he has Burbank cheated to a fare you well.—Williamsfield, Ill., Times.

NEWS NOTES.

Richmond, Ky.—The establishment of the late A. Reichsparr has been bought by J. Christman, Jr.

Woodstock, Conn.—Charles Lindeman has closed up his nursery business and has gone to Hartford.

Mt. Tabor, Ore.—The greenhouses and business of F. J. Broetje have been purchased by Crout & Wilson.

Greensburg, Ind.—John L. Dille and William C. Konzleman will locate a flower growing business in this city.

Muscatine, Iowa.—Fred Kranz is nourishing a variegated sport of Enchantress carnation, which he has named "Mrs. Fred Kranz."

Appleton, Wis.—E. E. Niles of Oconomowoc, for a number of years landscape gardener for the St. Louis parks, has been engaged to draft plans for beautifying the campus and grounds of Lawrence college. The work will be started early in the spring.

South Orange, N. J.—The thief who has been stealing plants from greenhouses and residences in this neighborhood has been captured and is held for the grand jury. His name is given as Joseph Klincher. Joseph may find that New Jersey justice is another clincher.

Williamsburg, Ia.—The impression has been created that the Williamsburg Nursery Co. will soon move to Cedar Rapids. This is a mistake. The yard and office will be continued at Williamsburg for at least four years and the stock will be increased beyond the largest line ever carried.

Of Interest to Retail Florists

The Christmas
WASHINGTON rush is on; every-
where the Christ-
mas spirit is manifest. The florists'
stores are veritable flower gardens;
the present year rivaling all previous
years in display of specimen plants.
The distinguishing feature of practi-
cally every store is the unusually large
display of poinsettias and specimen
azaleas. There is still a marked scar-
city of red carnations and with the
thermometer taking a steady down-
ward tendency, prices have gone soar-
ing up. If indications stand for any-
thing this will be a banner year for
both the retailer and grower. There
are thousands of Christmas trees lin-
ing the sidewalks, but close up against
the buildings. One noticeable feature
of the retail stores this year is the
unusually large quantity of wreaths
being handled by them. Heretofore
this branch of the business has been

Flower Market Reports.

BOSTON This market, on December 23, is well supplied with practically everything in the way of seasonable cut flowers and the impression gained from an inspection of the wholesale marts is that there is little likelihood of any famine in any line. Business from out-of-town has been excellent, the demand for all Christmas greens having been exceptionally brisk and forecasting an equally lively flower call at the wind-up, but nothing sensationally insistent or indicating present or expected starvation has come to light and the conviction grows that, while it is probable we are to have the biggest holiday trade ever experienced, there will be a sufficiency of material to supply everybody. Quality appears to be very high as a rule. Single violets are superb and calls from New York and elsewhere would seem to indicate that in places where the doubles have had exclusive sway hitherto, the singles are likely to supplant them, as they have already done in this market, where doubles have had but little standing for several years. The plant trade has been very satisfactory, growers being well cleaned up on azaleas, Lorraines, poinsettias and other holiday specialties.

CHICAGO Chicago market just before Christmas, bore evidences of the fact that the long-looked-for cold weather is here. Whether the florists are experiencing as much benefit from this fact as they anticipated, is a matter of opinion. Still there is cold weather and cold weather. With the thermometer in the zero region for two weeks and flowers arriving frozen, the outlook for the holiday trade may naturally be a little depressing. At this writing there appears to be a general shortage, the carnation supply being the nearest to a sufficiency. Red carnations will be scarce and the price is away up. Roses of all kinds are in demand, red ones especially so. Beauties are at the top notch and many have come in frozen. Violets are of different prices, the California bringing \$1.25 on Tuesday, while the shorter house grown ones are 75c. The New York violets have shared the fate of other flowers and some of the shipments come in frozen and worthless. Sweet peas will be of good quality and quantity is limited. Altogether as Christmas draws near the outlook for stock is not of the best and those who have anything good to sell will doubtless get a good price for it.

Some fortunate growers were able to disbud and otherwise cultivate their Richmonds so as to get them at their best for Christmas; 36-inch stems are reached by some of the fortunate ones and orders were taken early in the week for later delivery at \$50.00 per 100. Tuesday the same grade brought from \$25 to \$35.

DETROIT It has been a hustle and a bustle all during last week to get enough material to satisfy the many demands of pleasure-hunting society. Supply at present is "between the frying pan and the fire"—dark cloudy weather and the secret desire to do a little pickling. Christmas trading opens very brisk and we are in hopes of hav-

NEW YEAR

EACH year, more entertaining at New Year's means more, and better business, and this year will find us in splendid shape to care for our patrons. Quality the usual P/M Standard.

Prices on Roses, Carnations, etc., about 25 per cent less than Christmas. Greens and other staples about the same.

Will be strong on Valley, Gardenias, Beauties, Killarneys, Marylands and Carnations.

ing a better holiday at better prices than ever. This may sound somewhat sanguine, but is good logical calculation. Most of the stores have exten-

sive society affairs booked for this week as well as the week after Christmas.

Flower Market Reports.

(Continued from page 931)

Genuine winter INDIANAPOLIS weather is here and a healthful tone pervades the cut flower market. There is no longer an over-supply of anything. Prices have hardened and the quality of the goods is now perfect. Beauties have been in fair demand and a few specials reached record figures for the season to date. Of other roses some remarkable stock of My Maryland, Killarney and Richmond are arriving. Three and one-half foot stems on these and a good lively demand for some. Bride and Bridesmaid, however, are not relegated to the discard by any means and the best of them are bringing top-notch prices. The demand for orchids cleans up the market daily at good figures. There will be very few chrysanthemums left for the holidays. Carnations are all high grade now; even the smallest growers have high-class quality only. Of bulbous stock there is ample supply. Peas, lily of the valley, cypripediums, violets, callas and lilies are in good supply and move well. All things considered, the outlook is bright and cheerful and there seems to be no reason why wholesaler, retailer and grower should not have the best Christmas ever.

The usual lull which precedes the holiday uproar has prevailed throughout the wholesale flower districts during the first half of the week. The market is well supplied with most of the regular staples and it seems probable that, of roses and carnations especially, there will be a plentiful supply in readiness for the contemplated rush of Friday and Saturday. There is in evidence a good crop of American Beauty, Maryland, Killarney and a sufficiency of Bride and Bridesmaid roses and the quality is fine all through. While the carnation crop is not particularly heavy no shortage is feared. The call, up to the time of making this report, is quite limited.

NEW YORK QUOTATIONS PER 100. To Dealers Only

MISCELLANEOUS

Cattleyas.....	40.00	to	75.00
Lilies.....	6.00	to	8.00

20.00	to	25.00

Violets move rather reluctantly and gardenias and lily of the valley lack the snap of two weeks ago. Orchids are holding their own in good shape. Chrysanthemums are about closed out.

For the week PHILADELPHIA before Christmas conditions proved

better than expected, as there is usually a lull from about the 11th to the 18th. Business was really better for the week than it has been for some years back, which augurs well for Christmas trade. At this writing (December 20th), prices have jumped in many lines—two days earlier than the date set for the usual holiday figures. This is notably the case with carnations and violets. There have been a few dull days lately, which has doubtless had some effect in keeping stock back. American Beauty roses as a general thing are in splendid shape—better than for years. The track seems all clear for a magnificent business and we hope to give a good report next week. As supplementary to the quotations in regular prices current, the following seasonable items should be added: Roses—Liberty fancy and special, \$35 to \$50, lower grades, \$10 to \$15; Mrs. Jardine, \$12 to \$25; Perle and Sunrise, \$12. Poinsettias, \$25 to \$50. Callas, \$25. Daisies, white, \$3; yellow, \$4. Snapdragon, \$15. Bouvardia, \$5 to \$6. Cypripediums, \$15. Dendrobiums, \$50. Adiantum Farleyense, \$15 per 100.

CHICAGO NOTES.**Flower Shipments and the Cold Weather.**

The cold weather of the week before Christmas made the florists rather look for a change, but the last week is here and Monday morning early, the thermometer registered three below, and all day long the cold was intensified by a sharp, cutting wind. Any packages not properly wrapped and many that were, could not withstand the intense cold while waiting on a platform. The losses will no doubt foot up to a great amount when they are all known.

The E. F. Winterson Co. has lost many valuable flowers because they were shipped without sufficient wrapping. 200 American Beauties and 400 Roman hyacinths were a part of one lot that the grower will lose while gaining experience.

There are very few of the eastern shippers who send either plants or flowers to this market who will not have a loss to put on their books, where they had expected a good sum on the other side.

Harry Rowe had some beautiful heathers come in from New York frozen. He immediately placed them in cold storage and they completely recovered.

Chrysanthemums.

Mathew Evert and son, John Evert, chrysanthemum specialists, closed out the last of their blooms Tuesday. A. W. Meyer of South Holland, Ill., has been selling blooms of his new pom-poms in the Flower Growers' Market up to Christmas and there will be

some even later. They are single, with a fluffy twisted petal and come in white, yellow and pink. They are not yet named.

Moninger's New Building.

The new brick warehouse of the Moninger Co., is nearing completion. It is two stories high, 56x75 feet, and is equipped with all the latest improvements. It has iron windows and doors and is to be used exclusively for heating pipe and fittings. The Moninger people have an optimistic outlook for the new year because there are many planning new buildings, which is a good indication of an increase in business. Their new complete catalogues are just out.

Visit of Gifford Pinchot.

Gifford Pinchot, chief of forestry, was in Chicago last Monday, attending a conference of railroad magnates. His plea was for the railroads to take up the replanting of forests. It was suggested in return, by Pres. H. N. Mudge of the Rock Island road that it would be well for the government to take up this work as many think the railroads will be owned by the government within fifty years. Mr. Pinchot was assisted by assistant forester R. S. Kellogg with facts and figures regarding reforestation. Mr. Pinchot is opposed to the present laws regarding taxation of timber lands.

Miscellaneous.

Trees to the value of about \$200 have been cut down and stolen from the home of Dr. Geo. Fiske on Sheridan Road. It is the opinion of the police that they were taken to be sold as Christmas trees. Residents of Lake Forest have had to employ watchmen to guard their cedars.

The usual amount of artificial decorations are used in the big department stores, but it is usually where the natural could not be used and when it is well done no doubt has its lesson which may perhaps result in good to the florist later.

The Midwinter Flower Show of the West Chicago Park Commissioners will open Sunday, December 19, in the Garfield Park Conservatory, under the supervision of John Sell, head gardener for the West Park system.

Personal.

Anton Then has the sympathy of the trade in a succession of disasters which have fallen to his lot recently. His son is just recovering from an illness, a valuable horse died and another seems likely to follow, his heating plant went wrong and the houses barely escaped freezing and now his daughter is ill. Those who know Mr. and Mrs. Then and their family, know there is plenty of grit and expect the tide to turn again soon.

Mr. and Mrs. Geo. Walther are receiving the congratulations of their friends. Mr. Walther has been in the florists' business on 63rd street, Chicago, many years and Mrs. Walther was Miss Margaret Hill, formerly of Maywood, daughter of the well-known florist of that suburb. Mr. Walther is manager of the Flower Growers' Market, successor to Percy Jones.

Miss Frances Brundage of the E. H. Hunt Co., will spend Christmas at Galesburg, Ill.

H. H. Knope with J. Breitmeyers' Sons of Detroit, was a Chicago visitor.

Obituary.

Geo. H. Cornell.

George H. Cornell, who for about twenty years conducted a florist business with greenhouses on Hamlet avenue, Woonsocket, R. I., died at the home of his daughter in that city, Friday, December 17th. He was born in Connecticut about seventy-five years ago; located in Woonsocket about thirty years ago. He was well-known to the florists of Providence, and in fact, to the whole Blackstone valley a quarter of a century ago. Ill health had prevented active business for some years past.

We have received from one of Mr. Cornell's business competitors a most affectionate tribute to his memory, saying that in all the rivalry of business for a score of years he can recall nothing but uniform courtesy and kindness. Mr. Cornell was an oversensitive man and strangers sometimes thought him uncongenial, but closer acquaintance changed that opinion. The commercial instinct was not strong in him and his financial gains were not in proportion to the artistic ability of the man. His enjoyment of a new flower or plant was almost child-like. He was seldom seen away from the greenhouse without a flower in his button-hole or fingers. Few of the craft remember him now, so completely had he dropped out of sight. So soon we become even less than a memory.

Nardy Pere.

The death is announced at Hyeres of Monsieur F. Nardy on December 11th. This grand old man of Provençal horticulture had for fifty years been a contributor to the world's horticultural press and in 1875 was appointed delegate of the French Government to the Centennial Exposition at Philadelphia.

Upon his return to France he brought with him the first plants of the famous Amsden peach which, because of its extreme precocity, revolutionized the peach-growing industry of France.

His "Guide Pratique du Jardinier," the fruit of the labors and observations of a life-time, his writings in the periodical press and his "Cultures des Regions Mediterraneennes" are to be found on the bookshelves of all serious-minded cultivators from the Spanish to the Italian frontiers.

His son, Francois Nardy, is a member of the Toulon Chambre de Commerce and president of the Syndicat des Commerçants of Hyeres as well as director of the Jardin d'Acclimatation of Hyeres.

Mrs. Olive Burbank.

Mrs. Olive Burbank, mother of Luther Burbank died last week at her home in Santa Rosa, Cal. She was born 96 years ago in Massachusetts.

PORTLAND'S ROSES.

Portland, Ore., has grown famous for her roses, and, whereas in California, while there may be flowers blooming at all months of the year, the floral display is not actually foisted upon you; in Portland the roses, in the summer, are literally everywhere.

In the delightful suburbs of this far northwestern city, it is the custom to have a strip of lawn between curb and

sidewalk. In this, trees are planted of such sort as to throw shade on the walk. Then to make the stroll so much the more delightful, just next this paving, on the inner side, even the poorest suburbanite will run a row of rose-stocks. Neighbors arrange to vary these, so that as one man's plants cease blooming, the next begins to blossom, and thus at no time, when the snows are gone, is Portland devoid of its roses.

FELIX J. KOCH.

FUNERAL OF W. K. HARRIS.

The token sent by the Florists' Club of Philadelphia to the funeral of their esteemed fellow member and ex-president, William K. Harris, was the regular club token—a crescent wreath on easel; but in this wreath a great amount of sentiment was evident. The groundwork of the wreath was ivy leaves with some sprays of Ficus repens, the cluster being composed of foliage of crotons, pandanus, panicum and adiantum with white camellias and flowers of Daphne Indica—all the foliage and flowers being supplied by John Westcott—the easel being draped with evergreens from Waretown, a place Wm. K. Harris loved to visit as the guest of his old friend Westcott.

The funeral was very largely attended, all the principal florists and seedsmen being present. The pallbearers were John Westcott, Robt. Craig, Geo. Anderson, J. Wm. Colflesh, John Burton and Chas. H. Eimerman.

DAVID RUST.

PUBLICATIONS RECEIVED.

The S. A. F. Report.

We have received a copy of the annual report of Secretary W. N. Rudd and find it a very interesting volume, comprising 270 pages of information, valuable not only to the members of the Society but to all other progressive horticulturists who ought to be members. Secretary Rudd is a resourceful man and experienced official and has incorporated a number of new features which will be found very useful. Of these we mention the extended financial report and auditing in detail,

a complete list of the members enrolled at the first convention twenty-five years ago, a general report on the progress of ornamental horticulture at the experiment stations, a report for the year by the botanist of the Society, Prof. J. F. Cowell, the rules relating to the management of the trade exhibition at Cincinnati, full financial report of the National Flower Show at Chicago, and some interesting membership statistics. The printed list shows a total of 219 life members and 776 annual members—995 all told. A praiseworthy feature of the membership list is the record, after each name, of the year in which continuous affiliation began.

The book is well printed and contains a frontispiece portrait of President Valentine, also a number of illustrations in connection with Dr. Gallo-way's paper on the "Floricultural Work of the U. S. Department of Agriculture."

A Book Worth Having.

Rambles on the Riviera, by Francis Miltown, although not a new book this year, is worthy of a word of recommendation to horticultural readers, especially at this season of gift bestowing, for it is sure to make an acceptable holiday present. Horticultural topics are only incidentally touched upon but the book is descriptive of one of the most romantic and bewitching touring-grounds in the world and one that has much of horticultural interest attaching to it. The author has a most delightful, chatty way of tripping from one point of in-

terest to another and the reader is soon absorbed in the crisp, terse pen pictures with which the pages teem. The book is handsomely illustrated with seventy-five original drawings of which about one-half are full-page pictures. L. C. Page & Co., Boston, are the publishers.

SPRAYED

POTASH

produces an abundance of the best quality of

FRUITS

It strengthens the woody growth of the stock, and gives to the crop a size, color and flavor impossible to get without it. POTASH brings young stock into earlier bearing and adds to life of trees in bearing.

Potash Pays Make your commercial fertilizer read 2% Nitrogen, 8% Phosphoric Acid and 10% POTASH. If you apply barnyard manure, broadcast—150 lbs. Muriate or Sulfate of POTASH to the acre in addition.

Every 2 pounds of Sulfate or Muriate of POTASH added to 100 pounds of fertilizer increases the POTASH total by 1%.

Send for *Valuable Text Book*—about soil, crops, manure and fertilizer. Mailed on request, *Free*.

Landscape Gardening

PROF. CRAIG

A course for Home-makers and Gardeners taught by Prof. Craig and Prof. Batchelor, of Cornell University.

Gardeners who understand up-to-date methods and practice are in demand for the best positions.

A knowledge of Landscape Gardening is indispensable to those who would have the pleasantest homes.

We Build Where Others Cannot

We like to design greenhouses to meet unusual conditions. You may want a greenhouse, but think your available location is not adapted to one. Let us look it over, and see if we can't give you a greenhouse that you will be proud of — one that will be satisfactory in every way. If your ideas are not practical, we'll frankly say so. We have been too long in the business not to be frank with our customers.

Let us hear from you — it costs nothing to find out.

General Offices & Factory
Elizabeth, N.J.

A 50 Foot House At Edgeworth, Pa.

For a two compartment, right down practical, attractive house, you couldn't do better than duplicate this one.

It is Sectional Iron Frame Construction.

If you would like to know how it looks from other points of view and what the arrangement of the interior is, we will gladly send along photographs. It is next best to seeing the real thing.

The Rookery

U-Bar Houses Are Aluminum Finished

A heavy coat of glistening aluminum paint is given to all the interior iron parts. A paint that will not crack, peel off, mildew or lose its lustre, and that lasts for years. U-Bar houses are the simplest, strongest, lightest, most attractive, enduring and productive houses built, and cost less to maintain.

The ideal construction for private estates, parks, public institutions and florists' showrooms.
